Attachment A: Scope of Services

Project Name: Riley Road Speed Study

Background:

The City of Rollingwood has been requested to install speed cushions and flexible delineators near the intersection of Riley Road and Vance Lane and desires to conduct a speed study to determine if they are warranted.

KFA is tasked with performing a speed study based on data available from the City to determine the existing 85th Percentile speed along Vance Road as well as the existing roadway design speed based on k-values and stopping sight distances between Hatley Drive and Stratford Drive.

If speed cushions and/or vertical panels are warranted, KFA will prepare a plan sheet, detail sheet and cost estimate for installation of the items.

The deliverable will include a technical memorandum summarizing the existing 85th percentile speed (based on data provided by the City), and the design speed of Riley Lane based on vertical curvature and stopping sight distance. In addition, a plan set consisting of a cover sheet, plan sheet and detail sheet will be prepared for construction. Opinion of Probable Construction Cost (OPCC) will be provided to help inform and advise the City on how to proceed with the project.

Scope of Work:

This task order authorizes KFA to perform the following tasks:

1. Project Coordination
 - a. KFA will prepare monthly progress reports and invoices for the project (2 months assumed).
 - b. KFA will attend two (2) meetings with the City for project kick-off and after delivery of the technical memorandum to discuss the City's comments.
2. Speed Study Technical Memorandum
 - a. KFA will subcontract with Gram Traffic Counting (GRAM) to employ a radar based traffic counting system to obtain existing vehicle speed data. The traffic count will occur on a weekday 24-hour period and will provide 24 hour traffic volume and speeds.
 - b. KFA will review existing travel speed data along Riley Road provided by GRAM and include results in tabular form.
 - c. KFA will review and prepare an existing vertical profile along Riley Road and determine the existing design speed based on vertical curvature according to the AASHTO Geometric Design of Highways and Streets.
 - d. KFA will summarize results in a technical memorandum.
3. Plan Set
 - a. KFA will prepare a set of plans for installation of speed cushions and/or vertical panels. The plan set will include the following sheets:
 - i. Cover Sheet
 - ii. Plan Sheet (Riley Road and Vance Lane)

iii. Detail Sheets (including TxDOT and/or City of Austin Standards where applicable)

4. Engineers Opinion of Probable Construction Cost (OPCC) – KFA will prepare a cost estimate of recommended improvements.

Items not included in Scope:

1. Topographic Survey – vertical profile will be determined from publicly available GIS data

Services to be provided by the City: The City shall furnish the following services and/or data that is necessary for the development and completion of this project.

1. Review of submitted materials
