

UPPER PLAYGROUND RETAINING

- Create small, shallow basins to capture and filter water from downspouts
- Provide large boulder retaining with a few steps in between, possibly two sets of steps, overall distance about 85ft.
- Provide 10-15 1 gal. native plantings that do well in semi-shade: muhly, rosemary, soft yucca, artemisia, golden groundsel, bulbine, etc.
- Partially level the upper area for long picnic tables, combo of decomposed granite and grass, potential access for maintenance vehicles.
- Remove part of the existing wall where it is too close to live oak, and extend boulders
- Drip irrigation for new plants
- Maintain access for maintenance to back fields.
