

# VILLAGE OF ROSCOE

## AGENDA ITEM - STAFF REPORT

<b>Agenda Item:</b>	Discussion of an alternate electrical supply agreement for the Village of Roscoe Street Lighting Accounts		
<b>Date:</b>	4/7/2026	<b>Meeting:</b>	Committee of the Whole
<b>Prepared by:</b>	Anne Hanson	<b>Department:</b>	Village Hall

### Overview/Background Information

The Village of Roscoe is responsible for electricity services for three street light accounts through ComEd including the following sites/areas:

- 25 Bridge Lights near Village Hall with an approximate monthly supply cost of \$100.00
- Bike Path Lights near Chase Bank with an approximate monthly supply cost of \$30.00
- 363 Street Light Village-Wide with an approximate monthly supply cost of \$280.00

In 2023, Rock River Energy Services conducted a review of these accounts and determined that ComEd was providing the most cost-effective rates at that time. A recent review of these accounts, including an evaluation of current competitive supply rates, has identified potential cost savings opportunities through an alternate electricity supplier. Rock River Energy Services has provided options for consideration that may reduce the Village's electricity costs for these street lighting accounts by approximately \$1,000 annually. Final savings will depend on market conditions and contract pricing at the time of execution.

Based on the current bids, the most cost-effective option is a 48-month contract with Constellation. Rock River Services does not expect big fluctuation in these prices.

### Action Required/Recommendation

Staff recommend that the Village Board authorize staff to work with Rock River Energy Services to secure competitive pricing for these accounts to present to the Board for final approval on April 21, 2026.
