

VILLAGE OF ROSCOE

AGENDA ITEM - STAFF REPORT

Agenda Item: Storm Sewer Inlet Repairs

Date: 11-04-2025

Meeting: Village Board

Prepared by: Troy Taylor/Brandon Boggs

Department: Public Works

Overview/Background Information

This agenda request is to address structural deterioration and drainage issues at storm sewer inlets on Sheringham Drive and Joncey Drive. The repairs aim to restore inlet integrity and prevent roadway and curb damage. These inlets need to be fixed for safety issues with holes in the road from the inlet collapsing.

Public Works tries to repair most of the Village's inlets, but these two inlets require equipment that the Village does not have and require a more complicated process than what staff are used to repairing. Contracting these repairs will ensure they are installed correctly and will take less time to repair with a company that does these kinds of repairs daily.

Key Issues

- 3 years working on the Sheringham Dr inlet
- Inlets are collapsing
- Road failure on top of the collapsing inlet

Fiscal Note/Budget Impact

This project was budgeted for in 2025.

Prior Legislative Actions

This is the first hearing at the Village Board.

Action Required/Recommendation

Staff is asking the Village Board to suspend the rules and vote on this project at the Village Board of Trustees first hearing and also to suspend the rules for the Villages bidding process and approve the quoted amount of \$24,900.000 from O'Brien Civil Works for the storm sewer inlet repairs on Sheringham Dr and Joncey Dr.
