

It is our intention to utilize this storage container as a spot for our "Rock Cut Rental Hut"
This will be a working arm of our current store front, and will provide on-site area for us to
Send out, & receive our rental units. It will also provide visibility for this project. The hope is
to bring in and connect people to and in our community. To provide a reason to come and
spend time right here in our area. Making allegiance with other Stateline community
partners to provide points of interest along the way. Restaurants, Ice cream, Dog treats,
drink specials, Art galleries to ceramics, all offering discounts, and services to anyone
riding our e-bikes! Creating fun for the whole family!!!

It is our future goal, and original reason to start now to show proof of concept when the
plans for connection at Porter park, and the Perryville path finally happen, we want to be
right there connecting everyone to our great Town of Roscoe!

Thank you for your consideration. We believe Rock Cut E-bikes is a strong attraction for
families to poke around our town, and connect to our neighbors. We look forward to
working together.
