4. Vertical Pivot Gates

Vertical pivot lift gates utilize a pivot mechanism mounted on the overhead beam. These gates rotate vertically to open, offering a unique solution for spaces where traditional gate swings or slides are not feasible.

Average Cost: Vertical pivot gates can cost from \$8,000 to \$20,000, depending on their design complexity and automation system.

Pros:

What's A Security Gate?

A security gate is a critical component of a comprehensive security system, providing physical barriers that control access to residential, commercial, or industrial properties.

Depending on the application, the right security gate can range from simple manual barriers to

high-tech, automated systems. [Interested in learning more?](#)
