

DEPARTMENT Planning **PRESENTED BY** Kathryn Dunleavy - Planner DATE April 5, 2022

<u>ITEM</u>

Public Hearing and Second Reading for **Ordinance 2022-06**: An Ordinance of the City Council of the City of Salida Approving a Major Impact Review for a 0.60 Acre Parcel Located at 323 West First Street Currently Zoned Commercial (C-1) and Industrial (I) and Within the Hwy 291 Established Residential Overlay, to Place a Planned Development Overlay on the Property and Approve the Development Plan and 16-Lot Major Subdivision for Residences at Salida Bottling Company.

BACKGROUND

The applicant is requesting a Major Impact Review to approve a Planned Development overlay and a 16-lot subdivision on the 0.60 ac. parcel at 323 West First Street, located at the west corner of Hwy 291 and the Monarch Spur Trail (see vicinity map below). The property is currently split-zoned C-1 and I and within the Hwy 291 Established Residential Overlay. The property owner is Salida Bottling Company, LLC represented by Eric Warner.

City Council and Planning Commission held a Conceptual Review meeting for this plan on June 1, 2021. Planning Commission held a public

hearing on December 14, at which time Staff recommended continuation because the Civil Plans review was not yet complete. At the continuation on January 24, Planning Commission identified the need for further clarification on the utilities as well as the impact of the building height measurement deviation. At the continuation hearing on February 8, Planning Commission approved (5 - 0) both requests with conditions. City Council heard the first reading of the ordinance on March 15, 2022 and set the date for the public hearing for today, April 5, 2022.

There are a few brief additions that have been added to this report and to the Conditions of Approval since the First Reading, and those have been highlighted in blue.

- A. A Planned Development Request for a PD overlay which allows flexibility in the underlying zoning district standards to "permit the application of more innovative site planning and design concepts than may be possible under the application of standard zone districts." The applicants are requesting flexibility in design of the development in the following ways.
 - increased density
 - increased building height
 - modification to how building height is measured
 - increased number of building stories (over that allowed in the overlay zone)
 - decreased front setback
 - modified Schedule of Uses
 - decreased required parking for the proposed commercial use (deviation only necessary for an eating or drinking establishment tenant)
 - deviation from requirement to provide municipal water and sewer facilities within the PD
 - deviation from requirement to pave the alley

The applicant is also requesting to create for-sale townhome lots (i.e. units with shared common walls where the owner owns the building and land underneath) plus an HOA outlot for the common area and private drive, resulting in deviation requests that apply specifically to the individual townhome lots:

DEPARTMENT

Planning

CITY COUNCIL ACTION FORM

PRESENTED BY Kathryn Dunleavy - Planner DATE April 5, 2022

- lot frontage off of a private drive instead of public street
- decreased minimum lot size
- decreased minimum lot frontage
- decreased minimum landscape area/increased coverage on individual lots (but not the overall site)
- decreased setbacks

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

B. A Major Subdivision Request to split the 0.60 acre parcel into 16 townhome lots and 1 outlot, with the intention of 1 townhome lot to be split into 1 residential condominium and 1 ground floor commercial condominium. This will result in a total of 16 residential units, 1 commercial unit, and an HOA owned and managed outlot for the shared access drive. Utility, drainage, access and parking easements are provided where necessary.

DEPARTMENT Planning **PRESENTED BY** Kathryn Dunleavy - Planner DATE April 5, 2022

THE CITY OF SALIDA COMPREHENSIVE PLAN:

Generally, zoning should be consistent with the community's comprehensive plan. The following policies and actions are most applicable to the proposal:

LAND USE & GROWTH:

Policy LU&G-I. 1: New development in the city shall make the most appropriate use of the land using design standards that enhance and complement the historic built environment of the city.

The proposed architectural design is complementary to the historic architecture of the Salida Bottling Works, formerly located on this site.

Policy LU&G-I.2: Infill and redevelopment should be encouraged and will advance the objectives of this plan.

HOUSING:

Policy H-I.2: The character of existing neighborhoods should be protected.

This is a transitional area between historic downtown, industrial, Highway 291 Commercial, and residential uses. The character of the development is in line with the character of the existing neighborhood by providing historically relevant and complementary architecture, enhancing the streetscape and pedestrian experience of the area, and providing a commercial space along with residential density appropriate to its location adjacent to downtown.

Action H-1.2.a: Design and construction standards should be reviewed so that infill development in existing neighborhoods is compatible with the valued character features.

The applicant is not requesting any deviations from design and construction standards. The City of Salida does not have architectural design standards that apply to this location, however the proposed architecture is intended to complement

323 West 1st Street is a vacant lot surrounded by existing development and infrastructure.

Action LU&G-I.2a: Encourage projects to use maximum density allowances to make the best use of the available infrastructure.

The proposed project is requesting changes to the underlying dimensional standards in order to increase the residential density allowed on the site—16 units instead of the 9 townhomes or 10 multi-family units that would be allowed without a planned development.

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

the existing, historic downtown in its building form, materials, and details. The siting of the building frontages as well as the architecture are meant to relate to the Salida Bottling Works building that was formerly on this site.

Action H-II.3.d: When affordable housing units are provided, ensure the city has a mechanism or partner organization to keep track of and enforce the deed restrictions or land ownership arrangements to ensure the housing remains attainable in the long-term for low and moderate income residents.

The Chaffee Housing Authority was recently formed to work with developers and help pair them with eligible individuals and families and to administer deed-restrictions on units. The CHA is still in the process of creating administrative guidelines and preparing the organization to handle such arrangements. If the affordable units are constructed prior to the CHA being fully-operational, the City (or another organization) will be able to work with the developer on these requirements before such responsibilities are transferred to the CHA.

PLANNED DEVELOPMENT EVALUATION CRITERIA:

Section 16-7-40 (b) of the City of Salida Land Use and Development Code states "the PD Development Plan shall meet the following criteria...unless the applicant can demonstrate that one or more of them is not applicable or that another practical solution has been otherwise achieved." An analysis of the requested deviations is below. The deviations have been separated into 2 categories: those requested as part of the overall development of the lot (deviations that would be necessary even if the lot were not subdivided into individual townhome lots), and the deviations that are requested in order to accommodate subdividing the buildings into separate townhome lots.

 <u>Minimum dimensional standards</u>: Staff supports the increased density to accommodate the urban, clustered housing development style as well as the request to decrease the front setback of Unit 4, the corner unit which will have ground for commercial and second floor residential, to enhance the urban, pedestrian-oriented nature of that corner and more closely match the setback of the buildings across 1st Street. The Overlay recommends that front setbacks should be within 5 feet of historic setbacks along Hwy 291. The deviations for the Individual Townhome Lots are necessary to accommodate this development style.

Dimensional Standards	C-1	I	PD/Site as whole	Individual Townhome Lots	Notes
Min. lot size (sq. ft.)	5,625 5,063 3750	5,625	N/A	350	
Min lot size (sq. ft.)— attached units	2,800 2,520	2,800	N/A	350	
Min. lot frontage	37'-6" 25'	37'- 6"	N/A	16'	Townhome lot frontage is measured on 1 st Street or interior access easement
Min. lot frontage—attached units	20'	20'	N/A	16'	28' is narrowest residential building footprint facing 1 st Street.
Max. lot coverage: structures (additive coverage for structures + uncovered parking cannot exceed 90% except C-2)	60% 66%	60%	66%	N/A	This does include covered balconies. Additive coverage for structures and uncovered parking/access for the entire site will not exceed 90%

D Pla	EPARTMENT	PRESENTED BY Kathryn Dunleavy - Planner			April 5, 2022		
	Dimensional Standards	C-1	I	PD/Site as whole	Individual Townhome Lots	Notes	
	Max. lot coverage: uncovered prkg/access	60%	30%	60%	N/A	Additive coverage for structures and uncovered parking/access for the entire site will not exceed 90%	
	Min. landscape area	10%	10%	10%	0%		
	Min. setback from side lot line for a primary bldg.	5'	5'	5'	0'		
	Min. setback from rear lot line: principal bldg.	5' ²	5' ²	5'	0'		
	Min. setback from front lot line	10'	10'	5'	0'	Unit 4 building only at 5'. All other buildings along 1st Street have 10' porch front setback and 15' building front setback to 1st Street.	

- 2. <u>Trails</u>: A sidewalk will be provided along Hwy 291. No other trails or sidewalks are required. The site is adjacent to the Monarch Spur Trail.
- 3. Ownership and Maintenance: The development will have a homeowner's association to maintain the outlot, which includes the private drive, pedestrian walkways, a common area, and some parking spaces. Staff notes that HOA assessments have the potential of putting a disproportionate burden upon owners of deed-restricted affordable units within such HOAs, sometimes leading to their inability to afford mortgage payments. In order to ensure the long-term viability of deed-restricted units within the HOA, the applicant has included the following as Inclusionary Housing Note #4 on the Planned Development document: Occupants of any deed-restricted units shall not be responsible for any assessments nor dues beyond those fairly-priced specifically for utilities, trash services, and the like. Staff recommends an additional sentence be added that provides a measure of flexibility regarding dues and assessments while requiring approval by Chaffee County Housing Authority for any changes. This statement is already part of Inclusionary Housing Agreements for other projects, and staff believes it should be on the PD Plan as well to ensure congruence and clarity. Because this was not on the PD Plan previously, this statement was not reviewed by Planning Commission:
 - Should the Developer or HOA desire, they may renegotiate this condition with the Chaffee Housing Authority based upon the Authority's guidelines for such dues.
- 4. <u>Water and Sewer</u>: Section 16-7-40 (b) (4) of the Land Use Code states: "The developer shall provide municipal water and sewer facilities within the PD as required by the City." The applicant is requesting a deviation from this requirement in order to provide private water and sewer facilities beyond the connection within Hwy 291:

Standard:	Request per the PD:
Public right-of-way typically reserves 32 feet for public utilities.	To provide private water and sewer facilities within the PD in a minimum 20 foot utility easement.
Developer shall provide municipal water and sewer facilities within the PD.	To provide multiple individual private water lines in a common trench with a minimum offset of 5 feet from buildings and balconies.

The deviation request to provide private water and sewer services rather than the required municipal water and sewer facilities has implications that affect the health, safety, and welfare of the future residents of this development. In lieu

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

of a public street containing public utilities, the applicant is proposing a minimum 20 foot access and utility easement to accommodate private water and sewer service, as well as private gas and electric lines. See the Utility Plan on Page 10 of the Civil Drawings for details. Water service for those units not fronting First Street is proposed in a common trench containing individual water lines for each unit, up to 12 lines. Section 16-8-50, Undergrounding of Utilities, (c) requires that utility easements within a public right-of-way be at least 20 feet, and that widths of utility easements on private property shall be determined by the utility provider. The Building Department regulates the separation requirements for private water and sewer lines and has provided those requirements to the applicant. JVA Consulting has reviewed the applicant's plans and determined they are in compliance with the utility separation requirements. The Building Official also provided comments requiring that architectural elements not be allowed to encroach into a utility easement.

Modified since Planning Commission's Recommendation on February 8:

The Building Official clarified his previous comments in a meeting that was held on February 17th. He stated that it is "inadvisable" to allow an encroachment into an easement and that he would not allow it in the County, however, it is a land use issue, not a building code issue. The applicant has requested encroachments into drainage and utility easements. Staff has reviewed this request with the City Attorney, and has worked with the applicant to minimize where the encroachments are being requested. The City Attorney provided reference to language where similar encroachments have accommodated compact urban infill development. The following would be required:

- 1) Plat description of encroachments. Only the specific encroachments as described and illustrated on the Plat and PD Plan would be allowed. This includes:
 - a. the locations be limited to the areas identified on the PD Plan;
 - b. one (1) foot maximum encroachment would be allowed;
 - c. encroachment would be a minimum of twenty (20) feet above grade.
- 2) Sign-off of the owner of the utilities. Within the 20 foot utility easement, all of the utility lines will be owned by the HOA. However, it is still incumbent on the City through this review process to determine if this setup conforms to acceptable engineering and planning practices. JVA Engineering has stated that because the eaves are a minimum of 20 feet above grade, they have less objection with this encroachment. Additionally, similar encroachments have been allowed to accommodate 0-foot setbacks downtown.

Planning Commission recommended the following conditions of approval:

- > Building permits are required and the plan shall meet Building Department requirements.
- > An Operations and Maintenance manual shall be subject to review by the City and recorded with the Plat.
- > Plat Note 6 shall be modified to the following:
 - Architectural elements shall not encroach into utility easements and shall not extend off of the individual townhome lot. (This condition has been REMOVED, and the resulting Plat note (below) ALLOWS ENCROACHMENTS per the parameters outlined in the Plat Note as well as restrictions on the location of encroachments identified on the PD Plan by yellow highlights.)

Considering this new information, and the recommendation of the City Attorney with concurrence from engineering, the applicant has revised Plat Note # 6 to the following.

Plat Note 6 has been modified to the following:

- Eaves may encroach into the utility and drainage easements, no lower than 20 feet above finished grade and no further than 1 foot.
- Eaves, balconies or other architectural elements may encroach into the fire apparatus access and private vehicle access easements, no lower than 13.5' above finished grade.

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

• Eaves, balconies or other architectural elements may encroach into the pedestrian and parking easement, no lower than 8 feet above finished grade.

- Balconies shall not be within 5 feet horizontally of a parallel utility installation.
- 5. <u>Residential Density</u>: The allowable density for this lot, based on C-1 zoning and lot size, is 10 units and would require a public hearing for a limited impact review. The PD Development Plan requests density for 16 townhome units. Each unit has designated parking and ample access to light and air. Unit 4 is planned to be further subdivided into a residential condominium on the 2nd floor and a commercial condominium on the ground floor. A small common open space area is proposed in the center. The proposed density is appropriate for the lot size and location, and provides a better utilization of this infill lot surrounded by existing infrastructure close to downtown.

Dimensional Standards	C-1	Ι	PD/Site as whole	Individual Townhome Lots	Notes
Density (Min. lot sq. footage per principal dwelling unit)	2,800 2,450	2,800	1,632	N/A	

- 6. <u>Relationship to the Subdivision Regulations</u>: The provisions of these regulations concerning a Planned Development will not eliminate or replace the requirements applicable to the subdivision of land or air space, as defined in state statures and the ordinances and regulations of the City.
- 7. <u>Improvement Standards</u>: The deviations requested specifically from the Design Standards of Article VIII of the Land Use and Development Code are as follows:

<u>Sec 16-8-20 – Road, driveway and sidewalk standards. (a) Access to Roads. All lots and developments shall have</u> <u>direct access to a public street:</u> See item 4. Water and Sewer above regarding deviation from this requirement and its effect on the utilities. As for the effect on vehicular access, the townhome lots in this proposed development will have access to a public street via an HOA owned and maintained private access easement, which will provide a single access to Hwy 291, and two access points to a public alley.

<u>Sec 16-8-80 – Off-street parking standards</u>: The required amount of parking will be provided for all 16 residential units, plus 3 parking spaces will be dedicated to the Unit 4 commercial condo, planned to be 700-740 sf. For the commercial uses allowed, 3 parking spaces meets the requirement for office (1/400sf) and retail sales (1/250sf), and is one short of the requirement for an eating and drinking establishment (1/200sf). The applicant is requesting a deviation for a possible eating or drinking establishment tenant. Staff supports this request. There is street parking along Hwy 291 adjacent to the commercial space and this is a pedestrian-friendly location adjacent to the Spur Trail. Any additional residential business uses or commercial uses allowed on site must go through Administrative Review to determine if parking requirements can be met; this is a deviation that is stricter than the underlying zone district of C-1. The applicant's request per the PD Development Plan:

Standard:	C-1	I	PD/Site as whole	Individual Townhome Lots	Notes
Parking	19	19			1 per residential unit meets requirement for a site
raiking	or	or	19	1/3	meeting the inclusionary housing requirement. 3
spaces, min.	20	20			spaces for 700-740 s.f. commercial.

All other improvements shall meet design standards required in Article VIII.

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

- 8. <u>Maximum Height</u>: The applicant is requesting three deviations regarding height. The applicant has incorporated the Planning Commission's Conditions of Approval regarding these three deviations to the PD Plan.
 - 1) A deviation to the 2-story building maximum allowed in the Hwy 291 Existing Residential Overlay District in order to allow 3 stories on buildings 5-16.
 - 2) A deviation from the 35-foot maximum height in C-1 to allow 40 feet, with specific limitations described below.
 - 3) A deviation request to change how building height is measured to use the lower of either average post-construction grade or finished floor, rather than the Code requirement to use the lower of either pre-construction grade or post-construction grade.

ILLUSTRATION OF THE PLANNING COMMISSION CONDITIONS OF APPROVAL FOR BUILDING HEIGHT & STORIES DEVIATIONS: (Agreed to by the applicant and incorporated into the PD Plan.)

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

The Overlay District states: "New infill development shall be similar to the size and scale of buildings adjacent to the development. The design of buildings shall look appropriate to and compatible with their surroundings and shall not exceed 2 stories." The size of the building footprints is compatible with surrounding buildings. The design of the buildings, as previously noted, is intended to be complementary to Salida's nearby historic buildings, including buildings formerly on this site. The applicant has proposed a minimum 24 foot setback along Hwy 291 and the Monarch Spur Trail for any part of a building that exceeds 35 feet in height. This is shown by the red dashed line on the illustration above.

<u>Units 1-4</u> Units 1-4 are proposed at the allowed 2 stories for the majority of the structures. A deviation was requested for Units 1-4 to locate a rooftop access structure on each, limited to 100 sf per unit, with a maximum height of 40 feet to the highest point of the structure.

Staff recommended that the request be limited to the minimum necessary to allow rooftop access and only where it will not potentially obstruct prominent view corridors from downtown. Therefore the following limitations were recommended: rooftop access on Units 2 & 3 be allowed only as one combined structure at a total of 150 sf and that no rooftop access structure be allowed on Unit 4 due to the higher visibility of that location from downtown and the potential obstruction of prominent viewsheds.

DEPARTMENT Planning **PRESENTED BY** Kathryn Dunleavy - Planner

DATE April 5, 2022

Units 5- 7 (in blue on the site plan). The applicant is requesting a deviation to allow Units 5-7 to be 3 story buildings. The proposed maximum height of the 3 stories is 35 feet, which does not require a deviation. However, a deviation is requested to allow a rooftop access structure, limited to 100 sf per unit, to be a maximum of 40 feet at its highest point. Additionally, the applicant has requested an allowance for chimneys up to 40 feet.

(see building cross-section to right illustrating proposed rooftop access structure and chimney height)

The request for 3 stories along 1st Street will accommodate the proposed historically-referenced architectural design that is unique for new construction. It is a design that, when viewing from 1st & F Street, reads as an extension of the historic downtown. The primary structure will be a maximum of 35 feet in height, which is allowed in the Overlay District. Therefore staff supports the request for 3 stories. Staff recommends that the rooftop access request be limited to the minimum necessary and only where it will not potentially obstruct prominent view corridors from downtown. For this reason, staff recommended that no rooftop access structure be allowed on Unit 5 and that rooftop access on Units 6 & 7 be allowed only as one combined structure at a total of 150 sf. This was a condition of approval from Planning Commission and the applicant has agreed and incorporated it into the PD Plan.

DEPARTMENT Planning **PRESENTED BY** Kathryn Dunleavy - Planner DATE April 5, 2022

RIDGE WITH 40'-0" HEIGHT MAX

The Code states that increases in maximum height are allowed through a PD, but shall not result in:

- Adverse visual impacts on adjacent sites or other areas in the vicinity, including extreme contrast, interruption of vistas or scale that is disproportionate to surrounding development or natural features.
- Potential problems for adjacent sites caused by shadows, loss of air circulation or loss of view.
- Inability to provide adequate fire protection using equipment currently in use by the Fire Dept.

Units 8 -16 (shown in green on page 8, and in crosssection to the left). The applicant has requested a deviation to allow Units 8-16 to be 3 stories, and a deviation to allow 40 feet in height. As shown in the illustration below, the allowance for 40 feet would be to accommodate the peak of the gabled roof. These units do not front Hwy 291, are separated from the property to the south by an alley, and are adjacent to a gas station to the west. Staff supports the request for 3 stories off of Hwy 291. Staff recommended that the deviation for 40 feet in height only accommodate the peak of a gabled roof and not a flat roof.

The conceptual rendering below shows potential rooftop decks on buildings 8-16. Specific details were not provided for these decks. Staff recommends that no portion of the deck (inc. railings, shade structures, etc) shall exceed 35 feet in height to ensure that a person standing on the deck will not be visible above a 40-foot peaked roof. This was a condition of approval from Planning Commission and the applicant has incorporated it on the PD Plan Notes.

To determine the impact of the request on views of the Sawatch Range from the intersection of 1st and F Street, the applicant has provided a view corridor study. The corridor study illustrates that the development, and the requested height deviations, will be visible. However, being visible alone does not make the visual impacts "adverse". From this vantage point, it does not interrupt the mountain vista. It provides visual continuity of the downtown architecture and urban density as it transitions to a more residential use.

DEPARTMENT Planning PRESENTED BY Kathryn Dunleavy - Planner DATE April 5, 2022

VIEW CORRIDOR STUDY: View from 1st Street, just west of F Street

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

PHOTO STUDY: 35 feet and 40 feet at three different positions on the site and four different locations along on First Street.

DEPARTMENTPRESENTED BYDATEPlanningKathryn Dunleavy - PlannerApril 5, 2022

DATE April 5, 2022

The following dimensional standards table summarizes the applicant's deviation requests for # of building stories, and height.

Standards	C-1	I	PD/Site as whole	Notes
Max. building height for a primary bldg.	35'	35'	40'	Portions of buildings over 35' shall be setback 24' minimum from 1 st St & Spur Trail property lines. Height measured from finished floor or avg. post-construction grade around building perimeter, whichever is lower.
Maximum number of stories per Hwy 291 Established Residential	2	2	3	See PD Plan Notes 2, 3, & 4.

Article I of the Land Use Code defines the measurement of building height as follows: "the distance measured on a vertical plane from the <u>average pre-construction or post-construction grade</u> around the perimeter foundation of a building or structure, whichever is lower, to the highest point on the roof surface of the building or structure." The applicant is requesting the measurement of building height to use the lower base elevation of either the finished floor or the average post construction grade around building perimeter.

DEPARTMENT Planning

PRESENTED BY Kathryn Dunleavy - Planner DATE April 5, 2022

is currently artificially low and will be raised for stormwater drainage purposes. This was a condition of approval from Planning Commission. The applicant has since incorporated the following notes into the PD Plan:

- 1. On Units 1-7, no portion of the building nor architectural appurtenances can exceed 35 feet in height if within 24 feet of the property line along Hwy 291 or the Monarch Spur Trail.
- 2. Units 1-3 are allowed a rooftop access structure that cannot exceed 40 feet in height at its highest point. It may be up to 100 square feet on Unit 1. Units 2 & 3 are allowed a shared rooftop access structure up to 150 square feet (in total, not per unit). Shared structure can be greater than 150 square feet only if required by the Building Official, and shall be limited to the minimum required square footage. No rooftop access structure is allowed on Unit 4; this does not prohibit access to the roof.
- 3. Units 5-7 can be a maximum of 3 stories and 35 feet in height with the exception of chimneys and a rooftop access structure on Units 6 & 7. Units 6 & 7 are allowed a shared rooftop access structure that

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

cannot exceed 40 feet in height at its highest point, and can be up to 150 square feet (in total, not per unit). Shared structure can be greater than 150 square feet only if required by the Building Official, and shall be limited to the minimum required square footage No rooftop access structure is allowed on Unit 5; this does not prohibit access to the roof. Chimneys shall not exceed 40 feet.

- 4. Units 8-16 can be a maximum of 3 stories. They can be a maximum of 40 feet in height only to accommodate the peak of a gabled roof. If a flat roof with parapet is proposed, building height, including parapets, cannot exceed 35 feet. No part of a rooftop deck, including railings or covers, can exceed 35 feet.
- 5. The measurement of building height shall use the lower base elevation of either the finished floor or the average post construction grade.
- 9) Gross Floor Area: Currently one 700-725 sf commercial unit is proposed. Staff recommends that potential additional commercial uses not be restricted, leaving open the possibility of future commercial uses on the site. The parking requirements, which will be evaluated during the administrative review of any commercial use, will limit the potential type and square footage of commercial that can be accommodated.
- 10) <u>Permitted Uses</u>: The PD Development Plan Proposed Schedule of Uses is below. Two deviations are to allow the proposed 16 residential units and the inclusion of a commercial use with an Administrative Review. The applicant has added notes to remove incompatible C-1 uses per Planning Commission's condition of approval and to require Administrative Review of any uses requiring off-street parking.

Residential Uses	C-1	I	PD	Standards ¹
Accessory buildings and structures	Р	Р	Ρ	Sec. 16-4-190(c)

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

Office Uses	C-1	I	PD	Standards ¹
Eating and drinking establishments	Р	LR	AR	AR to allow for review of required parking.
Professional offices	Р	LR	AR	AR to allow for review of required parking.
Retail sales and rental establishments	Ρ	LR	AR	Sec. 16-4-190(m) AR to allow for review of required parking.

Schedule of Uses Notes – These were conditions of approval at the Planning Commission and have now been added to the PD Plan Schedule of Uses Notes:

Uses not specified in the Use Table shall default to the underlying C-1 Zone requirements, with the following exceptions:

1) All Permitted uses that require parking shall undergo Administrative Review (AR).

2) The following Permitted & AR uses in C-1 are not consistent with the intent of the Planned Development and would require a PD Amendment in order to be permitted: a) Commercial Lodging; b) Clubs Operated by and for Members; c) Mobile Home and Recreational Vehicle Sales and Services; d) Automobile Sales Service and Repairs.

<u>Transportation Design</u>: The development provides direct access to State Highway 291, which is designed to support the anticipated additional traffic generated by the proposed number of units. Secondary access will be provided via the rear public alley. Public Works requires an access permit from CDOT for access onto Hwy 291, which has been obtained. A Utility Permit will need to be obtained from CDOT as well. Required sight triangles per Public Works Design and Construction Standards have been illustrated on Sheet 5 of the Civil Plans and show no encroachment of structures. Per Planning Commission's recommended condition of approval, the applicant has added the following note to the PD Plan:

The City shall review and approve landscaping within the sight triangles prior to installation.

The applicant is requesting a deviation to Land Use Code Section 16-8-80 (e)(1) which requires that parking areas and access drives for 5 or more required parking spaces be paved. Staff does not support this deviation request and is recommending the alley be paved with drainage improvements.

The applicant has demonstrated compliance with Fire Code Section 503.2.1. regarding Fire Apparatus Access Roads.

The development provides safe and adequate pedestrian access within the site and to nearby amenities.

Staff recommends the following conditions of approval:

- > Applicant shall obtain necessary CDOT utility permits.
- Applicant is required to pave and provide drainage improvements to alley, after construction, from I Street to the southeastern-most access drive.
- 11) <u>Development Standards</u>: See Item 7 above.
- 12) <u>Energy Efficient Design</u>: The construction of new buildings will have to meet the energy reducing standards of the building codes. The compact design of the townhomes should also contribute to energy efficiency.
- 13) <u>Variety in Housing Types</u>: Fifteen townhomes and one residential condominium are proposed, all for-sale units. They range in size from approximately 800 -1400 square feet and from 1-3 bedrooms. Given the small size of the planned development and the architectural character proposed, staff feels this is sufficient variation that still allows for a cohesive character.

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

Some of the deviations to the dimensional standards requested by this PD are to allow:

- A 60% increase in the density allowed on this site,
- An increase in the number of stories allowed, effectively increasing the square footage of 67% of the units.
- A 14% increase in the maximum height allowed on more than half of the buildings.
- The creation of for-sale townhomes, which require code deviations that would not be necessary for condominium units.

These deviations directly result in added value to the applicant in the form of:

- more units to sell,
- larger units to sell,
- units with unique amenities, such as the rooftop access,
- and fee-simple lots to sell, rather than condominiums.

The Code requires 12.5% of units be deed-restricted at 80% AMI; this equates to 2 units for this development. Given the deviations requested, staff recommends that at least one additional deed-restricted unit is justified. One additional unit is one additional unit for perpetuity; it is important and significant over time to the workforce of Salida.

The applicant initially proposed providing 2, 80% AMI deed-restricted affordable housing units as part of the 16-unit development. This is equal to the percentage required by the Inclusionary Housing standards of Article 13 of the Land Use Code. Planning Commission recommended that the applicant provide 3 deed-restricted units and that they utilize the proposed revisions to the IH Ordinance regarding the % AMI distribution. Those revisions recommend adjusting AMI targets to provide housing to a wider variety of income levels that are not currently provided in market-rate housing, and differentiates AMI levels based on whether the unit is for sale or for rent. The revised ordinance also proposes raising the required percentage of IH units to 1 out of 6 units, or 16.67%, which brings the required IH units on this site to 2.67, or 3 built units. The draft revised ordinance is meant to provide affordable housing for those who:

- earn too much to qualify for traditional deed-restricted housing,
- earn enough to potentially own and maintain a home, and have some down-payment savings,
- and for whom there is nothing available at for-sale market rates.

The applicant has agreed to provide the deed-restricted units recommended by Planning Commission and the following note has been added to the PD Plan and the Subdivision Plat:

A minimum of 3 deed-restricted units shall be provided, if these units are for sale, they shall span the AMI requirements of 100%, 120%, 140% (excluding studios), and 160% (excluding studios and 1 bedrooms) with the average never going above 140% AMI. No AMI level shall be repeated.

If these units are for rent, a minimum of one-half (rounded up) of the units shall be at 80% AMI, and no unit shall exceed 100% AMI. If a for-rent unit converts to for-sale, its' AMI shall adjust accordingly.

- 14) <u>Fiscal Impacts</u>: The private drive, utility easements, and common areas are to be owned and maintained by the homeowners association. The City will provide the police and fire protection and serve the project with water and sewer through public mains. Water and sewer tap fees will help offset long term costs of expanding those systems. The Fair Contributions for Public School Sites fees will be required per residential unit to help offset impacts on the school district, and open space fees will be required for each unit.
- 15) <u>Higher Levels of Amenities</u>: The project provides a common open space area. This would not be a requirement of the underlying zone district. The project also provides a higher quality architectural design than required by Code as the underlying zone district has no architectural design standards, and a design that creates a cohesive neighborhood

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

that complements the historic architecture of Salida. The applicant has provided a note on the PD Plan, based on the Planning Commission condition of approval, which states

The final architectural plans shall substantially conform to the architectural character and design as submitted as part of the PD application. If any of the buildings 8-16 are modified to flat roofs, they shall be similar to the roofs of Units 1-7. Brick facades are encouraged to be provided on the units facing 1st Street to provide visual continuity with the several brick historical buildings along 1st Street in the historic district.

- 16) <u>Physical Conditions or Objective of Development</u>: The development provides a design that creates a cohesive neighborhood that complements the historic architecture of Salida.
- 17) <u>Effect on Adjacent or Nearby Development</u>: Immediately adjacent uses consist of a gas station, an industrial warehouse site, a duplex, a single family home, and a ditch and public trail corridor. These uses are all zoned either C-1 Commercial or Industrial. Nearby uses within the block and across the highway are residential uses: single-family, duplex and multi-family properties, as well as commercial uses and a skate park.

This project provides appropriate continuity of downtown architecture and urban density, transitioning to residential use. The residential on this site and the inclusion of a commercial unit would blend with the existing adjacent and nearby development. The development will utilize the alley as one of its vehicular access points, and the applicant will be responsible for improving the alley. Given the wide variety of existing uses in the area, the proximity to downtown, and the primarily residential nature of the proposal, there is no reason to believe that nearby or adjacent properties will be detrimentally affected.

EVALUATION STANDARDS FOR MINOR PLANNED DEVELOPMENTS

Section 16-7-40(d) states that "In addition to the above evaluation standards in Subsection (a) of this Section that apply to all PD applications, the following standards or requirements shall govern the application of a minor planned development and shall be utilized by the Planning Commission and the City Council in evaluating any minor PD plan:

- <u>Staging of Development: There shall be no staging of development in a minor PD.</u> There shall be no staging (also called 'Phasing' in the Code) of infrastructure or public improvements. Staff recommends the following condition of approval, and to address a concern raised below in Atmos Energy's comments, additional language is recommended to this condition as follows:
 - There shall be no staging (i.e. phasing) of the infrastructure and public improvements. [Add:] This includes that all private gas lines must be installed in a common trench at the same time, and no additional private gas lines can be installed after the initial installation.

An Operations and Maintenance guide will be reviewed and recorded that shall ensure compliance with all relevant State Statutes, including but not limited to, Statutes regarding the obligations and procedures for owners of underground facilities to locate and excavate those facilities.

If the applicant does not agree to these conditions, then there shall be no private gas lines on site.

2. <u>Types of Uses: A minimum of 25% of the floor area of the project is recommended for non-residential, commercial uses.</u> Less than 5% of the floor area is planned for non-residential uses. Having additional ground floor commercial along Hwy 291 would be fiscally beneficial and provide a greater mix of uses and activity to the site. However, given the parking requirements that come with commercial uses, removing buildings to accommodate cars would be detrimental to the character of this proposed development and detract from the urban, pedestrian, and historically-referential design. Staff finds the current proposal is an acceptable balance of commercial and residential.

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

- 3. <u>Public Places. Public gathering places should be provided to reinforce community identity and support civic engagement.</u> There are no public gathering places proposed in the development, and given the size it would not be practical. The site is across the street from a public skate park and adjacent to a community trail. There is a small common open space proposed within the development, which would promote social interaction and engagement in a private gathering space for residents of the development, and a patio/courtyard area as part of the commercial space.
- 4. Economic Opportunity: The PD provides a unique economic opportunity or provides a service, industry, or housing type that will benefit the City and would not be possible under the existing zone districts or dimensional standards of the City. Townhomes are challenging to construct within most of Salida's zone districts because of the standards for minimum lot size, street frontage, and other requirements. This PD will allow the applicant to create numerous residential units on a site that, given the depth of the site and likely access restrictions along Hwy 291, would likely not develop as residential without the ability to increase the density and an allowance for frontage on a private road. Housing in this location will offer easy access to downtown businesses as well as potential housing for downtown workforce.
- 5. Open Space: A Minor PD is not required to provide a dedication of open space on the site, however, it is required that any PD contribute to meeting the goals for open space through a negotiated fee-in-lieu of open space or other contribution. No open space is dedicated through this development. The applicant acknowledges that required open space fees-in-lieu will be paid at time of building permit for each unit and has already noted this on the PD Development Plan.

B. MAJOR SUBDIVISION PLAT REVIEW

The applicant is requesting approval of a 16-lot residential subdivision, along with an outlot to be commonly-owned by the homeowners' association. The applicant plans to construct multiple residential buildings containing a total of 16 units, with the shared common wall on the platted property lines. After foundations are poured, the applicant will do slight lot line adjustments where necessary to align the lot lines with the shared common walls. The proposed subdivision must comply with the following standards:

- 1. <u>Comprehensive Plan.</u> The proposed subdivision is consistent with the Comprehensive Plan as detailed on pages 3 and 4 of this report. Staff finds that the development's use and design is compatible with surrounding land uses and will not create unreasonable adverse effects on neighboring properties.
- <u>Zone District Standards.</u> The proposed subdivision and ultimate development of the lots will comply with the planned development standards outlined in this report, and where no deviation is requested, it will comply with the Land Use Code and the underlying C-1 zoning.
- 3. <u>Improvements</u>. The applicant will be required to comply with Code Section 16-2-60, Subdivision improvements agreements and development improvements agreements.

Public Works has noted the following which staff recommends as conditions of approval:

- > Applicant shall upsize the 4-inch water main in 1st St. anticipated to meet fireflow requirements.
- > Applicant shall pave south half of 1st Street where new water services are proposed.

The following condition has been added since the Planning Commission. JVA Consulting Engineers have outstanding comments from the civil plans review. The Public Works Director has stated that the plans can proceed to City Council review of the Plat and Planned Development and that the outstanding items can continue to be addressed, with the requirement that the SIA will not be approved until these items are deemed complete by JVA and Public Works.

> Outstanding engineering comments must be addressed prior to approval of the SIA.

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

A landscape plan has been provided with sufficient details and notes to ensure compliance with Section 16-8-90. No new public streets are proposed. Atmos Energy, Xcel Energy, and Salida Utilities have provided comments; please refer to the Referral Agency Comments section for those specific comments.

- 4. <u>Natural Features</u>. The site is relatively flat and void of any trees. Staff is unaware of any extraordinary natural features on the site.
- 5. Floodplains. This property does not reside in the floodplain. This standard does not apply.
- 6. <u>Noise Reduction</u>. This property borders State Highway 291. In this location, it is known as First Street and is a single lane in each direction with on-street parking on each side. As such, the speed and noise level are not equivalent to typical highway noise and additional setbacks or landscaping are not being requested by staff, nor would they be practical in this location next to the downtown business district.
- 7. Future Streets. As addressed above in Paragraph 3. Improvements; there are no new streets.
- 8. <u>Parks, Trails and Open Space.</u> No public open space dedication is proposed nor desired within this development due to its small size. A fee-in-lieu for open space for each unit constructed on the property must be paid at time of building permit. This is already noted on the Plat.
- 9. <u>Common Recreation Facilities</u>. The private open space identified on the site plan will be easily and safely accessed by residents of the development. It is located internal to the development and will not impact any adjoining properties.
- 10. Lots and Blocks. This is a clustered townhome development with an internal private access drive for vehicular access. This is the type of development encouraged by the Land Use Code in a Planned Development, but as such, typical lot and block requirements are not applicable nor practical to this type of development.
- 11. <u>Architecture</u>. The architectural concept proposed for this site is intended to complement the historic architecture of downtown and the previous historic structure on this site. It meets or exceeds the architectural requirements of the Code.
- 12. <u>Codes.</u> The subdivision will comply with all applicable City building, fire and safety codes for the proposed development.
- 13. <u>Inclusionary Housing</u>. An Inclusionary Housing Agreement is required as part of the Subdivision Improvement Agreement and Development Improvement Agreement. See Item 14. Housing Variety, Under Planned Development Evaluation Criteria. Planning Commission's condition of approval regarding inclusionary housing has been incorporated into the latest PD Plan and Plat submittal by the applicant.

RESPONSE FROM REFERRAL DEPARTMENTS AND AGENCIES:

<u>Salida Fire Department</u>: An emergency vehicle access plan (exhibit N of the application) was provided and Kathy Rohrich, Assistant Fire Chief, responded: "This is great and it all looks good to me." The previous comment remains: "We will follow up with fire sprinkler plans for commercial occupancy and include Colorado Division of Fire Prevention and Control."

Salida Public Works Department: Public Works Director, David Lady, submitted the following comments:

- Applicant shall upsize the 4 inch 1st Street water main to 8 inches to meet anticipated fireflow requirements.
- Applicant shall pave the south half of 1st Street where new water services are proposed.

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

- CDOT Utility Permit will be required.
- Paving and Drainage Improvements will be required in the alley.
- Clear sight triangles per Public Works Design and Construction Standards are required.
- The SIA will not be approved until outstanding engineering items are deemed complete by JVA and Public Works
- Refer to JVA's engineering review for additional requirements pertaining to plan.
 - See the attachments to the staff report for JVA's most recent comment letter.

Salida Police Department: Russ Johnson, Police Chief responded "No issues from PD at this time."

<u>Salida Utilities:</u> Renee Thonhoff, Senior Accountant, stated "The property located at 323 West First Street is currently a commercial property with one 3/4" commercial tap (water \$8,512 & sewer \$7,808). Upon development, system development fees will be required for each unit (15)."

Chaffee County Building Department: Dan Swallow, Building Official

The Building Official clarified his previous comments in a meeting that was held on February 17th. He stated that it is "inadvisable" to allow an encroachment into an easement and that he would not allow it in the County, however, it is a land use issue, not a building code issue.

Building Official's previous comments:

Confirmation should be sought that the outlot incorporates the entirety of the larger parcel outside of what appears to be the platted townhouse lots and that this entire outlet is a private blanket drainage and utility easement upon which no building construction will be permitted. This is important to determine proper fire separation distances to all units. If this is the case, then no projections should be permitted to encroach into the easement. Two-hour fire resistance rated walls are required between attached townhouses and exterior walls of adjacent buildings that are within 10' of each other must be constructed of 1-hour fire resistance rated construction and openings must be protected per IRC Table R302.1(1) such as occurs between lots 1 & 2, 4 & 5, 12 & 13, and 14 & 15.

The only thing I would allow in an easement, private or public, is concrete flat work such as sidewalks and driveways and fences. The easement owner has the right to remove any encroachment if needed to perform whatever maintenance may be required and is not obligated to restore what they remove. In my opinion, it would be a mistake to allow any encroachments over or into an easement. So, allowing encroachments into the easement will cause building code compliance issues and I recommend that Salida never allow encroachments into easements and particularly utility easements. [Note: from the February 17th meeting we clarified that an easement encroachment will not cause building code compliance issues in this particular situation.]

I have no further comments regarding the private utilities beyond what I provided to Bill Hussey with Crabtree Group previously. Permits will be required for the private water and sewer lines unless they will be inspected by Salida Public Works. David Lady has previously indicated that he does not want to provide installation oversight on private lines.

Salida School District: David Blackburn, Superintendent responded "We will accept fees in lieu of land."

<u>Atmos Energy:</u> In a conversation with Dan Higgins of Atmos Energy on 2/1/22, staff discussed his concerns outlined in the bullet points below. Dan reiterated that Atmos energy is "willing to serve" the site, however they have concerns about potential impacts to future residents. Those concerns were two-fold:

1) The danger of going in to install additional private lines after an initial install is complete.

DEPARTMENT	PRESENTED BY	DATE
Planning	Kathryn Dunleavy - Planner	April 5, 2022

2) The difficulty being placed on future residents to locate and maintain the private lines.

In response to these concerns, these conditions (also noted under item 1, Staging of Improvements, above) are recommended

There shall be no staging (i.e. phasing) of the infrastructure and public improvements. This includes that all private gas lines must be installed in a common trench at the same time, and no additional private gas lines can be installed after the initial installation.

An Operations and Maintenance guide will be reviewed and recorded that shall ensure compliance with all relevant State Statutes, including but not limited to, Statutes regarding the obligations and procedures for owners of underground facilities to locate and excavate those facilities.

If the applicant does not agree to these conditions, then there shall be no private gas lines on site.

Dan Higgins & Mark Cristelli met with the developers and notified them that the initially requested design for a gas main would not work. Rather, Atmos will install a meter manifold on the Southern side of building 1 and they will pipe to that manifold with privately owned lines to the units they desire to serve. It will be the responsibility of the private owner to locate and maintain the private gas lines.

Atmos also provided the following general comments for subdivisions with reduced width utility easements:

"Streets/ROWs being too small to adequately accommodate buried facilities safely leads to design options that include utility providers not being willing to install underground utilities in them. Subsequently the only way they will serve these subdivisions is by providing service to the edge of the property and builders have to install private utilities to each unit within.

There are several reasons I believe this is unwise.

- Private utilities are not located by the utility providers and private locate firms don't exist that I'm aware of in Chaffee County which leaves other buried facilities at great risk of third party damage.
- The design and layout of the privately owned utilities could easily become a hodgepodge free-for all and therefore excavation and maintenance will be extremely difficult and the addition of each individual unit will make the problem continually worse.
- Several other less than desirable scenarios can easily be imagined if subdivisions proceed with privately owned utilities serving them like this one."

<u>Xcel Energy</u>: Sterling Waugh responded "The customer will need at least a 2 hr firewall on all walls 10' or closer to the transformer locations. There cannot be any doors within 20' of the transformer locations. Operating windows should be 10' away from the transformer."

In a conversation with Sterling Waugh on 2/2/2022, Sterling explained that his previous comment below, specifically regarding 'this type of development makes it almost impossible to do any future undergrounding of existing utilities without stacking electric on other utilities which is bad practice and dangerous' is referencing that the City is creating a situation where they will likely be unable to underground the off-site electric service currently in the alley because it would be too dangerous due to the lack of space for an easement. These comments are meant as advisory to the City but do not affect Xcel's ability to serve this specific property.

Previous Comments: "For this project, Xcel has the very bare minimum needed to serve them power. It does not have the normal easements that Xcel would prefer. This would also make it very difficult to create a loop or install any power needs to HWY 291, ie a street light or stop light. If every lot had this bare minimum set up we would have to put more pad mount equipment in the ROW, so this should not be a trend. Also this type of development makes it almost impossible to do any future undergrounding of existing utilities without stacking electric on other utilities which is bad practice and dangerous."

DEPARTMENT Planning PRESENTED BY Kathryn Dunleavy - Planner

DATE April 5, 2022

RECOMMENDED FINDINGS:

- 1. This application is consistent with the purposes and objectives of planned developments stated in Section 16-7-10 and because it meets the criteria of Section 16-7-40, with the conditions herein.
- 2. This application meets the requirements of a Major Impact Review and, with the conditions herein, meets the subdivision review standards of Section 16-6-120.

STAFF RECOMMENDATION:

Based upon the criteria for a Planned Development and Major Subdivision, consistency with the Salida Comprehensive Plan, and the findings outlined above, staff recommends approval of the Planned Development and Major Subdivision requests with the following conditions:

1. The following shall be added to the PD Plan, as part of Inclusionary Housing Note # 4 regarding allowable HOA dues:

Should the Developer or HOA desire, they may renegotiate this condition with the Chaffee Housing Authority based upon the Authority's guidelines for such dues.

- 2. Building permits are required and the plan shall meet Building Department requirements.
- 3. An Operations and Maintenance manual shall be subject to review by the City and recorded with the Plat.
- 4. Applicant shall obtain necessary CDOT utility permits.
- 5. Applicant is required to pave and provide drainage improvements to alley, after construction, from I Street to the southeastern-most access drive.
- 6. There shall be no staging (i.e. phasing) of the infrastructure and public improvements. This includes that all private gas lines must be installed in a common trench at the same time, and no additional private gas lines can be installed after the initial installation. The Operations and Maintenance guide shall ensure compliance with all relevant State Statutes, including but not limited to, Statutes regarding the obligations and procedures for owners of underground facilities to locate and excavate those facilities. If the applicant does not agree to these conditions, then there shall be no private gas lines on site.
- 7. Applicant shall upsize the 4 inch 1st Street water main to 8 inches to meet anticipated fireflow requirements.
- 8. Applicant shall pave the south half of 1st Street where new water services are proposed.
- 9. Outstanding engineering comments must be addressed prior to approval of the SIA.

PLANNING COMMISSION RECOMMENDATION:

On February 8, 2022, Planning Commission voted 5-0 to recommend to City Council approval of the planned development and major subdivision applications with conditions. As noted in the staff report, the Planning Commission recommendation included a condition that did not allow any encroachment into easements. That condition that prohibited eaves from encroaching into easements has been removed and replaced with Plat notes that allow some encroachment.

An additional condition has been added regarding the HOA dues of the inclusionary units, and one requiring outstanding engineering comments be addressed prior to approval of the SIA. The remaining Planning Commission conditions have either been incorporated into the plans as specified by their recommendation and described in this report, or are included herein.

PRESENTED BY Kathryn Dunleavy - Planner

DATE April 5, 2022

SUGGESTED MOTION:

"I make a motion to recommend the City Council approve Ordinance 2022-06 regarding the Residences at Salida Bottling Company on second reading."

Ordinance 2022-06 Proof of Notice Application Materials JVA Comment Letter Public Comment Letters: **Two**

ORDINANCE NO. 2022-06 (Series 2022)

AN ORDINANCE OF THE CITY COUNCIL FOR THE CITY OF SALIDA, COLORADO APPROVING A MAJOR IMPACT REVIEW FOR A 0.60 ACRE PARCEL LOCATED AT 323 WEST FIRST STREET AND LEGALLY KNOWN AS PART OF LOTS 4 & 5, ALL OF LOTS 6-9, AND PART VACATED ALLEY, BLOCK 19, SALIDA, CURRENTLY ZONED C-1 AND I, WITHIN THE HWY 291 ESTABLISHED RESIDENTIAL OVERLAY, TO PLACE A PLANNED DEVELOPMENT OVERLAY ON THE PROPERTY, AND APPROVE THE DEVELOPMENT PLAN AND 16-LOT MAJOR SUBDIVISION FOR RESIDENCES AT SALIDA BOTTLING COMPANY.

WHEREAS, the City of Salida Planning Commission conducted a public hearing on the planned development and major subdivision application for the subject property on February 8, 2022 and forwarded to the City Council its recommendation that the subject property be approved, with conditions, as a planned development overlay pursuant to the attached Residences at Salida Bottling Company development plan included as Exhibit A; and

WHEREAS, the City of Salida Planning Commission reviewed and recommended approval, with conditions, of a sixteen-lot subdivision (Residences at Salida Bottling Company) within the planned development overlay, illustrated on Exhibit B; and

WHEREAS, the project is consistent with the purpose, conditions and evaluation standards for planned development districts; and

WHEREAS, the proposals for the subject property are consistent with the policies and goals of the City's land use regulations and Comprehensive Plan, and will advance the public interest and welfare; and

WHEREAS, the City Council held a public hearing on the proposals on April 5, 2022; and

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL FOR THE CITY OF SALIDA, COLORADO as follows:

Section One

That the entirety of the property comprising Part of Lots 4 & 5, All of Lots 6-9, And Part Vacated Alley, Block 19, Salida to wit, the 0.60 acres, be and is hereby approved as a Planned Development Overlay with the attached development plan and a sixteen-lot subdivision (Residences at Salida Bottling Company) with the attached subdivision plat and conditions of approval, which is attached to this ordinance as Exhibit C.

Section Two

Upon approval by the City Council of the Final Development Plan for the Residences at Salida Bottling Company Planned Development it shall be considered a site specific development plan and granted a vested property right. The City Council is approving the vested property right subject to the terms and conditions contained in the development plan and this ordinance and failure to abide by such terms and conditions may, at the option of the City Council, after a public hearing, result in the forfeiture of vested property rights.

Section Three

Upon approval by the City Council the applicant shall have one hundred eighty (180) days to submit a final Mylar of Exhibits A and B; and incorporating the conditions of approval attached as Exhibit C for the Mayor's signature and recordation.

Section Four

The City Clerk is hereby directed to undertake the following actions upon the adoption of this Ordinance:

- 1. Publish this Ordinance in a newspaper of general circulation in the City of Salida.
- 2. Following recording of the Mylar, the Clerk shall promptly amend the official city zoning district map to incorporate and reflect the planned development overlay of the subject property.

Section Five

This Ordinance shall not have any effect on existing litigation and shall not operate as an abatement of any action or proceeding now pending under or by virtue of any ordinance repealed or amended as herein provided, and the same shall be construed and concluded under such prior ordinances.

Section Six

The provisions of this Ordinance are severable and the invalidity of any section, phrase, clause or portion of the Ordinance as determined by a court of competent jurisdiction shall not affect the validity or effectiveness of the remainder of the Ordinance.

INTRODUCED ON FIRST READING, ADOPTED and ORDERED PUBLISHED IN FULL in a newspaper of general circulation in the City of Salida by the City Council on March 15, 2022 and set for second reading and public hearing on the 5th day of April, 2022.

Land Use Code

3 An existing dwelling can be modified or rebuilt as a matter of right provided it is in conformance with the dimensional standards of Table 16-F. * The allowed use is conditional in the SH 291 Corridor Overlay (291 CO). Refer to Section

16-5-50 regarding the SH 291 Corridor (291 CO) District.

NOTES

- MONARCH SPUR TRAIL
- THE ROOF.
- STRUCTURE IS ALLOWED ON UNIT 5; THIS DOES NOT PROHIBIT ACCESS TO THE ROOF. CHIMNEYS SHALL NOT EXCEED 40 FEET.
- UNITS 8-16 CAN BE A MAXIMUM OF 3 STORIES. THEY CAN BE A MAXIMUM OF 40 FEET IN HEIGHT ONLY TO ACCOMMODATE THE PEAK OF A GABLED ROOF. IF A FLAT ROOF WITH PARAPET IS THE MEASUREMENT OF BUILDING HEIGHT SHALL USE THE LOWER BASE ELEVATION OF EITHER THE FINISHED FLOOR OR THE AVERAGE POST CONSTRUCTION GRADE.
- WITH THE SEVERAL BRICK HOSTORICAL BUILDINGS ALONG 1ST STREET IN THE HISTORIC DISTRICT.
- SALIDA MUNICIPAL CODE. 8. FEES IN LIEU OF LAND DEDICATION FOR SCHOOL SITES, AND FEES IN LIEU OF OPEN SPACE, SHALL BE PAID AT TIME OF BUILDING PERMIT FOR EACH RESIDENTIAL UNIT.

SCHEDULE OF DIMENSIONAL STANDARDS

PROPERTY IS CURRENTLY SPLIT ZONED C-1 AND INDUSTRIAL. HIGHLIGHTED CELLS INDICATE WHERE PD EXCEEDS THE STANDARDS OF EITHER ZONE.

5 If a front-loaded garage is set back at least ten (10) feet behind the primary street-facing building façade, the lot overage between the garage entrance and the primary, street-facing building façade shall not be included in the calculation of lot coverage for uncovered parking/access.

6 Standards for inclusionary housing development per Section 16-13-50.

7 Fifteen (15) percent of the single-family lots within an inclusionary housing development may be twenty-five (25) feet by one hundred fifty (150) feet. 8 See Section 16-4-190(c) for a description of side lot line setbacks for all accessory buildings, including ADUs

ON UNITS 1-7, NO PORTION OF THE BUILDING NOR ARCHITECTURAL APPURTENANCES CAN EXCEED 35 FEET IN HEIGHT IF WITHIN 24 FEET OF THE PROPERTY LINE ALONG HWY 291 OR THE

UNITS 1-3 ARE ALLOWED A ROOFTOP ACCESS STRUCTURE THAT CANNOT EXCEED 40 FEET IN HEIGHT AT ITS HIGHEST POINT. IT MAY BE UP TO 100 SQUARE FEET ON UNIT 1. UNITS 2 & 3 ARE ALLOWED A SHARED ROOFTOP ACCESS STRUCTURE UP TO 150 SQUARE FEET (IN TOTAL, NOT PER UNIT). SHARED STRUCTURE CAN BE GREATER THAN 150 SQUARE FEET ONLY IF REQURIED BY THE BUILDING OFFICIAL, AND SHALL BE LIMITED TO THE MINIMUM REQUIRED SQUARE FOOTAGE. NO ROOFTOP ACCESS STRUCTURE IS ALLOWED ON UNIT 4; THIS DOES NOT PROHIBIT ACCESS TO

UNITS 5-7 CAN BE A MAXIMUM OF 3 STORIES AND 35 FEET IN HEIGHT WITH THE EXCEPTION OF CHIMNEYS AND A ROOFTOP ACCESS STRUCTURE ON UNITS 6 AND 7. UNITS 6 & 7 ARE ALLOWED A SHARED ROOFTOP ACCESS STRUCTURE THAT CANNOT EXCEED 40 FEET IN HEIGHT AT ITS HIGHEST POINT, AND CAN BE UP TO 150 SQUARE FEET (IN TOTAL, NOT PER UNIT). SHARED STRUCTURE CAN BE GREATER THAN 150 SQUARE FEET ONLY IF REQUIRED BY THE BUILDING OFFICIAL, AND SHALL BE LIMITED TO THE MINIMUM REQUIRED SQUARE FOOTAGE. NO ROOFTOP ACCESS

PROPOSED, BUILDING HEIGHT, INCLUDING PARAPETS, CANNOT EXCEED 35 FEET. NO PART OF A ROOFTOP DECK, INCLUDING RAILINGS OR COVERS, CAN EXCEED 35 FEET.

FINAL ARCHITECTURAL PLANS SHALL SUBSTANTIALLY CONFORM TO THE ARCHITECTURAL CHARACTER AND DESIGN AS SUBMITTED AS PART OF THE PD APPLICATION. IF ANY OF THE BUILDINGS 8–16 ARE MODIFIED TO FLAT ROOFS, THEY SHALL BE SIMILAR TO THE ROOFS OF UNITS 1–7. BRICK FACADES ARE ENCOURAGED ON THE UNITS FACING 1ST STREET TO PROVIDE VISUAL CONTUNUITY

LOT LINE ADJUSTMENTS FOR DESIGN CHANGES AND/OR CONSTRUCTION TOLERANCES ARE ANTICIPATED AND SHALL BE CONSIDERED "PRACTICAL NECESSITIES" PER SECTION 16-6-70 CITY OF

9. THE ACCESS EASEMENT SHOWN ON THE SUBDIVISION PLAT SHALL BE CONSIDERED "DIRECT ACCESS ONTO A PUBLIC STREET" PER CITY OF SALIDA MUNICIPAL CODE SECTION 16-8-20 (a).

NOTE: UNIT SIZES ARE APPROXIMATE AND SHALL NOT BE CONSTRUED AS MINIMUM OR MAXIMUM FOR THE FINAL ARCHITECTURAL PLANS.

1. NO EXISTING TREES ON SITE. IRRIGATION WILL BE PROVIDED WITH BACKFLOW PROTECTION PER PLUMBING CODE, AND DRIP AND SPRINKLER

- IRRIGATION AS NEEDED. 2. THE SITE AS A WHOLE WILL HAVE 2,612 SQUARE FEET OF LANDSCAPE SPACE TO MEET THE C-1 AND INDUSTRIAL ZONE STANDARDS. 60% OF THAT (1568 SF) WILL BE LIVING COVER. A MINIMUM OF 9 TREES WILL BE PLANTED, COUNTING STREET TREES ON 1ST STREET, MEETING THE C-1 MINIMUM OF 1 TREE PER 300 SQUARE FEET OF
- REQUIRED LANDSCAPE AREA. 3. LANDSCAPE WORK AS SHOWN IS ESTIMATED TO COST \$40,000. MORE DETAILED ESTIMATES OBTAINED FROM LANDSCAPE CONTRACTORS SHALL SUPERSEDE THIS ESTIMATE.
- 4. EROSION CONTROL WILL MEET CDPHE REQUIREMENTS OF THE GENERAL CONSTRUCTION STORMWATER DISCHARGE PERMIT. SPECIFIC BEST MANAGEMENT PRACTICES WILL BE CHOSEN, INSTALLED, INSPECTED, AND MAINTAINED BY THE CONTRACTOR'S QUALIFIED STORMWATER MANAGER.
- 5. LANDSCAPE MAINTENANCE WILL INCLUDE WEEDING, MOWING, AND TRIMMING. MAINTENANCE WILL BE THE RESPONSIBILITY OF THE PROPERTY OWNER, WHICH IN SOME SITE AREAS IS THE HOA.
- 6. ALL PLANTS SHALL BE OF A VARIETY WHICH IS COMPATIBLE WITH LOCAL CLIMATE AND THE SOILS, DRAINAGE AND WATER CONDITIONS OF THE SITE.
- 7. CITY SHALL REVIEW AND APPROVE LANDSCAPING WITHIN THE SIGHT TRIANGLES PRIOR TO INSTALLATION.

DATE: NOVEMBER ||, 202| SHEET 2 OF 2 ELANDMARK SURVEYING & MAPPING P.O. BOX 668 SALIDA, CO 81201 PH 719,539,4021 FAX 719,539,4031

EXHIBIT C:

Conditions of Approval for Residences at Salida Bottling Company Planned Development and Major Subdivision

1. The following shall be added to the PD Plan, as part of Inclusionary Housing Note # 4:

Should the Developer or HOA desire, they may renegotiate this condition with the Chaffee Housing Authority based upon the Authority's guidelines for such dues.

- 2. Building permits are required and the plan shall meet Building Department requirements.
- 3. An Operations and Maintenance manual shall be subject to review by the City and recorded with the Plat.
- 4. Applicant shall obtain necessary CDOT utility permits.
- 5. Applicant is required to pave and provide drainage improvements to alley, after construction, from I Street to the southeastern-most access drive.
- 6. There shall be no staging (i.e. phasing) of the infrastructure and public improvements. This includes that all private gas lines must be installed in a common trench at the same time, and no additional private gas lines can be installed after the initial installation. The Operations and Maintenance guide shall ensure compliance with all relevant State Statutes, including but not limited to, Statutes regarding the obligations and procedures for owners of underground facilities to locate and excavate those facilities. If the applicant does not agree to these conditions, then there shall be no private gas lines on site.
- 7. Applicant shall upsize the 4 inch 1st Street water main to 8 inches to meet anticipated fireflow requirements.
- 8. Applicant shall pave the south half of 1st Street where new water services are proposed.
- 9. Outstanding engineering comments must be addressed prior to approval of the SIA.

Introduction

Residences at Salida Bottling Company is a Planned Development and concurrent major subdivision of 16 residential units and 1 commercial unit on 0.60 acres at 323 W 1st Street in Salida.

Existing Conditions

The photo below shows existing conditions at the site.

The subject parcel is currently an unpaved parking lot. As shown on the land survey in Appendix A, the subject parcel is made up of portions of lots 4 and 5 of block 19, all of lots 6 through 9 of block 19, abandoned Denver & Rio Grande Railroad right of way, and abandoned alley right of way, for a total of 8 existing lots as summarized below.

	Area	Area		
	(SF)	(Acres)		
Lot 4	997	0.02		
Lot 5	3497	0.08		
Lot 6	3750	0.09		
Lot 7	3750	0.09		

Lot 8	3750	0.09
Lot 9	3750	0.09
D&RG abandoned		
ROW	6322	0.15
Alley abandoned		
ROW	296	0.01
Total	26112	0.60

The property is currently split zoned. D&RG abandoned right of way, which makes up 24% of the property, is zoned industrial (gray). The remainder is zoned C-1 Commercial (red). The entire property is within the Highway 291 Established Residential Overlay. See excerpt from zoning map below.

Current vehicle access to the site is from one driveway on 1st Street, and from the public alley behind the site.

Planned Development Narrative

A planned development plan is included in appendix B. This plan, upon approval, will be recorded with the Chaffee County Clerk to provide a record of the planned development entitlement for the property.

Sheet 1 of the planned development plan highlights changes to the use schedule and dimensional standards of the underlying zones required for the development. Sheet 1 also includes standard signature blocks for ownership, title report, survey by a professionally licensed surveyor, and city approval. Finally, this sheet includes the owner's method of meeting the inclusionary housing ordinance.

Sheet 2 of the planned development plan is the site plan, showing 1st Street sidewalk, driveway, and curb and gutter improvements, building setbacks, parking, site dimensions, and ground cover. A table of unit square footage is provided on this sheet to give a general sense of unit size, but these shall not be

construed as minimum or maximum required unit sizes. Landscaping notes address the requirements of Salida Municipal Code section 16-8-90.

Architecture

The architectural character of the project intends to complement the existing, historic downtown through use of building form, the employment of materials and details consistent with and inspired by the downtown and immediate, adjacent context. Sited adjacent to the downtown, the plan's design emphasizes the pedestrian experience through walkable connections and an emphasis on the public realm.

Sheets 1-3 of Appendix H shows urban and architectural precedent which balances both the use of the automobile and the pedestrian experience. Specifically, on Sheet 2, the historic Salida Bottling Works building formerly located on the site illustrates both the urban relationship of the historic building frontage as well as the traditional character of the architecture on the site.

Sheets 4-6 show the building footprints and landscaping on the site. The frontages along First Street are set back slightly from the road, with porches presenting a pedestrian frontage. A ground floor commercial space is located in the south east corner of the site, proximate to the downtown business district. Park-under residences are located in the center and rear of the project site.

Sheet 7 of Appendix H shows how buildings facing First Street and Monarch Spur Trail will have parapet wall roofs similar to those across First Street; buildings on the interior, towards the back of the development will have pitched roofs in character with the residential streets to the west and north of the site.

Sheets 8-10 illustrate elevation concepts for the project frontages facing Monarch Spur Trail and First Street. The elevations show distribution of various exterior materials, general architectural character and details, and opening proportions.

Sheets 8-10 are not final architectural elevations and are subject to vary throughout the design process. Elevations shown are intended to give a sense for the character, detailing and height of the proposed project.

Sheet 11-12 – Height Considerations – Two diagrams show an example of a pitched roof (3 story) house with 35'-0" Height Max. to Ridge. Proposed for Consideration, the Second diagram shows the same house with Ridge Height Max. at 40'-0". This would only be proposed for "pitched roof" residential units tucked back into the block. Sheet 12 shows the "Flat Roof" (Parapeted) Residences proposed. Parapet falls under Max. height of 35'-0". Requesting (with limitatations), Rooftop Access structures to be allowed to extend above 35'-0". Proposed minimal footprint (max. 100 s.f.).

View Corridor Study

Appendix H, Sheets 14-15 In recognition of the significance of the view along First Street, viewing the Sawatch Range from the downtown, the view corridor study is intended to provide a sense for the scale of the buildings and the extent to which the project obscures the view of the Conoco gas station from downtown.

Major Subdivision Plat

See Appendix I for the major subdivision plat requested concurrently with the Planned Development. Note that the dimensional standards requested in the Planned Development are slightly more permissive than the subdivision plat. This is because lot line adjustments for design changes and/or construction tolerances are anticipated.

This subdivision plat does not include the condominium subdivision of two units on Lot 4. The condominium subdivision of two units will be platted after building construction. This is a permitted use per the Planned Development.

Civil Engineering

Public Works has indicated that to provide adequate fire flow, the existing 4" water main in 1st Street will need to be replaced with an 8" line per city standards prior to any certificates of occupancy being issued in the planned development. This water main upsize will extend from the east end of the 1st Street property frontage, to the existing 8" water main in I Street. Sewer service will require installation of a manhole in the existing 1st Street sewer main. It is anticipated that the city's standard subdivision improvement agreement will be required prior to this work.

Gas, communications, and electric will be connected to existing mains in the public alley behind the site.

The following variances to City of Salida public works standards are requested for the subdivision:

- In subdivisions, public sewer mains are required to extend to the end of the property and provide sewer service to each individual lot. Public works has requested private HOA-owned sewer mains inside the Salida Bottling Co. development because there is no public right of way in which to run the new mains. Also, because this is an infill development, there is no opportunity for extension of the city's sewer collection system. The HOA documents will provide for maintenance of the private sewer mains inside the development.
- 2. Standard water services run from the public right of way directly onto the lot they will serve. In this subdivision, water service lines will first run through the HOA-owned lot, and then onto the lot they serve. This is acceptable because the lot to be served has an ownership interest in the HOA lot.

Civil engineering plans are included as Appendix J. Engineer's Opinion of Probable Cost for public improvements is included as Appendix K. Construction schedule is included as Appendix L. CDOT access permit is included as Appendix M. CDOT utility permit is required prior to utility work in Highway 291, as noted on the civil engineering plans. City of Salida will be the permittee on the utility permit.

Additional discussion of civil engineering items is provided in Appendix O, Responses to Staff Comments.

Submittal Requirements Checklist

The following items are required for planned development applications per Salida municipal code Section 16-7-90.

(1) PD Development Plan

i-ix. See Appendix B Planned Development Plan.

(2) Written Narrative

i. See Appendix A Survey.

- ii. See Appendix D Title Policy.
- iii. The planning objective is to provide a high quality infill development which will add to the quality of Salida's downtown by providing excellent architecture, commercial space, deed restricted housing, market rate housing, and private open space.
- Fee in lieu of parks, trails, and open space shall be paid at time of building permit for each unit. All private open space shall be maintained by the lot owner, which in some cases is the HOA.
- Phasing of private improvements shall not be restricted within the development. Safe access shall be provided to all occupied units during construction. Underground utilities for the entire site will need to be installed early in the construction process due to space constraints.
- vi. See Appendix E, Geotechnical Report, and Appendix F, Limited Phase II Subsurface Investigation.
- vii. See Architectural section above.
- viii. See Appendix C, Drainage Report.
- ix. See Appendix G, projected water and sewer demand.
- x. All utilities are available near the site, and the project is within city limits.
- xi. Trip generation from the site:

Source: ITE Trip Generation, 8th Edition

xii. The city's fiscal impacts will be very minor because development of empty lots near the middle of town is the most efficient kind of development. The city will collect sales tax from the commercial unit in the development. Construction of the project will provide sales tax to the city. In addition, the development will provide two units of 80% AMI housing in downtown Salida, which will provide an opportunity for workers to live affordably, near downtown jobs.

Per staff request, an emergency vehicle access exhibit was added as Appendix N.

Per staff request, and exhibit showing eave overhangs, utilities, and easements, was added as Appendix Q.

- 8. THE CONTRACTOR SHALL WARRANTY ALL WORK FOR A PERIOD OF ONE YEAR COMMENCING FROM THE TIME OF FINAL ACCE THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPAIR AND REPLACEMENT OF ALL FAILURES DETERMINED BY THE ENGINEER CAUSED BY DEFECTS IN MATERIAL OR WORKMANSHIP DURING THE WARRANTY PERIOD.
- 9. THE CONTRACTOR SHALL MAINTAIN A SET OF PLANS ON THE JOB SITE AT ALL TIMES AND PROVIDE SUBCONTRACTORS WITH OF PLANS. THE CONTRACTOR SHALL MAINTAIN A RED-LINED SET OF PLANS, INDICATING ALL CONSTRUCTION CHANGES, AN IT UP TO DATE AT ALL TIMES. INCOMPLETE REDLINES SHALL BE SUFFICIENT CAUSE FOR REJECTION OF PAYMENT APPLICAT COMPLETED RED LINE SET SHALL BE SUBMITTED TO THE ENGINEER PRIOR TO SUBSTANTIAL COMPLETION.
- 10. ALL CONSTRUCTION SHALL COMPLY WITH THE CONSTRUCTION CONTRACT, THESE PLANS AND THE APPROVAL AGENCY CONST STANDARDS AND SPECIFICATIONS IN FORCE AT THE TIME OF THE BID AWARD. IN CASE OF CONFLICT THE FIRST LISTED ORDER ABOVE SHALL RULE.
- 11. CONTRACTOR SHALL BE RESPONSIBLE FOR SCHEDULING WITH THE TESTING AGENCIES AND PROJECT ENGINEER TO ENSURE T REQUIRED TESTING IS COMPLETED PRIOR TO PROCEEDING WITH THE WORK. RETESTING REQUIRED DUE TO FAILED MATERIA AND/OR REQUESTS FOR TESTING OUTSIDE OF NORMAL BUSINESS HOURS SHALL BE AT THE CONTRACTOR'S EXPENSE.
- 12. CONTRACTOR SHALL PROVIDE BUSINESSES AND PRIVATE RESIDENCES NOTICE A MINIMUM OF 48 HOURS PRIOR TO COMI WORK THAT WILL IMPACT ACCESS OR SERVICES TO THEIR PROPERTIES.
- 13. CONTRACTOR SHALL PROVIDE THE APPLICABLE PUBLIC WORKS DEPARTMENT NOTICE A MINIMUM OF 7 DAYS PRIOR TO COMI WORK THAT WILL IMPACT PUBLIC ACCESS OF SERVICES.
- 14. THE CONTRACTOR SHALL AT ALL TIMES MAINTAIN PROPER BARRICADING, DUST CONTROL, TRAFFIC CONTROL, SHORING AND MEASURES OF EVERY NATURE. ALL EXCAVATIONS LEFT OPEN OVERNIGHT MUST BE BARRICADED TO PREVENT VEHICUL PEDESTRIAN ACCESS.
- 15. THE CONTRACTOR SHALL OBTAIN WRITTEN AGREEMENT TO UTILIZE OFF-SITE PROPERTIES FOR STAGING OR STORAGE OF MA CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO MINIMIZE ANY NUISANCE CONDITIONS ARISING FROM THEIR STAG MATERIAL STORAGE AREAS.
- 16. THE CONTRACTOR SHALL COORDINATE WITH THE APPLICABLE PUBLIC WORKS DEPARTMENT TO ARRANGE FOR ANY CONST WATER NEEDED PRIOR TO THE START OF CONSTRUCTION.
- 17. THE CONTRACTOR SHALL SUBMIT A TRAFFIC CONTROL PLAN FOR APPROVAL BY THE GOVERNING ENTITY, WHICH MUST BE AP PRIOR TO COMMENCING WITH THE WORK.
- 18. CONTRACTOR SHALL KEEP WEIGHT TICKETS, BATCH TICKET, INVOICES, ETC. FOR ALL MATERIAL INCORPORATED INTO THE P COPIES MUST BE SUBMITTED TO THE ENGINEER PRIOR TO PAYMENT FOR ITEMS.
- 19. THE CONTRACTOR SHALL SCHEDULE THE WORK TO MINIMIZE THE DISTURBANCE OF MAIL DELIVERY TO ALL AFFECTED A WHEN NECESSARY, CONTRACTOR SHALL NOTIFY EXISTING RESIDENCES OF IMPENDING DISTURBANCE A MINIMUM OF ONE WEEL TO REMOVING/OBSTRUCTING MAILBOXES.
- 20. THE CONTRACTOR IS RESPONSIBLE FOR REPLACING OR REPAIRING ANY DAMAGE TO PRIVATE PROPERTY IMPROVEMENTS A FINAL CLEAN UP AND STREET SWEEPING OF THE JOB SITE.

RE: Residences at Salida Bottling Company – Final Plat 03 Review JVA Job# 3121.10c

Dear Kathryn:

JVA Inc. has reviewed the Residences at Salida Bottling Company final plat documents submitted through email dated March 8, 2022 for conformance with the City of Salida Code of Ordinances (Code), and Design and Construction Standards. Upon review, we find that the revised submittal documents have continuing and additional comments needing to be addressed prior to Subdivision Improvement Agreement (SIA) review and approval.

- 1. We assume that all other reviewing agencies have had opportunity to comment and any required changes to the plans that come from these comments will be made. This includes CDOT utility permitting.
- 2. Prior to SIA review and approval, the following comments will be required to be addressed / clarified.
 - a. Clarify ³/₄" minus clean rock and 3" minus clean rock meet minimum 40% void space criteria as detailed in Drainage Report. Include sieve analysis specifications as needed. Provided Well Graded Gravel with little or no fines has a maximum 46% void ratio when no or little compaction is provided. Website states void ratio is greatly affected through compaction which driving surfacing would expect. Mile High Flood District recommends AASHTO #57 or #67 rock. Plans still state "minus clean rock". Minus rock typically has fines while clean rock has fines removed. One or the other should be provided, revise as necessary;
 - b. Per previous comment, provide additional information to show ADA accessible route to ADA accessible units, trash enclosure, and public right-of-way;
 - i. Provide ADA and van accessible signage, access aisle, striping, and symbol per 16-8-80(8).;
 - c. Record with City an Operation and Maintenance plan / narrative at a minimum for the following items:
 - i. Snow Storage;
 - ii. Water service repair
 - iii. Storm facilities including storm infiltration systems
 - 1. Include long term maintenance requirements for instances if infiltration areas become clogged with sediment;
 - d. Confirm design with CDOT if asphalt sawcut and replacement limits are acceptable. Sawcut limits appear to be within wheel path. Provide asphalt sawcut and paving per CDOT access permit requirements;
 - e. Per previous comment, revise Drainage Report to provide the following information.

- i. Provide historical and post-development drainage figures. Comment response states drainage figures provided, however Staff could not locate figures in Drainage Report dated January 31, 2022;
- f. Per previous comment, survey does not show alley as a public access easement. Revise survey as necessary to confirm. If not, a construction easement is needed within alley;
- g. Civil Plans show a detail to improve alley however no grading and drainage information is provided on Civil Plans. Provide information on these improvements that includes drainage connection to the Monarch Spur Ditch;
- h. Engineer can proceed with Salida Municipal code site triangles. Whichever plan shows site triangles, potential obstructions should be shown and removed from site triangles, this includes shrubs, groundcovers, berms, signs, structures or other materials greater than two (2) feet in height above the street centerline grade, including trees and parked cars.
 - i. JVA may consider variance applicability if proposed tree bottom branches provide clear visibility 96-inches above road surface
 - ii. A stop sign will not be required
 - iii. Please remove site triangle conversation on Civil Plans Site Plan sheet 5
- i. PD Plan shows a tree placed in close proximity to sanitary sewer service, gas line, and within infiltration area. Clarify design intent, obtain confirmation that proposed tree location is acceptable to utility providers, and provide detail of how infiltration areas will be installed around tree root ball; or revise plans as necessary
 - i. Provide No Parking Signs for areas within Clear Site Triangles;
- j. Update Civil Engineering Plans Sheet Index; and
- k. Provide information to demo existing water meter, curb stop, and water service pipe in conflict of proposed sewer main installation along First Street entering the site.
- 3. The following contains informational comments for consideration
 - a. Consideration should be given to providing a typical looped water main with typical water services;
 - b. The west three parking stalls appear to be at a steep 8% cross slope and convey stormwater towards building. Revise drainage per applicable building codes and geotechnical requirements. Revise as necessary;
 - c. ADA parking stall does not meet ADA grading criteria;
 - d. Per the geotechnical report, roof downspouts should not be discharged within limits of foundation excavation. Revise as necessary; and
- 4. Applicant should provide responses to comments to accompany future submittals.
- 5. Applicant may be subject to additional comments upon future review of future submittals.

Review at Salida Bottling Company Final Plat 03 Review 03/09/2022 3 of 3

We look forward to verifying the above comments in a future submittal. Please feel free to reach out to us if you have any comments or questions.

Sincerely, JVA, INCORPORATED

Mark G. Rocheleau, P.E., CFM

Senior Project Engineer

Mr. Bill Almquist Salida Community Development Director The Touber Building 448 E 1st Street, Suite 112 Salida, CO 81201

Dear Mr. Almquist,

The purpose of this letter is to share with you our concerns and make suggestions regarding the planned development of the 323 West 1st Street property.

We have made our home for twenty years at 211 West 1st Street in the historic Adolph Coors, Golden Beer Depot, Salida Bottling Company Agents Building, which is a contributing structure within the Salida Downtown Historic District. The building was purchased by our family from the City of Salida in 1989. For your information, we have included photos of our building from the 1890s, 1980s (when the City sold it to our family) and today. We have always strived to be responsible property owners and good citizens of historic Salida and Chaffee County.

We love living in downtown Salida and have learned over the years that we need to be flexible to enjoy it. Traffic, people, bars, noise, crowds, etc., are all part of the downtown lifestyle. If either of us complains about a minor downtown annoyance, we remind ourselves that we chose "to live in the hood, so suck it up buttercup."

In 2004, the City sold us a second parcel of land on which we constructed an addition to the back of our building. At the same time the City also sold us a parking easement to park three vehicles in the small public lot directly behind our building, and the access easements we needed to access our building and property.

We watched the Planning & Zoning Commission hearing held on December 14, 2021 about the plans for the development of 323 West 1st Street. After watching that meeting, it occurred to us that we are likely to see some changes if the development is approved with height increases and with such limited parking, as your staff recommended. We have identified several concerns to share with you and the P & Z Commission.

Our concerns are as follows:

1. The new construction will effectively swamp the view of our historic building from the east (i.e., 1st Street in downtown) as well as from the west, rising high over our roof line and historic Western false front.

2. The new construction will eliminate any views we have of the mountains to the west of our historic building, and our views will likely be replaced with people on rooftop decks, as well as the buildings.

3. The new construction, when occupied, will put a substantial strain on the already very limited public parking in the neighborhood. The small lot behind our home, being the closest to the development, most likely will be impacted first.

We appreciate that time marches on and that the views of and from our actually historic home may not be of concern to you. But we wanted to mention it because we have always enjoyed seeing the mountains from our west-facing windows and property and we think our building adds character to the historic downtown.

Parking in the lot directly behind our building is of greater concern to us. We believe that by approving this development with such limited parking, the City will effectively devalue the parking easement that was sold to us by the City in 2004. In addition, parking along the west side of our building, at least partly on our private property, is already a problem during busy times (Thanksgiving, Brewfest, FIBArk, Artwalk, July 4th, etc.). People park on our property; often parking and walking on top of our landscaping and flowers.

The lot behind our home holds about 8 to 10 vehicles, depending on the vehicle size and care taken when parking. We suspect that the fourteen new 2+ bedroom units across the trail will likely require 2+ parking places per unit. Because the lot directly behind our building is the closest parking to the new development, we suspect that as regards to parking, every day will be FIBArk at our house.

We would like to propose a solution that would satisfy us by eliminating the effective devaluation of the parking easement sold to us by the City in 2005 and eliminating, as well, our issues with people parking on our private property, landscaping and plants.

If you agree, we would like to propose that we work with Public Works Director David Lady to install signage designating our three parking spots as reserved for our building, and to get his advice on how best to sign our private property as unavailable for public parking. We would be willing to work with Mr. Lady to cover the cost of any sign purchases that are found to be necessary.

Thank you in advance for considering our input. We look forward to hearing from you.

Sincerely.

Skitten

March 29, 2022

Kathryn Dunleavy Planner, City of Salida 448 E. 1st St. #112 Salida, CO 81201

Dear Kathryn,

Page 1, Section A, of the City Council Action Form, as it relates to the Residences at Salida Bottling Company, lists 14 deviation requests. We recognize that some of these requests have been addressed by staff.

Please accept this letter in opposition to the **height deviations** as requested for the proposed development at 323 West 1st Street, Salida, CO 81201 (aka, Residences at Salida Bottling Company).

In our opinion, forty feet (40') is too high. Please see the attached photo taken from the east side yard at 317 W. 2nd St. The red line is approximately 40' from grade at the base of the utility pole on the right side of the photo. A digital range finder was used for this measurement. A height of 35', as measured using existing methods from Article I of the Land Use Code, appears to be a suitable height that would allow for successful completion of the project. And it would adhere to present code. The View Corridor study that was submitted only considered points of view from the east and west along Highway 291. Would it be possible for the applicant to add the north and south perspectives to better understand the project's impact to these view corridors? There will be impacts. An effort to fully understand them before it is too late would be wise.

Also, of concern is the request to *"change how building height is measured to use the lower of either average post-construction grade or finished floor, rather than the Code requirement to use the lower of either pre-construction grade or postconstruction grade."* We object to this request as well. This will result in a final height above where 40' would exist if built on present grade. Can the project be excavated/lowered to drop the grade to levels below where they presently exist and still accommodate storm water runoff?

And then there are the rooftop structures and chimneys. Again, we object to anything over 35', including these.

We strongly urge Town Council to vote "No" on all three items in section 8, "Maximum Height", of the City Council Action Form. The request for an additional 5' simply does not fit, nor is it required for the successful completion of the project.

Also, we fear that an approval of these deviations will set a precedent for future projects. Is this a glimpse at our future downtown? Please limit this structure to the present height limitation of 35'.

Finally, the applicant is asking for a 67% increase in density. We feel this, combined with the height

deviation, would result in a project that is simply out-of-scale. Intended or not, this project will be a "statement piece" for those approaching the historic districtal from the west on Highway 291. Let's be sure it is something we can all live with and appreciate.

Thank you for your consideration.

Sincerely,

Jeff Westcott and Courtney Kenady-owners 217/219 | Street

1 INTRODUCTION

Residences at Salida Bottling Company is a proposed development in the City of Salida, at the west corner of Highway 291 (1st Street) and the Monarch Spur Trail. Improvements to the site will include landscaping, pedestrian and vehicle access pavement, and buildings.

2 EXISTING CONDITIONS

The subject site is currently a parking lot with road base surface. Existing stormwater flow on site consists of sheet flow from southwest to northeast. There is no evidence of significant off-site generated stormwater runoff entering the site. Runoff generated on site currently discharges to Highway 291, which slopes down from northwest to southeast, and the Salida Ditch, which slopes down from southwest to northeast.

3 SOILS

Information for the on-site soils was obtained from the USDA Web Soil Survey (U.S. Department of Agriculture, n.d.). The soils consist of Dominson gravelly sandy loam, which is assigned to Hydrologic Soils Group A. Web Soil Survey data is included in Appendix A.

4 PRECIPITATION

Precipitation amounts for the Design Storms was obtained from the NOAA precipitation frequency estimates for the subject area. The Design Storms utilized in the analysis are summarized in 1 below.

TABLE 1						
Storm	24-hour					
Return Period	Rainfall					
(yr)	Amount (in.)					
2	1.34					
5	1.64					
10	1.89					
25	2.26					
50	2.55					
100	2.85					

5 RUNOFF ANALYSIS

The runoff Analysis was performed utilizing the methods described in the Natural Resources Conservation Service (NRCS) Technical Release #55 (TR-55), with a Type II storm distribution. Predevelopment peak site runoff for the 25-year, 24 hour is 0.33 cfs. Postdevelopment peak site runoff for the 25-year, 24 hour is 0.33 cfs. Postdevelopment peak site runoff for the 25-year, 24 hour storm is 1.304 cfs.

Therefore, per TR-55 Figure 6-1, a minimum of 1,191 cubic feet of stormwater detention is needed to mitigate the additional runoff caused by development of the site. Surface detention will be provided per the civil engineering plans.

TR-55 calculations are included in Appendix C.

6 CONCLUSION

The development of the site is expected to increase the on-site generated stormwater flows after completion of construction. To mitigate this impact, a minimum of 1,191 cubic feet (CF) of on-site stormwater detention is incorporated in the site plan. Incorporation of the stormwater storage into the site design will mitigate the impact of the development to the stormwater flows in the area.

Since approximately half of the site impervious area is building roof, approximately half of the required detention was designed as downspout infiltration basins. Considering two downspouts per lot, a total volume (including rock) of 36.75 CF, and 40% voids in the drain rock, the total detention volume of the downspout infiltration basins is 470 CF. Downspout infiltration basins will have the added benefit of reducing ice buildup on the pavement during freeze/thaw cycles.

The remainder of the required detention, 721 CF, is provided at the low point of the private access drive. Dimensions are per the civil engineering plans, and 40% voids assumed in the drain rock.

Per the calculation in Appendix C, the 25-year, 24-hour storm will produce a maximum runoff of 1.3 cfs. Therefore, a 2'x2' Nyloplast Highway Inlet Grate with 0.15' sump is sufficient to accept the maximum runoff into the infiltration gallery at the bottom of the private access drive. Note that this is conservative because the site plan distributes detention among roof drain infiltration basins as well as the main infiltration basin.

Nyloplast 2' x 2' Road & Highway Grate Inlet Capacity Chart

(866) 888-8479 / (770) 932-2443 • Fax: (770) 932-2490 © Nyloplast Inlet Capacity Charts June 2012

Finally, exfiltration from the perforated pipe in the main infiltration basin is calculated in Appendix D. It is sufficient to pass the 25-year, 24-hour peak flow.

This analysis assumes that the vehicle access lane is asphalt. If pervious pavers are installed, less detention will be required.

Note that the deepest infiltration area is 4' deep. Per appendix A soil data, site soils infiltrate at 2 to 6 inches per hour under 1' of head. 48 inches divided by 2 inches/hour equals 24 hours to completely infiltrate the detained stormwater. Note that the site detention areas provide a total plan area of 877 square feet. If constantly saturated for 120 hours, at 2 inches/hour, the site would infiltrate 17,540 cubic feet of stormwater.

Because the site is located at the bottom of the Salida Ditch watershed, it may be beneficial to detain only the 2 year storm on site for water quality purposes, and avoid adding to the peak flow of the Salida Ditch in larger storms.

Map Unit Setting

National map unit symbol: jq8d Elevation: 7,200 to 8,800 feet Mean annual precipitation: 11 to 16 inches Frost-free period: 75 to 100 days Farmland classification: Not prime farmland

Map Unit Composition

Dominson and similar soils: 100 percent Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Dominson

Setting

Landform: Alluvial fans, fan terraces Down-slope shape: Linear Across-slope shape: Linear Parent material: Alluvium and/or moderately coarse-textured gravelly outwash

Typical profile

H1 - 0 to 11 inches: gravelly sandy loam *H2 - 11 to 60 inches:* very gravelly loamy sand

Properties and qualities

Slope: 1 to 9 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Runoff class: Low
Capacity of the most limiting layer to transmit water (Ksat): High (2.00 to 6.00 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 1 percent
Available water supply, 0 to 60 inches: Very low (about 2.9 inches)

¹ Precipitation frequency (PF) estimates in this table are based on frequency analysis of partial duration series (PDS).

Numbers in parenthesis are PF estimates at lower and upper bounds of the 90% confidence interval. The probability that precipitation frequency estimates (for a given duration and average recurrence interval) will be greater than the upper bound (or less than the lower bound) is 5%. Estimates at upper bounds are not checked against probable maximum precipitation (PMP) estimates and may be higher than currently valid PMP values. Please refer to NOAA Atlas 14 document for more information.

Mr. Paul Inge Paul Inge Custom Building 8315 CR 144 Salida, CO 81201

Subject: Geotechnical Engineering Study 323 West 1st Street, Salida, CO

Project No. 20-464

Dear Mr. Inge:

This geotechnical engineering study was performed to provide foundation recommendations for the subject project. As requested, representatives of Mountain Engineering and Testing (MET) visited the subject site on December 21, 2020 to record the subsurface conditions in two exploratory test pits at the site. The project was performed based on our proposal P-20-168 signed on December 17, 2020.

<u>Proposed Construction</u>: This report was compiled for the proposed construction of approximately 16-17 residential 3 story structures with a partial basement 4 to 6 feet deep, at the subject location. Construction of the structures is proposed along the entirety of the lot with parking in the cutting the lot in half (see Figure 1). Grading plans were not provided, however, no significant fills or cuts are anticipated aside from the excavation for the basements.

Foundation loads are anticipated to be light to moderate and typical for the type of construction. If loads, locations or conditions including fills or cuts are significantly different from those described above or depicted in this report, MET should be notified to reevaluate the recommendations contained herein.

<u>Site Conditions</u>: The 0.67 acre lot is located on 1st Street one block northeast of downtown Salida, Colorado. The lot is bordered by 1st Street to the northeast, residential and commercial lots to the northwest and southwest and the Monarch Spur trail to the southeast. The area of the proposed buildings footprints is on a graded gravel parking lot that slopes gently to the east (1%-2%). The site has been previously developed for various purposes previous to its current use as a gravel parking lot.

<u>Subsurface Conditions</u>: Subsurface conditions at the site were observed in five test pits dug just outside the proposed footprints of the structures provided on the site plan. The footprints of the structures were not staked in the field prior to MET's arrival on-site. The approximate locations of the test pits are shown on Figure 1. The test pit logs and legend are presented on Figures 2-6.

The density of the native soil was evaluated with a ⁵/₈-inch penetrometer driven into the various strata with blows from a 10-pound hammer falling 12 inches. This test is similar to the standard penetration test described by ASTM D 1586. Depths at which penetrometer testing were performed and the corresponding resistance values are shown on the test pit logs, Figures 2 and 3.

323 West 1st Development January 12, 2021 Page 2

The subsurface conditions encountered in Test Pits 1-4 consisted of between 0.5-3.5 feet of loose to medium dense manmade fill at the surface, containing various types of debris and rubble. The fill was underlain by brown medium dense to dense gravely sand with cobble to the end of excavation at 8 feet.

Subsurface conditions encountered in test pit 5 were similar with 2 feet of medium dense manmade fill at the surface underlain by brown medium dense sandy gravel with cobble to the end of excavation at 8 feet. Test pits 1-5 were concluded at depths of 8 feet due to the relative density of the soil and rock content encountered.

A sample of the native gravely sand with cobble was collected from Test Pit 1 at a depth of 4 feet. The results of gradation testing performed on the sample obtained from test pit Test Pit 1 are shown on Figure 7 and the Figure 2 test pit log.

Ground water was not encountered in the test pits at the time of excavation. Seasonal ground water was estimated at a depth greater than six feet. In the limited phase II subsurface investigation performed by AEI Consultants on March 19, 2019 four soil borings were completed. Groundwater was encountered at depth ranging from 18.5-20.5 feet in the 3 boring that depths exceeded 7.5 feet.

Ground water observations by MET and AEI Consultants are based on conditions current at the time of the fieldwork performed and may not be indicative of other times or locations. Ground water levels may fluctuate with varying seasonal and weather conditions. It should be expected that groundwater may be encountered for excavations deeper than explorations contained in this report, particularly on the southern edge of the property during annual high water runoff in the ditch located along the Monarch Spur Trail.

<u>Foundation Recommendations</u>: The presence of manmade fills, rubble, and debris is of particular importance to avoid placement of foundation elements. Foundation elements should only be placed on undisturbed, native soils or compacted structural fill to minimize the potential of differential or excessive settlement. The following design and construction criteria are recommended for a shallow foundation system bearing on the undisturbed, native, dense to very dense gravelly cobble with sand or structural fill with an estimated settlement of less than 0.60 inches. The following design and construction criteria are recommended for a spread footing foundation system.

- Footings (interior and exterior) should have a minimum embedment of 48 inches (minimum partial basement depth) from the native surface and bear on the dense gravelly sand, sandy gravel or on structural fill designed for:
 - An allowable soil bearing pressure of 3,000 psf.
 - An allowable coefficient of friction of 0.41.

January 12, 2021

Page 3

- Exterior footings and footings beneath unheated areas should be placed at least 24 inches below the exterior grade for frost protection.
- Spread footings should have a minimum width of 16 inches for continuous footings and 24 inches for isolated pads.
- Continuous foundations walls expected to span greater than 8 feet should have additional reinforcement top and bottom sufficient to achieve the expected span, under the maximum expected factored load.
- Subgrade soils disturbed by excavation operations should be re-compacted prior to placement of foundation elements. If the presence of large rocks makes disturbing the native soil below the footing elevation unavoidable, then the rocks should be removed and replaced with compacted structural fill.
- MET recommends a 4-6 inch layer of compacted structural fill be placed on native cobble soils to avoid point loading of rock or cobble on foundation elements.
- If fill material/soils, contaminated soils, rubble, soft or yielding soils, or any deleterious
 materials are encountered during excavation, MET should be contacted to assess the soil
 conditions and recommend remedial measures. At a minimum, those soils/materials should be
 completely removed to native subgrade soils and replaced with compacted structural fill. Any
 structural fill should be compacted in 6 inch lifts per the recommendations discussed in "Fill
 Materials" until the desired footing elevation is achieved.
- Compacted fill placed against the sides of the foundations to resist lateral loads should be a granular material. Requirements for fill placed and compacted to resist lateral loads are discussed below in <u>"Fill Materials, Placement and Compaction."</u>
- Once the excavation is exposed, but prior to placement of any fill or footing formwork, a representative of MET must be called out to verify the nature and density of the foundation excavations to ensure that relatively uniform soil conditions are present and to confirm that MET's recommendations are consistent with actual conditions. If MET is not able to verify the soil conditions, MET cannot be held responsible for recommendations that may be inconsistent with actual conditions.

<u>Lateral Earth Pressures</u>: The lateral equivalent fluid pressures for soils above a free water surface are recommended below:

Backfill Material	Active	Passive	At Rest
On-site Gravelly Sand	34 pcf	400 pcf	53 pcf
Imported Structural Fill	34 pcf	400 pcf	53 pcf

All foundation walls should be designed for appropriate surcharge pressures such as adjacent buildings, traffic, construction materials and equipment. The pressures recommended above assume drained conditions behind the walls and a horizontal backfill surface. If water or sloping backfill conditions occur, we should be contacted to reevaluate our recommendations.

The native on-site soils, exclusive of organic matter or other deleterious matter, can be used as foundation wall backfill. However, the on-site materials placed within 3 feet of foundation walls should **not** contain materials greater than 3 inches in diameter.

1537 G Street Salida, CO 81201		2035 1/2 Grande Avenue Monte Vista, CO 81144
(719)539-2312	MOUNTAIN	(719)628-2069
Fax (719)530-9111	ENGINEERING AND TESTING, INC.	Fax(719)530-9111

January 12, 2021 Page 4 <u>Floor Slabs</u>: A minimum depth of 6 inches of compacted structural fill or gravel is recommended below floor slabs placed in accordance with the recommendations in the "Fill Material, Placement and Compaction" section of this report. Topsoil, fills, and deleterious material; if encountered below slab areas, should be removed and replaced with the structural fill material recommended under the heading "Fill Materials, Placement and Compaction" in this report.

Floor slab control joints should be used to reduce damage due to shrinkage cracking. Joint spacing is dependent on slab thickness and aggregate size, and should be consistent with recognized guidelines such the Portland Cement Association (PCA) and the American Concrete Institute (ACI). A vapor retarder membrane is recommended for slabs with moisture sensitive floor coverings to reduce moisture in the concrete slab. Concrete placement and curing should be in accordance with the American Concrete Institute recommendations. Improper curing techniques and/or high slump concrete can cause excessive shrinkage, cracking and/or curling of the concrete slab. Floor slab control joints should be used to reduce damage due to shrinkage cracking.

Concrete placement and curing should be in accordance with the American Concrete Institute recommendations. Improper curing techniques and/or high slump concrete can cause excessive shrinkage, cracking and/or curling of the concrete slab.

<u>Site Clearing and Subgrade Preparation:</u> Strip and remove existing vegetation, debris, rubble, contaminated soils, and other deleterious materials from the proposed subgrade areas. All exposed surfaces should be free of mounds and depressions that could prevent uniform compaction.

Stripped materials consisting of vegetation and organic materials should be used to revegetate exposed areas after completion of grading operations. Organic materials should only be placed in non-structural areas. **Onsite rounded or subrounded cobble is not suitable for stabilization aggregate or structural fill.**

<u>Fill Materials, Placement and Compaction:</u> The on-site gravel, exclusive of topsoil and materials greater than 3 inches in diameter, will be suitable for use as fill. Only crushed aggregate should be placed below the ground water elevation. **Imported** structural fill should conform to the following:

<u>Sieve Size</u>	Percent Finer
2 inch	100
No. 4 Sieve	30-70
No. 50 Sieve	10-50
No. 200 Sieve	5-20

323 West 1st Development

Plasticity

Liquid Limit 30 max. Plasticity Index 10 max.

Frozen soils should not be used as fill or backfill, and fill should not be placed over frozen ground. The subgrade preparation during winter should follow ACI 306 Chapter 6 when temperatures fall below freezing.

GES 20-464

Salida, CO 81201	\sim	Monte Vista, CO 81144
(719)539-2312		(719)628-2069
Fax (719)530-9111	ENGINEERING AND TESTING, INC.	Fax(719)530-9111

323 West 1st Development January 12, 2021 Page 5

The following compaction recommendations are provided for structural fill depths less than five (5) feet. If fill materials are placed in excess of five feet, we should be contacted to review the conditions and provide additional recommendations, if necessary. The compaction and moisture contents shown in the following table are recommended for granular soils.

FILL AREA	MIN. COMPACTION	MOISTURE CONTENT
Below Foundations	98% Std. Proctor (ASTM D698) or 93% Mod. Proctor (ASTM D1557)	Optimum Moisture, +/- 3%
Below Floor Slabs	95% Std. Proctor (ASTM D698) or 90% Mod. Proctor (ASTM D1557)	Optimum Moisture, +/- 3%
Landscape & Wall Backfill	90% Std. Proctor (ASTM D698)	Optimum Moisture, +/- 3%

<u>Compliance</u>: Performance of the foundations supported on compacted fills or prepared subgrade depend upon compliance with the above earthwork recommendations. To assess compliance, observation and testing of subgrade soils and fill materials should be performed under the direction of the geotechnical engineer.

<u>Surface Drainage</u>: The exterior ground surface within 10 feet of the building should have a minimum positive slope of 6 inches over 10 feet. A minimum slope of 2¹/₂ inches over 10 feet is recommended in paved areas. Drains and roof downspouts should discharge well beyond the limits of all backfill.

<u>Subsurface Drain System</u>: Increases in moisture of the subgrade soils increase the risk of foundation settlement, and therefore should be reduced or prevented. A perimeter drain system is recommended to reduce moisture seepage into the subgrade soils. The drain should consist of perforated 4-inch diameter, rigid PVC pipe surrounded with free-draining granular material. To prevent contamination of the free-draining granular material filter fabric consisting of Mirafi 140N or approved equal should be placed between the native soils and the gravel collector. The PVC pipe should have a minimum 1% grade and should be sloped to a sump and pump or to a suitable gravity outlet. Clean outs should be provided at minimum intervals of 50 feet.

<u>Concrete:</u> Based on the granular soils encountered in the test pits, we recommend a Type II cement type. Material testing of the foundation concrete for slump, air content and compressive strength is recommended during placement.

<u>Limitations</u>: This study has been conducted in accordance with generally accepted geotechnical engineering practices in this area for use by the client for design purposes. The conclusions and recommendations submitted in this letter are based upon the data obtained from the exploratory test pits and the proposed type of construction. The nature and extent of subsurface variations across the

January 12, 2021 Page 6 site may not become evident until excavation is performed. If during construction, fill, soil, rock or water conditions appear to be different from those described herein, this office should be advised at once so reevaluation of the recommendations may be made. We recommend on-site observation of excavations by a representative of the geotechnical engineer.

The scope of services for this project does not include either specifically or by implication any environmental or biological (e.g. mold, fungi, and bacteria) assessment of the site or identification or prevention of pollutants, hazardous materials or conditions. If the owner is concerned about the potential of such contamination or pollution, other studies should be undertaken.

Please contact me at 719-539-2312 at your convenience if you have any questions of if we can be of further assistance.

Sincerely,

323 West 1st Development

Appendix A General Engineered Fill Recommendations

- A. Clearing and Grubbing
 - a. Areas where excavation or fill placement will be undertaken shall be cleared of all trees, stumps, roots, brush, rubbish, organic soil, or other objectionable matter as determined by the Soil Engineer. Organic soil which is suitable for topsoil shall be stockpiled for later use in landscaping,
- B. Preparation of Area to be Filled
 - a. <u>Scarification</u>: After vegetation and other unsuitable material have been removed, the ground surface of the area to be filled shall be scarified to a depth of at least six (6) inches, and the ground surface is free from ruts, ridges and other uneven features.
 - b. <u>Benching:</u> Where fills are placed upon hillsides or slopes where the slope ratio of the original ground exceeds 5 horizontal to 1 vertical (20%), the original ground slope shall be stepped or benched, and the surfaces of benches scarified to a depth of at least six (6) inches. Ground slopes which are flatter than 5 horizontal to 1 vertical shall be benched when considered necessary by the Soil Engineer.
 - c. <u>Subgrade Compaction:</u> After the foundation for the fill has been scarified and benched as necessary, the ground surface shall be bladed until it is uniform size and brought to the proper moisture content for compaction. The ground surface shall then be compacted to the densities recommended in the geotechnical report.
 - d. <u>Existing Earth Fill:</u> Any unsuitable existing fill on the site shall be removed until undisturbed native soil is exposed. The native soil shall then be scarified, prepared, and compacted and suitable structural fill shall be placed, in accordance with these guidelines.
- C. Compacted Fill
 - a. <u>Fill Materials:</u> Material for fill shall consist of suitable soil as identified in soil reports and/or approved by the Soil Engineer. The fill materials used shall be free of vegetation, frozen material, or other deleterious material. The fill shall no contain particles having a diameter greater than three (3) inches.
 - b. <u>Rock:</u> The maximum rock size in fill materials shall be three (3) inches. Large rocks shall not be allowed to nest and voids between rocks shall be carefully filled with properly compacted soil. No large rocks will be permitted within twelve (12) inches of finished grade.
 - c. <u>Fill Placement:</u> Fill shall be placed in uniform, level layers which do not exceed six (6) inches thickness after compaction. Each layer shall be placed, mixed, and spread in such a manner as to insure uniformity of each layer, and to prevent the formation of layers or zones of material which differ significantly in characteristics from the surrounding fill.

- d. <u>Moisture Control:</u> Prior to compaction, the fill material shall be brought to its Proctor optimum moisture content, plus or minus 3% to insure even and uniform moisture conditions within the layer. The contractor may be required to add water to material in the excavation or borrow areas prior to transporting to the fill if, in the opinion of the Soil Engineer, proper moisture control cannot be obtained by adding water directly to the fill surface.
- e. <u>Compaction Procedure:</u> After each layer has been spread, mixed, and brought to the proper moisture content, it shall be mechanically compacted to the recommended density. Other levels of compaction may also be specified by the Soil Engineer depending upon the type of soil encountered. Compaction of each layer shall be continuous over the entire area of the layer, and compaction equipment shall make sufficient passes to insure uniform and adequate compaction of each layer.
- f. <u>Compaction of Slopes:</u> The face slopes of fills shall be properly compacted. Compaction on face slopes of fills may be accomplished progressively in increments of three (3) to five (5) feet in fill height, or may be done after the fill is brought to its total height.
- D. Quality Control
 - a. <u>Moisture Density Tests:</u> Prior to commencement of fill operations, a Proctor test, shall be made for each soil material anticipated in the excavation and borrow areas. Additional Proctor tests shall be made during construction if different materials are encountered, or if soil mixtures on the fill warrant additional testing. Occasional single-point density tests shall be performed if necessary to verify the appropriateness of the Proctor values being used.
 - b. <u>Density Testing</u>: Field density tests shall be made by the Soil Engineer of the compaction of each layer of fill. At least one test shall be made for each layer of fill, and sufficient suitable compaction of each layer has been achieved. Density tests shall be taken in the compacted material below the disturbed surface. When these tests indicate that the density of any layer of fill or portion thereof has not been properly compacted, the particular layer or portion shall be reworked until the required density has been obtained.
- E. Seasonal Limits
 - a. No fill material shall be placed, spread, or rolled while it is frozen or thawing, or during unfavorable weather conditions. When fill operations are interrupted by weather conditions, fill operations shall not be resumed until the moisture content and density of the previously placed fill are tested for density.

March 19, 2019

Mr. Joe Smith High Country Bank 7360 West Highway 50 Salida, Colorado 81201

Subject: Limited Phase II Subsurface Investigation 323 West 1st Street Salida, Colorado 81201 AEI Project No. 400082

AEI Consultants (AEI) prepared the following report to document the results of a Limited Phase II Subsurface Investigation (Phase II) performed at the above referenced property, hereafter referred to as the "Site" (See Figure 1). The investigation was completed in general accordance with the authorized scope of services outlined in AEI's proposal 62462, signed February 21, 2019.

1.0 SITE DESCRIPTION

The Site consists of a vacant 0.64-acre gravel-surfaced parking lot. The Site is located on the west side of the intersection of West 1st Street and the Monarch Spur Trail in a mixed commercial and residential area of Salida, Colorado (Figure 2).

The Site is slopes gently to the east with elevations ranging between 7,065 to 7,070 feet above mean sea level. Based on the regional topographic gradient, the direction of groundwater flow beneath the Site is inferred to be to the northeast. The Arkansas River is located approximately 678 feet to the northwest.

Based on a review of the Geologic Map of Colorado, the Site is underlain by the Dry Union Formation, which is comprised of sedimentary deposits of the Tertiary Period. According to the United States Department of Agriculture (USDA) Soil Survey, soils at the Site are described as the Dominson Series. Soils from this series are classified as gravelly sandy loam.

Refer to Section 4.1 below for additional information on the site geology and groundwater conditions.

2.0 BACKGROUND

According to a February 4, 2019 Phase I Environmental Site Assessment (ESA) completed by AEI, the Site was developed with several buildings that included warehousing, livery, blacksmiths, outbuilding storage, and a dwelling along West First Street from 1886 through 1904. From 1909 through 1945, the Site was occupied by an auto wrecking business (315 West First Street), the Salida Street Department warehouse (323-327 West First Street), and a beverage bottling operation (309 West First Street). By 1950, with the exception of the auto wrecking and bottling buildings, all of the former structures on the Site had been demolished and replaced with a garage

San Francisco (HQ) | Atlanta | Chicago | Costa Mesa | Dallas | Denver | Los Angeles | Miami | New York | Phoenix | Portland | San Jose

building occupied by the City of Salida Public Works Department (Salida PWD) (323 West First Street). The two remaining commercial buildings (309 and 315 West First Street) were demolished sometime between 1979 and 1984 and the Site was solely occupied by Salida PWD garage (323 West First Street). The Salida PWD continued to operate on the Site until 2009, when the last remaining building was demolished. The Site has been used as a surface parking lot since that time.

During the Phase I ESA, AEI identified the following concerns:

According to a 1945 Sanborn map, a former commercial building with frontage along West First Street (315 West First Street), was occupied at the time by an auto wrecking business. The same Sanborn map also depicted two gasoline underground storage tanks (USTs) within the street in front of this building. While the noted location on the map may not correlate to their actual location, the USTs are presumed to have been associated with this former building and business its operations. AEI cannot rule out the possibility that USTs were historically present on the Site as early as 1945. By 1950, a portion of the Site was redeveloped with a commercial garage building. This building was occupied by the Salida PWD until 2009. According to interviews conducted during this AEI assessment and information from prior reports, operations conducted within the former garage building included fleet vehicle/equipment repair, storage, and offices. In particular, Mr. Kevin Nelson, Inspector with the City of Salida, stated that there were no in-ground features present, such as oil change pits, hydraulic lifts, floor drains/trench drains, or oil/water separators within the garage/repair area of the building. However, Mr. Nelson did state that a concrete sump was present in one of the newer (1995) additions to the building that was used to collect snow melt/wash water from any vehicles or equipment brought in to the building. The sump was reported to be connected to the municipal sewer system and no other inline debris collection system (e.g., separator) was reported to be in use with the sump.

AEI did not uncover any other records regarding the disposition of any former building features during building demolitions. Further, AEI did not uncover any records regarding the removal of the two tanks associated with the former 315 West First Street building. Therefore, based on the unconfirmed disposition of past features of concern, length of time the Site was occupied for automotive wrecking (in at least 1945) and fleet maintenance by the City of Salida (more than 55 years), further investigation of the sump was recommended.

• The Site is listed as a UST site in the regulatory database report and within Colorado Division of Labor and Employment (CDLE) Division of Oil and Public Safety (OPS) records. According to the regulatory database report, the Site is reported to have utilized three galvanized steel USTs that have been permanently closed. The three UST capacities and contents were noted to include the following: one 1,000-gallon gasoline, one 1,000-gallon diesel fuel, and one 500-gallon gasoline.

Records reviewed from OPS included a two-page UST Notification Form from 1986 noting that the three USTs were still in use at that time, did not contain any internal or external protection, and were owned by the City of Salida. No additional details were reported on the 1986 form. However, a one-page letter enclosed in the OPS files that was sent from the City of Salida to

the OPS noted that the City of Salida has discontinued the use of all three USTs effective March 16, 1990 and that the USTs were planned for removal as soon as possible. However, no additional records were identified during this assessment which confirmed the UST removal date(s), the condition of the USTs at the time of removal, or any subsurface sampling at the time of removal to confirm no release had occurred. Based on the unconfirmed disposition of the USTs and undocumented analysis of the subsurface conditions at the time, AEI recommended additional investigation.

3.0 INVESTIGATION EFFORTS

AEI was requested to perform additional investigation, including the collection of soil and groundwater samples in the area of the former USTs and the repair shop, to evaluate if the former operations had adversely impacted the property.

3.1 Health and Safety Plan

A site-specific health and safety plan was prepared, reviewed by onsite personnel, and kept onsite for the duration of the fieldwork.

3.2 Permitting and Utility Clearance

Drilling permits were not required for this investigation. The public underground utility locating service Colorado 811 was notified to identify public utilities in the work area. Private utility locating was conducted by Ground Penetrating Radar Systems (GPRS) of Denver, Colorado to identify underground utilities on the subject property.

3.3 Geophysical Survey

On February 28, 2019, a geophysical survey was conducted by GPRS (Appendix A). The purpose of the survey was to determine if any USTs remain on the Site or to locate disturbed soils that may represent former UST basins. The geophysical survey was conducted using ground penetrating radar (GPR). The geophysical survey did not identify any anomalies indicative of USTs or disturbed soils indicative of a former UST basin.

The client should be aware of the inherent limitations of geophysical surveying methods and that above and underground utilities and other man-made or natural features (i.e. automobiles, debris piles, tree roots, reinforced concrete, certain soil conditions, etc.), if in the area of the survey, may decrease the effectiveness of the survey. The client should be aware that the lack of a detection of a feature from a geophysical survey does not mean that the feature does not exist, only that it was not detected.

3.4 Drilling and Soil Sample Collection

On February 28, 2019, four soil borings (SB-1 through SB-4) were advanced by Site Services of Golden, Colorado using a truck-mounted hollow stem auger. The borings were advanced to depths between 14 and 28 feet below ground surface (bgs). The location and purpose of each boring are listed below:

- Boring SB-1 was advanced near the location of the former Salida PWD UST for the collection of soil and groundwater samples.
- Boring SB-2 was advanced near the location of the former UST identified in Sanborn Maps for the collection of soil and groundwater samples.
- Boring SB-3 was advanced near the southern portion of the former Salida PWD building for the collection of soil and groundwater samples.
- Boring SB-4 was advanced near the former Salida PWD UST for the collection of soil samples.

The borings were advanced using 6 5/8-inch outer diameter auger. Soil samples were collected by advancing a five-foot long California split spoon. After each interval, the spoon was retrieved, the spoon barrel disassembled, and the sample liner transferred to the onsite geologist.

Soils from borings SB-1 through SB-4 were evaluated for the purposes of lithologic logging, headspace testing, and sample collection for laboratory analyses. Soil samples were obtained by removing the soil from the split-spoon, placed in four-ounce glass jars, and capped. Upon collection, each sample was labeled with the project name, boring number, sample depth, and date/time of sampling. After labeling, each sample was entered onto chain-of-custody documentation and placed into an iced cooler for transportation to a State of Colorado-certified laboratory for analyses.

Soils were visually inspected for the potential presence of impacted soils. Recovered soils were described on detailed boring logs in general conformance with the United Soil Classification System (USCS). The boring logs for borings SB-1 through SB-4 are presented in Appendix B.

Headspace field measurements were measured with a photoionization detector (PID) equipped with an electrodeless 10.6 eV ultraviolet lamp for detecting the potential presence of organic vapors in the soil samples. To initiate the headspace testing procedure, soil samples were removed from the spoon, placed into labeled, plastic bags, and sealed for conducting the tests. Due to the weather conditions at the time of sampling the plastic bags were placed on the dashboard with the defrost running to assist with the volatilization of any contaminants in the sample. After a sufficient duration of time had elapsed for vapor build-up inside the bags, each bag was then punctured with the PID probe tip to measure the concentration of any gases in the headspace. Measurements of the headspace were obtained in the parts per million (ppm) range for total organic vapors. The results of the headspace tests (PID readings) for borings SB-1 through SB-4 were recorded on the boring logs, presented in Appendix B.

Down-hole equipment was decontaminated prior to drilling and between successive boring locations.

3.5 Groundwater Sample Collection

On February 28, 2019, groundwater samples were collected from borings SB-1, SB-2 and SB-3 by inserting temporary PVC casing into the boreholes and collecting the samples using a new PVC tubing and a foot valve.

3.6 Boring Abandonment

Following completion of sample collection and removal of tooling, the borings were backfilled with soil cuttings and hydrated bentonite chips and completed at the surface to match the surrounding conditions.

3.8 Laboratory Analyses

The soil and groundwater samples were labeled and placed into a cooler with ice following sampling. The samples were transferred under appropriate chain-of-custody documentation to SGS Accutest of Wheat Ridge, Colorado. Laboratory analytical documentation is provided in Appendix C.

Two soil samples from borings SB-1 and SB-4 were analyzed for:

- Benzene, toluene, ethylbenzene and xylenes (BTEX) by EPA Method 8260
- Polynuclear aromatic hydrocarbons (PAHs) by EPA Method 8270

Two soil samples from borings SB-2 and SB-3 were analyzed for:

- Volatile organic compounds (VOCs) by EPA Method 8260
- PAHs by EPA Method 8270

One groundwater sample from boring SB-1 was analyzed for:

- BTEX by EPA Method 8260
- PAHs by EPA Method 8270

Two groundwater samples from borings SB-2 and SB-3 were analyzed for:

- VOCs by EPA Method 8260
- PAHs by EPA Method 8270

3.9 Investigation Derived Wastes

No investigation derived waste was created during this investigation.

4.0 FINDINGS

The Colorado Department of Public Health and Environment (CDPHE) Hazardous Materials and Waste Management Division has the responsibility for overseeing soil and groundwater cleanups in Colorado.

The soil analytical results were compared with the Environmental Protection Agency (EPA) Regional Screening Levels (RSLs) for Residential sites and the EPA's RSLs for Worker Protection (Commercial sites) (both dated November of 2017), and the CDPHE Groundwater Protection Values Soil Cleanup Table (CGWPVSC) dated March of 2014.

The Colorado Department of Public Health and Environment (CDPHE) Hazardous Materials and Waste Management Division has the responsibility for overseeing soil and groundwater cleanups

in Colorado under a variety of regulatory programs. Soil sampling results were compared to the Soil Remediation Objectives (SROs) listed in the CDPHE's Dry Cleaner Remediation Guidance Document, dated March 2006.

The groundwater analytical results were compared to the Colorado Basic Standards for Groundwater (CBSGW), which were issued by the CDPHE's Water Quality Control Commission (WQCC) in January of 1987, with amended rules taking effect in December of 2016.

The OPS has established the Tier 1 Risk Based Screening Levels (Tier 1 RBSL) for UST-related volatile organic compounds (VOCs) and polynuclear aromatic hydrocarbons (PAHs). The Tier 1 RBSLs were revised in October of 2005 and published in the Petroleum Storage Tank Owner/Operator Guidance Document to assist owners and/or operators in conducting release investigations, performing initial response actions, preparing site characterization reports, and preparing and implementing corrective action plans.

4.1 Geology and Hydrogeology

Unconsolidated sediment encountered in each of the borings generally consisted of sands with gravel, cobble and boulders (Appendix B). AEI attempted to collect blow counts in the borings, however due to cobbles and boulders in the subsurface, blow counts exceeded 50 after two to four inches. In boring SB-2 a six-inch thick concrete pad was encountered at 0.4 feet bgs.

Saturated soils were encountered at 19 feet bgs in borings SB-1, SB-2 and SB-3. Groundwater was measured in boring SB-1, SB-2 and SB-3 at depths ranging between 18.5 and 20.5 feet bgs. Groundwater was not encountered in boring SB-4.

4.2 Soil Sample Analytical Results

The following information is a summary of the soil sample analytical test results (Appendix C). This information has also been included in Table 1.

- Toluene was reported at a concentration of 0.0019 in boring SB-2. The concentration does not exceed the regulatory screening levels.
- All 18 PAHs were reported in the soil sample collected from boring SB-2. Of the PAHs, only benzo(a)pyrene exceeded any of the regulatory screening levels. The reported concentration of benzo(a)pyrene at 0.159 milligrams per kilogram (mg/kg) exceeded the OPS Tier 1 RBSL for soil exposure of 0.062 mg/kg and the EPA RBSL for residential exposure of 0.11 mg/kg; however, it was below the OPS Groundwater Protection Level of 4.8 mg/kg.
- The reported concentrations of all remaining VOCs and PAHs in the samples from borings (SB-1, SB-3 and SB-4) were below the laboratory method detection limits.

4.3 Groundwater Sample Analytical Results

The following information is a summary of the groundwater sample analytical test results (Appendix C). This information has also been included in Table 2.

- Methyl ethyl ketone (MEK) was reported in borings SB-2 and SB-3 at 22.2 and 9.9 micrograms per liter (µg/L), respectively, which do not exceed the regulatory screening levels.
- The remaining VOCs and PAHs were not reported above the laboratory method detection limits.

5.0 SUMMARY AND CONCLUSIONS

AEI has completed a Phase II at the Site. The purpose of the Phase II at the Site was to assess the potential for USTs at the Site and to evaluate current conditions related to the former operation of USTs and repair operations associated with the DPW. A total of four borings (SB-1 through SB-4) were advanced at the Site for the collection of soil and groundwater samples. A geophysical survey using GPR was conducted at the site in an attempt to locate any USTs that may remain on the Site or locate disturbed soils indicative of former UST basins.

A summary of the investigation findings includes:

- The geophysical survey did not identify any anomalies indicative of USTs at the Site.
- Toluene was reported at a concentration of 0.0019 mg/kg in the soil sample collected at 8.5 feet bgs in boring SB-2. The concentration of toluene does not exceed any of the regulatory screening levels.
- The remaining VOCs were not reported in soil samples collected from the remaining borings above the laboratory method detection limits.
- All 18 PAHs were reported in boring SB-2, completed at the reported location of the former UST identified in Sanborn Maps from 1945. Of the reported PAHs in boring SB-2, only benzo(a)pyrene exceeded any of the regulatory screening levels. The reported concentration of benzo(a)pyrene at 0.159 mg/kg exceeded the OPS Tier 1 RBSL for soil exposure of 0.062 mg/kg and the EPA RBSL for residential exposure of 0.11 mg/kg but was below the OPS Tier 1 Groundwater Protection Level of 4.8 mg/kg.
- PAHs were not reported in soil samples collected from the remaining borings above the laboratory method detection limits.
- Methyl ethyl ketone was reported in the groundwater samples from borings SB-2 and SB-3 at 22.2 and 9.9 μ g/L, respectively, which do not exceed the regulatory screening levels.
- The remaining VOCs and PAHs in groundwater were not reported above the laboratory method detection limits

Although benzo(a)pyrene was reported in boring SB-2 at concentrations exceeding the regulatory levels for soil exposure, this concentration is below the OPS Tier 1 screening level based on groundwater protection. Based on the depth of the impacted soils at 8.5 feet bgs and the lack of groundwater impacts, the only potential exposure route would be to workers during excavation or utility construction. Direct contact with the soil at 8.5 feet bgs appears unlikely. Based on the depth of the impacts and lack of groundwater impacts AEI does not recommend any additional investigation. However it is recommended that a Material Management Plan (MMP) be created for the Site so workers are aware of potential exposure to impacted soils and proper soil management, sampling and disposal protocols are established if the soils are disturbed.

6.0 REPORT LIMITATIONS AND RELIANCE

This report presents a summary of work completed by AEI Consultants. The completed work includes observations and descriptions of site conditions encountered. Where appropriate, it includes analytical results for samples taken during the course of the work. The number and location of samples are chosen to provide the requested information, subject to scope of work for which AEI was retained and limitations inherent in this type of work, but it cannot be assumed that they are representative of areas not sampled. This report should not be regarded as a guarantee that no further contamination beyond that which could have been detected within the scope of this investigation is present beneath the subject property. Undocumented, unauthorized releases of hazardous material, the remains of which are not readily identifiable by visual inspection and are of different chemical constituents, are difficult and often impossible to detect within the scope of a chemical specific investigation.

Any conclusions and/or recommendations are based on these analyses and observations, and the governing regulations. Conclusions beyond those stated and reported herein should not be inferred from this document. These services were performed in accordance with generally accepted practices, in the environmental engineering and construction field, which existed at the time and location of the work. No other warranty, either expressed or implied, has been made.

This investigation was prepared for the sole use and benefit of High Country Bank. All reports, both verbal and written, whether in draft or final, are for the benefit of High Country Bank. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's Proposal and Standard Terms & Conditions executed by High Country Bank. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

If there are any questions regarding our investigation, please do not hesitate to contact AEI at 720.238.4582.

Sincerely, **AEI Consultants**

APPENDIX A

GEOPHYSICAL SURVEY REPORT

Subsurface Investigation for Storage Tanks/Utilities

Prepared For: AEI Consultants

Prepared By: Jordan Bradish Project Manager-CO/WY 3/6/2019

March, 6, 2019

AEI Consultants Attn: Jason Grubb Site: 323 West First St., Salida, CO

We appreciate the opportunity to provide this report for our work completed on 2/28/2019 at the above address in Salida, CO.

PURPOSE

The purpose of this project was to search for underground storage tanks (USTs), UST-related piping and/or underground utilities prior to drilling three soil boring locating. The interior of the buildings on site were excluded from the scope of this project.

EQUIPMENT

- 400 MHz GPR Antenna. The antenna is mounted in a stroller frame which rolls over the surface. The surface needs to be reasonably smooth and unobstructed in order to obtain readable scans. Obstructions such as curbs, landscaping, and vegetation will limit the feasibility of GPR. The data is displayed on a screen and marked in the field in real time. GPR works by sending pulses of energy into a material and recording the strength and the time required for the return of the reflected signal. Reflections are produced when the energy pulses enter into a material with different electrical properties from the material it left. The strength of the reflection is determined by the contrast in signal speed between the two materials. The total depth achieved can be as much as 8' or more with this antenna but can vary widely depending on the conductivity of the materials. Depths provided should always be treated as estimates as their accuracy can be affected by multiple factors. For more information, please visit: Link
- Electromagnetic Pipe Locator. The EM locator can detect the electromagnetic fields from live power or radio frequency signals. It can also be used in conjunction with a transmitter to connect directly to accessible, metallic pipes, risers, or tracer wires. A current is sent through the pipe or tracer wire at a specific frequency and the resulting EM field can then be detected by the receiver. The receiver is moved over the surface without coming in contact with the ground so it is not affected by terrain. Depths provided should always be treated as estimates as their accuracy can be affected by multiple factors. Depths achieved can be as much as 20' depending on the type of signal being traced or methods used. For more information, please visit: Link

PROCESS

The EM pipe locator was used to connect to accessible, traceable pipes that may be tank-related such as vent pipes or product lines. A current is induced onto the pipe which creates an electromagnetic field that can be traced using the receiver. We can then attempt to trace these pipes to their origin or end point and paint or flag their locations.

Initial GPR scans were collected in order to evaluate the data and calibrate the equipment. Based on these findings, a scanning strategy is formed, typically consisting of scanning the entire area in a grid with 3'-5' scan spacing in order to locate any potential UST's that may remain at the site. With this site, due to obstructions, some area's were limited to shorter scans. The GPR data is interpreted in real time and anomalies in the data are located and marked on the surface along with their depths using spray paint, pin flags, etc. Depths are dependent on the dielectric of the materials being scanned so depth accuracy can vary throughout a site. Relevant scan examples were saved and will be provided in this report.

LIMITATIONS

Please keep in mind that there are limitations to any subsurface investigation. The equipment may not achieve maximum effectiveness due to soil conditions, above ground obstructions, reinforced concrete, and a variety of other factors. No subsurface investigation or equipment can provide a complete image of what lies below. Our results should always be used in conjunction with as many methods as possible including consulting existing plans and drawings, exploratory excavation or potholing, visual inspection of above ground features, and utilization of services such as One Call/811.

FINDINGS

We found that the soil allowed for maximum GPR depth penetration of 2'-3' in most areas. We were able to locate one unknown line with the RD. We were not able to locate any known utilities on site. The data seen on site wasn't consistent with UST data signatures

The following pages will provide photos and further explanation of our findings.

CLOSING

GPRS, Inc. has been in business since 2001, specializing in underground storage tank location, concrete scanning, utility locating, and shallow void detection for projects throughout the United States. I encourage you to visit our website (<u>www.gprsinc.com</u>) and contact any of the numerous references listed.

GPRS appreciates the opportunity to offer our services, and we look forward to continuing to work with you on future projects. Please feel free to contact us for additional information or with any questions you may have regarding this report.

Signed,

Jordan Bradish

LIMITED IMPACT & MAJOR IMPACT City Of SUBMITTAL REQUIREMENTS 448 East First Street, Suite 112 Salida, CO 81201

Phone: 719-530-2626 Fax: 719-539-5271 Email: planning@cityofsalida.com

An application is meant to highlight the requirements and procedures of the Land Use Code. With any development application, it is the responsibility of the applicant to read, understand, and follow <u>all</u> of the provisions of the Land Use Code.

1. PROCEDURE (Section 16-3-80)

A. Development Process (City Code Section 16-3-50) Any application for approval of a development permit shall include a written list of information which shall constitute the applicant's development plan, which shall be that information necessary to determine whether the proposed development complies with this Code. The development plan shall include the following, as further specified for each level of review on the pre-application checklist:

- 1. Pre-Application Conference (Limited Impact and Major Impact Review Applications)
- 2. Submit Application
- 4. Staff Review. Staff report or decision forwarded to the applicant (Administrative review)
- 5. Public Notice
- 6. Public Hearing with Planning Commission (Limited Impact and Major Impact Review Applications)
- 7. Public Notice
- 8. Hearing Conducted by City Council (Major Impact Review)

B. Application Contents (City Code Section (16-3-50) A General Development Agreement completed.

- ✓ 2. A copy of a current survey or the duly approved and recorded subdivision plat covering the subject lots where the proposal is for development on previously subdivided or platted lots;
- \checkmark 3. A brief written description of the proposed development signed by the applicant;
 - 4. Special Fee and Cost Reimbursement Agreement completed.
 - 5. Public Notice.
 - a) List. A list shall be submitted by the applicant to the city of adjoining property owners' names and addresses. A property owner is considered adjoining if it is within 175 feet of the subject property regardless of public ways. The list shall be created using the current Chaffee County tax records.
 - b) Postage Paid Envelopes. Each name on the list shall be written on a postage-paid envelope. Postage is required for up to one ounce. Return Address shall be: City of Salida, 448 E. First Street, Suite 112, Salida, CO 81201.
 - c) Applicant is responsible for posting the property and submittal of notarized affidavits for proof of posting the public notice.

✓ 6. Applications for Limited Impact Review must submit six (6) copies of application materials and applications for Major Impact Review must submit twelve (12) copies of application materials.

✓ 7. Developments involving construction shall provide the following information:

(i) A development plan map, at a scale of one (1) inch equals fifty (50) feet or larger with title, date, north arrow and scale on a minimum sheet size of eight and one-half ($8^{1/2}$) inches by eleven (11) inches, which depicts the area within the boundaries of the subject lot, including:

a. The locations of existing and proposed land uses, the number of dwelling units and the square footage of building space devoted to each use;

b. The location and dimensions, including building heights, of all existing and proposed Buildings or structures and setbacks from lot lines or building envelopes where exact dimensions are not available;

- c. Parking spaces;
- d. Utility distribution systems, utility lines, and utility easements;
- e. Drainage improvements and drainage easements;
- f. Roads, alleys, curbs, curb cuts and other access improvements;
- g. Any other improvements;
- h. Any proposed reservations or dedications of public right-of-way, easements or other public lands, and
- i. Existing topography and any proposed changes in topography, using five-foot contour intervals or ten-foot contour intervals in rugged topography.
 - (ii) 24" x 36" paper prints certified by a licensed engineer and drawn to meet City specifications to depict the following:
 - a. Utility plans for water, sanitary sewer, storm sewer, electric, gas and telephone lines;
 - b. Plans and profiles for sanitary and storm sewers; and
 - c. Profiles for municipal water lines; and
 - d. Street plans and profiles.

(iii) Developments in the major impact review procedure shall provide a development plan map on paper prints of twenty-four (24) inches by thirty-six (36) inches, with north arrow and scale, and with title and date in lower right corner, at a scale of one (1) inch equals fifty (50) feet or larger which depicts the area within the boundaries of the subject lots and including those items in Section 16-3-40(a) (3).

8. Any request for zoning action, including review criteria for a requested conditional use (Sec. 16-4-190) or zoning variance (Sec. 16-4-180);

9. Any subdivision request including a plat meeting the requirements of Section 16-6-110;

▶ 10. Any other information which the Administrator determines is necessary to determine whether the proposed development complies with this Code, including but not limited to the following:

(i) A tabular summary of the development proposal, which identifies the total proposed development area in acres, with a breakdown of the percentages and amounts devoted to specific land uses; total number and type of proposed residential units; total number of square feet of proposed nonresidential space; number of proposed lots; and sufficient information to demonstrate that the plat conforms with all applicable dimensional standards and off-street parking requirements.

(ii) A description of those soil characteristics of the site which would have a significant influence on the proposed use of the land, with supporting soil maps, soil logs and classifications sufficient to enable evaluation of soil suitability for development purposes. Data furnished by the USDA Natural Resource Conservation Service or a licensed engineer shall be used. The data shall include the shrink/swell potential of the soils, the groundwater levels and the resulting foundation requirements. Additional data may be required by the City if deemed to be warranted due to unusual site conditions.

(iii) A report on the geologic characteristics of the area, including any potential natural or manmade hazards which would have a significant influence on the proposed use of the land, including but not limited to hazards from steep or unstable slopes, rockfall, faults, ground subsidence or radiation, a determination of what effect such factors would have, and proposed corrective or protective measures.

- (iv) Engineering specifications for any improvements.
- (v) A plan for erosion and sediment control, stabilization and revegetation.

(vi) A traffic analysis prepared by a qualified expert, including projections of traffic volumes to be generated by the development and traffic flow patterns, to determine the impacts of a proposed development on surrounding City streets and to evaluate the need for road improvements to be made.

(vii) A storm drainage analysis consisting of the following:

(a) A layout map (which may be combined with the topographic map) showing the method of moving storm sewer water through the subdivision shall be provided. The map shall also show runoff concentrations in acres of drainage area on each street entering each intersection. Flow arrows shall clearly show the complete runoff flow pattern at each intersection. The location, size and grades of culverts, drain inlets and storm drainage sewers shall be shown, as applicable.

(b) The applicant shall demonstrate the adequacy of drainage outlets by plan, crosssection and/or notes and explain how diverted stormwater will be handled after it leaves the subdivision. Details for ditches and culverts shall be submitted, as applicable.

(c) The projected quantity of stormwater entering the subdivision naturally from areas outside of subdivision and the quantities of flow at each pickup point shall be calculated.

(viii) Evidence of adequate water supply and sanitary sewer service - Data addressing the population planned to occupy the proposed subdivision and future development phases and other developments that may need to be served by extensions of the proposed water supply and sewage disposal systems. The resulting domestic, irrigation and fire flow demands shall be expressed in terms of gallons of water needed on an average day and at peak time, and the resulting amounts of sewage to be treated shall be expressed in gallons per day.

(ix) An analysis shall be submitted addressing how water for domestic use and for fire flows is to be provided, along with the collection and treatment of sewage generated by the property to be subdivided.

(x) A statement shall be submitted addressing the quantity, quality and availability of any water that is attached to the land.

(xi) A preliminary estimate of the cost of all required public improvements, tentative development schedule (with development phases identified), proposed or existing covenants and proposed maintenance and performance guarantees. The applicant shall submit, at least in summary or outline form, any agreements as may be required by Section 16-2-70, relating to improvements and dedications.

(xii) If intending to use solar design in the development, include a description of the steps that have been taken to protect and enhance the use of solar energy in the proposed subdivision. This shall include how the streets and lots have been laid out and how the buildings will be sited to enhance solar energy usage.

(xiii) If applicable, a report shall be submitted identifying the location of the one-hundred-year floodplain and the drainage ways near or affecting the property being subdivided. If any portion of a one-hundred-year floodplain is located on the property, the applicant shall also identify the floodway and floodway fringe area. The applicant shall also describe the steps that will be taken to ensure that development locating in the floodway fringe area is accomplished in a manner which meets Federal Insurance Administration standards.

(xiv) If applicable, a report shall be submitted on the location of wetlands, as defined by the U.S. Army Corp of Engineers, on or affecting the property being subdivided. The report shall outline the development techniques planned to ensure compliance with federal, state and local regulations.

(xv) A landscape plan, meeting the specifications of Section 16-8-90.

(xvi) If applicable, a description of how the proposal will comply with the standards of any of the overlays.

(xvii) A site plan for parks, trails and/or open space meeting the requirements of Section 16-6-110 below. If an alternate site dedication or fee in lieu of dedication is proposed, detailed information about the proposal shall be submitted.

(xviii) All development and subdivision naming shall be subject to approval by the City. No development or subdivision name shall be used which will duplicate or be confused with the name of any existing street or development in the City or the County;

11. An access permit from the Colorado Department of Transportation; and

12. A plan for locations and specifications of street lights, signs and traffic control devices.

2. REVIEW STANDARDS (If necessary, attach additional sheets)

The application for Limited or Major Impact Review shall comply with the following standards.

1. Consistency with Comprehensive Plan. The use shall be consistent with the City's Comprehensive Plan.

This development represents traditional neighborhood development with a dense mixture of uses taking advantage of existing infrastructure near the center of the city. (Pages 3-4 and 3-5)

- 2. Conformance to Code. The use shall conform to all other applicable provisions of this Land Use Code, including, but not limited to:
 - a. Zoning District Standards. The purpose of the zone district in which it is located, the dimensional standards of that zone district, and any standards applicable to the particular use, all as specified in Article 5, Use and Dimensional Standards.

The proposed subdivision conforms to the concurrently proposed Planned Development.

b. Site Development Standards. The parking, landscaping, sign and improvements standards.

Parking, landscaping, sign, and improvements per the concurrently proposed planned development.

3. Use Appropriate and Compatible. The use shall be appropriate to its proposed location and be compatible with the character of neighboring uses, or enhance the mixture of complementary uses and activities in the immediate vicinity.

The mixed use on this site provides a transition from commercial downtown to the surrounding residential neighborhoods.

4. Nuisance. The operating characteristics of the use shall not create a nuisance and the impacts of the use on surrounding properties shall be minimized with respect to noise, odors, vibrations, glare, and similar conditions.

No nuisances are anticipated.

5. Facilities. There shall be adequate public facilities in place to serve the proposed use, or the applicant shall propose necessary improvements to address service deficiencies which the use would cause.

Water main improvements are required to be built by the applicant from I Street to the east edge of the site, per the Planned Development.

6. Environment. The use shall not cause significant deterioration to water resources, wetlands, wildlife habitat, scenic characteristics, or other natural features. As applicable, the proposed use shall mitigate its adverse impacts on the environment.

No adverse environmental impacts are anticipated.

Schedule BI & BII

Commitment No: 19-08153

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

- 1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.
- 2. Pay the agreed amount for the estate or interest to be insured.
- 3. Pay the premiums, fees, and charges for the Policy to the Company.
- 4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.
- 5. Payment of all taxes and assessments now due and payable as shown on a certificate of taxes due from the County Treasurer or the County Treasurer's Authorized Agent.
- 6. Evidence that all assessments for common expenses, if any, have been paid.
- 7. Final Affidavit and Agreement executed by Owners and/or Purchasers must be provided to the Company
- 8. Warranty Deed sufficient to convey the fee simple estate or interest in the land described or referred to herein, to the Proposed Insured, Schedule A, Item 2A.
- 9. Deed of Trust sufficient to mortgage the fee simple estate or interest in the land described or referred to herein, to the Proposed Insured, Schedule A, Item 2B.
- 10. Deed from RJPA Holdings, LLC to 323 W 1st, LLC, a Colorado limited liability company, conveying that portion of subject property described in Quit Claim Deed recorded July 24, 2015 as Reception No. 421429.
- 11. Please be advised that our search did not disclose any open Deeds of Trust of Record. If you have knowledge of an outstanding obligation, please contact us immediately for further review prior to closing.
- 12. Recorded Statement of Authority signed by the member (s) of 323 W 1st, LLC, authorized to transact business on behalf of the company.

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

- 1. Any facts, rights, interests or claims which are not shown by the Public Records, but which could be ascertained by an inspection of the Land or by making inquiry of persons in possession thereof.
- 2. Easements, or claims of easements, not shown by the Public Records.
- 3. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, and any facts which a correct land survey and inspection of the Land would disclose, and which are not shown by the Public Records.
- 4. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown in the Public Records.
- 5. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

Note: Exception number 5. will be removed from the policy provided the Company conducts the closing and settlement service for the transaction identified in the commitment

- 6. Any and all unpaid taxes, assessments and unredeemed tax sales.
- 7. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof.
- 8. Any water rights, claims of title to water, in, on or under the Land.

This page is only a part of a 2016 ALTA[®] Commitment for Title Insurance issued by First American Title Insurance Company. ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

Schedule C

File No.: 19-08153

The Land referred to herein below is situated in the County of Chaffee, State of Colorado, and is described as follows:

Lots No. 6, 7, 8 and 9 Block No. 19 City of Salida Chaffee County, Colorado and

Fractional Lots Four (4) and Five (5) in Block 19 of the City of Salida and a strip of land between said Block 19 and the right-of-way of the Denver and Rio Grande Western Railroad (Monarch branch) all of which is more particularly described as a Tract of land located within the City of Salida, Chaffee County, Colorado and being part of fractional Block No. 19 of Original Salida and part of the adjoining railroad reservation land being described as follows:

Beginning at the common corner of Lots 5 and 6 of said Block No. 19 located on First Street;

Thence South 48°48'24" West along the common lot line of said Lots 5 and 6 for a distance of 150.00 feet to the Northeasterly alley boundary of said Block No. 19;

Thence South 41°11'36" East along said Northeasterly alley boundary 53.76 feet to the Northerly boundary of the Denver and Rio Grande Western Railroad - Monarch Branch;

Thence North 63°13'57" East along said railroad boundary 154.88 feet to the Southwesterly boundary of said First Street; Thence North 41°11'36" West along said street boundary 92.34 feet to the point of beginning.

TOGETHER WITH

THAT PORTION OF THE FOLLOWING DESCRIBED ALLEY LOCATED WITHIN BLOCK 19, IN THE CITY OF SALIDA, CHAFFEE COUNTY, COLORADO, THAT ABUTS LOTS 5,6,7, 8 AND 9, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT THE INTERSECTION OF THE NORTHEASTERLY RIGHT-OF-WAY OF SAID ALLEY IN BLOCK 19 AND THE SOUTHEASTERLY BOUNDARY OF SAID BLOCK 19, FROM WHENCE THE INTERSECTION OF SAID SOUTHEASTERLY BOUNDARY OF BLOCK 19 AND THE NORTHEASTERLY RIGHT-OF-WAY OF SECOND STREET BEARS SOUTH 60°24'50" WEST, A DISTANCE OF 178.58 FEET;

THENCE SOUTH 60°24'50" WEST ALONG SAID SOUTHEASTERLY BOUNDARY OF BLOCK 19, A DISTANCE OF 2.69 FEET;

THENCE NORTH 40°46'31" WEST, A DISTANCE OF 215.34 FEET TO THE SOUTHEASTERLY RIGHTOF-WAY OF I STREET;

THENCE NORTH 49°13'29" EAST ALONG SAID RIGHT-OF-WAY OF I STREET, A DISTANCE OF 2.42 FEET TO SAID NORTHEASTERLY RIGHT-OF-WAY OF THE ALLEY WITHIN BLOCK 19;

THENCE SOUTH 40°49'58" EAST ALONG SAID NORTHEASTERLY ALLEY RIGHT-OF-WAY, A DISTANCE OF 215.86 FEET TO THE POINT OF BEGINNING.

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT—READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I—Requirements; Schedule B, Part II—Exceptions; and the Commitment Conditions, *First American Title Insurance Company*, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I—Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

A Policy-Issuing Agent of First American Title Insurance Company

If this jacket was created electronically, it constitutes an original document.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I—Requirements; Schedule B, Part II—Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

COMMITMENT CONDITIONS

1. DEFINITIONS

- (a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
- (b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
- (c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
- (d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
- (e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
- (f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
- (g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
- (h) "Title": The estate or interest described in Schedule A.
- 2. If all of the Schedule B, Part I-Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.
- 3. The Company's liability and obligation is limited by and this Commitment is not valid without:
 - (a) the Notice;
 - (b) the Commitment to Issue Policy;
 - (c) the Commitment Conditions;
 - (d) Schedule A;
 - (e) Schedule B, Part I-Requirements;
 - (f) Schedule B, Part II-Exceptions; and
 - (g) a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

- (a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
 - (i) comply with the Schedule B, Part I-Requirements;
 - (ii) eliminate, with the Company's written consent, any Schedule B, Part II-Exceptions; or
 - (iii) acquire the Title or create the Mortgage covered by this Commitment.
- (b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
- (c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
- (d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
- (e) The Company shall not be liable for the content of the Transaction Identification Data, if any.

This page is only a part of a 2016 ALTA[®] Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I—Requirements; Schedule B, Part II— Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright 2006-2016 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and
Reprinted under license from the American Land Title Association.

(g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

- (a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
- (b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
- (c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
- (d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
- (e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
- (f) When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION

The Policy contains an arbitration clause. All arbitrable matters when the Proposed Policy Amount is \$2,000,000 or less shall be arbitrated at the option of either the Company or the Proposed Insured as the exclusive remedy of the parties. A Proposed Insured may review a copy of the arbitration rules at http://www.alta.org/arbitration.

This page is only a part of a 2016 ALTA[®] Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I—Requirements; Schedule B, Part II— Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

DISCLOSURE STATEMENT

Pursuant to C.R.S. 30-10-406(3)(a) all documents received for recording or filing in the Clerk and Recorder's office shall contain a top margin of at least one inch and a left, right and bottom margin of at least one-half of an inch. The Clerk and Recorder will refuse to record or file any document that does not conform to the requirements of this section.

NOTE: If this transaction includes a sale of the property and the price exceeds \$100,000.00, the seller must comply with the disclosure/withholding provisions of C.R.S. 39-22-604.5 (Nonresident withholding).

NOTE: Colorado Division of Insurance Regulations 8-1-2 requires that "Every title insurance company shall be responsible to the proposed insured(s) subject to the terms and conditions of the title commitment, other than the effective date of the title commitment, for all matters which appear of record prior to the time of recording whenever the title insurance company, or its agent, conducts the closing and settlement service that is in conjunction with its issuance of an owner's policy of title insurance and is responsible for the recording and filing of legal documents resulting from the transaction which was closed.

Pursuant to C.R.S. 10-11-122, the company will not issue its owner's policy or owner's policies of title insurance contemplated by this commitment until it has been provided a Certificate of Taxes due or other equivalent documentation from the County Treasurer or the County Treasurer's authorized agent; or until the Proposed Insured has notified or instructed the company in writing to the contrary.

The subject property may be located in a special taxing district. A Certificate of Taxes due listing each taxing jurisdiction shall be obtained from the County Treasurer or the County Treasurer's authorized agent. Information regarding special districts and the boundaries of such districts may be obtained from the Board of County Commissioners, the County Clerk and Recorder, or the County Assessor.

NOTE: Pursuant to CRS 10-11-123, notice is hereby given:

This notice applies to owner's policy commitments containing a mineral severance instrument exception, or exceptions, in Schedule B, Section 2.

- A. That there is recorded evidence that a mineral estate has been severed, leased, or otherwise conveyed from the surface estate and that there is a substantial likelihood that a third party holds some or all interest in oil, gas, other minerals, or geothermal energy in the property; and
- B. That such mineral estate may include the right to enter and use the property without the surface owner's permission.

NOTE: Pursuant to Colorado Division of Insurance Regulations 8-1-2, Affirmative mechanic's lien protection for the Owner may be available (typically by deletion of Exception no. 4 of Schedule B, Section 2 of the Commitment from the Owner's Policy to be issued) upon compliance with the following conditions:

- A. The land described in Schedule A of this commitment must be a single family residence which includes a condominium or townhouse unit.
- B. No labor or materials have been furnished by mechanics or material-men for purposes of construction on the land described in Schedule A of this Commitment within the past 6 months.
- C. The Company must receive an appropriate affidavit indemnifying the Company against un-filed mechanic's and material-men's liens.
- D. The Company must receive payment of the appropriate premium.
- E. If there has been construction, improvements or major repairs undertaken on the property to be purchased within six months prior to the Date of the Commitment, the requirements to obtain coverage for unrecorded liens will include: disclosure of certain construction information; financial information as to the seller, the builder and or the contractor; payment of the appropriate premium, fully executed Indemnity Agreements satisfactory to the company, and, any additional requirements as may be necessary after an examination of the aforesaid information by the Company.

No coverage will be given under any circumstances for labor or material for which the insured has contracted for or agreed to pay.

NOTE: Pursuant to C.R.S. 38-35-125(2) no person or entity that provides closing and settlement services for a real estate transaction shall disburse funds as a part of such services until those funds have been received and are available for immediate withdrawal as a matter of right.

NOTE: C.R.S. 39-14-102 requires that a real property transfer declaration accompany any conveyance document presented for recordation in the State of Colorado. Said declaration shall be completed and signed by either the grantor or grantee.

NOTE: Pursuant to CRS 10-1-128(6)(a), It is unlawful to knowingly provide false, incomplete, or misleading facts or information to an insurance company for the purpose of defrauding or attempting to defraud the company. Penalties may include imprisonment, fines, denial of insurance and civil damages. Any insurance company or agent of an insurance company who knowingly provides false, incomplete, or misleading facts or information to a policyholder or claimant for the purpose of defrauding or attempting to defraud the policyholder or claimant with regard to a settlement or award payable from insurance proceeds shall be reported to the Colorado division of insurance within the department of regulatory agencies.

NOTE: Pursuant to Colorado Division of Insurance Regulations 8-1-3, notice is hereby given of the availability of an ALTA Closing Protection Letter which may, upon request, be provided to certain parties to the transaction identified in the commitment.

Nothing herein contained will be deemed to obligate the company to provide any of the coverages referred to herein unless the above conditions are fully satisfied.

First American Title™

Privacy Information

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information – particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet. In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site.

There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

Business Relationships

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

Cookies

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive.

FirstAm.com uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

Fair Information Values

Fairness We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.

Public Record We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.

Use We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data. Accuracy We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.

Education We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.

Security We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

COLORADO Department of Transportation

Permit No. 521066

November 30, 2021

Eric Warner Salida Bottle Company, LLC 777 Dunlavy Street, Apt 8204 Houston, Texas 77019

Dear Permittee:

- 1. Please review the attached State Highway Access Permit (Form #101) and all enclosed attachments.
- 2. If you choose NOT to act on the permit, please return the permit unsigned.
- 3. If you wish to APPEAL the Terms and Conditions of the permit, please refer to the attached Form 101, Pages 2 and 3 for an explanation of the appeal procedures.
- 4. If you ACCEPT the Permit and its Terms and Conditions and are authorized to sign as legal owner of the property or as an authorized representative, <u>please sign and date</u> the Access Permit form on the line marked "PERMITTEE". Your signature confirms your agreement to all the listed Terms and Conditions.
- 5. Provide a check or money order made payable to CDOT for the total amount due of \$100.00.
- 6. You must return the signed Access Permit signature pages, including the permit face page (Form #101) and the final page of the terms and conditions, with your payment to the Colorado Department of Transportation (CDOT) at the address noted below. The Department will return an executed copy of this permit.
- 7. If you fail to sign and return the attached Access Permit within 60 days of the date of this transmittal letter, Colorado Department of Transportation will consider this permit withdrawn.
- As described in the attached Terms and Conditions, you must make a written request to obtain a Notice to Proceed. DO <u>NOT</u> begin any work within the State Highway Right-of-Way without a validated Access Permit and Notice to Proceed. Use of this permit without the Colorado Department of Transportation's validation shall be considered a violation of State Law.

If you have any questions, please call Randee Reider at (970) 385-3626.

Please return Access Permit and attachments to:

State Highway Access Permit Form 101, Page 2

The following paragraphs are excerpts of the State Highway Access Code. These are provided for your convenience but do not alleviate compliance with all sections of the Access Code. A copy of the State Highway Access Code is available from your local issuing authority (local government) or the Colorado Department of Transportation (Department). When this permit was issued, the issuing authority made its decision based in part on information submitted by the applicant, on the access category which is assigned to the highway, what alternative access to other public roads and streets is available, and safety and design standards. Changes in use or design not approved by the permit or the issuing authority may cause the revocation or suspension of the permit.

APPEALS

1. Should the permittee or applicant object to the denial of a permit application by the Department or object to any of the terms or conditions of a permit placed there by the Department, the applicant and permittee (appellant) have a right to appeal the decision to the [Transportation] Commission [of Colorado]. To appeal a decision, submit a request for administrative hearing to the Transportation Commission of Colorado within 60 days of transmittal of notice of denial or transmittal of the permit for signature. Submit the request to the Transportation Commission of Colorado, 4201 East Arkansas Avenue, Denver, Colorado 80222-3400. The request shall include reasons for the appeal and may include changes, revisions, or conditions that would be acceptable to the permittee or applicant.

2. Any appeal by the applicant or permittee of action by a local issuing authority shall be filed with the local authority and be consistent with the appeal procedures of the local authority.

3. In submitting the request for administrative hearing, the appellant has the option of including within the appeal a request for a review by the Department's internal administrative review committee pursuant to [Code] subsection 2.10. When such committee review is requested, processing of the appeal for formal administrative hearing, 2.9(5) and (6), shall be suspended until the appellant notifies the Commission to proceed with the administrative hearing, or the appellant submits a request to the Commission or the administrative law judge to withdraw the appeal. The two administrative processes, the internal administrative hearing, may not run concurrently.

4. Regardless of any communications, meetings, administrative reviews or negotiations with the Department or the internal administrative review Committee regarding revisions or objections to the permit or a denial, if the permittee or applicant wishes to appeal the Department's decision to the Commission for a hearing, the appeal must be brought to the Commission within 60 days of transmittal of notice of denial or transmittal of the permit.

PERMIT EXPIRATION

1. A permit shall be considered expired if the access is not under construction within one year of the permit issue

date or before the expiration of any authorized extension. When the permittee is unable to commence construction within one year after the permit issue date, the permittee may request a one year extension from the issuing authority. No more than two one-year extensions may be granted under any circumstances. If the access is not under construction within three years from date of issue the permit will be considered expired. Any request for an extension must be in writing and submitted to the issuing authority before the permit expires. The request should state the reasons why the extension is necessary, when construction is anticipated, and include a copy of page 1 (face of permit) of the access permit. Extension approvals shall be in writing. The local issuing authority shall obtain the concurrence of the Department prior to the approval of an extension, and shall notify the Department of all denied extensions within ten days. Any person wishing to reestablish an access permit that has expired may begin again with the application procedures. An approved Notice to Proceed, automatically renews the access permit for the period of the Notice to Proceed.

CONSTRUCTION

1. Construction may not begin until a Notice to Proceed is approved. (Code subsection 2.4]

2. The construction of the access and its appurtenances as required by the terms and conditions of the permit shall be completed at the expense of the permittee except as provided in subsection 2.14. All materials used in the construction of the access within the highway right-of-way or on permanent easements, become public property. Any materials removed from the highway right-of-way will be disposed of only as directed by the Department. All fencing, guard rail, traffic control devices and other equipment and materials removed in the course of access construction shall be given to the Department unless otherwise instructed by the permit or the Department inspector.

3. The permittee shall notify the individual or the office specified on the permit or Notice to Proceed at least two working days prior to any construction within state highway right-of-way. Construction of the access shall not proceed until both the access permit and the Notice to Proceed are issued. The access shall be completed in an expeditious and safe manner and shall be finished within 45 days from initiation of construction within the highway right-of-way. A construction time extension not to exceed 30 working days may be requested from the individual or office specified on the permit.

4. The issuing authority and the Department may inspect the access during construction and upon completion of the access to ensure that all terms and conditions of the permit are met. Inspectors are authorized to enforce the conditions of the permit during construction and to halt any activities within state right-of-way that do not comply with the provisions of the permit, that conflict with concurrent highway construction or maintenance work, that endanger highway property, natural or cultural resources protected by law, or the health and safety of workers or the public.

5. Prior to using the access, the permittee is required to complete the construction according to the terms and conditions of the permit. Failure by the permittee to abide

by all permit terms and conditions shall be sufficient cause for the Department or issuing authority to initiate action to suspend or revoke the permit and close the access. If in the determination of the Department or issuing authority the failure to comply with or complete the construction requirements of the permit create a highway safety hazard, such shall be sufficient cause for the summary suspension of the permit. If the permittee wishes to use the access prior to completion, arrangements must be approved by the issuing authority and Department and included in the permit. The Department or issuing authority may order a halt to any unauthorized use of the access pursuant to statutory and regulatory powers. Reconstruction or improvement of the access may be required when the permittee has failed to meet required specifications of design or materials. If any construction element fails within two years due to improper construction or material specifications, the permittee shall be responsible for all repairs. Failure to make such repairs may result in suspension of the permit and closure of the access.

6. The permittee shall provide construction traffic control devices at all times during access construction, in conformance with the M.U.T.C.D. as required by section 42-4-104, C.R.S., as amended.

7. A utility permit shall be obtained for any utility work within highway right-of-way. Where necessary to remove, relocate, or repair a traffic control device or public or private utilities for the construction of a permitted access, the relocation, removal or repair shall be accomplished by the permittee without cost to the Department or issuing authority, and at the direction of the Department or utility company. Any damage to the state highway or other public right-of-way beyond that which is allowed in the permit shall be repaired immediately. The permittee is responsible for the repair of any utility damaged in the course of access construction, reconstruction or repair.

8. In the event it becomes necessary to remove any rightof-way fence, the posts on either side of the access shall be securely braced with an approved end post before the fence is cut to prevent any slacking of the remaining fence. All posts and wire removed are Department property and shall be turned over to a representative of the Department.

9. The permittee shall ensure that a copy of the permit is available for review at the construction site at all times. The permit may require the contractor to notify the individual or office specified on the permit at any specified phases in construction to allow the field inspector to inspect various aspects of construction such as concrete forms, subbase, base course compaction, and materials specifications. Minor changes and additions may be ordered by the Department or local authority field inspector to meet unanticipated site conditions.

10. Each access shall be constructed in a manner that shall not cause water to enter onto the roadway or shoulder, and shall not interfere with the existing drainage system on the right-of-way or any adopted municipal system and drainage plan..

11. By accepting the permit, permittee agrees to save, indemnify, and hold harmless to the extent allowed by law,

the issuing authority, the Department, its officers, and employees from suits, actions, claims of any type or character brought because of injuries or damage sustained by any person resulting from the permittee's use of the access permit during the construction of the access.

CHANGES IN ACCESS USE AND PERMIT VIOLATIONS

1. It is the responsibility of the property owner and permittee to ensure that the use of the access to the property is not in violation of the Code, permit terms and conditions or the Act. The terms and conditions of any permit are binding upon all assigns, successors-in-interest, heirs and occupants. If any significant changes are made or will be made in the use of the property which will affect access operation, traffic volume and or vehicle type, the permittee or property owner shall contact the local issuing authority or the Department to determine if a new access permit and modifications to the access are required.

2. When an access is constructed or used in violation of the Code, section 43-2-147(5)(c), C.R.S., of the Act applies. The Department or issuing authority may summarily suspend an access permit and immediately order closure of the access when its continued use presents an immediate threat to public health, welfare or safety. Summary suspension shall comply with article 4 of title 24, C.R.S.

MAINTENANCE

1. The permittee, his or her heirs, successors-in-interest, assigns, and occupants of the property serviced by the access shall be responsible for meeting the terms and conditions of the permit, the repair and maintenance of the access beyond the edge of the roadway including any cattle guard and gate, and the removal or clearance of snow or ice upon the access even though deposited on the access in the course of Department snow removal operations. Within unincorporated areas the Department will keep access culverts clean as part of maintenance of the highway drainage system. However, the permittee is responsible for the repair and replacement of any accessrelated culverts within the right-of-way. Within incorporated areas, drainage responsibilities for municipalities are determined by statute and local ordinance. The Department will maintain the roadway including auxiliary lanes and shoulders, except in those cases where the access installation has failed due to improper access construction and/or failure to follow permit requirements and specifications in which case the permittee shall be responsible for such repair. Any significant repairs such as culvert replacement, resurfacing, or changes in design or specifications, requires authorization from the Department.

Form 101, Page 3

State Highway Access Permit

Page - 101a

Worker Safety and Health

All workers within the State Highway right of way shall comply with their employer's safety and health policies/procedures, and all applicable U.S. Occupational Safety and Health Administration (OSHA) regulations – including, but not limited to the applicable sections of 29 CFR Part 1910 – Occupational Safety and Health Standards and 29 CFR Part 1926 – Safety and Health Regulations for Construction.

Personal protective equipment (e.g. head protection, footwear, high visibility apparel, safety glasses, hearing protection, respirators, gloves, etc.) shall be worn as appropriate for the work being performed, and as specified in regulation. At a minimum, all workers in the State Highway right of way, except when in their vehicles, shall wear the following personal protective equipment:

- Head protection that complies with the ANSI Z89.1-1997 standard;
- At all construction sites or whenever there is danger of injury to feet, workers shall comply with OSHA's PPE requirements for foot protection per 29 CFR 1910.136, 1926.95, and 1926.96;
- High visibility apparel as specified in the Traffic Control provisions of this permit (at a minimum, ANSI/ISEA 107-1999, Class 2).

Where any of the above-referenced ANSI standards have been revised, the most recent version of the standard shall apply.

Environmental Clearance

It is the applicant's responsibility to contact the appropriate agencies and obtain all environmental clearances that apply to their activities. Such clearances may include but are not limited to Corps of Engineers 404 Permits or Colorado Discharge Permit System permits, or ecological, archeological, historical, or cultural resource clearances. The CDOT Environmental Clearances Information Summary presents contact information for agencies administering certain clearances and information about prohibited discharges; copy attached.

LEVEL 2 - ACCESS PERMIT TERMS & CONDITIONS <u>FULL-MOVEMENT ACCESS</u>

A. <u>PERMIT REQUIREMENTS SPECIFIC TO THIS ACCESS:</u>

- 1. <u>Permit Number 521066</u> is issued by the Colorado Department of Transportation (CDOT) in accordance with the 1998 Access Code and is based upon the information submitted by the Permittee.
 - a. Any changes in the herein permitted type and use and/or volume of traffic using the access, drainage, or other operational aspects shall render this permit void, requiring that a new application be submitted for review based upon currently existing and anticipated future conditions.
 - b. Upon completion of the improvements identified in this permit, Permit Number <u>521066</u> shall replace and void all previous access permits for this location.
 - c. If the requirements of this Permit are not satisfied or this Permit expires, the access rights will revert to the access permit issued prior to this permit. If there is no valid prior permit then the access rights and uses shall revert to the historic use.
 - d. This permit is not valid unless the land uses enumerated herein have been approved by the local (City/County) Planning Authority.
- 2. Permit Number <u>521066</u> is issued for the <u>reconstruction and continued use</u> of:
 - a. A <u>Paved full-movement</u> access to <u>State Highway 291</u> for <u>Salida Bottle Company</u>, <u>LLC at approximate mile marker 1.237 Right</u>
- 3. The access shall be <u>Paved a distance of 20 feet</u> from the edge of traveled way and gravel surfaced any remaining distance within State Highway ROW. The access shall have a width of <u>24 feet</u> and be <u>constructed according to M-609-1, Type 3, see attached</u>.
- 4. The access shall be <u>perpendicular</u> to the travel lanes of the State Highway for a minimum distance of <u>40 feet from the edge of pavement or to the ROW, whichever is furthermost,</u> and beyond the back of sidewalk shall not exceed <u>eight percent (8%)</u> grade up or down to the ROW line.
- 5. <u>Temporary Traffic Control, with prior written approval by CDOT</u>, is required at all times during construction of the access in accordance with a <u>Traffic Control Plan (TCP)</u>. The TCP <u>shall be developed and implemented</u> by a <u>Traffic Control Supervisor (TCS)</u> <u>certified</u> by the <u>American Traffic Safety Services Association (ATSSA)</u> or the <u>Colorado Contractors Association (CCA)</u>.
- The category for this section of <u>SH 291</u> is <u>NR-C.</u> The access shall be in conformance with the State of Colorado State Highway Access Code, Volume Two, Code of Colorado Regulations 601-1, August 31, 1998 as amended.

- The access shall serve a tract of land located at street address 323 West First Street, Salida, Colorado, 81201, parcel number 368132419160. The location of the access is shown in EXHIBIT "A" (Location Map).
- 8. Incorporated as part of this permit are the following:
 - a. State Highway Access Permit pages 1-3 and Page 101a
 - b. Access Permit Terms and Conditions Pages <u>1 through 12</u>
 - c. **<u>EXHIBIT "A,"</u>** (Location Map)
 - d. **EXHIBIT "B,"** (Traffic Control Typical Application)
 - e. CDOT M&S Standards M-208-1, M-210-1, M-608-1, and M-609-1, Type 3.
 - f. CDOT Late Fall, Winter and Spring Special Provisions for Access Construction and Utility Installations
 - g. CDOT Environmental Clearances Information Summary
 - h. Water Quality Program Summary
 - i. State Highway Access Permit Application (CDOT Form No. 137) received <u>November 2,</u> 2021
- 9. This Permit describes the access and improvements that will serve the following land uses: a. 16 Townhomes (ITE Code 220)

b. <u>740 sq. ft. General Retail (ITE Code 814)</u> <u>Total – 13 DHV</u>

- 10. For the Access Category of <u>NR-C</u>, the vehicular volumes using this access shall not exceed the following:
 - a. An average Peak Hour Volume of <u>25 left-turning entrance movements</u> from the State Highway into the access.
 - b. An average Peak Hour Volume of <u>50 right-turning entrance movements</u> from the State Highway into the access.
- 11. A passenger car equivalent of <u>two (2)</u> for <u>each vehicle or combination at or over 20 feet in</u> <u>length but less than 40 feet</u> and a passenger car equivalent of <u>three (3)</u> shall be used for <u>each bus and all trucks and combination at or over 40 feet in length or longer</u> when determining the volumes listed above.
- 12. Any changes in the type, use and/or volume of traffic using the access in excess of the values stated above will require a new permit and will require the installation of warranted access improvements within the earliest construction season. Such improvements include but are not limited to:
 - a. Increasing the access width
 - b. Increasing the access radii
 - c. Improving the access surfacing
 - d. Installing acceleration and deceleration lanes
 - e. A full width overlay of the State Highway corresponding to the start and end of the acceleration and deceleration lanes

- 13. Any future warranted highway improvements shall be designed and constructed by the Permittee or the property owner at no cost to CDOT.
- 14. Under no circumstances will the access be allowed to continue operation in an unsafe manner. Failure to provide the warranted improvements will result in closure of the access.
- 15. At the access location, <u>SH 291</u> has a posted speed limit of <u>25 mph</u> with less than approximate <u>6:1 foreslopes</u> and an Average Daily Traffic of <u>4,300</u> which correlates to a minimum Clear Zone of <u>14</u> feet from the edge of traveled way. The Permittee/Contractor shall take the minimum Clear Zone into consideration during the design and construction of the access.

16. <u>Any damaged curb and gutter, sidewalk and abandoned curb cuts along the property</u> <u>adjacent to the State Highway shall be replaced as part of this project.</u>

- 17. "Right-of-Way" means the entire width between the boundary lines of every way publicly maintained when any part thereof is open to the use of the public for purposes of vehicular travel or the entire width of every way declared to be a public highway by any law of this state.
- 18. Internal site circulation and parking must be adequate to serve the land uses described here.
- 19. No backing into the Right-of-Way will be allowed under any circumstances.
- 20. No parking within the Right-of-Way will be allowed under any circumstances.
- 21. Both backing into the Right-of-Way and parking within the Right-of-Way are considered to be traffic offenses and can be ticketed by any law enforcement officer of the jurisdiction in which the access is located.
- 22. Any violation of the above provisions may be grounds for revocation by the Department of this access permit and may result in physical closure of the access.

B. <u>REQUIREMENTS PRIOR TO NOTICE-TO-PROCEED (NTP) FOR CONSTRUCTION:</u>

- The Permittee/Contractor must contact <u>Ms. Randee Reider</u> at phone number <u>970-385-3626</u> or via email at <u>randee.reider@state.co.us</u> to schedule a meeting with one of our inspectors <u>thirty (30) working days prior to beginning any access improvements</u> or construction of any kind within the highway Right-of-Way (ROW). Failure to comply with this condition may result in revocation of this permit.
- It is the responsibility of the Permittee/Applicant to determine which <u>environmental</u> <u>clearances</u> and/or regulations apply to the project, and to obtain any clearances that are required directly from the appropriate agency. Please refer to "CDOT Environmental Clearance Information Summary" for details. <u>FAILURE TO COMPLY WITH REGULATORY</u>

REQUIREMENTS MAY RESULT IN SUSPENSION OR REVOCATION OF THE CDOT ACCESS PERMIT, OR ENFORCEMENT ACTIONS BY OTHER AGENCIES.

- 3. A <u>written request for a Notice to Proceed</u> must be submitted to this issuing office along with the following items:
 - a. The Permittee shall provide <u>written approval</u> from the Local Authority for the proposed land use that will be served by the access. Granting of an access permit in no way implies CDOT concurrence or non-concurrence with the Permittee's proposed land use.
 - b. <u>The Permittee/Contractor is required to provide comprehensive general liability and</u> <u>property damage</u> insurance naming the Department (CDOT) as an additional insured party in the amounts of not less than <u>\$1,000,000 per occurrence</u> and <u>automobile liability</u> <u>insurance of \$1,000,000</u> combined single limit bodily injury and property damage for each accident, during the period of access construction. By accepting the permit, Permittee agrees to save, indemnify, and hold harmless to the extent allowed by law, the Department, its officers, and employees from suits, actions, claims of any type or character brought because of injuries or damage sustained by any person resulting from the Permittee's use of the access permit during the construction of the access. <u>CDOT shall be listed as</u> <u>"Additional Insured", and CDOT shall be listed as "Certificate Holder" on the Certificate of Insurance (COI)</u>. Copies of insurance coverage shall be submitted to the Region 5 Access Manager prior to the issuing of the NTP. A copy of the insurance policy is required to be available at the construction site at all times for inspection.
 - c. The <u>Traffic Control Supervisor (TCS)</u> shall provide a <u>Traffic Control Plan (TCP)</u> in accordance with the current edition of the Manual on Uniform Traffic Control Devices (MUTCD). The <u>TCP shall be submitted</u> to the Region 5 Access Manager for review and acceptance <u>a minimum of ten (10) working days prior to the desired implementation</u> <u>date. Exhibit "C,"</u> provides a typical application from the MUTCD as a basis for developing the TCP. If construction of the access improvements involves a Traffic Control application that differs from <u>Exhibit "C,"</u> the <u>TCS</u> shall submit a new TCP for review and acceptance. Traffic Control of any nature will not be allowed unless authorized in writing by CDOT.

C. <u>GENERAL DESIGN REQUIREMENTS:</u>

- 1. **Design of improvements** within the highway ROW shall be in compliance with the most current editions of the following manuals and documents except as indicated:
 - a. CDOT Design Guide
 - b. CDOT Drainage Design Manual
 - c. CDOT Standard Plans M&S Standards
 - d. AASHTO Roadside Design Guide
 - e. AASHTO Policy on Geometric Design of Highways and Streets
 - f. CDOT Standard Specifications for Road and Bridge Construction

- g. CDOT Standard Special Provisions
- h. Manual on Uniform Traffic Control Devices (MUTCD)
- i. 1998 State Highway Access Code, Volume 2, Code of Regulations 601-1, as amended
- j. ITE Traffic Engineering Handbook
- k. ITE Trip Generation Manual, 6th Edition
- 1. 2011 CDOT CAD Manual

2. <u>No grading, construction, structures or toes of slopes necessary for site development shall</u> <u>be placed within CDOT ROW.</u>

- 3. Permittee is required to comply with the <u>Americans with Disabilities Act Accessibility</u> <u>Guidelines (ADAAG)</u> that have been adopted by the U.S. Architectural and Transportation Barriers Compliance Board (Access Board), and incorporated by the U.S. Attorney General as a federal standard. These guidelines are defining traversable slope requirements and prescribing the use of a defined pattern of truncated domes as detectable warnings at street crossings. The current Standard Plans reflect these requirements.
- 4. It is the responsibility of the Permittee/Applicant to determine which <u>environmental</u> <u>clearances</u> and/or regulations apply to the project, and to obtain any clearances that are required directly from the appropriate agency. Please refer to "CDOT Environmental Clearance Information Summary" for details. <u>FAILURE TO COMPLY WITH REGULATORY</u> <u>REQUIREMENTS MAY RESULT IN SUSPENSION OR REVOCATION OF THE</u> <u>CDOT ACCESS PERMIT, OR ENFORCEMENT ACTIONS BY OTHER AGENCIES.</u>
- 4. ALL discharges are subject to the provisions of the Colorado Water Quality Control Act and the Colorado Discharge Permit Regulations. Prohibited discharges include substances such as: wash water, paint, automotive fluids, solvents, oils or soaps.
- 5. Unless otherwise identified by CDOT or the Colorado Department of Public Health and Environment (CDPHE) Water Quality Control Division (WQCD) as not being a source of pollutants to the waters of the State, the following discharges to storm water systems are allowed without a Colorado Discharge Permit System permit: landscape irrigation, diverted stream flows, uncontaminated ground water infiltration to separate storm sewers, discharges from potable water sources, foundation drains, air conditioning condensation, irrigation water, springs, footing drains, water line flushing, flows from riparian habitats and wetlands, and flow from fire fighting activities, and water incidental to street sweeping (including associated sidewalks and medians) and that is not associated with construction. Discharges from these sources may still require separate CDPS permit coverage to be obtained by the discharger.
- ANY OTHER DISCHARGES may require Colorado Discharge Permit(s) or separate permits from CDPHE or the appropriate agency before work begins. For additional information and forms, go to the CDPHE website at: <u>http://www.cdphe.state.co.us/wq/PermitsUnits/wqcdpmt.html</u> or contact the CDOT Water Quality Program Manager at 303-757-9343.

7. Discharges may also be subject to additional State and Local restrictions, such as MS4 (Municipal Separate Storm Water Sewerage Systems) requirements for permanent sediment control, TMDL (Total Maximum Daily Limit), TMAL (Total Maximum Annual Limit) or discharge.

D. DRAINAGE DESIGN REQUIREMENTS:

- 1. No site drainage from the constructed access shall enter onto the traveled way of the highway.
- 2. Drainage to the State Highway Right-of-Way shall not exceed the historical undeveloped rate of flow.
- 3. If the State Highway includes a drainage ditch at the proposed access location, the Permittee shall install a minimum of an 18" Corrugated Steel Pipe side drain culvert for drainage. The side drain culvert shall include steel end sections at both ends. The access drainage requirements to include the required side drain culvert size shall be discussed with the CDOT Maintenance representative prior to any construction of the access.
- 4. Required Cross Culverts under the State Highway, Side Drain Culverts under the Access, Curb, Gutter, Inlets, Sidewalk and Driveways shall conform to CDOT Standards and facilitate proper drainage along the State Highway.

E. PAVEMENT DESIGN REQUIREMENTS:

- 1. Materials shall conform with:
 - a. Section 304 Aggregate Base Course (ABC) Class 6, with resistance values of at least 70 and 76 respectively when tested by the Hveem Stabilometer method.
 - b. Section 403 Hot Mix Asphalt Grading S or SX, PG 58-28.
 - c. Section 412 & 601 Concrete Pavement Class P or D = 4,500 psi
- 2. Unless a pavement design is submitted, pavements shall conform to the following compacted thicknesses:
 - a. Hot Mix Asphalt (HMA) Pavement
 - i. HMA- 4 inches on the Access. Any pavement replaced on the State Highway shoulder shall match the existing pavement thickness.
 - ii. ABC (Class 6)- 6 inches
 - iii. ABC (Class 1 or 2)- 12 inches
 - b. Concrete Pavement
 - i. Concrete- 6 inches
 - ii. ABC (Class 6)- 6 inches

F. <u>GENERAL CONSTRUCTION REQUIREMENTS:</u>

1. <u>A COPY OF THIS PERMIT AND THE VALIDATED NOTICE TO PROCEED MUST</u> <u>BE ON THE JOB WITH THE CONTRACTOR AT ALL TIMES OR ANY WORK</u> <u>ONSITE AND OFFSITE WILL BE ORDERED TO BE IMMEDIATELY SUSPENDED</u> <u>UNTIL THIS TERM IS COMPLIED WITH.</u>

- 2. <u>Construction Activities</u> within the highway ROW shall be in compliance with the most current editions of the following manuals:
 - a. CDOT Standard Specifications for Road and Bridge Construction
 - b. CDOT Standard Special Provisions
 - c. CDOT Standard Plans M&S Standards
 - d. CDOT Construction Manual
 - e. CDOT Field Materials Manual
 - f. CDOT Laboratory Manual of Test Procedures
 - g. Manual on Uniform Traffic Control Devices (MUTCD) Part IV and the Colorado Supplement
 - h. **<u>EXHIBIT "B,"</u>** (Traffic Control Typical Application)
- 3. The Permittee/Contractor is responsible for obtaining any necessary additional <u>Federal, State</u> <u>and/or City/County permits or clearances</u> required for construction of the access. Approval of this access permit does not constitute verification of this action by the Permittee.
- 4. <u>Any removal of existing fence, in excess of opening required for the access, or installation</u> of a fence that is erected adjacent to the highway ROW requires a separate CDOT <u>Fencing Agreement.</u>
- 5. <u>Any landscaping within CDOT ROW requires a separate</u> <u>CDOT Landscaping Permit</u>.
- 6. <u>Any Utility work</u> within CDOT ROW requires a separate <u>CDOT Utility Permit</u>.
- The Permittee will be responsible for <u>verification of existing utility locations</u>. The Permittee must notify owners or operators of <u>underground utility facilities</u> at least two (2) business days prior to beginning excavation in the vicinity of such facilities, as required under Section 9-1.5-103, Colorado Revised Statutes. <u>Call Utility Notification Center of Colorado</u> (UNCC), <u>811</u> or 1-800-922-1987 for marking of member utilities. Call non-member utilities directly.
- 8. The Permittee/Contractor shall coordinate access construction with any utility installations.
- 9. Any damage to utilities during construction shall be the Permittee's responsibility to repair or replace the utility at no cost to CDOT.
- 10. The Permittee/Contractor shall not make any changes to the access design without prior approval from the Region 5 Access Manager or other authorized Region 5 CDOT representative. If necessary, minor changes, corrections, and/or additions to this permit will be ordered by CDOT to meet unanticipated site conditions.

11. Any damage to any existing highway facilities shall be repaired by the Permittee prior to continuing other work.

G. SAFETY, WORKING TIMES AND TRAFFIC CONTROL:

- 1. CDOT reserves the right to suspend any construction activities, to include Traffic Control, that interfere with the safe operation of the State Highway. Any such suspensions shall require a written plan of action detailing how the Permittee/Contractor will prevent further safety infractions prior to recommencing construction activities.
- 2. All equipment, materials or any other non-crashworthy item shall be stored outside the clear zone during non-working times.
- 3. Existing highway signs requiring removal within the limits of the construction activities shall be removed and delivered to the CDOT Maintenance Shop for storage and future replacement by the Permittee unless otherwise agreed to by CDOT and Permittee. Installation shall be as directed by CDOT.
- 4. The Permittee/Contractor will be responsible for keeping the State Highway travel lanes and shoulders clear of any mud or debris tracked onto it throughout construction of the access on a daily basis or as otherwise directed by CDOT.
- 5. The existing paved shoulder edge shall not be saw cut back until the future pavement is ready to be installed.
- 6. Any pavement drop-offs that will be left overnight shall be delineated with appropriate channelizing devices and any reasonably obtained lateral buffer space.
- 7. The Permittee/Contractor shall comply with Revision of Section 107.06 of the CDOT Specifications regarding Safety, Health, and Sanitation Provisions.
- 8. No work within the highway ROW will be allowed on Saturdays, Sundays, legal holidays, or during periods of adverse weather conditions.
- 9. All construction activities within the state highway ROW will not be allowed to begin before sunrise and shall be required to cease prior to sunset. Traffic Control operations may begin one half hour before sunrise and continue until one half hour after sunset.
- 10. No disruption of traffic flow will be allowed during the morning (7:00 AM to 8:30 AM) and evening (4:30 PM to 6:00 PM) peak hour traffic flows, unless otherwise authorized in writing by CDOT.

H. SPECIFIC CONSTRUCTION REQUIREMENTS:

- 1. All existing ROW and survey control markers shall be protected during construction of this access. Any damage to these markers shall require resetting by a Colorado Professional Land Surveyor.
- 2. All <u>erosion control devices</u> shall be in place prior to the start of construction. Typical erosion control devices are shown in M-208-1.
- 3. For any **<u>ROW fence</u>** that must be removed, the posts on either side of the entrance must first be braced with an end post prior to cutting the fence as shown in M-607-1. Removed fencing material shall remain the property of CDOT and shall be given to the CDOT Maintenance representative.
- 4. If livestock animals roam freely within the property served by the access, the access shall close the break in the ROW fence with a gate conforming to CDOT Standard Plan M-607-1 or a Cattle Guard conforming to M-611-1. Gates shall be located so that the longest vehicle using the access can completely clear the highway when the gate is closed.
- 5. The Permittee/Contractor shall remove obstructions, clear and grub the proposed access location to the toe of fill or the top of cut. Cleared topsoil shall be stockpiled for final stabilization.
- 6. Prior to the placement of any fill, the surface to receive the fill shall be scarified a depth of 6 inches and compacted with moisture and density control. Any cut that shall subsequently receive Aggregate Base Course shall also be scarified and compacted in the same manner. Subsequent Fill shall also be constructed with moisture density control. The compaction shall conform to AASHTO T99 or AASHTO T180 as shown in the following table:

AASHTO T99	AASHTO T180
Percent Min.	Percent Min.
Relative Compaction	Relative Compaction
100	95
95	90
	AASHTO T99 Percent Min. Relative Compaction 100 95

- 7. Fill placed on slopes steeper than 4:1 shall be continuously benched into the existing slope.
- 8. Fill shall be placed in layers not to exceed 8 inches of loose material prior to compaction.
- 9. Fill material shall not have rock larger than 6 inches in diameter.
- 10. If a side drain culvert is required under the access fill, the fill shall first be constructed full width to a height of 1/3 the diameter of the culvert. The fill shall then be trenched for installation of the culvert. The trench width shall be the culvert diameter 18 inches on both sides. If the bottom of the trench is in rock, loose bedding material shall be 12 inches of Structure Backfill (Class I).

- 11. The culvert shall be installed with steel end sections and will connect the flowline of the roadside ditch crossing the access.
- 12. The culvert shall be backfilled with the same material and the same moisture density control as the rest of the fill. Backfill shall be brought up equally on both sides using 6 inch lifts of loose material prior to compaction.
- 13. Aggregate Base Course (ABC) shall be placed in layers not to exceed 6 inches once compacted. Compaction shall be 95% of AASHTO T180.
- 14. The final ABC shall have a smooth surface free of irregularities and any substance other than ABC.
- 15. The existing State Highway shoulder at the access location shall be saw cut a minimum of one (1) foot from the existing pavement edge to assure a straight edge for placement of adjacent pavement. If using asphalt pavement, the exposed vertical edge of the existing asphalt shall be coated with Emulsified Asphalt (Slow Setting).
- 16. For Hot Mix Asphalt (HMA) Pavement the following applies:
 - a. The ABC shall not be frozen and the air and ABC surface temperatures shall be 50 degrees Fahrenheit and rising.
 - b. The HMA shall be placed in layers not to exceed 2 inches compacted thickness.
 - c. Longitudinal joints between layers shall be offset by 6 inches and shall not be in the wheel path.
 - d. Any segregated areas shall be removed and replaced.
 - e. The Permittee/Contractor shall use rolling equipment to compact the HMA immediately after placement.
 - f. Compaction shall be 92 to 96 percent maximum theoretical density determined according to Colorado Procedure 51.
 - g. The finished surface shall be smooth and conform to the lines and grades shown in M-609-1.
- 17. For Concrete Pavement the following applies:
 - a. The ABC shall not be frozen and Concrete shall not be placed if the temperature is expected to fall below 45 degrees Fahrenheit or if the temperature of the delivered concrete is above 90 degrees.
 - b. The concrete shall conform to the approved mix design and additional water added at the delivery site shall not exceed the maximum water cement ratio.
 - c. The concrete shall be free of any foreign material.
 - d. Concrete shall be placed on the ABC to require as little rehandling as possible and vibrated to insure consolidation.
 - e. Concrete shall be struck off, screed, floated and finished in a manner that will leave a uniform surface of gritty texture. Additional water applied to the surface for finishing is not allowed.

- f. The finished surface shall be smooth and conform to the lines and grades shown in M-609-1.
- g. Immediately after finishing the entire concrete surface shall be cured by being kept moist with water and protected from the sun or sprayed uniformly with a membrane forming curing compound that is VOC compliant and meets AASHTO M148, Type 2.
- h. The curing period shall be a minimum of 120 hours (5 days). If the forms are removed prior to the end of the curing period, the exposed concrete sides shall be cured for the remainder of the curing period in the same manner as the rest of the concrete.
- i. Joints shall be constructed during the curing period to control cracking.
- j. The concrete shall not be subjected to traffic until it has reached a compressive strength of 3,000 psi.
- 18. Shouldering material shall be placed to eliminate any vertical edges upon completion of the paving.
- 19. If a <u>mailbox</u> is to be installed, it shall be crashworthy and conform to M-210-1. The mailbox shall be located as far from the edge of travel way as possible and allow for mail delivery vehicles to stop completely outside of the traveled way.

I. <u>FINAL STABILIZATION REQUIREMENTS:</u>

- 1. <u>All areas disturbed</u> during the construction of the access <u>shall be immediately stabilized</u> upon completion of the access.
- 2. Break points at the top of cut slopes and in the bottom of ditches shall be rounded on construction for a pleasing appearance.
- 3. A minimum of 4 inches of topsoil shall be placed on all slopes which are to be seeded and mulched.
- 4. Soil preparation, seeding, and mulching shall be required within the ROW limits on all disturbed areas not surfaced. The following types and rates shall be used unless a separate Landscaping Permit states otherwise:

Seed Requirements:		
COMMON NAME	BOTANICAL NAME	LBS.
<u>PLS\ACRE</u>		
Western Wheatgrass (V. Arriba)	Pascopyrum Smithii	16
Slender Wheatgrass (V. San Luis)	Elymus Trachycaulus	6
Indian Ricegrass (V. Paloma)	Oryzopsis Hymenoides	6
Hard Fescue (V. Durar)	Festuca Ovina Duriuscula	6
Alsike Clover	Trifolium Hybridium	4
Sand Dropseed	Sporobolus Cryptandrus	<u>0.50</u>
Total lbs/acre		38.50

Seed shall be mechanically drilled to a depth of 0.25 or 0.5 inches into the soil on slopes flatter than 3:1. Seed shall be broadcast on slopes 3:1 or steeper and raked into soil.

5.	<u>Fertilizer Requirements:</u>		
	Nutrient Type	<u>% AVAILABLE</u>	LBS \ACRE
	Nitrogen:	18	45
	Phosphorus:	46	115
	Fertilizer shall be incorpora	ted to a depth of 2" to 4" into the topsoil.	

6. <u>Mulching Requirements and Application:</u> 2 tons/acre straw mechanically crimped into soil on slopes flatter than 3:1. Place a soil retention blanket consisting of woven wood or straw coconut material on slopes 3:1 or steeper.

J. FINAL PROJECT ACCEPTANCE:

- 1. <u>Final Project Acceptance</u> will be by the Regional Transportation Director (RTD) or their authorized designee.
- 2. <u>Reconstruction or improvements</u> to the access will be required when the Permittee fails to meet the required design and/or materials specifications. If any construction element fails within two years of CDOT's final acceptance due to improper construction or materials, the Permittee is responsible for all such repairs.

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community, Esri, HERE, Garmin, (c) OpenStreetMap, contributors, and the GIS user community Traffic Control Typical Application - Exhibit "B"

Notes for Figure 6H-6—Typical Application 6 Shoulder Work with Minor Encroachment

Guidance:

- 1. All lanes should be a minimum of 3 m (10 ft) in width as measured to the near face of the channelizing devices.
- 2. The treatment shown should be used on a minor road having low speeds. For higher-speed traffic conditions, a lane closure should be used.

Option:

- 3. For short-term use on low-volume, low-speed roadways with vehicular traffic that does not include longer and wider heavy commercial vehicles, a minimum lane width of 2.7 m (9 ft) may be used.
- 4. Where the opposite shoulder is suitable for carrying vehicular traffic and of adequate width, lanes may be shifted by use of closely spaced channelizing devices, provided that the minimum lane width of 3 m (10 ft) is maintained.
- 5. Additional advance warning may be appropriate, such as a ROAD NARROWS sign.
- 6. Temporary traffic barriers may be used along the work space.
- 7. The shadow vehicle may be omitted if a taper and channelizing devices are used.
- 8. A truck-mounted attenuator may be used on the shadow vehicle.
- 9. For short-duration work, the taper and channelizing devices may be omitted if a shadow vehicle with activated high-intensity rotating, flashing, oscillating, or strobe lights is used.
- 10. Vehicle hazard warning signals may be used to supplement high-intensity rotating, flashing, oscillating, or strobe lights.

Standard:

11. Vehicle hazard warning signals shall not be used instead of the vehicle's high-intensity rotating, flashing, oscillating, or strobe lights.

CURB RAMP GENERAL NOTES:

- (1) IN NEW CONSTRUCTION OR FULL-DEPTH RECONSTRUCTION, PROVIDE A SEPARATE CURB RAMP FOR EACH MARKED OR UNMARKED PEDESTRIAN STREET CROSSING. CURB RAMPS SHALL BE CONTAINED WHOLLY WITHIN THE WIDTH OF THE PEDESTRIAN STREET CROSSING OR CROSSWALK THEY SERVE, OR AS SHOWN ON THE CONTRACT PLANS
- (2) ALTERATIONS ARE DEFINED AS CHANGES TO AN EXISTING HIGHWAY THAT AFFECT PEDESTRIAN ACCESS, CIRCULATION, OR USE. ALTERATIONS INCLUDE, BUT ARE NOT LIMITED TO, RESURFACING, REHABILITATION, RECONSTRUCTION, CURB RAMP RETROFITS, HISTORIC RESTORATION, OR CHANGES OR REARRANGEMENT TO STRUCTURAL PARTS OR ELEMENTS OF A PEDESTRIAN FACILITY.
- (3) A WALKABLE SURFACE IS DEFINED AS A PAVED SURFACE ADJACENT TO A CURB RAMP OR TURNING SPACE, WITHOUT RAISED OBSTACLES, THAT COULD BE MISTAKENLY TRAVERSED BY A USER WHO IS VISUALLY IMPAIRED.
- (4) IN ALTERATIONS, WHERE AN EXISTING PHYSICAL CONSTRAINT PREVENTS PROVIDING A SEPARATE CURB RAMP FOR EACH PEDESTRIAN STREET CROSSING, A SINGLE DIAGONAL RAMP (ON THE APEX) SHALL BE PERMITTED TO SERVE BOTH PEDESTRIAN STREET CROSSINGS. THE USE OF A SINGLE DIAGONAL RAMP SHALL BE APPROVED BY THE ENGINEER PRIOR TO CONSTRUCTION. DIAGONAL RAMPS ARE NOT ACCEPTABLE IN NEW CONSTRUCTION OR FULL-DEPTH RECONSTRUCTION.
- (5) DETECTABLE WARNINGS SURFACES (DWS) ARE INTENDED TO INDICATE THE BOUNDARY BETWEEN A PEDESTRIAN ROUTE AND VEHICULAR ROUTE WHERE THERE IS A FLUSH RATHER THAN CURBED CONNECTION. DWS ARE NOT INTENDED TO PROVIDE WAYFINDING. DWS SHALL BE PROVIDED AT THE FOLLOWING LOCATIONS; 1. CURB RAMPS, BLENDED TRANSITIONS, AND DEPRESSED CORNERS AT PEDESTRIAN STREET CROSSINGS; 2. PEDESTRIAN REFUGE ISLANDS (6 FEET IN WIDTH OR GREATER); 3. BOARDING PLATFORMS AT TRANSIT STOPS WHERE THE EDGE OF THE PLATFORM IS NOT PROTECTED TO PEDESTRIAN CROSS TRAFFIC; AND

4. BOARDING AREAS AT SIDEWALK OR STREET LEVEL TRANSIT STOPS WHERE THE AREA IS NOT PROTECTED TO PEDESTRIAN CROSS TRAFFIC.

- (6) DETECTABLE WARNING SURFACES SHALL CONTRAST VISUALLY WITH THE ADJACENT GUTTER, HIGHWAY, OR PEDESTRIAN ACCESS ROUTE SURFACE, EITHER LIGHT-ON-DARK OR DARK-ON-LIGHT. FEDERAL YELLOW COLOR IS PREFERRED, HOWEVER, OTHER COLORS MAY BE USED IF APPROVED BY THE ENGINEER.
- (7) IN ALTERATIONS, TO AVOID CHASING GRADE INDEFINITELY ON STEEP ROADWAYS, A CURB RAMPS LENGTH IS NOT REQUIRED TO EXCEED 15 FEET REGARDLESS OF THE RESULTING RAMP RUNNING SLOPE.
- (8) ALL SLOPES ARE MEASURED WITH RESPECT TO A LEVEL PLANE.
- (9) DRAINAGE STRUCTURES, TRAFFIC SIGNAL EQUIPMENT, OR OTHER OBSTRUCTIONS SHALL NOT BE INSTALLED ON THE CURB RAMP, OR TURNING SPACE AREAS.
- (10) IN NEW CONSTRUCTION, PULL BOXES, METER BOXES, MAINTENANCE HOLE COVERS, VAULT LIDS, OR SIMILAR, SHALL NOT BE CONSTRUCTED WITHIN ANY PART OF CURB RAMP OR TURNING SPACE. IN ALTERATIONS, WHERE THESE ITEMS CANNOT BE RELOCATED DUTSIDE OF THE CURB RAMP OR TURNING SPACE, THEY MUST NOT CREATE A VERTICAL DISCONTINUITY GRATER THAN 1/2 INCH. ANY VERTICAL DISCONTINUITY BETWEEN 1/4 INCH AND 1/2 INCH SHALL BE BEVELED WITH A SLOPE NOT STEEPER THAN 1V:2H. THE BEVEL SHALL BE APPLIED ACROSS THE ENTIRE SURFACE DISCONTINUITY.
- (1) CONSTRUCTION OF ANY REQUIRED PEDESTRIAN CURB SHALL BE INCLUDED IN THE BID PRICE OF THE CONCRETE CURB RAMP AND WILL NOT BE PAID FOR SEPARATELY
- (12) ALL CURB RAMP JOINTS AND GRADE BREAKS SHALL BE FLUSH (0'-1/8"). THE JOINT BETWEEN THE ROADWAY SURFACE AND THE GUTTER PAN SHALL BE FLUSH.
- (13) THE CONTRACTOR SHALL VERIFY REMOVAL LIMITS ARE SUFFICIENT TO PROVIDE POSITIVE DRAINAGE, MAINTAIN EXISTING DRAINAGE PATTERNS, AND AVOID PONDING IN THE FINAL CONFIGURATION.
- (14) FLARED SIDE SLOPES MAY EXCEED 10.0% ONLY WHERE THEY ABUT A NON-WALKABLE SURFACE, OR WHERE THE ADJACENT RAMP SURFACE IS BLOCKED TO PEDESTRIAN TRAFFIC.
- (15) THE CHANGE IN GRADE AT THE BOTTOM OF THE CURB RAMP SHALL NOT EXCEED AN ALGEBRAIC DIFFERENCE OF 13.33%. THE COUNTER SLOPE OF THE GUTTER AT THE FOOT OF A RAMP, TURNING SPACE, OR BLENDED TRANSITION SHALL NOT EXCEED 5.0%.
- (16) GRADE BREAKS AT THE TOP AND BOTTOM OF RAMP RUNS SHALL BE PERPENDICULAR TO THE DIRECTION OF THE RAMP RUN. GRADE BREAKS SHALL NOT BE PERMITTED ON THE SURFACE OF THE RAMP RUN OR TURNING SPACE. SURFACE SLOPES THAT MEET AT GRADE BREAKS SHALL BE FLUSH.
- (17) A BROOM FINISH, WITH SWEEPS PERPENDICULAR TO THE DIRECTION OF PEDESTRIAN TRAFFIC, SHALL BE APPLIED TO ALL RAMP AND TURNING SPACE SURFACES.
- (18) IN ALTERATIONS, WHERE A RAMP OR TURNING SPACE MUST TIE INTO AN EXISTING GRADE THAT CANNOT BE ALTERED, THE RAMP OR TURNING SPACE MAY BE WARPED TO TRANSITION TO THE REQUIRED CROSS SLOPE. THE TRANSITION TO THE REQUIRED CROSS SLOPE SHALL BE SPREAD EVENLY OVER THE LENGTH OF THE RAMP OR TURNING SPACE TO MINIMIZE THE DEGREE OF WARPING. THE RATE OF CHANGE ON A RAMP OR TURNING SPACE SHALL NOT EXCEED 3% PER LINEAR FOOT.

STATE OF COLORADO

DEPARTMENT OF TRANSPORTATION

Region 5, Traffic and Safety Unit 3803 N. Main Avenue, Suite 100 Durango, CO 81301 (970) 385-8360 (970) 385-8361 Fax

LATE FALL, WINTER AND SPRING SPECIAL PROVISIONS FOR ACCESS CONSTRUCTION AND UTILITY INSTALLATIONS

It's that time of year again when work within the Right of Way (ROW) becomes a special concern. Due to Southwest Colorado's unpredictable weather, utility work in the ROW can create several types of hazards for the traveling public, contractors and their personnel. The condition of the highway can change quickly. Mud tracked onto the highway by equipment, or ice and snowpack are just a few of the conditions that make the roadway more hazardous for all concerned. The terrain within the ROW must be kept clear of hazards as well. Holes, trenches, equipment and materials can make the terrain "unrecoverable" for a driver should his/her vehicle leave the highway. **Activities must be shut down when the roadway is other than dry.** The use of frozen materials for backfilling will only lead to settlement. The contractor must make extra effort to compact the excavation. In the spring, any settlement of backfill shall be repaired. The re-vegetation shall take place yet this fall or early next spring.

COLORADO DEPARTMENT OF TRANSPORTATION Environmental Clearances Information Summary

PURPOSE - This summary is intended to inform entities external to CDOT that may be entering the state highway right-of-way to perform work related to their own facilities (such as Utility, Special Use or Access Permittees), about some of the more commonly encountered environmental permits/clearances that may apply to their activities. This listing is not all-inclusive—additional environmental or cultural resource permits/clearances may be required in certain instances. Appropriate local, state and federal agencies should be contacted for additional information if there is any uncertainty about what permits/clearances are required for a specific activity. **IMPORTANT: Please Review The Following Information Carefully – Failure to Comply With Regulatory Requirements May Result In Suspension or Revocation of Your CDOT Permit, Or Enforcement Actions By Other Agencies.**

CLEARANCE CONTACTS - As indicated in the permit/clearance descriptions listed below, the following agencies may be contacted for additional information:

- CDOT Utilities, Special Use and Access Permitting: (303) 757-9654 <u>https://www.codot.gov/business/permits</u>

<u>Wildlife Resources</u> - Disturbance of wildlife shall be avoided to the maximum extent practicable. Entry into areas of known or suspected threatened or endangered species habitat requires special authorization from the CDOT permitting office. If any threatened or endangered species are encountered during the progress of the permitted work, work in the subject area shall be halted and the CDOT Regional Permitting Office and Region Planning and Environmental Manager shall be contacted immediately. Authorization must be provided by CDOT prior to the continuation of work. Information about threatened or endangered species may be obtained from the CDOT website, http://www.codot.gov/programs/environmental/wildlife/guidelines, or the Colorado Parks and Wildlife (CPW) website, http://www.cpw.state.co.us/learn/Pages/SOC-ThreatenedEndangeredList.aspx. Additional guidance may be provided by the appropriate Region Planning and Environmental Manager (RPEM).

Cultural Resources - The applicant must request a file search of the permit area through the Colorado Office of Archaeology and Historic Preservation (OAHP), Denver, to ascertain if historic or archaeological resources have previously been identified (<u>https://www.historycolorado.org/file-access</u>; 303-866-5216). Inventory of the permit area by a qualified cultural resources specialist may be necessary, per the recommendation of CDOT. If archaeological sites/artifacts or historic resources are encountered as the project progresses, all work in the subject area shall be halted and the CDOT Regional Permitting Office and Region Planning and Environmental Manager shall be contacted immediately. Authorization must be provided by CDOT prior to the continuation of work. Additional guidance may be provided by the Regional Permitting Office and RPEM.

<u>Paleontological Resources</u> - The level of effort required for paleontological resources is dependent on the amount of ground disturbance, including rock scaling, digging, trenching, boring, ground leveling, and similar activities.

- If the permit will involve extensive ground disturbance (generally involving more than one mile of CDOT ROW), a full review will be required by a qualified paleontologist, including map, file, and locality searches, with final recommendations provided by the CDOT paleontologist upon receipt of the report. Based on results of the review, a survey or inventory of the permit area may be necessary.
- If the permit will involve a small amount of ground disturbance (less than one mile of ROW), the applicant must request a fossil locality search through the University of Colorado Museum of Natural History (<u>https://www.colorado.edu/cumuseum/research-collections/paleontology/policies-procedure</u>) and the Denver Museum of Nature and Science (<u>https://www.dmns.org/science/earth-sciences/earth-sciences-collections/</u>). The museum collections manager will provide information about localities in the project area. If there are no known localities, the permit requirement for paleontology is complete upon submitting that information to CDOT. If there are known localities, the CDOT paleontologist will be contacted by the museum with details, and additional recommendations will be made if necessary. Note that museum staff are not required to disclose the details of fossil localities to the permit applicant, nor is detailed locality information required for the permit application to proceed.
- If the permit involve no ground disturbance, no action is required for paleontological resources. If fossils are encountered during the permitted action, all work in the immediate area of the find should stop and the CDOT Staff Paleontologist and the Region Environmental Manager should be contacted immediately. Authorization must be provided by CDOT prior to the continuation of work. Additional guidance may be provided by the Regional Permitting Office in the Permit Special Provisions. Contact Information: See the museum websites listed above. The CDOT Paleontologist is not able to conduct locality searches independently. For further information contact CDOT Paleontologist Nicole Peavey at <u>nicole.peavey@state.co.us</u> or (303)757-9632.

Hazardous Materials, Solid Waste - The Solid Wastes Disposal Sites and Facilities Act C.R.S. 30-20-100, et al, and Regulations Pertaining to Solid Waste Disposal Sites and Facilities (6 CCR 1007-2), prohibit solid waste disposal without an approved Certificate of Designation (a landfill permit). The Colorado Hazardous Waste Act C.R.S. 25-15-301 et al, and the Colorado Hazardous Waste Regulations (6 CCR 1007-3) prohibit the transfer, storage or disposal (TSD) of hazardous waste except at permitted TSD sites. There are no permitted landfills or TSD sites within the State Highway Right of Way. Therefore, all solid or hazardous wastes that might be generated by the activities of entities entering the State Highway Right of Way must be removed from the ROW and disposed of at a permitted facility or designated collection point (e.g., for solid waste, a utility or construction company's own dumpster). If pre-existing solid waste or hazardous materials contamination (including oil or petroleum contaminated soil, asbestos, chemicals, mine tailings, etc.) is encountered during the performance of work, the permittee shall halt work in the affected area and immediately contact the CDOT Regional Permitting Office for direction as to how to proceed. **Contact Information:** Theresa Santangelo-Dreiling, CDOT Hazardous Materials Management Supervisor: (303) 512-5524.

Asbestos Containing Materials, Asbestos Contaminated Soil - All work on asbestos containing materials (ACM) must comply with the applicable requirements of the CDPHE Air Pollution Control Division's (APCD) Regulation 8. Disposal of ACM, and work done in asbestos-contaminated soil, must comply with the CDPHE Hazardous Materials and Waste Management Division's (HMWMD) Solid Waste Regulations. The application for any CDOT permit must specifically identify any ACM involved in the work for which authorization is being requested. Additional guidance or requirements may be specified in the permit special provisions. *Contact Info:* CDPHE APCD and HMWMD Regulations can be accessed via the CDPHE Environmental Permitting Website listed above. Additional information <u>concerning clearance on CDOT projects</u> is available from the CDOT Asbestos Project Manager (303) 512-5519, or Theresa Santangelo-Dreiling, Hazardous Materials Management Supervisor: (303) 512-5524.

Transportation of Hazardous Materials - No person may offer or accept a hazardous material for transportation in commerce unless that person is registered in conformance with the United States Department of Transportation regulations at 49 CFR, Part 171. The hazardous material must be properly classed, described, packaged, marked, labeled, and in condition for shipment as required or authorized by applicable requirements, or an exemption, approval or registration has been issued. Vehicles requiring a placard, must obtain authorization and a State HAZMAT Permit from the Colorado Public Utilities Commission. *Contact Information:* For authorization and more info call the Federal Motor Safety Carrier Administration, US DOT for inter- and intra-state HAZMAT Registration (303) 969-6748. Colorado Public Utilities Commission: (303) 894-2868.

Discharge of Dredged or Fill Material – 404 Permits Administered By the U.S. Army Corps of Engineers, and Section 401 Water Quality Certifications Issued by the CDPHE WQCD - Clean Water Act section 404 permits are often required for the discharge of dredged or fill material into waters of the U.S., including wetlands. Several types of section 404 permits exist, including nationwide, regional general, and individual permits. Nationwide permits are the most commonly authorized type for activities with relatively minor impacts. If an individual 404 permit is required, section 401 water quality certification from the CDPHE WQCD is also required. Contact the appropriate Corps District Regulatory Office for information about what type of 404 permit may be required (contact information above). Contact the CDPHE Water Quality Control Division at (303) 692-3500.

Working on or in any stream or its bank - In order to protect and preserve the state's fish and wildlife resources from actions that may obstruct, diminish, destroy, change, modify, or vary a natural existing stream or its banks or tributaries, it may be necessary to obtain a Senate Bill 40 certification from the Colorado Department of Natural Resources. A stream is defined as 1) represented by a solid blue line on USGS 7.5' quadrangle maps; and/or 2) intermittent streams providing live water beneficial to fish and wildlife; and/or 3) segments of streams supporting 25% or more cover within 100 yards upstream or downstream of the project; and/or 4) segments of streams having wetlands present within 200 yards upstream or downstream of the project measured by valley length. The CPW application, as per guidelines agreed upon by CDOT and CPW, can be accessed at https://www.codot.gov/programs/environmental/wildlife/guidelines.

Erosion and Sediment Control Practices - Any activities that disturb one or more acres of land require a Stormwater Construction Permit (SCP) from the CDPHE-WQCD. Erosion & sediment control requirements will be specified in that permit. In situations where a stormwater permit is *not* required, all reasonable erosion and sediment control measures should be taken to minimize erosion and sedimentation. Control practices should be in accordance with CDOT Standard Specifications 107.25, 208, 213 and 216 (<u>https://www.codot.gov/business/designsupport/cdot-construction-specifications</u>). The CDOT Erosion Control and Stormwater Quality Guide (website: <u>https://www.codot.gov/programs/environmental/landscape-architecture/erosion-storm-quality</u>) can also be used to design erosion/sediment controls. *Contact Information:* Contact the CDPHE-WQCD at (303) 692-3500. Website: <u>https://www.colorado.gov/pacific/cdphe/wq-construction-general-permits</u>

<u>Site Stabilization</u> - All disturbances require a stabilization plan, native seeding or landscape design plan according to applicable CDOT Standard Specifications 212-217 and 623. The CDOT Erosion Control and Stormwater Quality Guide should also be used to plan restoration of disturbed vegetation. Website: <u>https://www.codot.gov/programs/environmental/landscape-architecture/erosion-storm-quality</u>

<u>Stormwater Discharge From Industrial Facilities</u> - Discharges of stormwater runoff from certain types of industrial facilities, such as concrete batch plants - require a CDPS Stormwater Permit. *Contact Information:* Contact the CDPHE-WQCD at (303) 692-3500. Website: <u>https://colorado.gov/pacific/cdphe/wq-commerce-and-industry-permits</u>

<u>Concrete Washout</u> - Waste generated from concrete activities shall NOT be allowed to flow into the drainage ways, inlets, receiving waters, or in the CDOT ROW. Concrete waste shall be placed in a temporary concrete washout facility and must be located a minimum of 50 feet from state waters, drainageways, and inlets. Concrete washout shall be in accordance to CDOT specifications and guidelines at <u>https://www.codot.gov/business/designsupport/cdot-construction-specifications</u> and refer to the specifications and their revisions for sections 101, 107 and 208.

<u>Construction Dewatering (Discharge or Infiltration) and Remediation Activities</u> - Discharges of water encountered during excavation or work in wet areas may require a Construction Dewatering or Remediation Activities Discharge Permit. *Contact*

Information: Contact the CDPHE-WQCD at (303) 692-3500. For Applications and Instructions: https://www.colorado.gov/pacific/cdphe/wg-construction-general-permits.

Municipal Separate Storm Sewer System (MS4) Requirements - When working in a MS4 area, discharges to the storm sewer system are subject to CDOT's or other municipalities' MS4 Permit. For activities within the boundaries of a municipality that has a MS4 permit, the owner of such activity should contact the municipality regarding stormwater related requirements. All discharges to the CDOT highway drainage system or within the Right of Way (ROW) must comply with the applicable provisions of the Colorado Water Quality Control Act, the Water Quality Control Commission (WQCC) Regulations

(https://www.colorado.gov/pacific/cdphe/wqcc-regulations-and-policies-and-water-quality-statutes) and the CDOT MS4 Permit #COS-000005 (https://www.codot.gov/programs/environmental/water-quality/documents). Discharges are subject to inspection by CDOT and CDPHE. For CDOT-related MS4 programs and requirements, go to:

https://www.codot.gov/programs/environmental/water-quality/stormwater-programs.

Post-Construction Permanent Water Quality - When working in a CDOT MS4 area and the activity disturbs one or more acres, permanent water quality control measures may be required. Information on the requirements can be found under the CDOT Permanent Water Quality MS4 Program at: https://www.codot.gov/programs/environmental/water-quality/stormwaterprograms/pwg-permanent-water-quality

Discharges to Storm Sewer Systems

Prohibited Discharges - All discharges are subject to the provisions of the Colorado Water Quality Control Act and the Colorado Discharge Permit Regulations. Prohibited discharges include, but are not limited to, substances such as wash water, paint, automotive fluids, solvents, oils or soaps and sediment.

Allowable Discharges - The following discharges to stormwater systems are allowed without a permit from the CDPHE-WQCD: landscape irrigation, diverted stream flows, uncontaminated ground water infiltration to separate storm sewers, discharges from potable water sources, foundation drains, air conditioning condensation, irrigation water, uncontaminated springs, footing drains, water line flushing, flows from riparian habitats and wetlands, and flow from firefighting activities. Contact Information: Contact the CDPHE-WQCD at (303) 692-3500. Information can also be found in the CDOT Illicit Discharge MS4 Program PDD at: https://www.codot.gov/programs/environmental/water-quality/stormwater-programs/idde.html.

Spill Reporting - Spills shall be contained and cleaned up as soon as possible. Spills shall NOT be washed down into the storm drain or buried. All spills shall be reported to the CDOT Illicit Discharge Hotline at (303) 512-4426 (4H20), as well as the Regional Permitting Office and Regional Maintenance Supervisor. Spills on highways, into waterways, any spill in the highway right-of-way exceeding 25 gallons, or that may otherwise present an immediate danger to the public shall be reported by calling 911, and shall also be reported to the CDPHE at 1-877-518-5608. More information can be found at

https://www.colorado.gov/pacific/cdphe/emergency-reporting-line.

Disposal of Drilling Fluids - Drilling fluids used in operations such as Horizontal Directional Drilling may be classified as "discharges" or "solid wastes," and in general, should be pumped or vacuumed from the construction area, removed from the State Highway Right of Way, and disposed of at permitted facilities that specifically accept such wastes. Disposal of drilling fluids into storm drains, storm sewers, roadside ditches or any other type of man-made or natural waterway is prohibited by Water Quality Control and/or Solid Waste regulations. Small quantities of drilling fluid solids (less than 1 cubic yard of solids) may be left on-site after either being separated from fluids or after infiltration of the water, provided: 1) the drilling fluid consists of only water and bentonite clay, or, if required for proper drilling properties, small quantities of polymer additives that are approved for use in drinking water well drilling; 2) the solids are fully contained in a pit, and are not likely to pose a nuisance to future work in the area, 3) the solids are covered and the area restored as required by CDOT permit requirements (Utility, Special Use, or Access Permits, etc.). Contact Information: Contact CDPHE (telephone #'s listed above).

Noxious Weeds and Invasive Species Management Plan - Noxious Weeds and Invasive Species guidance can be found by contacting the Colorado Department of Agriculture (https://www.colorado.gov/pacific/agconservation/noxiousweeds) and the Colorado Division of Parks and Wildlife (http://cpw.state.co.us/aboutus/Pages/RS-NoxiousWeeds.aspx). In either case, management plans involving the control of noxious weeds associated with the permitted activity and cleaning of equipment will be required.

What is stormwater runoff?

Stormwater runoff occurs when precipitation from rain or snowmelt flows over the ground. Impervious surfaces like roads and sidewalks prevent stormwater from naturally soaking into the ground

Why is stormwater runoff a problem?

Stormwater can pick up debris, chemicals, dirt and other pollutants and flow into CDOT's storm drain system or directly into a stream, river, lake, wetland or reservoir. Anything that enters CDOT's storm drain system is discharged untreated into the waterways we use for fishing, swimming, and providing drinking water.

Dredged spoil, dirt, slurry, solid waste, incinerator residue, sewage, sewage sludge, garbage, trash, chemical waste, biological nutrient, biological material, radioactive material, heat, pH, wrecked or discarded equipment, **rock**, **sand**, any industrial, municipal, or agricultural waste.

Tips for Reporting an Illicit Discharge

Call the illicit discharge hotline at **(303) 512-4426** From a safe distance try to estimate the amount of the discharge. Identify characteristics of the discharge (color, odor, algae, etc.). Obtain information on the vehicle dumping the waste (if applicable). Do not approach! Call *CSP for illicit dumping. If possible, take a photo, record a license plate. *REMEMBER:* Never get too close to the illicit discharge, it may be dangerous!!!

For more information on CDOT Utility Permits:

https://www.codot.gov/business/permits/utilitie sspecialuse

For more information on CDOT Access Permits:

Water Quality Program Industrial Facilities Program

CDOT has a Municipal Separate Storm Sewer System permit, otherwise known as (MS4) from the Colorado Department of Public Health and Environment. The permit states that only stormwater can be discharged from CDOT's storm drain system

As part of the permit, CDOT has several different programs to prevent pollutants from entering into the storm drain system:

- Construction Site Program
- New Development Redevelopment Program
- Illicit Discharge Program
- Industrial Facilities Program
- Public Education and Outreach Program
- Pollution Prevention and Good Housekeeping Program
- Wet Weather Monitoring Program

Control Measures for Industrial Facilities

Industrial facilities can use control measures (CM) otherwise known as Best Management Practices (BMP) during the construction of a facility and when operating the facility. Control measures are schedules of activities, maintenance procedures, and other management practices to prevent and reduce pollution entering into CDOT's storm drain system. Control Measures also include treatment, operating procedures, and practices to control site run off which can include structural and non-structural controls.

CDOT defines a utility, or utility facility as any privately, publicly, or cooperatively owned line, facility, or system producing, transmitting or distributing the following:

- ✓ Communications
- ✓ Cable television
- ✓ Power
- ✓ Electricity
- ✓ Light
- ✓ Heat Gas
- ✓ Oil
- ✓ Crude Products
- ✓ Water
- ✓ Stream
- ✓ Waste
- ✓ Stormwater not connected with highway drainage
- ✓ Similar Commodity

COLORADO

Department of Transportation

Industrial Facilities Program Elements:

- Educate and outreach to owners or operators that have potential to contribute substantial pollutant to water.
- 2. Report and include information on discharge and water quality concerns. Provide written notification within 15 days of discovery to CDPHE.
- Submit an annual report to CDPHE containing the number of informational brochures distributed; name and title of each individual trained.

Education

There are instances when a utility company or other entity doing work in the state highway right-of-way will require some type of environmental permit or clearance for that work. CDOT has put together an Environmental Clearances Information Summary for those applying for a CDOT Utility and Special Use Permit or Access Permit to obtain all required clearances. This fact sheet is given to each permittee and is available at: http://www.coloradodot.info/programs/ environmental/resources/guidancestandards/Environmental%20Clearances% 20Info%20Summary.pdf

18) Check with the issuing authority to determine which of the following documents are required to complete the review of your application.

- a) Property map indicating other access, bordering roads and streets.
- b) Highway and driveway plan profile.
- c) Drainage plan showing impact to the highway right-of-way.
- d) Map and letters detailing utility locations before and after
- development in and along the right-of-way.

- e) Subdivision, zoning, or development plan.
- f) Proposed access design
- g) Parcel and ownership maps including easements.
- h) Traffic studies.
- i) Proof of ownership.

1- It is the applicant's responsibility to contact appropriate agencies and obtain all environmental clearances that apply to their activities. Such clearances may include Corps of Engineers 404 Permits or Colorado Discharge Permit System permits, or ecological, archeological, historical or cultural resource clearances. The CDOT Environmental Clearances Information Summary presents contact information for agencies administering certain clearances, information about prohibited discharges, and may be obtained from Regional CDOT Utility/Special Use Permit offices or accessed via the CDOT Planning/Construction-Environmental-Guidance webpage: https://www.codot.gov/programs/environmental-learances

2- All workers within the State Highway right of way shall comply with their employer's safety and health policies/ procedures, and all applicable U.S. Occupational Safety and Health Administration (OSHA) regulations - including, but not limited to the applicable sections of 29 CFR Part 1910 - Occupational Safety and Health Standards and 29 CFR Part 1926 - Safety and Health Regulations for Construction.

Personal protective equipment (e.g. head protection, footwear, high visibility apparel, safety glasses, hearing protection, respirators, gloves, etc.) shall be worn as appropriate for the work being performed, and as specified in regulation. At a minimum, all workers in the State Highway right of way, except when in their vehicles, shall wear the following personal protective equipment: High visibility apparel as specified in the Traffic Control provisions of the documentation accompanying the Notice to Proceed related to this permit (at a minimum, ANSI/ISEA 107-1999, class 2); head protection that complies with the ANSI 289.1-1997 standard; and at all construction sites or whenever there is danger of injury to feet, workers shall comply with OSHA's PPE requirements for foot protection per 29 CFR 1910.136, 1926.95, and 1926.96. If required, such footwear shall meet the requirements of ANSI Z41-1999.

Where any of the above-referenced ANSI standards have been revised, the most recent version of the standard shall apply.

3- The Permittee is responsible for complying with the Revised Guidelines that have been adopted by the Access Board under the American Disabilities Act (ADA). These guidelines define traversable slope requirements and prescribe the use of a defined pattern of truncated domes as detectable warnings at street crossings. The new Standards Plans and can be found on the Design and Construction Project Support web page at:

https://www.codot.gov/business/civilrights/ada/resources-engineers

If an access permit is issued to you, it will state the terms and conditions for its use. Any changes in the use of the permitted access not consistent with the terms and conditions listed on the permit may be considered a violation of the permit.

The applicant declares under penalty of perjury in the second degree, and any other applicable state or federal laws, that all information provided on this form and submitted attachments are to the best of their knowledge true and complete.

I understand receipt of an access permit does not constitute permission to start access construction work.
