

From the Transit Manager

June Ridership

In June 2026, overall ridership decreased by 1.66% when compared to June 2025. Total ridership for June 2026 was 8,211 passengers. SAM-Gresham provided 5,799 rides, a 1.56% decrease from the previous year. SAM-Estacada had a moderate decline of 12.19%, providing 785 rides. SAM-CTC provided 310 rides, a 29.55% decrease. The shopper experienced a considerable increase of 35.17%, providing 627 rides.

SAM rides provided 630 rides, an increase of 8.25% compared to last year. SAM Med also experienced an increase of 8.86%, transporting 86 riders.

The decline in ridership is incongruent with other factors and we have hired a tech consultant to review the numbers as we suspect there may be an issue with our tablets. Once they have reviewed and presented the findings we will move forward with the best solution to resolve any discrepancy in ridership counts.

Historical Museum Camp Field Trip to the Operations Center

In June, approximately 15 kids from the Historical Museum Camp boarded a trolley for a tour of the Operations Center. The youth learned about riding a bus, bus operations and Public Works duties. They were able to have hands-on experience with equipment and operations. As shown above, the students were able to, with adult assistance, spray the pressure washer. They also viewed the various vehicles used by PW to perform their tasks such as the backhoe, mobile toolbox and crane. They ended the trip by learning wheelchair securement and, of course, ringing the trolley bell! A great time was had by all!

SAM-Clackamas Partnership

SAM and Clackamas County's partnership continues to provide monthly revenue to the Transit Department. This includes \$5,297 monthly for administrative support and rent, \$3,556.86 for medical transportation of 34 Clackamas County residents outside the City limits and \$27,208.93 in FLAP reimbursement. The total received for June was \$36,062.79.
