Re: Range Improvement Project #RIP 859 (Montezuma Canyon Creek Water Wells II)

Dear Mr. Stewart:

San Juan County supports the proposed drilling of 2 livestock water wells and installation of pumping equipment and water troughs on SITLA lands in Montezuma Canyon in southeastern San Juan County. The proposal is consistent with the 2017 San Juan County Resource Management Plan (RMP) which supports the implementation of range improvement projects such as water wells and associated facilities which support proper livestock grazing and improved range conditions.

We appreciate this notification and opportunity to comment.

Sincerely,

Willie Grayeyes
Chairman
