### SUMMARY

SEUALG is applying for a regional grant through the Scaling Pandemic Resilience Through Innovation and Technology (SPRINT) Challenge Letter of Support. As the county is an association partner with Economic Development a letter of support has been requested. The SEUEDD's proposal includes working with Utah State University, Utah Association of Counties, and possibly another outside source that helps couple investors with communities to generate financial results and meaningful impact. Our goal is to strengthen our entrepreneurial ecosystem throughout southeastern Utah through this grant.
