Sky Ranch is a disaster waiting to happen. There has already been a plane crash at the old airport, it is notoriously windy in Spanish Valley. It's absolutely absurd to allow an airport to be there, it's just ridiculous, irresponsible and incredibly dangerous.

If approved my home and land will be heavily impacted if SRA becomes an actual active airport since I'm in the direct flight path of the aircraft leaving the valley. We already have planes flying way too low as they exit the valley, having no idea that there are people living out here.

The winds in this region are wild, big and erratic. Please do not approve Sky Ranch.
