ADMINISTRATIVE ITEMS

5. Announcement of Public Hearings

Time Stamp 0:25:30 (audio)

Administrator Bushnell reminded the Planning Commission of the upcoming dates and times for the Public Hearings on the 2024 Ordinance legal adoption later this month.

6. Review of Final Zoning Maps

Time Stamp 0:28:30 (audio)

Administrator Bushnell highlighted the final zoning maps and areas that were changed based on previous discussions. The purpose of the maps goes beyond the current task of Zoning the county and will be a large part of future ambitions to create online interactive GIS data to the public for parcel fabric information. The goal of having more opportunity available to more community locations was reiterated.

There was some discussion on the maps in particular areas to make changes where it would be more fitting with the surrounding zones. The La Sal community was especially of interest based on community comments received. Coordination of the use table was throughout the discussion.

7. Review of Final Use Table

Time Stamp 2:12:00 (audio)

Administrator Bushnell reviewed the Use Table for accuracy of previous comments. There were some uses similar enough to one another that were conflicting, such as private and public corrals, and adjustments were made to be more consistent with the intent of uses in each zone.

Commission Austin stressed the importance of having a process to allow for an unlisted use to be able to be considered and placed on the table for future reference as proposal would be discussed and agreed upon by Planning Commission and staff.

8. Review of Additional Sections to Zoning Ordinance

Time Stamp 2:35:00 (audio)

Administrator Bushnell pointed out the resources available to the public to review online and stated that comments will continue to be collected and forwarded onto the Planning Commissioners.

The debate of being a “Fence In” or “Fence Out” county was discussed with a general agreement that the amount of land used for livestock grazing makes it very unreasonable to put the responsibility of “Fence In” on local ranchers. Therefore, we agreed to include a section for “Fence Out” in the final document.

Density and Lot Size standards were discussed as to what seemed practical for heights, set backs, coverage area and frontages. The intent was to allow higher densities in hopes of enticing more housing developments.
