	Professional Installation		1	\$25,200.00	\$25,200.00
				Grand Total	\$65,694.50

Additional Info:

We reserve the right to charge extra for extreme digging including but not limited to: site not excavated prior to our arrival, material other than native soil, such as old footers, loose-fill, drainage, etc.

Does not include any site prep, drainage, borders, flatwork, or permits.

Standard Insurance applies. Additional insurance requirements will incur applicable charges. Tax exempt.

Due to recent events many of our Suppliers are requiring the 1/2 down deposit be paid before the order will go into production. To not delay your order please make arrangements to pay the 1/2 down on equipment as soon as your estimate is signed & invoice is received.

Job will take two (2) mobilizations. Pricing has been adjusted to include those.

REQUOTE PROJECT BEFORE SIGNING AS FREIGHT COSTS VARY DAILY.

Steelworx Hexagonal Shelter w/ Vented Top - 28'

Model: HX-28-SW-VT

DESIGN SPECIFICATIONS

Model: Steelworx Hexagonal Shelter w/ Vented Top, 28'

Model # HX-28-SW-VT

Manufacturing Mission: To provide all prefabricated components and installation instructions for a 28' hexagonal (measured from eave to eave) free standing bolt together, tubular steel constructed shelter kit.

Design Criteria: Structure is typically designed for a 25 lb live load and a 90 mph wind load capacity, but can be designed based on specific site requirements upon request. All structural members are ASTM A-500 U.S. grade B steel. Welded connection plates shall be ASTM A-36 hot rolled steel. All fabrication performed to latest AISC standards by AWS Certified welders. All framing connections are done using A325 grade bolts within concealed access openings from above and will later be concealed by the roofing. All roof framing shall be flush against the roof decking to eliminate the possibility of bird nesting.

Tubular Steel Columns and Beams: Standard column dimension shall be 5" x 5" x 3/16" tubular steel welded to 5/8" base plates for surface mounting. Main support beams are 7" x 5" x 3/16" and purlins are 5" x 3" x 1/8". Steel sizes are preliminary and may change due to ongoing review and final engineering.

Roofing: 24 Ga. pre-cut steel Multi-Rib panels with Kynar 500 finish in a variety of colors with white underside. Standard roof slope is a 4/12 pitch with a eave height of 8'-0". Attached to structural framing with exposed self tapping screws painted to match roof color. Matching 24 Ga. trim included.

Frame Finish: All steel framework will receive a corrosion protective TGIC Polyester powder coat, electro-statically applied and cured at 400°F. A large selection of standard colors are available.

Foundation: All columns need to be anchored to concrete footings (footing design provided separately). Columns can be surface mounted to footings with anchor bolts at or below finish slab elevation or they can be embedded directly into the footing without base plates upon request. Anchor bolts and bracing templates are included. Optional base plate covers are available at an additional cost.

Hardware: All structural hardware and roofing fasteners shall be provided.

Warranty: 10 years against manufacturer defects.

Not Included: Concrete work of any kind, unloading of product and installation.

Additional Options:

- Flexibility of Design
 - Such as: Height and Pitch
- Additional Engineering
- Variety of Colors
- Decorative Railings, Lattice, Braces, Trim, etc.
- Cupolas and Rooftop Accs.
- Column Style Variations
- Provisions for Electrical
- Lexan Wind Screens
- Tongue & Groove Roof Decking
- Asphalt Shingles, Standing Seam, Cedar Shake, or Clay Tile Roofing
- Composite Finished Ceiling
- Solar Panels & Solar Lighting
- Site Furnishings and Accs.
