

ANYWHERE IT CAN RAIN, IT CAN FLOOD.

Do you know your flood risk?

Flooding is the most costly and common natural disaster and occurs in all 50 states. Our community is working with FEMA to update our current flood maps to identify your flood risk and help protect you and your property.

FEMA

Learn Your Risk

Find your maps: visit the FEMA Map Service Center: <https://msc.fema.gov/portal/home>

Look up your address and the corresponding flood zone:

- Zones AE, A, and AE with Floodway are high risk. Flood insurance is mandatory.
- Zone X is moderate risk. Flood insurance is recommended but not mandatory.
- Unshaded properties are low risk. However, low risk does not mean no risk! Flood insurance is recommended.

Questions? Visit floodsmart.gov to learn more or talk to your insurance agent to see how you can prepare against flooding.
