Mr. Mayor and Town Council,

I would like to acknowledge what great employees we have working for us at the Town Of Saratoga.

This includes the Ladies that run town hall. They help in all matters when it comes to questions and information needed regarding the town.

Also the work that our Public Works Director , Emery Penner has his crews doing, including himself has been remarkable and major cost savings . This includes there replacing sewar and water lines in our city streets. With there direct work, replacing of these utility lines it has saved all Saratoga residents \$100,000 of dollars.

Lets not forget to acknowledge the work done by these same employees at the Never Forget Park. I mean starting with the surveying of the site , laying out the restrooms, parking lot, lawn area , side walks and curbing. Then these same guys laying down all the asphalt for the parking lot, huge project all done by them . Job well done!!

Very few other municipalities in the state ' would take on these projects. They would have bid out for contractors to complete these major projects. As stated previously there dedication to these projects has saved all town residents \$100,000 dollars .THANK YOU

Sincerely

Johnny Portillo
