

## **\*\*NOTICE OF MOSQUITO ABATEMENT\*\***

### **Includes application of pesticides via ground fogging machines and airplanes.**

The Town of Saratoga will begin population reduction of mosquitoes on a 3 day a week schedule, beginning as early as June 1, 2026, and continuing through September 15, 2026. The exact commencement date of treatment will be dependent on weather and arrival of mosquito populations. Fogging will take place Monday, Wednesday and Thursday from 7:30 P.M. to 10:00 PM, weather permitting. Aerial spraying via airplane will begin in early June 2026 and continue into late summer. At this point in time the Town staff is planning on three (4) aerial applications throughout the season: 3 larvicide applications and 1 adulticide application. The Town's aerial program uses larvicide and adulticide, and adulticide applications are completed via ground fogging, and larvicide applications are also completed by hand in various ponding areas of Town.

The purpose of this abatement program is to increase public health and safety as well as quality of life throughout the community.

For questions or information about mosquitoes, pesticides, monitoring, or other aspects of the program please contact the Saratoga Public Works Department at:
