

(No subject)

I have noticed this fire hydrant adjacent to Harvey Shields home. It has been inoperable for many months. I contacted STVFD, Chief Rydeen and he stated that he asked the City to fix it. He suggested for me to contact the City. I believe the City has been negligent in not repairing the fire hydrant. Health and Safety should be on top of your list for your residences I have noticed it for months but haven't said anything because there is a working hydrant near my home. So reaching out to the city on behalf of the affected neighbors. If there was a fire in one of those 4 homes, is a good chance the City could be negligent. As there would be a delay in response time to a fire, going to the next closest fire hydrant. Please think of safety and fix the fire hydrant as soon as possible

Thank you for hearing me out

Lee

Lee I checked with the fier chief as well, & ask how many houses does one fier hydran cover? and he told me 8 houses

But that doesn't excuse the City. If it was outside my home I would advocate for it to be fixed and I would point it out to my home insurance company

I recall the fire across the street from me (Pat Bryant) the fire department couldn't use the nearest fire hydrant because the fittings were incompatible and that delayed the fire fighting. The city should fix it. If they don't they are negligent

Lee, for now I am happy to print your text and add it to public testimony for the next regular meeting. I am happy to arrange zoom for you if you need it. -Lori
