

City of Sedgwick  
City Council Meeting  
December 3, 2025

**TO:** Mayor and City Council

**SUBJECT:** Vehicle Exhaust Removal System – Station 31

**INITIATED BY:** Administration

**AGENDA:** New Business

---

**Background:** The Station 31 project has four components that are outside of the GC solicitation; site generator, a/v system, access control system, and a vehicle exhaust removal system.

RFB 10-2025 was issued on October 13, 2025, for the purchase and installation of the vehicle exhaust removal system at Station 31. Submittals for the solicitation were due by 10:00 am November 17, 2025. There were a total of two bids submitted, with the lowest qualified bidder being Air Cleaning Technologies Inc. for \$69,700.00.

**Analysis:** The industry leaders in vehicle exhaust removal systems are Plymovent, MagneGrip, Monoxivent, EuroVent, and Fume-A-Vent. These systems are expandable in the future should reconfiguration of the apparatus parking take place. The table below depicts the bids received.

**Financial Considerations:** The cost for the vehicle exhaust removal will be paid from the capital improvement fund and be reimbursed through the bonding process.

**Recommended Action:** It is recommended that council approve the bid from Air Cleaning Technologies Inc. for \$69,700.00

**Attachments:** Bid Tabulation

Bid Tabulation
