

City of Sedgwick
City Council Meeting
April 2, 2025

TO: Mayor and City Council

SUBJECT: Staff Report

INITIATED BY: Administration

Speed Limit Discussion

We held the first community meeting regarding the reduction of the speed limit in the City and had a productive time with those who attended. In the coming weeks, we will be releasing a video that provides viewers with an overview of the proposal as well as releasing more dates for community meetings. Overall, once communicated the plan was well received.

Parks Master Plan Engagement Session

The first parks master plan engagement session is scheduled for Saturday, April 5th from 11am – 1pm. Landworks Studio LLC will be onsite at the park shelter to poll community members while Sedgwick PD provides visitors with hot dogs, chips, and refreshments while supplies last. To boost engagement, the city will have two bouncy houses set up at the park during the event. Come out and enjoy a free lunch while providing input on how you want your parks to be developed in the future.

Reminder that the website and survey are still live. We have gotten a lot of great responses back already but would like to hear from as many people as possible during this process.

Code Enforcement

Sedgwick PD has been out in full force this past two weeks working with community members to remediate their code violations. Since March 13th, eleven (11) violation notices have been issued, with two of those violations being remediated by their required date. The remaining nine (9) notices have a remediation date of this Friday. SPD is working on creating social media content to help community members be vigilant about the “Nasty 9” which are the nine most common code violations.
