### **Section 3 If the Request is for a Nonconforming Use**

I am requesting a variance to allow for the completion of a roundabout (drive-through) driveway on my property to improve safety, accessibility, and ease of use for myself and my family. Our current driveway requires vehicles to back out next to a stone wall into the busy city park traffic, which creates a hazardous situation.

The current driveway also has a slope making it very dangerous during icy or snowy conditions if family members who walk up the driveway.

Additionally, I have close family members with health and mobility challenges. This includes individuals with cancer undergoing treatment, as well as family members with special needs, and elderly who require a zero-step drop-off area for safe entry and exit from vehicles. A roundabout driveway would provide the space needed to accommodate these accessibility need in a way that our current layout simply cannot.

Importantly, all neighboring properties in the immediate vicinity already have roundabout drive-through driveways. This request would bring our home into alignment with the established character of the neighborhood, without disrupting the visual or functional consistency of the area.

Approving this variance would greatly enhance the safety and livability of our home while supporting the medical and accessibility needs of my family.

### **Section 4- Requested Variance**

I am requesting a variance from the City of Sheboygan's zoning code that limits or restricts the construction of roundabout drive-through driveways in residential districts. I am seeking approval which would allow vehicles to enter from one side

and exit from the other, rather than requiring backing into the busy park street down a sloped driveway.

This design will:

- Improve safety for vehicles entering and exiting the property
- Provide a zero-step drop-off area for family members with mobility issues and medical needs
- Match the character of surrounding homes, which have similar roundabout driveways.

The variance is necessary to meet both accessibility needs and neighborhood consistency, while enhancing safety during winter conditions.

- Removing section of blacktop.
- Approx 41 ft of blacktop along street is remaining
