I live at 2606 Grey Fox Court.

I had a dead tree and Tim from Public Works ^{Forestry} looked at it and agreed that it needed to be removed. He then asked me if I wanted a new one replanted. I said NO. I had a notice on my door ~~the~~ last month that a tree was going to be planted. I called Tim and explained my concern. Upon my return trip from Ireland two days ago, I came home and a new tree was planted. I told him that I wanted it removed. We have no sidewalks or street lights and we have a lot of dog owners that walk their dogs late at night. The trees that were planted over twenty years ago, are the bottom of ~~quality~~ the barrel. Branches are laying in the street on most days and I feel this is a safety concern. The garbage truck hits the trees when they pick up the garbage. We have older people that live in this subdivision and they cannot haul these branches to the drop off center.

There are other people in the city of Sheboygan that would love a new tree planted on their property, but I am not one of them. I requested that I did not want a tree planted and I feel with the high taxes that I am paying, no street lights or sidewalks, trees are not properly trimmed unless you call continuously and complain, so I feel that I have the right to have this new tree removed. I am trying to save the city money!

Thank you.
