June 2026

The IT Department continues to be busy with closing on several IT Department projects and supporting City Departments.

Here are updates for the month of June:

- Our new service desk is moving along to go live in late July.
- We are assisting our city departments by onboarding new apps that will improve efficiency. For example, the City Clerk's office is working to onboard NextRequest to help with records requests.
- IT is continuing to make improvement to internal processes so we can sustain our positive momentum. Our current focus is documentation and team building.
