SUMMARY

INTRODUCTION:

This report provides a summary of the operations of the Stormwater and Urban Forestry Division of Public Works for 2023.

LEGISLATIVE HISTORY

From 2021 onwards, an Urban Forestry Annual Report has been provided to Parks & Public Works Committee, and to Council. In 2023, the City created a new combined division within the Parks & Public Works Department – the Stormwater & Urban Forestry Division. This report provides information on the operations of this newly-formed division within the calendar year of 2023.

BACKGROUND

The City maintains stormwater infrastructure to meet NPDES (National Pollution Discharge Elimination System) permit requirements. These requirements protect the waters of the United States (WOTUS) from pollution nationwide.

As demonstrated by the [Snoqualmie Natural Infrastructure Assessment 2020](#) The City's urban forest provides a series of measurable benefits, the most significant of which is reducing stormwater runoff, as well as improving water quality through filtration.

ANALYSIS

The report summarizes the work of the Stormwater & Urban Forestry division in 2023. It includes details on maintenance of stormwater assets including catch basins, pipes, vaults, detention ponds, bioswales and trees. Additionally, the report summarizes the activities of the Green Snoqualmie Partnership, a volunteer and partner-based program with the mission "to engage the community in creating and caring for healthy natural areas and forested open spaces in the city to protect Snoqualmie's heritage and valuable natural resources for current and future generations to enjoy."

NEXT STEPS

This report will be presented to Council on 4/22/2024

PROPOSED ACTION
