

Attachment D

Horseshoe CUP

Building Elevation

Overall Garage Height: 24.9 Ft
Roof Pitch: 1/12
Existing Home Height - Peak: 17Ft - Tallest Point: 20 Ft.

The garage will be used for a personal hobby shop for wood working etc.
It will also be used for personal storage of vehicles and trailers.

The community ARC sent me an email on 6/7/26 approving the garage.

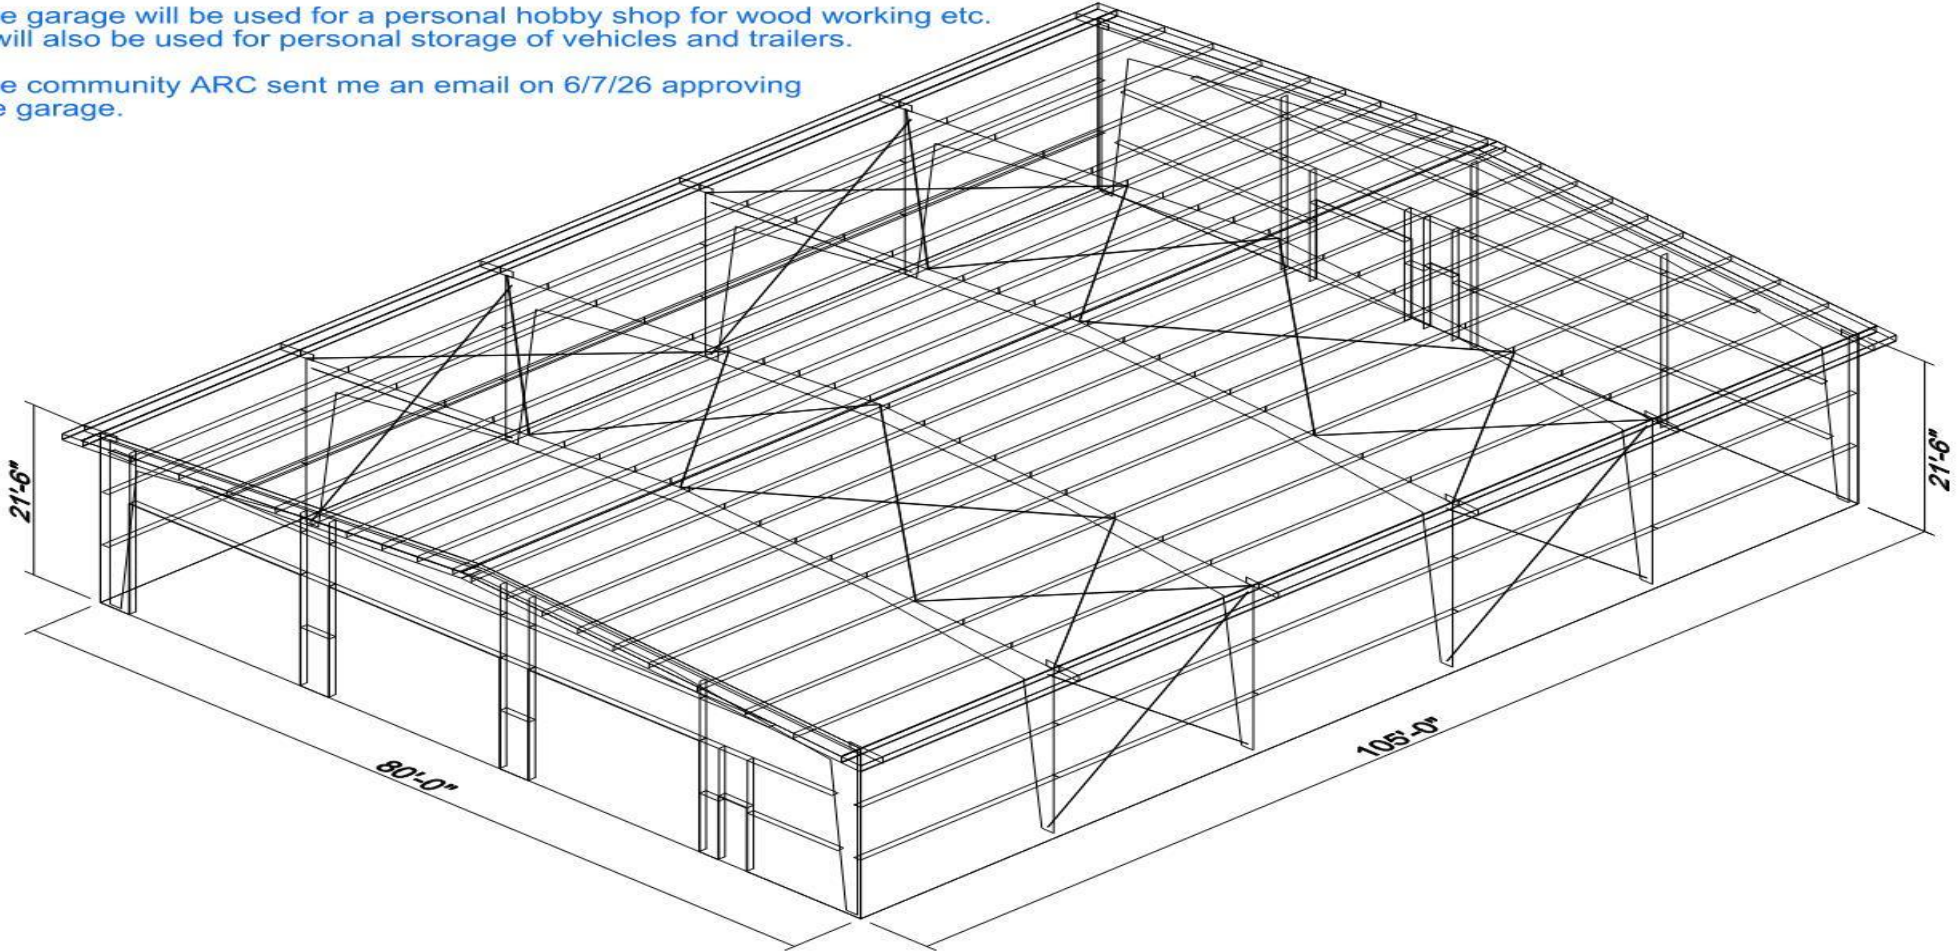

Image Description: The image shows a technical drawing of a large rectangular garage building presented in a transparent wireframe style. The roof structure, support beams, framing lines, and exterior walls are all visible through the outline. The drawing includes labeled measurements along the exterior edges: 80 feet along the front, 105 feet along the side, and 21 feet 6 inches in height. Several garage door openings and entry doors are outlined on the front and side walls. Text appears above the drawing, stating: "Overall Garage Height: 24.9 Ft Roof Pitch: 1/12 Existing Home Height – Peak: 17 Ft – Tallest Point: 20 Ft. The garage will be used for a personal hobby shop for woodworking etc. It will also be used for personal storage of vehicles and trailers. The community ARC sent me an email on 6/7/26 approving the garage."
