

CITY COUNCIL AGENDA REPORT

MEETING DATE: October 5, 2020

TO: City Council Members

FROM: Mary Rose Rutikanga, City Administrator

SUBJECT: Energy Action Committee Update

RECOMMENDATION

Receive an update from the Energy Action Committee

DISCUSSION

The Energy Action Committee is a committee that formed after the City adopted the Energy Action Plan on March 5, 2018. Working with the Sierra Business Council, the Energy Action Committee goal is to expand energy efficiency, renewable energy and water efficiency efforts with the City of Sonora.

The Energy Action Committee recently met and it was agreed the City would pursue a grant from the Tuolumne County Public Power Agency (TCPPA) to conduct/update the City's Energy Audit. This would inform the City as to what changes it can make to make City buildings and facilities to become more energy efficient. With an updated energy audit, the City will be in a better position to apply for energy grants to improve/replace aging infrastructure.

The Energy Action Committee will be working with staff to complete the necessary documentation to the TCPPA to begin the Energy Audit.

FISCAL IMPACT

The Energy Audit will be funded by the TCPPA.
