

memo

DATE: October 28, 2022
TO: Spring Lake Park
FROM: Steve Robertson
Supervisor, Source Water Protection Unit
SUBJECT: Statewide Perfluoroalkyl Substances (PFAS) Monitoring Project

Below please find your system's sampling results for the Statewide PFAS Monitoring Project. Sampling was conducted on 4/21/22, 5/31/22, and 8/31/22.

Sampling results

There were no PFAS compounds detected in the samples. No additional action is needed at this time.

About the project

The Minnesota Department of Health (MDH) has been studying the potential health impacts of PFAS in groundwater in Minnesota since 2002. This project is part of a larger effort at MDH to sample all community water systems (CWSs) for PFAS. MDH aims to cover 90% of CWS customers under its PFAS monitoring program by 2025. The project has been made possible through funding from the Clean Water Fund and U.S. Environmental Protection Agency. Sampling results from all systems that participated in the study will be included in an interactive mapping application on the MDH website.

- For more information about the PFAS monitoring in Minnesota, please visit [PFAS Testing of Public Water Systems](https://www.health.state.mn.us/communities/environment/water/pfas.html) (<https://www.health.state.mn.us/communities/environment/water/pfas.html>).
- For more information about Phase I of this project, see the infosheet [Statewide PFAS Monitoring Project \(PDF\)](https://www.health.state.mn.us/communities/environment/water/docs/statewidepfas.pdf) (<https://www.health.state.mn.us/communities/environment/water/docs/statewidepfas.pdf>).

If you have any questions about the results, please contact Jane de Lambert, the Project Manager, at (651)201-4692.
