Memorandum

Spring Lake Park
History. Community. Home.

To: Mayor Nelson and Members of the City Council

Cc: Dan Buchholtz, City Administrator

From: George Linngren, Public Works Director

Date: October 29, 2026

Subject: October Public Works Report

Here is my summary of our work activities that were carried out in October.

1. Park Maintenance

- All park irrigation systems have been shut down and winterized by blowing out the lines in preparation for the winter season.
- We planted 27 trees throughout the parks and will continue watering them through the fall to ensure they are well established and adequately hydrated before winter.

2. Water Main Breaks

- All water main breaks have been repaired, and the system is in good condition heading into the fall and winter months.

3. Street Painting

- Street and curb painting operations have concluded for the year. While not all planned painting was completed, the current condition is sufficient for winter, and remaining work will resume in the spring.

4. Street Sweeping

- With leaves now falling more consistently, we have resumed street sweeping operations and will continue throughout the fall season until snowfall begins.

5. Miscellaneous Projects

- The street mill and overlay project has been completed, including all punch-list items. The project was successful and produced positive results.
- Miscellaneous asphalt patching for the year has also been completed, and our roadways are in good condition heading into the winter months.

Meetings and Community Engagement

- Attended two City Council meetings and two work sessions.
- Attended the quarterly SRA meeting in Chanhassen.
- Participated in the monthly supervisors meeting.

This concludes my report. I would be happy to answer any questions.
Thank you.
