This is not a research report and was not prepared by the research departments of Oppenheimer & Co Inc. It was prepared by Oppenheimer's Cash Management Group for use with institutional investors only. Past performance is not necessarily a guide to future performance. Financial Advisors Paul Sullivan and Chris Sullivan, as members of the Cash Management Group of Oppenheimer & Co. Inc. ("Oppenheimer"), offer clients Oppenheimer's cash management services. Securities products offered or sold by Oppenheimer & Co. Inc. ("Oppenheimer") will not be deposits or other obligations of Oppenheimer, will not be endorsed or guaranteed by Oppenheimer, and will be subject to investment risks, including the possible loss of principal invested. Investing in securities is speculative and subject to substantial risk. There is no guarantee that any investment strategy will be successful.

Please see additional important information and qualifications at the end of this material.

Important Information and Qualifications

Rates are as of the morning of the date shown and are subject to availability. Market price, yield, and ratings are subject to change at any time. The market value of fixed income securities will fluctuate, and if sold prior to maturity, investors may receive more or less than their original purchase price or maturity value, depending on market conditions. Callable bonds may be redeemed by the issuer prior to maturity. Additional call features may exist that could affect yield. Please consult your Oppenheimer Financial Advisor regarding applicable call provisions prior to investing. In some cases information is based on data obtained by the firm from external sources deemed to be reliable. Investors should match credit ratings to their risk profiles. For additional information on any of the data noted above, please contact us.

Commercial Paper (CP):

Short-term negotiable unsecured promissory notes issued at a discount to par, primarily by industrial and financial corporations. Interest income on CP is fully taxable.

Federal Funds Futures Contracts:

The Federal Funds Futures Contract is for the simple average of the daily effective federal funds rate during the month of the contract.

Federal Agency Discount Notes:

Federal Agency Discount Notes are short-term securities issued by government sponsored enterprises (GSEs) at a discount to par value. The difference between the discount purchase price and the par value (the accreted interest) is paid at maturity. The interest earned on some Federal Agency Discount Notes is state and local tax-exempt.

Federal Agency Bonds:

Federal Agency Bonds are securities issued by government sponsored enterprises (GSEs), corporations created by Congress to foster a public purpose. Most agency bonds pay a semiannual coupon and are sold in a variety of instruments.

Money Market Mutual Funds

An investment in a U.S. SEC 2a-7 registered money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other U.S. government agency. Although a US Domestic money market fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in a money market fund. An investor should consider the investment objectives, risks, and charges and expenses of the Fund(s) carefully before investing. A prospectus which contains this and other important information about the Fund(s) may be obtained from your Oppenheimer Financial Advisor. Please read the prospectus carefully before investing or sending money.

USD Composite A

Bloomberg Composite Ratings are averages of Moody's, Standard and Poor's and Fitch. The indices are comprised of a basket of US Dollar denominated option-free Fair Market Value Corporate bonds with maturity dates around the selected time period.

US General Obligation AAA, AA+, AA-, A+

Bloomberg Composite Ratings are averages of Moody's, Standard and Poor's and Fitch. The indices are comprised of a basket of US Dollar denominated option-free Fair Market Value Municipal General Obligation bonds with maturity dates around the selected time period.

U.S. Treasury Bills:

A short term debt obligation backed by the U.S. Government with a maturity of less than one year. T-bills commonly have maturities of one month, three months, or six months. T-bills are issued through a competitive bidding process at a discount from par, which means that rather than paying fixed interest payments like conventional bonds, the appreciation of the bond provides the return to the holder.

U.S. Treasury Notes and Bonds:

A fixed-interest U.S. government debt security with a maturity from one to thirty years. Treasury securities make interest payments semi-annually and interest is only taxed at the federal level.

90 Day Rate Change

The difference between the current rate and the rate 90 days prior. Should 90 days prior fall on a date where the market is closed, the date is shifted to the last open market date beyond 90 days.
