	Describe your special qualifications applicable to City Council.
	Having spent half my life working in the private (business) sector, the other half working in the pul
	sector in service to students and parents, I have a unique business acumen that has been molder
	by my experience of working in the public sector. In business, I honestly felt in my naivety, I never
	had a problem I couldn't either solve, or get rid of. Working in the public sector was humbling, and
	I had to learn how to work with existing resources and problems that required strategies and not
	necessarily solutions.
	I tend to be very analytical. I ask questions, and look for solutions. I view problems as obstacles
	to overcome, not reasons to do nothing. I don't appreciate my time being wasted, and I don't
	like perseverating on issues that are already decided, or are beyond my pervue
	Why do you want to serve on the Stevenson City Council?  The entire second half of my career was always been about service to others: students, parents, and the communities that serve them. It was always fulfilling work. I am now retired and willing to
	continue this service to our community. I see our city at an inflection point. As we grow (and yes v
	will continue to grow), it is up to us to decide how that growth will take place. I would like to be a
	part of tranforming our city into a place that attracts others that want to be a part of it as well. I kno
	there are some that prefer our city never change. If in the future, voters were to make a
	determination of my continued tenure in this position, based upon this premise, I would ask they
	never consider me. You plan for success. Lacking this forsight, is a plan for failure.
	Specify any activities that might create a conflict of interest if you should appointed to the City Council.
	Barring any isuues that may affect me as a homeowner in our community, I see no conflicts.
