7121 E Loop Road, PO Box 371  
Stevenson, Washington 98648

To: Stevenson City Council  
From: Carolyn Sourek, Public Works Director  
RE: Sewer Plant Update  
Meeting Date: April 20, 2023

## Water:

- Loop Road Waterline nears completion. Appreciated everyone's patience with the detour.
- Leak Survey on contract for August. Information will be used to identify focus areas for maintenance and capital improvement priorities.
- Initial quote from painting contractor the WTP interior painting (see photo attached).
- Altitude valve malfunctions at the Catholic Church reservoir. Scheduled rebuilds of a portion of clay valves (should be every 5 years and altitude valve was at 8 years from the last rebuild) for coming weeks.

## Wastewater:

- Sewer report part of this agenda.
- Still waiting on RAS pump delivery – was supposed to be 4/20/23
- North oxidation ditch brush motor shaft is badly damaged after a bearing malfunction. Repair options being considered. (see photo – this shaft should be a continuous diameter, not decrease in size as shown). This mechanism will be replaced as part of the WWTP upgrades.
- Sewer line extension on Iman Cemetery Road to break ground early May. Mitigation Agreement was approved at last meeting.
- Sewer line lateral at Fir Street (for anyone familiar with this issue) will be rerouted in the coming months. Mitigation Agreement is on the agenda.

## Stormwater:

- No change.

## Streets:

- Spruce Up Stevenson Meeting. City would like help with planting annuals, mulching tree wells, painting curb yellow, and weeding of course.
- Signs – Sea Reach was awarded a contract to design and manufacture new (Chamber of Commerce, Fairgrounds Park, RV Dump Station, and Transfer Station) and replacement (Middle School removal, Directions to County Office and to Public Restrooms) Wayfinding signs. Work will be paid for by TAC grant funding received.
- Sidewalks – received grant from Insurance Company to do more cutting and some panel replacement. Going out for RFPs next month.

- Resurfacing projects – Map of roads to be improved attached. East Side roads are this years' focus. TIB is supporting chipsealing and overlay projects. County is generously doing this work for us. We anticipate receiving additional money for cracksealing in advance of the improvements. McEvoy will get an overlay and we expect to have funds to include El Paso in the surfacing repairs.

**Equipment:**

- Surplus request will be at next meeting.

**Parks:**

- Nothing to report

**Staff:**

- Bill Sexton passed his Cross Connection Control Specialist test.
- Jon Dexter passed his Cross Connection Control Specialist test.
- Newest PW staff member, Carson Whitney, passed his Cross Connection Control Specialist test. Did first on call week and nothing blew up. Yay!
- Devon Groom passed his WWTP0 II test (noted in last council meeting as well).
