

## Council update

December 2025

### Projects

- Cascade project is still ongoing, sewer is completed, as well as storm. Water is 90% completed waiting on the last few services and hydrants to be connected. Anticipating bulk of the work to be completed by the end of the year and holding off on restorative under weather improves.
- We were able to secure partial funding for Lasher Street project; we will be pursuing fund sources for the remainder of the project.

### Water

- LTWS 1B has officially kicked off, kick off meeting was earlier this week, expected completion will be early summer.
- With high amount of rain, the crew has been utilizing the well as surface water is high in turbidity to use. The well has been running well, and crews have been taking advantage of the water plant down time to perform maintenance.

### Wastewater

- WWTP upgrades and lift stations are proving to be quite useful with the high levels of rain, the staff has been managing the high flows well.

### Streets

- Crews have been battling the storms by clearing the storm catch basins, sweeping and removing obstacles the rainwater can get caught on.
