From: Gloria Butsch, Finance Director

RE: Second Quarter FY2024 Financial Report

For the first quarter of the new fiscal year, I changed the presentation. My goal is to provide a report that is brief, easily understood and provide all the financial information needed for the Council to make decisions.

Since this is a new format and the information is condensed from what you have received in past years, please let me know if there is any specific information that you would like to have clarified in future reports.

The focus of this report is on our major operating funds: General Fund and Utility Funds.

In the Budget to Actual Reports, please note that the beginning fund balances are estimated until we have the completed audit. Though you received the audit presentation from the auditor on January 24<sup>th</sup>, the financial reports were still in draft form and the entire report document had not yet been completed. As near as I can tell, the fund balances that I show in this quarterly report are the actual ending fund balances from FY2023.

As of the second quarter, we expect revenues and expenditures to be approximately 50% of budget (50% of budget remaining). There are exceptions, particularly for property taxes, which approximately 94% of budget was collected in November and early December.

I reported in the first quarter that it appeared the estimated beginning fund balance for the General Fund was \$500k less than the budget, however during performing additional audit adjustments, it is closer to \$300k less than budget. Additionally, I would like to clear up some statements made by others that have mis-quoted me as saying that \$500k was "missing"; this is not the case. Budget estimates are our best effort for forecasting resources and requirements. Last year, the audit was extremely late, and we were unable to rely on it for the beginning fund balances when preparing the FY2024 budget.

In the General Fund, overall expenditure for personnel services is at 54% remaining and materials and service are at 71%; however, this includes contingency (which we hope to not need). If we eliminate contingency as an available expenditure, we have almost 55% of budget remaining.

Police materials & services are at 41% of budget remaining. This is due to the report writing software, the cost of which was supposed to be shared with the County and the City of Scappoose. The City of Scappoose pulled out, increasing the cost shares for the County and us.

Finance is at 43% remaining, this is due to exorbitant bank fees, which staff are working on reducing. In addition, though Finance has budgeted for banking fees, most of these fees are generated from utility services and should be included in General Fund Support Services which is charged out to the Utility Funds.

Administration has 13% of the remaining budget in materials & services; this is primarily due to the costs of professional services. We are analyzing this to determine if some should be allocated to other departments or if we will need to make budget adjustments.

The Utility Funds are all operating at better than 50%. Charges for services for the Water, Sewer, and Storm Funds are right at 50% of budget. Personnel Services are 59% to 65% remaining.

I've included the Budget to Actual Report for all funds. There are only a couple of notable items. In the Community Development Fund, we had not budgeted for timber harvesting, however the forester advised that it was a good time, marketwise. Also, in nearly all funds, interest revenue is well over what we anticipated, or was not budgeted for. In the General Fund it is less than budgeted; this is because in the past the General Fund received nearly 100% of interest earnings from the LGIP. I made a correction to this practice as this pooled cash and all funds should receive interest earnings based on their cash balances.

As always, please contact me if you have any questions.
