ITEM: New Business – Roof Repair Proposal: Light and Water Department

BACKGROUND: Shawn Boyle, Schwickert’s Tecta America, will be presenting proposals regarding the Light and Water department roof repairs after a recent facility roof audit in order to accommodate solar panels.

The roof audit identified several maintenance concerns and recommended repairs necessary to maintain roof performance and ensure continued watertight protection of the building. In addition to addressing deterioration and long-term maintenance concerns, completion of this project is necessary to maintain compliance requirements associated with the solar panel grant received by the city.

STAFF RECOMMENDATION: Approve/Deny Proposals.
