FORSYTH COUNTY COURTHOUSE ADA PARKING

Forsyth County, Georgia

Stantec staff provided design and construction administration services for a retrofit parking lots project in downtown Cumming next to the Forsyth County Courthouse. The courthouse did not have easily accessible ADA parking, and the county found many folks of varying need were struggling to access the public building. Forsyth contracted Stantec to design and accessible parking lot and route withing ADA standards in between the court house and the public road. This includes accessible entrances and exit drive, relocating existing city sidewalks, underground detention and water quality systems. The project has been constructed and users of all capabilities can easily access the courthouse.

Stantec was hired to provide civil engineering services for the parking lot expansion as well as to consider related stormwater containment and release. The design was integrated into the overall architectural and structural improvements that the Church is implementing at the same time. In some cases, tight and narrow through-ways were mitigated with unique design solutions that allow the parking lot to still function as anticipated. Construction is planned for Summer of 2023.

Stantec was originally hired to provide a complete site restoration and site amenity package to the historic and recreational property that included pathways, seating, parking, and new roads. After completion, Stantec was rehired to provide design of a parking lot expansion for the building capacity expansion of the property to provide additional capacity. The proposed area had many drainage issues on a slope. Stantec provided civil engineering services for the parking area as well as detailed stormwater and utility coordination to ensure the lasting success of the parking area. Concise effort was given to ensure ADA accessibility of the parking lot as well as access to the other areas that the farm has to offer. Paths and drainage routes were implemented to mitigate existing conditions. The project was constructed in 2020.

c. Project Understanding and Approach

Understanding

Stantec understands how public spaces and accessibility are interconnected and dependent upon one another. The expanded capacity for parking at Fairington Park will promote the recreational use for the community as well as assist with connection to New Fairington Park. Stonecrest recreational opportunities are fantastic places for the community to join and partake in their natural environment. This parking lot expansion and site upgrade will allow users to more efficiently connect with what this park and future connections have to offer.

Approach

Project Management - Stantec is a team-oriented group. When our team joins with you all, a true partnership is formed that promotes the growth of a healthy community. We will kick-off that relationship by creating a Project Management Team (PMT) with Stantec and city staff as well as any identified stakeholders or key members. The PMT will then finalize the schedule and anticipated deliverables within the project framework. All decisions and processes will go through the PMT to ensure all parties are effectively informed and agreed.

Survey - Concurrently, Stantec will release our survey partner KCI Technologies for site survey to gather all required site and topographic information that allows our team to start analyzing the existing conditions and inform our preliminary design process. KCI will survey the adjacent property for reference but not the entire site boundary. Survey will include existing utilities and edge of roadway and r/w adjacent to Fairington Parkway

Concept - Stantec will then begin to figure preliminary design with opportunities and constraints that can be communicated with the city prior further development. If appropriate, 2 developed concepts will be brought to the PMT during a Concept Development meeting where final direction can be confirmed with all proposed improvements. Certain considerations will be given to orientation, parking lot layout and capacity, stormwater conveyance, and existing utilities. T

Construction Plans - Our team of engineers will then go to work to develop these concepts into working construction drawings that include the necessary information to implement and construct the project. This will include all detailed construction drawings including existing conditions, site, grading, and erosion control plans as well as any stormwater or utility profiles that will be utilized for construction. As required final specifications and plans will be delivered to the city for bidding and construction.

Permitting - As the plans go into final development and the PMT is comfortable with the anticipated deliverable, Stantec will begin to permit the project through the City of Stonecrest permitting process and Georgia Soil and Water Conservation (GSWC). Any required updates, edits, or revisions that the city may need will be adjusted and addressed during this time. Stantec prides itself as working with the permitting team efficiently and effectively to meet all schedules.

Specific Design Considerations - Our team will evaluate specific spatial relationships and offsets from proposed expansion of parking lot to the property boundary on the East side adjacent the residential property. Adequate space and buffering will be allowed and provided as required by Stonecrest.

Our team will also evaluate the tree removal as part of the expansion. Existing trees will be categorized and evaluated. Our plan will include tree replacement around the parking area where feasible to restore tree canopy cover to provide shade and mitigate heat island effect.

Construction Administration and Related Services -

As mentioned, Stantec is a partner in this process. If requested/or as needed, Stantec can be involved during the construction process. Stantec can assist with the bidding and contractor selection process as well as answer RFI's and respond with Addendum if needed. During the construction phase, Stantec can be virtual attendees of agreed upon progress meetings and approve any shop drawings. These services re for the benefit of the city to ensure that the anticipated goals and objectives of the project are being delivered in the manner that are anticipated. Stantec shares the desire with the city to see a final implemented project that is delivered and also gives value to the local community around it.
