Restroom Expansion at Southeast Athletic Complex

Specific Requirements:

The City is expecting the selected firm to evaluate the existing building for current uses on the first and second floors to make sure the access to stairs and the doors are not compromised and meet the ADA and access codes when designing the footprint of the restroom expansion. The City prefers to utilize the existing entrance doors for the current restrooms and increase the capacity by adding extension to each side of the building, with a knockout passage to the extension for each side. The goal is to increase each restroom to provide no less than seven (7) units each, including one (1) ADA accessible stall per side.

- 1. Design and construct a minimum of four (4) female water closets, and two (2) wash basins that are accessible and connected to the existing woman side of the restroom facility. The City prefers to use the existing woman side of the entrance to the additional water closets if possible. A separate entrance must be used only if it is necessary due to the existing layout/wall/roof restrictions and/or ADA requirements.
- 2. Existing sewer lateral (from the Woman restroom side) shall be tested and replaced if any breaks or cracks are located within the lateral up to the manhole.
- 3. Design and construct a minimum of two (2) male water closets and two (2) urinals, on the male side of the restroom facility. City prefers to use the existing entrance to the men side of the rest room facility for the additional water closets if possible. A separate entrance must be used only if it is necessary due to the existing layout/wall/roof restrictions and/or ADA requirements.
- 4. Existing sewer lateral (from the Men restroom side) shall be tested and replaced if any breaks or cracks are located within the lateral up to the manhole.
- 5. The contractor is responsible for all required design, including architectural, electrical, mechanical, plumbing and site/civil. If subconsultants/contractors are used for any of these design services, the prime contractor is responsible for their work and included in the proposal.
- 6. Contractor shall be mindful about the staircase on the Men side (back of the building) while designing the restroom addition and make sure the stairs are usable by employees during construction and easily accessible once the project is completed.
- 7. The City desires to become as energy efficient as possible and therefore is moving in an eco-friendly direction. With this in mind, contractor should take every opportunity to include energy efficient lighting, water-flow, and other industry standard methods to conserve energy with the final product.
- 8. The City is also moving to provide safety features for our guests. It is expected that all features will become touchless, including flush mechanisms, sink operations and touchless hand dryers. The door(s) may remain mechanical, but all other amenities should be touchless. In addition, for germ free safety, all sit-down toilets are required to have a lid and there shall be no grout used in the flooring.
- 9. In addition to the safety of trying to eliminate germs, the City is also concerned with privacy. The current block wall barriers for stalls are not required to be duplicated. However, if the contractor designs a facility with new partitions they must provide as much privacy as possible, both high and low, and not contain gaps where there are joints.
- 10. Water Closet dimensions shall meet the latest Building Code and ADA standards.
- 11. Utility Services: All utility services are available at the existing restroom facility. Use/Redirect any existing utilities (electrical, mechanical, or plumbing) as needed.

- 12. Contractor shall provide a full design with sketches/plans and specifications to City Engineer's approval. Once the plan is approved, the contractor can begin material supply.
- 13. Once the design is approved, the Contractor shall apply for permitting with City of Stonecrest Building Department and DeKalb County Fire Marshal. The City of Stonecrest permit fees will be waived.
- 14. The land disturbance is expected to be minor, and less than one acre, and disturbance is limited to the proposed restroom addition pad area. So, no separate land disturbance permit is required, however a site plan including grading plan and utility plan (if necessary) shall be included in the building plan submittal.
- 15. Non-load bearing internal CMU walls could be removed and/or reconfigured with new CMU walls. If external load nearing CMU walls are to be removed and reconfigured, the reconfiguration shall be properly designed and constructed. Any new doors on the existing CMU walls should be properly designed for structural load.
- 16. Install new mirrors for the full width of the vanity surfaces.
- 17. The City has a contract with a supplier for restroom fixtures. It is <u>not</u> required to include toilet tissue paper holders, seat cover holders, soap or hand sanitizer dispensers, air fresheners, paper towel dispensers, sign holders or trash cans. Any other fixtures such as handrails, changing tables, etc., must be included.
- 18. All paints and fitting shall match existing colors and types. If different type of fittings to used, it should be clearly stated in the proposal.
- 19. All new interior and exterior walls, roof structure, partitions and fixtures shall match the existing restroom materials and color.
- 20. All existing fixtures shall be assessed for repair or possible replacement.

Contractual Notes:

- 1. This is a design/build contract. Price/Bid should include a complete scope of work including all necessary modifications to existing utility connections, permitting and any specified design costs (if applicable). The city of Stonecrest is seeking a qualified firm that can perform all of the services and meet the design requirements, within the given special limits and complete the construction in an expeditious manner.
 - 1. The contractor is solely responsible for securing the construction area and any related material storage to prevent the public from entering the area. The second floor and the rooms on the opposite side of the existing restrooms will be used by the city staff during construction.
 - 2. Southeast Athletic Complex is an active park and heavily used throughout the year. The contractor is responsible for having all workers on site (within limits of construction) to wear proper Personal Protective Equipment (PPE) at all times to meet the OSHA requirements. This includes but is not limited to hard hats, vests, eye protection, respiratory protection (dust/other), gloves and any other PPE as necessary. Contractor and anyone on site affiliated with or working with contractor must wear identifiable clothing, name tags, or ID badges that reflect the company they work for and indicate they are part of the contractors team.
 - 3. Contractors must keep the jobsite continually clean with all materials to be placed in contractors dumpsters and service the dumpsters as necessary.

- 4. Contractor is allowed to close the existing restrooms as necessary for a reasonable period of time and must open for use immediately when it is safe for patrons to use. The city prefer the Contractor kept open the existing rest rooms during weekends and events and make sure the restrooms are safe for public use.
- 5. Change Orders, if issued by the City, are strictly limited to 10% overhead expenses and 10% profit. Any Changes, if directed are to be based on proven, documented (actual) costs (labor, material, equipment, subcontractor, and other expenses including applicable burdens and/or taxes) multiplied by 1.20 (20% total O&H). Lower tier contractors are subject to the same margins and must provide any documentation to confirm cost at the City's request. If a deductive change order occurs, estimated cost plus 10% (x1.10) shall be credited to the City of Stonecrest. Approval of any change is subject to the City of Stonecrest's sole approval and should be submitted prior to any new, additional, deductive and/or modified work occurs.
- 6. Contractor shall submit a schedule of values (breakdown of billing) for approval by the owner, before submitting the first bill/invoice.
- 7. Contractor, within 10 days of notice to proceed, to submit a contract schedule (in MS Project format). Handwritten/Drawn schedules are acceptable if the presented information is clear and provide all necessary information.
- 8. The Contractor is required to upgrade the existing water closets as necessary to meet the current applicable code.
- 9. Signage shall be used to direct the public and employees during construction to direct foot traffic and restroom users.
- 10. Parking area near the restroom (except the Handicap spaces) could be sued to park contractor vehicles during construction.
- 11. This is a Lump Sum Contract.
- 12. The approximate location of the restroom expansion is shown in the sketch below.

BASIS OF ESTIMATE

The Basis of Estimate is a written explanation clarifying the assumptions and exclusions used in establishing the quantified bid dated February 2025 The scope of work includes the Renovation for Restroom Expansion at Southeast Athletic Complex. The following were used in preparation of this estimate:

- Scope of Work provided by City
- Site walk

Following a joint review, reconciliation and estimate modifications can be made to better serve your needs.

ASSUMPTIONS & CLARIFICATIONS

01 - GENERAL REQUIREMENTS

- Paryani Construction carries insurance as required by law and excess liability over the total cost of the project.
- We have included a general one-year warranty on all items.
- We have confirmed adequate parking on site at no additional costs for all contractors.
- Payment and Performance bonds have been excluded. If required add 2.2%
- All material testing and special inspections are to be provided by an independent third party contracted by the Owner if required.
- All moving of owner FF&E is excluded as indicated in the drawings.
- All temporary electricity, water, wi-fi, and other utility costs during construction are assumed to be provided by the Owner.
- We have included engineering and architectural design.

02 - EXISTING CONDITIONS

- We have included selective demolition of CMU walls.
- We have included demolition of all flooring, base, glass, doors, frames, as needed to provide full scope.
- We have included demolition of MEP as required to relocate and install new.
- We have included all dumpsters and dump fees.

03 - CONCRETE

- We have included new SOG with turndown footings, GAB, WWF, Moisture Barrier, and Rebar.
- We have included patch back of plumbing trenches.
- We have included new sidewalks.

- We have included cutting and patching the façade for new doors.
- We have assumed providing bond beams at all new exterior openings.
- We have included pouring grout in cells at connection detail between old CMU and new CMU.

06 - WOODS, PLASTICS, AND COMPOSITES

 We have included wood roof framing, trusses, built up members, vented soffit framing, fascia framing.

07 - THERMAL AND MOISTURE PROTECTION

- We have included new shingle roofing.
- We have included patching mechanical penetrations as needed.
- We have included flashing and caulking at all exterior openings as needed.
- We have included new downspouts and gutters.
- We have included roll on vapor barrier.
- We have included slot drains at exterior.

08 - OPENINGS

We have included new hollow metals door hardware to replace existing.

09 - FINISHES

- We have included a new ACT system.
- We have included patching, finishing, and sanding walls as required.
- We have included all floor covering.
- We have included a new integral base.
- We have included priming and painting all the walls.
- We have included painting all doors and door frames as shown.

10 - SPECIALTIES

- We have included new fire extinguisher cabinets and fire extinguishers as required.
- We have included providing stainless toilet partitions.
- We have included providing all grab bars.
- We have included installing relocated paper towel dispensers.
- We have included installing relocated toilet paper dispensers.
- We have included installing relocated soap dispensers.
- We have included providing new bathroom mirrors.

22 - PLUMBING

- We have included all plumbing associated with the new plumbing fixtures as shown.
- We have included providing PVC sanitary vents and pipes.
- We have included providing copper water supply/distribution pipes.
- We have included connecting new plumbing to a new hose bib.
- We have included insulating all new overhead water piping.

23 - HEATING, VENTILATION, AND AIR CONDITIONING (HVAC)

• We have included providing exhaust fans in CMU block walls.

26 - ELECTRICAL

- We have included providing new lighting fixtures.
- We have included switching and sensors.
- We have included providing outlets, quads, GFCI's, and dedicated receptacle as needed.
- We have included power for mechanical and plumbing fixtures as required.
- We have included power for signage as shown.

31 - EARTHWORK

- We have provided testing and camera of existing line as requested.
- We have included digging and preparation of earth for new SOG.

•
