East	Residential	A-2 Suburban District
West	Greenspace / Residential	Bedico Creek PUD Planned Unit Development

5. The subject property abuts A-2 Suburban District to the north, south, and east. To the west sits the Bedico Creek PUD Planned Unit Development.
6. The purpose of the existing A-2 Suburban District to provide a single-family residential environment on large, multi-acre lots. The A-2 district is located primarily in less populated areas where the character of the area should be preserved through low densities. The density requirements of the A-2 Suburban District call for a minimum of 1-acre lot sizes with 150' of Parish road-frontage, and allows 1 dwelling unit per every 1 acre. Exceeding the placement of 5 units would trigger a Major Subdivision review by the St. Tammany Parish Planning Commission.
7. The purpose of the proposed CBF-1 Community-Based Facilities District is to provide for the location of public and quasi-public uses that are appropriate within close proximity to residential districts. Permitted uses under the CBF-1 Community-Based Facilities District are as follows: Golf courses and recreational facilities owned by public or private entities, including restaurants, clubhouses, grills and retail (including sale of alcohol) when accessory to recreational facilities; Churches, temples, and synagogues; religious educational facilities; clubs and lodges; Fraternal and religious institutions.
8. The CBF-1 Community-Based Facilities District allows for a maximum ground floor footprint of no more than 30,000 sqft as well as limiting maximum lot coverage to 50% of the total area of the lot. **However, if a CBF-1 Community-Based Facilities-zoned property is within 200ft of a residential zoning classification, the maximum footprint shall be limited to 500 sqft in area.**
9. Per the petitioner's application, the request, if approved, is to obtain building permits to construct a Church as well as other associated uses.

Additional Development Information

10. The subject property is also within the vicinity of East Bedico Creek (named waterway), which would be subject to the following requirements per the Department of Engineering:
 - 50' no-cut buffer from top-of-bank each side of the waterway

Consistency with New Directions 2040

Residential: Light-Intensity: Predominantly single family, detached homes on very large lots. The lower residential density creates a more spacious character appropriate as a transition between the Parish's Rural or Conservation areas and more intense land uses. The dispersed development pattern makes public services and amenities less efficient and more expensive to provide, and so residents typically must travel farther to access them.

Residential: Medium-Intensity: Medium Intensity neighborhoods include a broader mix of large and small lots but remain predominantly, single-family detached homes. Attached homes such as townhomes and 2-unit homes, as well as assisted living centers may fit into the character of Medium Intensity Residential Neighborhoods. The higher density of development makes central water and sewer more practical than on-site water and wastewater systems, and infrastructure like sidewalks, subsurface drainage, and street lighting are more common. These areas are appropriate buffers between Rural or Low Intensity Residential Neighborhoods and High Intensity Residential Neighborhoods or Commercial and Institutional areas.

The proposed zoning change is NOT consistent with the following goals, policies, and strategies of the Comprehensive Plan:

- i. Goal 1.3: The character of existing residential areas, expansive rural landscapes, and sensitive ecological areas will be preserved.
- ii. Strategy 1.8.1: Maintain zoning classifications for mixed-use development at various scales and intensities.
