Compatibility or Suitability with Adjacent Area

4. Table 3: Surrounding Land Use and Zoning

5. Direction	Surrounding Use	Surrounding Zoning Classification
North	Residential	L-1 Large Lot Residential District
South	Residential	L-1 Large Lot Residential District
East	Residential	L-1 Large Lot Residential District
West (across Airport Road)	Industrial	I-2 Industrial District

6. The subject site abuts residential properties to the north, south, and east zoned L-1 Large Lot Residential District. To the west across Airport Road is the Covington Industrial Park Subdivision which is zoned I-2 Industrial District.
7. The existing L-1 Large Lot Residential District is intended to provide a single-family residential environment at a low-density level. The L-1 Large Lot is located primarily in less populated areas where the character of the area should be preserved through low densities. The minimum parcel size in the L-1 Large Lot Residential District is 1 acre with a minimum lot width of 150’.
8. The purpose of the requested ED-1 Primary Education District is to provide for the location of public or private schools that are generally served by buses or serve smaller student populations.
- Permitted uses include art studio, day care or adult care center, educational facility, adult secondary, learning center, elementary or middle school, electrical energy substation*, small wireless facility*, stormwater retention or detention facility.
9. Per the petitioner’s application, the reason for the request is to develop the site to construct an approximately 35,000sqft private school for grades Pre-K through 12.
10. If approved, the site will need to comply with all parish requirements including parking, drainage, and landscaping standards.

Consistency with New Directions 2040

Residential: Medium-Intensity: Medium Intensity neighborhoods include a broader mix of large and small lots but remain predominantly, single-family detached homes. Attached homes such as townhomes and 2-unit homes, as well as assisted living centers may fit into the character of Medium Intensity Residential Neighborhoods. The higher density of development makes central water and sewer more practical than on-site water and wastewater systems, and infrastructure like sidewalks, subsurface drainage, and street lighting are more common. These areas are appropriate buffers between Rural or Low Intensity Residential Neighborhoods and High Intensity Residential Neighborhoods or Commercial and Institutional areas.

The proposed zoning change is consistent with the following goals, policies, and strategies of the Comprehensive Plan:

- i. Goal 4.3: Neighborhoods throughout the Parish will share high access to quality public facilities and services, including schools, public safety facilities, recreation facilities, and libraries.

Standards for Review (Sec. 200-3.1.G) - When reviewing a zoning map amendment, the St. Tammany Parish Planning & Zoning Commission shall take the following items into consideration prior to recommending a decision to the Council:

- i. The proposed amendment is compatible with the Comprehensive Plan and consistent with the future land use map.
- ii. The proposed amendment promotes the public health, safety, and welfare of the Parish.
- iii. The proposed amendment corrects an error or meets the challenge of some changing condition, trend or fact.
- iv. The proposed amendment is compatible with existing use and zoning of nearby property.
- v. The proposed amendment is a more suitable zoning classification for the property than the current classification.
- vi. The proposed amendment enhances or protects the surrounding natural environment, including air, water, stormwater management, wildlife, and vegetation.
