3. As seen in Table 2, the subject site borders undeveloped land to the east, and residential development to the north, west and south with a zoning classification of R-1 Rural Residential District, RO Rural Overlay, and MHO Manufactured Housing Overlay.
4. The existing R-1 Rural Residential District is intended to provide a single-family residential environment at a low-density level located primarily in less populated areas where the character of the area should be preserved through low densities. The minimum lot area is 5 acres, and the minimum lot width is 300'.

The RO Rural Overlay is established to permit agriculture uses, to encourage the maintenance of the rural countryside, to preserve forests and other undeveloped lands away from areas of population growth, and to allow residents to retain their traditional ways of life. The preferred land use in the district is agricultural, either active in the form of crops or passive in the form of forest management or pasture lands. Permitted uses include single-family residences and certain accessory structures and uses for the conduct of agriculture support and related business.

The purpose of the MHO Manufactured Housing Overlay is to provide areas where manufactured homes may be placed on individual lots as permitted uses. It is intended to provide various areas and settings for a quality living environment for manufactured home residents.

5. The purpose of the R-2 Rural Residential District is to provide a single-family residential environment at a low-density level. The R-2 District is located primarily in less populated areas where the character of the area should be preserved through low densities. The minimum lot area is 3 acres, and the minimum width is 200'.
6. No access to community water or sewer systems in the vicinity of this parcel. The Owner will need to obtain a private well and septic system.
7. If approved, the applicant may apply for a minor subdivision to create 2 three acre lots.

Consistency with New Directions 2040

Rural/Agricultural: areas include mostly very low intensity uses in non-urbanized areas, such as agriculture, horse farms, timberlands, ranches, and very large single-family lots typically larger than three acres. No large traffic generators or noisy or pollution causing uses are located in Rural and Agricultural areas. Low-capacity country roads—typically two-lanes—serve these areas. Septic systems and wells are typical. The Parish's abundant rural areas provide ample space for low intensity uses, offering residents privacy and access to the outdoors. The countryside also fosters a number of commercial activities, such as production farms, horse boarding, and lumber harvesting. The Rural and Agricultural category includes these commercial uses, as well as small rural-serving businesses such as small groceries, gas stations, restaurants, and auto repair shops. St. Tammany's countryside supports a growing tourism industry, whose businesses in this area include bed and breakfasts, retreat centers, nature tours, and "u-pick" farms.

The proposed zoning change is consistent with the following goals, policies, and strategies of the Comprehensive Plan:

- i. Goal 1:3: The character of existing residential areas, expansive rural landscapes, and sensitive ecological areas will be preserved.
- ii. Goal 1:8: A variety of safe, affordable, and attractive housing types will meet the needs of our diverse community.

Standards for Review (Sec. 200-3.1.G) - When reviewing a zoning map amendment, the St. Tammany Parish Planning & Zoning Commission shall take the following items into consideration prior to recommending a decision to the Council:

- i. The proposed amendment is compatible with the Comprehensive Plan and consistent with the future land use map.
- ii. The proposed amendment promotes the public health, safety, and welfare of the Parish.
- iii. The proposed amendment corrects an error or meets the challenge of some changing conditions, trend or fact.

- iv. The proposed amendment is compatible with existing use and zoning of nearby property.
- v. The proposed amendment is a more suitable zoning classification for the property than the current classification.
- vi. The proposed amendment enhances or protects the surrounding natural environment, including air, water, stormwater management, wildlife, and vegetation.
