4. The subject property is currently occupied by a vacant mobile home and is flanked by A-2 Suburban District on all sides with undeveloped property to the east and west. The Dixie Pines Subdivision is presently developed with a mixture of stick-built single-family residences as well as mobile homes that are considered to be of legal non-conforming use. *

* (Sec 130-162): Legal nonconforming uses shall be defined as any use lawfully existing at the time of enactment of the ordinance from which these regulations are derived may be continued as a legal nonconforming use even though such use does not conform to the provisions of these regulations for the zoning district in which it is located. Similarly, whenever a use district shall be changed thereafter, then the existing lawful use may be continued.

5. The purpose of the requested MHO Manufactured Housing Overlay is to provide for areas where manufactured homes may be placed on individual lots as permitted uses. It is intended to provide various areas and settings for a quality living environment for manufactured home residents. In the event that there is currently an unoccupied mobile home / electricity has been turned off for longer than six months, an applicant may apply for the zoning change to turn power back on to the existing mobile home.

Site and Structure Provisions

6. Through the most available and recent data, it appears that there are approximately six (6) mobile homes along S Tranquility Road within the Dixie Pines Subdivision. This information accounts for the structures themselves rather than their current occupancy status.
7. The subject property currently does not meet the minimum size requirements of the A-2 Suburban District as the Dixie Pines Subdivision was changed to the A-2 Suburban District classification through Comprehensive Rezoning. The property measures 50' x 238' which allows the property to be considered as a lot of record.
8. If the change to MHO Manufactured Housing Overlay was to be approved, the applicant may apply for an electrical permit to turn power back on to the existing structure, or replace the current unit with a new mobile home.

Consistency with New Directions 2040

Residential – Low-Intensity: Predominantly single family, detached homes on very large lots. The lower residential density creates a more spacious character appropriate as a transition between the Parish's Rural or Conservation areas and more intense land uses. The dispersed development pattern makes public services and amenities less efficient and more expensive to provide, and so residents typically must travel farther to access them.

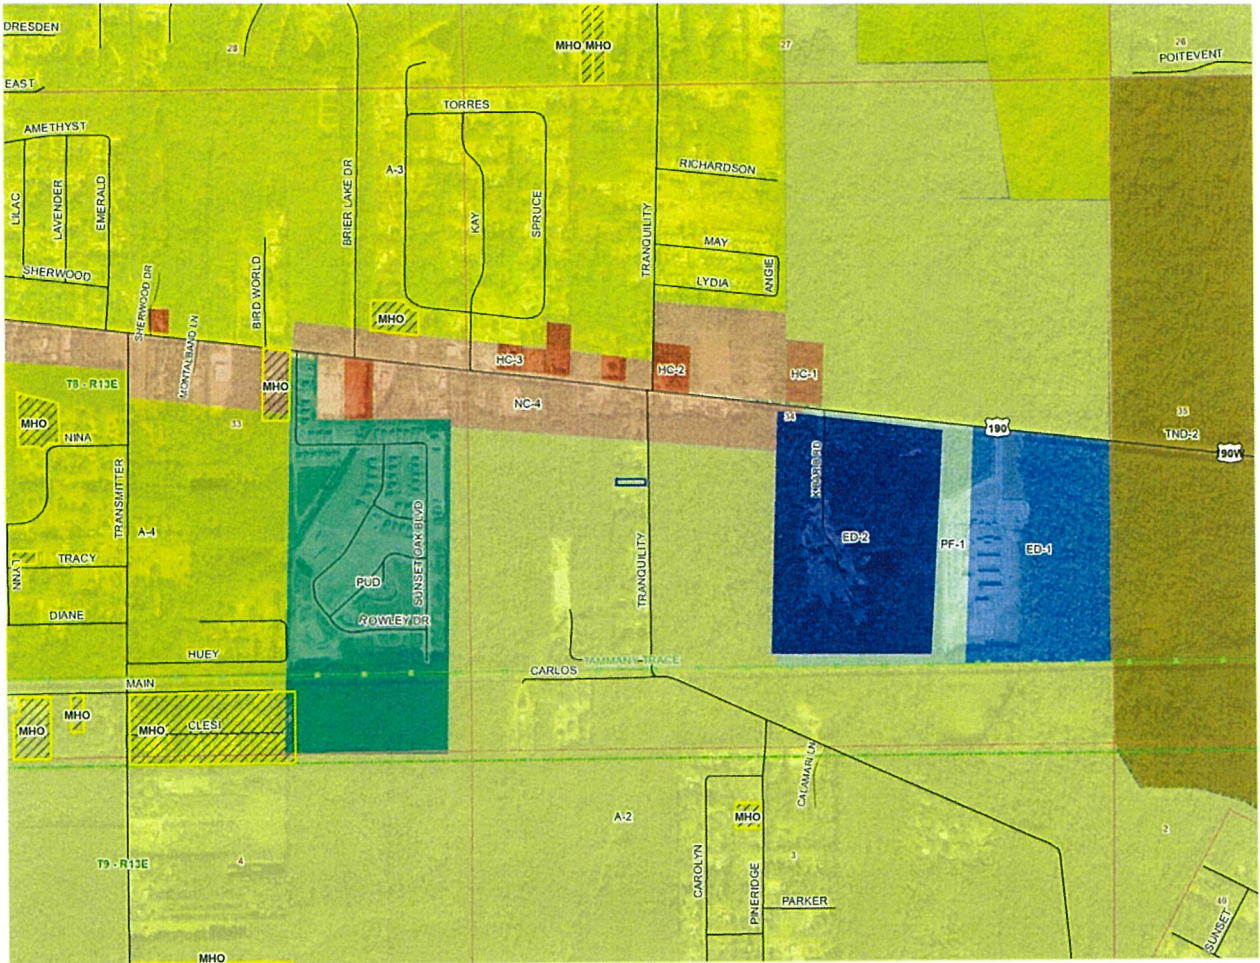

1. The proposed zoning change is consistent with the following goals, policies, and strategies of the Comprehensive Plan:
 - i. Goal 1.3: The character of existing residential areas, expansive rural landscapes, and sensitive ecological areas will be preserved.
 - ii. Goal 1.9: Our building stock will be maintained in stable condition, with minimal vacant, blighted, or abandoned properties
