Compatibility or Suitability with Adjacent Area

4. Table 2: Surrounding Land Use and Zoning

Direction	Surrounding Use	Surrounding Zoning Classification
North	Undeveloped	L-1 Large Lot Residential District
South (across Brewster Road)	Undeveloped	L-2 Large Lot Residential District
East	Undeveloped	L-1 Large Lot Residential District
West	Residential	L-1 Large Lot Residential District

- 5. The subject site abuts properties zoned L-1 Large Lot Residential District to the north, east, and west. To the south, there are some undeveloped parcels zoned L-2 Large Lot Residential District.
- 6. The purpose of the RO Rural Overlay is to permit agriculture uses, to encourage the maintenance of the rural countryside, to preserve forests and other undeveloped lands away from areas of population growth, and to allow residents to retain their traditional ways of life. The preferred land use in the district is agricultural, either active in the form of crops or passive in the form of forest management or pasture lands. Permitted uses include single-family residences and certain accessory structures and uses for the conduct of agriculture support and related business.
- 7. The reason for the request is to allow for the construction of a 60x80 workshop to house agricultural equipment prior to the construction of a main residence on-site.

Consistency with New Directions 2040

Residential: Medium-Intensity: Medium Intensity neighborhoods include a broader mix of large and small lots but remain predominantly, single-family detached homes. Attached homes such as townhomes and 2-unit homes, as well as assisted living centers may fit into the character of Medium Intensity Residential Neighborhoods. The higher density of development makes central water and sewer more practical than onsite water and wastewater systems, and infrastructure like sidewalks, subsurface drainage, and street lighting are more common. These areas are appropriate buffers between Rural or Low Intensity Residential Neighborhoods and High Intensity Residential Neighborhoods or Commercial and Institutional areas.

The proposed zoning change is consistent with the following goals, policies, and strategies of the Comprehensive Plan:

 Goal 1.3: The character of existing residential areas, expansive rural landscapes, and sensitive ecological areas will be preserved.

Standards for Review (Sec. 200-3.1. G) - When reviewing a zoning map amendment, the St. Tammany Parish Planning & Zoning Commission shall take the following items into consideration prior to recommending a decision to the Council:

- i. The proposed amendment is compatible with the Comprehensive Plan and consistent with the future land use map.
- ii. The proposed amendment promotes the public health, safety, and welfare of the Parish.
- iii. The proposed amendment corrects an error or meets the challenge of some changing condition, trend or fact.
- iv. The proposed amendment is compatible with existing use and zoning of nearby property.
- v. The proposed amendment is a more suitable zoning classification for the property than the current classification.
- vi. The proposed amendment enhances or protects the surrounding natural environment, including air, water, stormwater management, wildlife, and vegetation.
