Compatibility or Suitability with Adjacent Area

4. Table 3: Surrounding Land Use and Zoning

Direction	Surrounding Use	Surrounding Zoning Classification
North	Residential	NC-4 Neighborhood Institutional District
South (Across US Highway 190 E)	Residential	A-3 Suburban District
East	Residential	HC-2 Highway Commercial District
West (Across Shamrock Drive)	Commercial	HC-2 Highway Commercial District

5. The subject property abuts commercial zonings to the north, east and west, zoned NC-4 Neighborhood Institutional District and HC-2 Highway Commercial District respectively. All are developed with residential uses, whereas the property to the west across Shamrock Drive is developed commercially under the HC-2 Highway Commercial District designation.
6. The purpose of the existing HC-2 Highway Commercial District is to provide for the location of moderately scaled, more intense retail, office and service uses, generally located along major collectors and arterials designed to provide services to a portion of the parish. In addition, the existing NC-4 Neighborhood Institutional District's purpose is to provide for the location of uses which provide a service at the neighborhood level but could result in a large influx of customers or clientele at a specific time because of scheduled gatherings, classes or meetings.
7. The A-3 Suburban District calls for a minimum lot size of half an acre and allows one dwelling unit per every half acre. Given the size of the property, the applicant could technically construct two residential units on-site.
8. Per the petitioner's application, the request, if approved, is to construct a single-family residence to be utilized as a residential group home for STARC of Louisiana.

Consistency with New Directions 2040

Mixed-Use: areas are flexible and appropriate for higher concentration of residential and commercial uses, allowing shorter trips between destinations and opportunities for walkable, compact development patterns. Mixed Use areas are typically located at or near the Parish's existing hubs of activity and intersections of major roads, as well as along major traffic corridors. Mixed Use areas may also include higher density residential uses, such as garden apartments and condominiums.

The proposed zoning change is consistent with the following goals, policies, and strategies of the Comprehensive Plan:

- i. Goal 4.4: Our residents - particularly vulnerable groups such as people with disabilities, elderly people living alone, and veterans - will have access to resources to ensure their health, safety, and basic needs.
- ii. Goal 4.5: Goal 5: People of all ages and backgrounds will feel safe and secure in their homes, neighborhoods, and throughout the public realm.
