Subject: Hovel Rd

Hey!!!

We need help getting the hovel rd "bridge" to drain. The need for an actual bridge is needed and the lack of proper water flow is causing damage to our home.

Its time to fix the actual problem. What needs to happen to get it done and taken care of? Right now we cant even get the water down in the rodeo because it wont flow through. I know in 2021 it was dug out, and they may need to do that again to get an immediate fix before the next rain system comes through. To prevent this from continuing to happen we need the bridge.

Tell us how we can help the community get this done. We are done with water in our house in a space were we shouldn't be flooding simply due to improper drainage.

I look forward to hearing from you!
