2026 Final Budget

Summary of City Services

The City of Sumas was incorporated in 1891 and operates under the laws of the state of Washington applicable to a non-charter code city operating under the mayor-council plan of government. The City is a general-purpose local government and provides public safety, street improvements, parks and recreation, building inspection, municipal court, cemetery, and general administrative services. In addition, the City owns and operates public utilities for water, sewer, storm-sewer, and electric.

Fund Accounting

Financial transactions of the government are reported in individual funds. Each fund uses a separate set of self-balancing accounts that comprises its cash and investments, revenues and expenditures. The government's resources are allocated to and accounted for in individual funds depending on their intended purpose. The following fund types are used:

GOVERNMENTAL FUND TYPES:

General Fund (001)

This fund is the primary operating fund of the government. It accounts for all financial resources except those required or elected to be accounted for in another fund. The general fund covers law enforcement, legal, administrative, finance, planning and development, parks and other miscellaneous categories. The major revenue sources include taxes, fees, grants, licenses, and permits, with the largest being property taxes.

Special Revenue Funds (101-107)

These funds account for specific revenue sources that are restricted or committed to expenditures for specified purposes of the government. The City's special revenues funds include Street, Cemetery, Economic Development, Civic Improvement, and Criminal Justice Lo-Pop. The Street and Cemetery fund share a small portion of the property tax as its primary revenue source, whereas the other funds are primarily funded by state-shared taxes and revenues.

Capital Projects Funds (301-302)

These funds account for financial resources which are restricted, committed, or assigned for the acquisition or construction of capital facilities or other capital assets. These funds include the REET 1, and REET 2 funds, which are funded through the sales of real estate.

PROPRIETARY FUND TYPES:

Enterprise Funds (401-412)

These funds account for operations that provide goods or services to the general public and are supported largely through user charges (utility rates). These funds account for City owned utilities of water, sewer, storm sewer and electric.

FIDUCIARY FUND TYPES:

Custodial Funds (631-634)

These funds are used to account for assets that the government holds on behalf of others in a custodial capacity. *The City is not required to budget for fiduciary funds.*

Basis of Accounting

Financial statements are prepared using the cash basis of accounting. Revenues are recognized when cash is received, and expenditures are recognized when paid. In accordance with state law, the City also recognizes expenditures paid during twenty days after the fiscal year's close for claims incurred during the previous period.

Budget

The City budgets at the fund level. The budget constitutes the legal authority for expenditures at that level. Budgeted amounts are authorized to be transferred between departments within any fund; however, any revisions that alter the total expenditure of a fund, or that affect the number of authorized employee positions, salary ranges, hours, or other conditions of employment must be approved by the City's legislative body.

Annual appropriations for these funds lapse at the fiscal year end.

The budget for 2026 is as follows:
