

§ 93.001 BOARD APPROVAL OF NEW STREETS.

(A) Board approval of new streets consists of two elements, an offer of dedication on the part of a property owner to dedicate his property or an interest therein to some public use and an acceptance of that offer by some appropriate public authority.

(B) Before any new street offered for dedication to the town is accepted as such and officially recognized as a town-maintained street, the Board must give its approval, finding that the street complies with engineering standards set by the Board and that the best interests of the town would be served by accepting the street as a town street.

(OC, § 4-1-1) (Am. Ord. passed 11-10-88)
