## Acronym List

<b>RHMP</b>	Regional Hazard Mitigation Plan
<b>HMAP</b>	Hazard Mitigation Plan
<b>H-GAC</b>	Houston-Galveston Area Council
<b>FEMA</b>	Federal Emergency Management Agency
<b>TDEM</b>	Texas Division of Emergency Management
<b>TX</b>	Texas
<b>CRS</b>	Community Rating System
<b>NFIP</b>	National Flood Insurance Program
<b>HGMP</b>	Hazard Mitigation Grant Program
<b>CHARM</b>	Community Health and Resource Management
<b>mph</b>	miles per hour
<b>NOAA</b>	National Oceanic and Atmospheric Administration
<b>NSSL</b>	National Severe Storm Laboratory
<b>OEM</b>	Office of Emergency Management
<b>ArcGIS</b>	Geographic Information System
<b>RL</b>	repetitive loss
<b>KBDI</b>	Keetch-Byram Drought Index
<b>WUI</b>	Wildland Urban Interface
<b>FM</b>	Farm to Market road
<b>PHDI</b>	Palmers Hydrological Severity Index
<b>USDA</b>	United States Department of Agriculture
<b>LAL</b>	Lightning Activity Levels
<b>NCDC</b>	National Climate Data Center
<b>CDC</b>	Centers for Disease Control and Prevention
<b>NCEI</b>	National Centers for Environmental Information
<b>SPIA</b>	Sperry-Piltz Ice Accumulation
<b>NWS</b>	National Weather Service
<b>LEP</b>	Linear Extensibility Percent
<b>COLE</b>	Coefficient of Linear Extent
<b>PMT</b>	Plan Maintenance Team

# Part 1: INTRODUCTION

Brazoria County’s previous Hazard Mitigation Plan was adopted in 2006 and updated in 2011 as part of a seven-county Regional Hazard Mitigation Plan (RHMP). Due to new regulation and planning recommendations, Brazoria County prepared a new countywide multi-jurisdictional Hazard Mitigation Plan (HMAP). Brazoria County partnered with the Houston- Galveston Area Council (H-GAC) for both the 2006 and 2011 plans and continued this partnership during the development and adoption of the HMAP.

Image source: <https://www.wikipedia.org/>

## History

On April 28, 2006, the Federal Emergency Management Agency (FEMA) and the Texas Division of Emergency Management (TDEM) approved the first RHMP. H-GAC prepared the regional plan in coordination with FEMA and TDEM to ensure it met all applicable state and federal requirements. H-GAC updated the RHMP in 2011 to re-assess vulnerabilities and increase the number and diversity of mitigation action items. The plan includes a more robust assessment of natural hazards, newly uncovered vulnerabilities, more advanced analysis techniques, and a more effective and informed mitigation strategy. In 2018, Brazoria County and H-GAC developed a county HMAP and included a fresh look at specific county hazards and new mitigation efforts to address this in Brazoria County.

## Purpose of Plan

The purpose of Brazoria County’s HMAP is to reduce the loss of life and property within the county and lessen the negative impacts of natural disasters. Vulnerability to several natural hazards has been identified through research, analysis, and public input. These hazards threaten the safety of residents and have the potential to damage or destroy both public and private property, disrupt the local economy, and impact the overall quality of life of individuals who live, work, and play in the county. While natural hazards cannot be eliminated, the effective reduction of a hazard’s impact can be accomplished through thoughtful planning and action.

The concept and practice of reducing risks to people and property from known hazards is generally referred to as hazard mitigation. One of the most effective tools a community can use to reduce hazard vulnerability is developing, adopting, and updating a hazard mitigation plan as needed. A hazard mitigation plan establishes the broad community vision and guiding principles for reducing hazard risk, including the development of specific mitigation actions designed to eliminate or reduce identified vulnerabilities.

## Scope of Plan

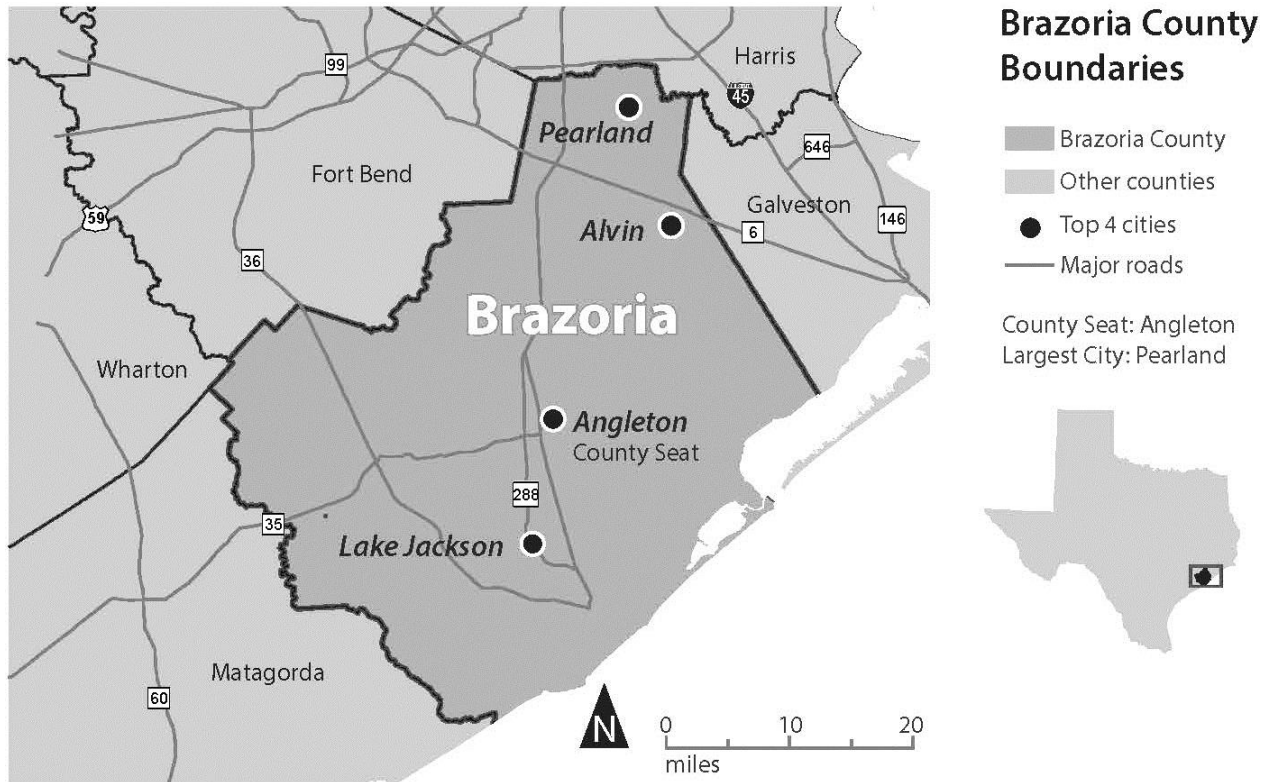

Brazoria County is in the east-central region of Texas along the coast, and scope of the HMAP includes the following participating jurisdictions:

- Brazoria County
- Brazosport ISD
- Sweeny ISD
- Baileys Prairie
- Bonney
- Brazoria
- Brookside Village
- Clute
- Danbury
- Iowa Colony
- Hillcrest Village
- Holiday Lakes
- Jones Creek
- Lake Jackson

- Liverpool
- Manvel
- Oyster Creek
- Quintana
- Richwood
- Surfside Village
- Sweeny
- Damon ISD

- West Columbia
- Brazosport College
- Drainage District 11
- Velasco Drainage District
- Freeport
- Port Freeport
- Alvin ISD
- Danbury ISD

**Planning Area Map**

The plan, developed in accordance with state and federal rules and regulations governing local hazard mitigation plans, was adopted by the participating jurisdictions and shall be routinely monitored and revised to maintain compliance with all state and federal regulations. All Climate change factors will be considered in this plan relating to future mitigation projects and increased hazard potential. Increased awareness and focus in vulnerable areas, at-risk populations and underserved communities are forefront in plan development with equitable and impartial treatment of all individuals in the entire community. No new hazards were observed in climate changes to alter the current mitigation strategies developed in this plan.

**The HMAP profiles the following hazards:**

- Flooding
- Hurricanes and Tropical Storms
- Wildfire
- Drought
- Lightning
- Heat
- Hail
- Winter Weather
- Tornado
- Dam/Levee Failure
- Coastal Erosion
- Expansive Soils

## Presidential Declared Disasters

Brazoria County has persevered through many natural disasters. The table below lists the presidential declared disasters that the County has experienced since 1973. Each disaster is costly and challenging. The goal of this HMAP is mitigation and reduce the impact of future disasters.

Year	Declaration Type	Title
1973	Major Disaster Declaration	Flood
1979	Major Disaster Declaration	Flood
1979	Major Disaster Declaration	Flood
1983	Major Disaster Declaration	Hurricane
1991	Major Disaster Declaration	Severe Storm
1991	Major Disaster Declaration	Flood
1994	Major Disaster Declaration	Flood
1998	Major Disaster Declaration	Severe Storm
1998	Major Disaster Declaration	Severe Storm
1998	Major Disaster Declaration	Flood
1999	Emergency Declaration	Fire
2001	Major Disaster Declaration	Coastal Storm
2002	Major Disaster Declaration	Coastal Storm
2002	Major Disaster Declaration	Severe Storm
2003	Major Disaster Declaration	Hurricane
2005	Major Disaster Declaration	Hurricane
2005	Emergency Declaration	Hurricane
2005	Emergency Declaration	Hurricane
2006	Major Disaster Declaration	Fire
2007	Emergency Declaration	Hurricane
2008	Major Disaster Declaration	Hurricane
2008	Emergency Declaration	Hurricane
2008	Emergency Declaration	Hurricane
2015	Major Disaster Declaration	Severe Storm
2015	Major Disaster Declaration	Severe Storm
2016	Major Disaster Declaration	Flood
2017	Major Disaster Declaration	Hurricane
2020	Emergency Declaration	Tropical Storm
2021	Emergency Declaration	Winter Storm
2021	Major Disaster Declaration	Winter Storm

## Part 2: Planning Process

## Part 2: PLANNING PROCESS

This section includes a description of the process used by Brazoria County and participating jurisdictions to develop the 2023 HMAP.

### Overview

Hazard mitigation planning can be described as the means to break the repetitive cycle of disaster loss. A core assumption of hazard mitigation is that pre-disaster investments will significantly reduce the demand for post-disaster assistance by alleviating the need for emergency response, repair, recovery, and reconstruction. All Climate change factors will be considered in this plan relating to future mitigation projects and increased hazard potential. Increased awareness and focus in vulnerable areas, at-risk populations and underserved communities are forefront in plan development with equitable and impartial treatment of all individuals in the entire community. No new hazards were observed in climate changes to alter the current mitigation strategies developed in this plan.

Hazard mitigation planning is the process of identifying natural hazards, understanding community capabilities and resources, identifying and assessing hazard vulnerability and risk, and determining how to minimize or manage those risks. Brazoria County approached the hazard mitigation planning process by establishing a Planning Team. The next step of the planning process was the assessment of hazards and how they can impact specific assets. H-GAC conducted a hazard analysis in 2017 and the county, with updated information, presented this at the kick-off meeting and Planning Team on November 9, 2022.

After hazard identification and analysis, communities considered their vulnerability to the identified threats. Crucial input from the participating jurisdictions and members of the public helped inform a vulnerability and risk assessment for the entire county. This information gathered from meetings with the Planning Team, online participation and input from the participating jurisdictions, and natural hazard modeling techniques was used to produce a comprehensive vulnerability assessment.

The planning process culminated in a Mitigation Strategy, i.e. identification of specific mitigation actions, which when viewed, represents a comprehensive strategy to reduce the impact of hazards. The Planning Team then began the process of developing an overarching Mitigation Strategy, and a long-term approach to update and maintain the HMAP. Specific mitigation actions are identified in this plan and included in the Appendix E. Responsibility for each mitigation action is assigned to a specific individual, department or agency along with a schedule for its implementation. Plan maintenance procedures (Part 8 of this plan) establish procedures to monitor progress, including the regular evaluation and enhancement of the Plan. Multijurisdictional coordination and integration of the HMAP into local planning mechanisms was also addressed. The established maintenance procedures ensure that the plan remains a dynamic and functional document over time.

### Plan Development Resources

The Brazoria County HMAP was developed using existing plans, studies, reports, and technical information. Materials and historic data were used to inform participants throughout the planning process, evaluate and analyze hazards, and develop the mitigation strategy.

Plan Development Resources: Existing Documents and Data	
FEMA Disaster Declarations	FEMA Flood Map Services
H-GAC Land Use & Demography Database	Houston-Galveston Area Regional Plan
2011 Regional Hazard Mitigation Plan	NOAA Storm Event Database
State of Texas Hazard Mitigation Plan	Texas A&M Forest Service Wildfire Reports
US Census American Fact Finder	USDA Census of Agriculture Reports
USGS Homeland Infrastructure Foundation-Level Data	Brazoria County Disaster Recovery Plan
Brazoria County Emergency Operations Plan	2017 Brazoria County Hazard Mitigation Plan

## Planning Team

Brazoria County and participating jurisdictions established the Planning Team in Fall 2022 in preparation for the first meeting and hazard mitigation planning workshop held on October 19-20, 2022. Members were asked to attend all meetings in person but were provided an online alternative if they were unable to do so. Online materials, surveys, forms, and documentation are provided in Appendix A. Representatives from the County Office of Emergency Management served as liaisons between stakeholders, staff, and members of the public who were unable to attend the meetings, the County's Office of Emergency Management sent out a series of emails to the planning team to invite them to the meeting and to participate in the online forums. In addition to the list below a TDEM Chief and TDEM Hazard Mitigation Planner/Supervisor were part of the workshop and advised the team.

<b>Jurisdiction</b>	<b>Title</b>	<b>Contact Method</b>
Velasco Drainage District	Superintendent	Email
Freeport	Fire Chief / EMC	Email
Port Freeport	Director of Protective Services	Email
Sweeny	City Manager	Email
Bailey's Prairie	Mayor	Email
Angleton	Emergency Management Coordinator	Email
Drainage District 11	Superintendent	Email
Lake Jackson	City Manager	Email
Iowa Colony	Mayor	Email
Brazoria	City Manager	Email
Holiday Lakes	Mayor	Email
Surfside Beach	City Secretary	Email
Liverpool	Mayor	Email
Alvin ISD	Superintendent	Email
West Columbia	City Manager	Email
Brazoria County	Deputy Emergency Management Coordinator	Email
Clute	Fire Marshal / EMC	Email
Richwood	City Manager & Chief of Police	Email
Hillcrest Village	Mayor	Email
Danbury	Mayor	Email
Bonney	Mayor	Email
Brookside Village	Mayor	Email
Oyster Creek	Mayor	Email
Quintana	Mayor	Email
Jones Creek	Mayor	Email
Manvel	Mayor	Email
Brazosport ISD	Superintendent	Email
Brazosport College	Emergency Management Coordinator	Email
Alvin ISD	Director Safety and Security	Email

## Stakeholders

There were a variety of stakeholders throughout the community and neighboring jurisdictions that were a part of the planning process; these stakeholders either attended meetings, contacted the planning team with their input or both. The chart below shows these stakeholders and their titles. Their input was utilized throughout the plan and specifically in the Hazard Analysis and Mitigation Strategy sections of this plan.

<b>National, Regional, and Local Agencies</b>		
<b>Stakeholder</b>	<b>Title</b>	<b>Contact Method</b>
Texas A&M AgriLife	Extension Program Specialist	Email/ Hosted CHARM Meeting
The Trust for Public Land	Senior Vice President and Director of Conservation Strategies	Email/ Phone
U.S Army Corps of Engineers	Civil Engineer & Flood Risk Manager	Email/ Attended CHARM Meeting
<b>Neighboring Communities and Regulatory Authorities</b>		
<b>Stakeholder</b>	<b>Title</b>	<b>Contact Method</b>
TDEM	County Engineer	Email/ Attended CHARM Meeting
Brazoria Drainage District #4	District Engineer	Email/ Attended CHARM Meeting
Chambers County	Emergency Management Coordinator	Email/ Phone Call

## Meeting Dates & Details

### November 9, 2022: Hazard Mitigation Kick-off Meeting

Brazoria County and the Planning Team hosted a Kick-off meeting at new Brazoria County Emergency Operations Center 520 North Front Street Angleton, TX 77515 on November 9, 2022. The purpose of the meeting was for Brazoria County and participating jurisdictions to gather feedback and input on the draft Hazard Analysis and discuss local vulnerabilities. The Planning Team and local jurisdictions were given a presentation and provided large maps displaying the analysis of various hazards. Participants worked with the planning team to improve the accuracy of the analysis and pinpoint the vulnerabilities of each hazard within their communities. Meeting participants also discussed their current ability to mitigate these threats and how to draft a mitigation action to address them. Prior to the meeting, community members and jurisdiction stakeholders were invited. Past meetings and information from the initial HMAP are documented and information was also gleaned from the 2017 HMAP. Public involvement data was used to update the new plan and process. Past actions used for gathering the public's information online, web based, press releases, public service announcements, and other advertisements in newspapers and on the radio. See Appendix A for meetings agenda, attendees list, and press releases.

### October 19-20, 2022: Hazard Mitigation Workshop (G-318)

Brazoria County hosted a Planning Team workshop at the Lake Jackson Civic Center for local jurisdiction officials and staff on October 19-20, 2022. The purpose of this workshop was to develop a framework to begin the updating of our HMAP and mitigation strategy. TDEM staff presented the materials and helped formulate a procedure with steps to update our existing plan. Presentations and examples were offered on appropriate topics and workgroup discussions occurred about strategy development. Planning Team members outlined a Mitigation Strategy and refined their mitigation actions. See Appendix A for the workshop information, agenda and sign-in sheet.

### **October 27, 2022: Community Health and Resource Management (CHARM) Workshop**

The County and City of West Columbia had the opportunity to partner with Texas A&M’s AgriLife and US Army Corps of Engineers to host a workshop for all jurisdictions in the county (<https://tcwp.tamu.edu/charm/>); members of the planning team attended. The workshop utilized GIS to explore current conditions including data such as 100 year-floodplain overlays and social vulnerability throughout the area. After current conditions were presented, the workshop participants discussed what they wanted future land use to look like given the current conditions.

### **Ongoing 2022-2023: Request for Public Comment**

Brazoria County hosted a draft of the HMAP on its website, and provided an online method for the public to submit comments and feedback on the draft. The comments and feedback will be discussed at planning meetings when the plan is up for adoption. The jurisdictions' HMAP adoption meeting dates and public comments were also provided on the same webpage. Press releases were then sent to all local media outlets to notify the public of the opportunity to comment online or by phone at each jurisdiction. Each jurisdiction also notified the public as described in Part 8 of this plan.

### **February 2, 2023: Public Open House for The Freeport Project – Lake Jackson Civic Center**

The Freeport Project, a component of the Sabine Pass to Galveston Bay Program (S2G Program), hosted a public open house on February 2, 2023, to provide the public with information about project progress. The Freeport Project is one of three mitigation projects included in the S2G Program and focuses on improvements to the existing hurricane flood protection system in the Freeport area. These improvements will reduce the risk of flooding from coastal storm surge, while not inducing adverse impacts to area residents and businesses within the Freeport area. The Freeport Project is a partnership of the U.S. Army Corps of Engineers (USACE) and its non-Federal sponsor, the Velasco Drainage District.

## **Plan Adoption - 2023**

To be completed after Plan Adoption.

The participation of small school districts (Danbury ISD, Sweeny ISD and Damon ISD) was through conversations at meetings, email question & answer correspondence. These school districts are small and under resourced and represent underserved communities and vulnerable populations. Their participation in planning helped develop strategies with emphasis on their respective populations. This correspondence and planning involved each school superintendent and mayor of these three smaller school districts.

Non-profit participation and representation in our planning process, at planning meetings and through email correspondence, provided valuable information to help formulate strategies to included insight into the vulnerable populations they serve.

The United Way of Brazoria County liaison, Women’s Center Director, Action’s Inc. Executive Director, Brazosport CARE Director and the Gulf Coast Transit Manager all worked with the planning team and gave meaningful guidance/insight to help form strategies that would impact the populations they serve in a positive way. These non-profit organizations worked with their respective populations and community leaders to gain awareness into what mitigation strategies would benefit them.

Participation invitations and continued interaction with vulnerable populations will be done through our non-profit organizations.

## Participation & Public Input

Public input and participation are crucial elements of hazard mitigation planning. Feedback and input from the November 2022 Hazard Mitigation Kick-off meeting, surveys and other meetings were used to identify vulnerabilities in each jurisdiction, identify valuable assets, and develop the risk assessment. Covid 19 has altered the way Brazoria County gathered public input and the “in-person” meetings have not been recommended. We have incorporated a county-wide method of obtaining public opinion through surveys, email and social media outlets. Online surveys, resources, a mitigation action survey with a place to submit comments on the draft plan were made public on Brazoria County’s website and social media accounts with links to participating jurisdictions’ websites. (see Appendix A). Examples of online participation include submitting mitigation actions, completing the hazard mitigation survey, and conversations over email. The Brazoria County Office of Emergency Management also distributed hardcopies of the surveys at various public locations and to each participating jurisdiction. These jurisdictions then had the option to either mail in the survey responses or hand deliver them to Brazoria County. The data from returned surveys was used to develop the risk assessment and identify vulnerabilities.

The chart below demonstrates the method and type of participation by each jurisdiction.

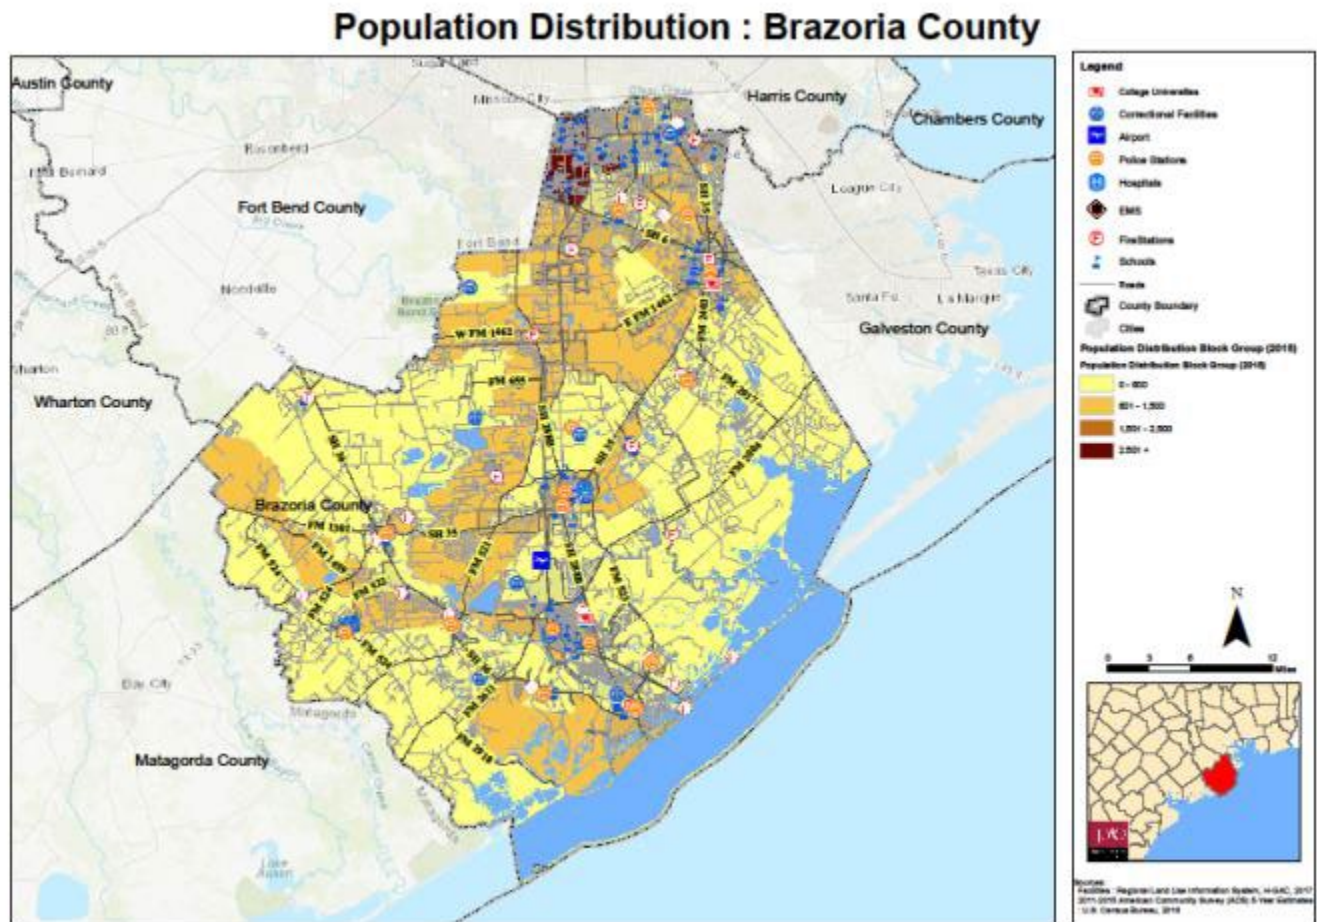

Jurisdiction	Representative attended Hazard Mitigation Meeting(s)	Participated in Mitigation Strategy Development	Online Participation
Brazoria County	x	x	x
Pearland	x	x	x
Brazosport College	x	x	x
Bailey’s Prairie	x	x	x
Bonney			x

## Part 3: County Profile

### Part 3: COUNTY PROFILE

Brazoria County is a coastal county located south of Houston, west of Galveston County. The southern portion of the county is home to coastal marshes, the Brazoria National Wildlife Refuge and the San Bernard National Wildlife Refuge. The Brazos River cuts through the western half of the county before it enters the Gulf of Mexico at the Port of Freeport. State Highway 6 runs east-west through the northern end of Brazoria County with State Highways 35, 36, and 288 sweeping generally north-south.

The 2020 census showed Brazoria County is home to 372,031 residents. The current population is closer to 390,000 and is forecast to grow rapidly, reaching 574,000 by 2040. The county is home to eight cities boasting more than 8,000 residents: Pearland (125,828), Lake Jackson (28,177), Alvin (27,098), Angleton (19,429), Freeport (10,696), Clute (10,604), Manvel (9,992) and Iowa Colony (8,154).

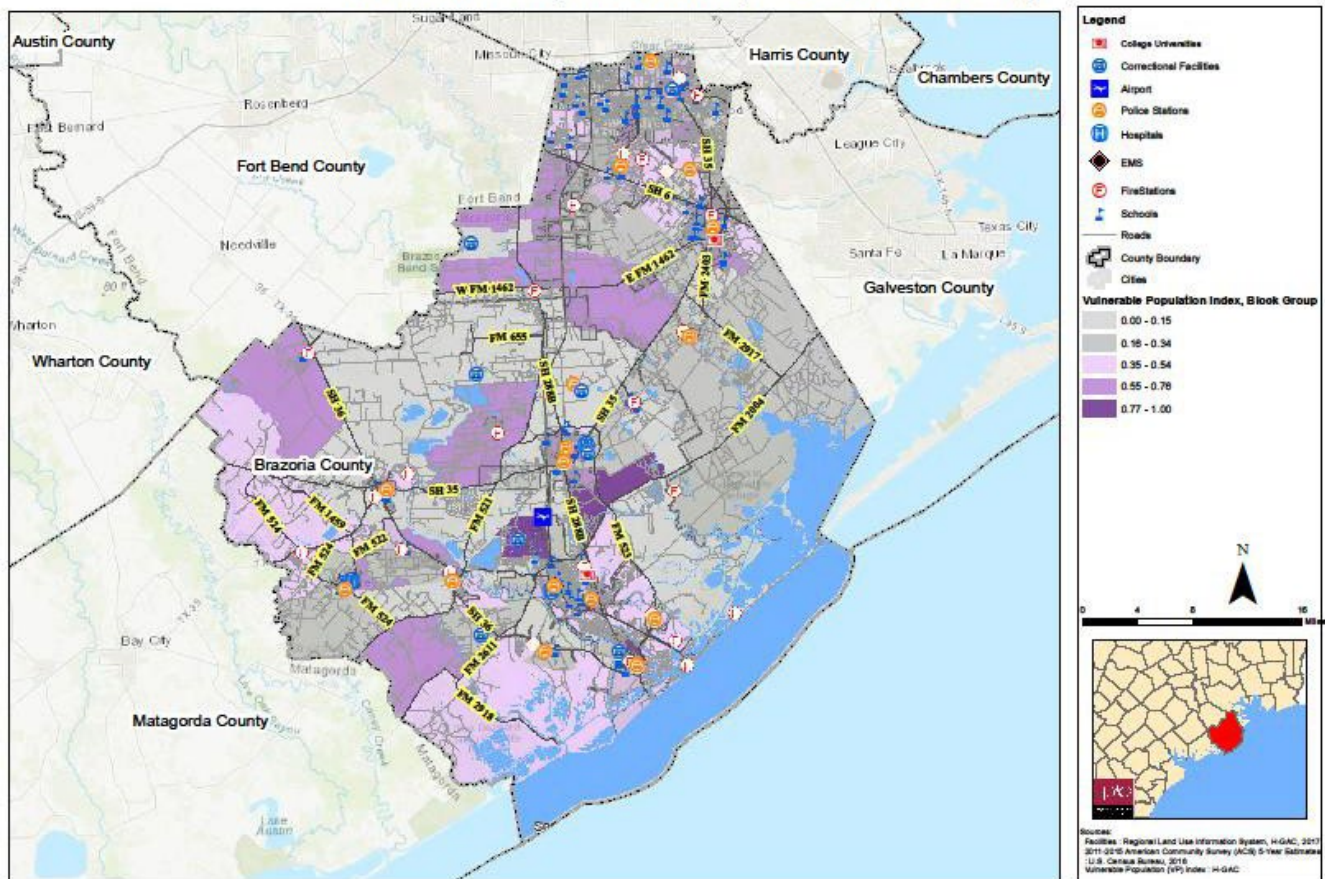

The county's robust economy is geographically divided between agriculture in the western portion of the county, petrochemical production in the Brazosport area in the southern portion of the county; public services and banking in the mid-county/Angleton area; and burgeoning residential construction, retail, and medical services sectors in the suburban northern portion of the county, including Pearland, part of the Houston metropolitan area. The deep-water Port of Freeport is undergoing an expansion and will be the only terminal capable of receiving Panamax ships on the Texas Coast (Panamax ships are the largest sized ships that are able to pass through the Panama Canal). Agriculture, particularly rice and cattle production have a significant history in the county; this sector continues to be a foundation in the county contributing over 1 billion dollars to the local economy annually. The Port of Freeport also supports 37,200 jobs within Brazoria County and 12,000 direct jobs.

Brazoria County's median household income is one of the largest in the region\* at \$87,958. The county also has a high rate of homeownership (73.6%) and a median home value of \$225,200. Residents of the county spend approximately 54% of their income on costs related to housing and transportation.

Although Brazoria County is largely residential (the majority of Brazoria County residents work in neighboring Harris County), Brazoria County's economy has grown in pace with its residential development.<sup>[iv]</sup> Business services are the largest employment cluster, with approximately 18,000 employees. Many of these jobs are related to the support activities for oil and gas operations.<sup>[v]</sup> Retail, healthcare, distribution, and manufacturing are important private sector employers. Retail trade comprised 12 percent of employment in 2014, and retail sales totaled \$6.3 billion in 2012.<sup>[vi]</sup> Several major national retailers have distribution centers in Brazoria County. Healthcare is a growing sector of the economy as many of the institutions based in the Texas Medical Center have opened or are planning to open hospitals in the county. The county has one of the highest median home values in the region at \$225,200 and over 40% of its housing units have been built since 2000.

### Vulnerable Population Map : Brazoria County

The Vulnerable Population Index identifies areas throughout Brazoria County that may not have the means or the resources to act when a natural disaster occurs in Brazoria County. For the purposes of this plan, vulnerable populations include any households without a car, single female household with child/children in the home, individuals living below the poverty line, individuals who are disabled, individuals who are Hispanic, individuals who are non-Hispanic, and non-white, and individuals 65 years and older. The areas in the county with the greatest proportion of these individuals is defined as the most vulnerable areas in Brazoria County. On the map, the areas that are deep purple (or black if printed in black and white) are where the greatest proportion of the vulnerable population is located in Brazoria County. Cities that have the largest proportion of the vulnerable population in

Brazoria County include Angleton, West Columbia, and Bailey’s Prairie. Defining and mapping vulnerable populations provides the opportunity to demonstrate where perhaps the most need is throughout Brazoria County.

\*The region includes Austin, Brazoria, Chambers, Colorado, Fort Bend, Galveston, Harris, Liberty, Matagorda, Montgomery, Walker, Waller and Wharton counties.

The changes and increases in population do not currently show any impacts of hazards listed in the plan.

Brazoria County has seen significant growth in population since the last plan update. This growth has had no change in vulnerability in the planning area. This increase in population has been factored into the current planning and mitigation strategies.

# Part 4: Hazard Identification

## **Part 4: HAZARD IDENTIFICATION**

The State of Texas’s Hazard Mitigation Plan has identified 5 major natural hazards that affect the region. These include hurricane, flood, wildfire, drought, and tornado<sup>i</sup>. The local planning team identified 12 natural hazards which could affect the county and local jurisdictions.

### **Flooding**

Flooding is one of the most frequently occurring, destructive, and costly natural hazards facing Texas.<sup>ii</sup> There are two main categories for floods: general and flash flooding. General flooding is typically a long-term event that can last from a couple of days to weeks. This type of flooding is characterized by an overflow of water from an existing waterway, including rivers, streams, and drainage ditches. Flash flooding is an event that typically lasts a few minutes to less than 6 hours. These floods are characterized by heavy rain or water from a dam failure that inundates waterways and infrastructure, such as bridges and roads. Either type of flooding can destroy infrastructure, homes, and other structures, and pulling cars off roads. However, flash flooding typically is considered the most dangerous type of flooding, because of its “speed and the unpredictability”<sup>iii</sup>. Generally, the impact of flooding is intensified in urban areas because of less impervious surfaces and in suburban or rural areas because of building in vulnerable areas. While 100 and 500-year floodplains are identified throughout the county and local jurisdictions, flooding can occur outside of these areas.

### **Lightning**

Lightning can be seen throughout thunderstorms, hurricanes, intense forest fires, and winter storms. Lightning occurs when positive and negative charges build within a cloud leading to a rapid discharge of electricity<sup>iv</sup>. While there are several types, lightning is typically classified as ground flashes or cloud flashes. One of the more common lightning strikes are cloud-to-ground lightning; these strikes are classified as ground flashes. Cloud-to-ground lightning starts as a channel of negative charge, called a stepped leader, zigzagging downward in roughly 50-yard segments in a forked pattern<sup>v</sup>

Lightning often strikes tall structures, such as trees and skyscrapers, but can also strike open fields or other areas depending on where the electrical charges form. Lightning causes an average of 80 deaths and 300 injuries each year in the United States.<sup>7</sup> In 2017, 16 people were killed by lightning in the United States, two of these deaths occurred in Texas, but not in the county.<sup>vi</sup>

### **Hail**

Hail is a form of precipitation that occurs when updrafts in thunderstorms carry raindrops upward into extremely cold areas of the atmosphere where they freeze into balls of ice. To be considered hail, frozen precipitation needs to be at least .2 inches. Size of hail can range from pea-sized (1/4 inch in diameter) to softball-sized (4 ½ inches in diameter). Quarter sized hail (1 inch in diameter) and above is considered severe by the National Oceanic and Atmospheric Administration’s (NOAA) National Severe Storm Laboratory. Hail storms can result in significant damage to vehicles, buildings, and crops. Severe hail and hail swaths can result in an accumulation of hail on roadways and roofs, which may result in car accidents or roofs collapsing.<sup>vii</sup> As of 2015, Texas had the highest level of hail loss claims throughout the country. According to the National Insurance Crimes Bureau, hail loss claims totaled 400,000 dollars in Texas from 2013 to 2015. However, damage from hail typically occurs in northern Texas rather than southern Texas.

## **Winter Weather**

A winter storm is any event in which the main type of precipitation is snow, sleet, or freezing rain, according to (NOAA), 70 percent of injuries related to winter storms are in automobiles. Winter storms form with cold air, lift, and moisture.<sup>viii</sup> While there are several types of winter storms, ice storms and snow flurries or showers with light accumulation are the most likely in the region. The main concerns with winter weather are road conditions and power outages.

## **Hurricanes and Tropical Storms**

Tropical cyclones with sustained winds of 74 mph and above are classified as hurricanes. Hurricanes can reach wind speeds of 156 mph or more, which would be considered a category five on the Saffir-Simpson scale with potential for catastrophic damage. Hurricanes generally have a well-defined center, called the eye. Hurricane season is generally June 1<sup>st</sup> through November 30<sup>th</sup> each year.<sup>ix</sup> However, hurricanes can and have formed outside of this season. Hurricanes are one of the top natural hazards affecting the region, with high winds and flooding considered two of the main impacts from hurricanes and tropical storms.<sup>x</sup>

Tropical cyclones (rotating low-pressure weather systems that have organized thunderstorms, but no fronts) with sustain winds of at least 39 mph and no higher than 73 mph are classified as tropical storms. Tropical storms generally have ill-defined centers and slower moving winds than hurricanes.<sup>12</sup>

Flooding is also a concern for the county during these events. Hurricane Harvey is a recent example of the impact flooding during hurricanes and tropical storms has on the region, county, and local jurisdictions. Hurricane Harvey made landfall on August 25<sup>th</sup>, 2017 as a category four hurricane near Rockport, Texas; Hurricane Harvey traveled further inland as a tropical storm over the next few days. The tropical storm triggered general and flash flooding throughout the region with recorded rainfall measuring as high as 60.58 inches in the region. Flooding was seen throughout the county and local jurisdictions.

Windstorms are identified by the State of Texas as a common hazard affecting the region. The plan addresses the concerns of windstorms through the hurricane/ tropical storm and tornado sections.

## **Tornado**

Tornadoes are a violently rotating column of air touching the ground, usually attached to the base of a thunderstorm.<sup>xi</sup> However, tornadoes have formed during hurricanes and tropical storms. Tornadoes form when there is a change in a storm's speed and direction. Tornadoes can have wind speeds that range from 40 mph to 300 mph and move at 10 mph to 20 mph. However, tornadoes typically last a few minutes. The damage seen from a tornado is largely due to the strength of the winds, but strong hail and lightning often accompany tornadoes.<sup>xii</sup>

## **Wildfire**

Wildfires are any non-structure fire, except prescribed fires that occur in wildland areas, including prairies or forest. as many as 90 percent of wildland fires in the United States are cause by humans and the other 10 percent are started by lava or lightning.<sup>xiii</sup> In understanding that most wildfires are started by people, the Texas Forest Service assigns a high priority to year-round wildfire prevention activities that reduce risks to residents and property. Texas Forest Service prevention campaigns use radio, TV, print, and web-based products along with local outreach programs to increase wildfire awareness and deliver fire safety messages. Texas Forest Service works with local and county officials to keep them informed of fire danger and the likelihood of large damaging wildfires. In 2017, five Texans

died due to wildfires in north Texas; Texas faced more than 21 million dollars in damages from wildfires throughout the state.<sup>xiv</sup>

## **Drought**

Drought varies greatly in length and extent. High temperatures, high winds, and low humidity can worsen drought conditions and can make areas more susceptible to wildfire. Human demands and actions, such as farming and animal grazing, can also hasten drought-related impacts. There are typically four types of drought: meteorological, agricultural, hydrological, and socio-economic. Meteorological droughts are typically defined by the level of dryness over a given period. Hydrological droughts are defined by the decline of soil/ground water or stream flow or lake/ river levels. Agricultural droughts refer to the impact of low rainfall and storm water or reduced ground water or reservoir levels needed for agriculture. Socio-economic drought considers the impact of drought conditions on supply and demand of some economic goods such as grains.<sup>18, xv</sup> There are a wide range of effects that can occur from drought, including decreased land prices, loss of wetlands, increased energy demand, and increase of mental health disorders.<sup>xvi</sup> Impacts seen in Texas from drought in the past, include wildfires, loss of agricultural crops including rice and wheat fields, and increase in energy cost and demand.<sup>xvii</sup>

## **Coastal Erosion**

There are several types of erosion including soil and coastal erosion. Soil erosion is comprised of two types: wind erosion and water erosion. Wind erosion is a common occurrence, which typical occurs when winds blow across flat, sparsely vegetated, or disturbed land, lifting soil into the air or displacing soil to a new location. Wind erosion can cause soil deterioration and air pollution.<sup>xviii</sup> Water erosion can occur over land or in streams and channels. Water erosion that takes place over land may result from rain, shallow sheets of water flowing off the land, or surface flow, which is concentrated in areas of lower elevation. Stream channel erosion may occur as the volume and velocity of water flow increases enough to cause movement of the streambed and bank soils.<sup>xix</sup> Major storms, such as hurricanes, may cause significant erosion by combining high winds with heavy surf and storm surge to significantly affect the rate of coastal erosion.<sup>xx</sup>

Coastal erosion in the county is a central concern for communities located along the coast. Coastal erosion is the wearing away of beaches and bluffs due to storms, wave action, sea level rise, and human activities. Coastal erosion is responsible for an estimated 500 million dollars per year in property loss throughout the U.S. Coastal erosion can impact local economies that depend on tourism and ports, and high property values for beachfront homes and establishments. Additionally, coastal erosion can greatly impact wetlands and destroy natural ecosystem and natural barriers that can help to protect from other natural hazards including hurricanes.

## **Heat Events**

While the National Weather Service defines excessive heat as temperatures that hover 10 degrees or more above the average high temperature for the region and last for several weeks, a Heat Event is more loosely defined. A heat event could be a period where the county experiences high temperatures which could affect residents particularly children and the elderly. According to the National Weather Service, the county particularly in summer months experiences typical daily temperatures more than 90 degrees and humidity more than 75 percent. These high temperatures mixed with high percentage of humidity can affect the elderly and children even though these are not above average temperatures for the county.

## Dam/ Levee Failure

Aging infrastructure and increased uncertainty of other natural hazards such as flooding are factors in the rising concern of dam and levee failure. Rising flood levels can create a levee breach or dam failure resulting in flashing flooding within as little as six hours or less. Aging infrastructure and other factors such as debris or melting snow may create a dam failure or levee breach over a greater period, weeks to months. The results of a dam failure or levee failure can result in residential and commercial buildings flooded outside of the identified 100 to 500-year floodplain and increase flood water levels during a flood event.<sup>xxi</sup>

There are 51 known dams and levees in Brazoria County. These dams are maintained by public, state, federal, local, or partnering entities. All dams have been classified as 'Low' in the hazard potential classification. The failure of a dam or levee during a major rain event would cause additional flood damage, but substantial economic, environmental, or lifeline losses are not expected. Only the communities at risk of experiencing impacts from a dam or levee failure are profiled. Those jurisdictions include Unincorporated Brazoria County, Bailey's Prairie, Brazoria, Holiday Lakes, Oyster Creek, West Columbia, Port of Freeport, and Freeport. The remaining jurisdictions participating in this plan are not at risk for dam and failure and will not be profiled.

## Expansive Soils

Expansive soils are soils and soft rock that tend to swell or shrink due to changes in moisture content. Expansive soils (bentonite, smectite, or other reactive clays) expand when the soil particles attract water and can shrink when the clay dries. Changes in soil volume present a hazard primarily to structures built on top of expansive soils. In Texas, most expansive soils are in band 200 miles west of the coastline, stretching approximately from Beaumont to Brownsville. These areas receive the most moisture and are also vulnerable to droughts, which can cause the soils to contract. Problems associated with expansive soils are sinking or broken foundations or ruptured pipelines. In the region, the problems associated with expansive soils typically occur during drought periods.<sup>xxii</sup> Drought may also worsen the effects of land subsidence. Land subsidence is identified as a common hazard by the State of Texas. However, land subsidence was not brought up throughout the planning process and there were no recorded events or damage found throughout the county. Consequently, land subsidence is not identified as a natural hazard in this plan.

# Part 5: Risk Assessment

## Part 5: RISK ASSESSMENT

A Vulnerability Assessment is the process of identifying threats by natural hazards to the population and infrastructure. By identifying the greatest vulnerabilities within the County, it becomes possible to develop a Mitigation Strategy that effectively allocates resources for addressing the most serious vulnerabilities. For this assessment, the Planning Team conducted three main processes to identify the vulnerabilities within Brazoria County:

- Cataloging critical and valuable assets within the County.
- Conducting a capability assessment.
- Assessing the County’s vulnerability to each hazard and ranking these hazards according to degree of risk.

H-GAC maintains a database of critical facilities. During our kick-off meeting on November 9, 2022, Brazoria County and local jurisdiction officials reviewed and updated this list, including adding additional valuable assets within the community. Following this process, the Planning Team determined 461 facilities are critical or valuable assets. Through a Hazus analysis, the Planning Team also identified residential and commercial units. Appendix B contains a comprehensive list of the facilities. The full Hazus analysis is catalogued in Appendix C. A summary of the facilities is provided below.

### Critical Facilities & Valuable Assets

Asset Description	Quantity
Emergency Operation Centers	11
Medical Facilities and Emergency Rooms	21
Fire Station	34
Police Station	50
Utility, Electrical, and Waste Water Facilities	76
Correctional Facilities	8
College University Campus and Buildings	5
Schools	91
Nursing Home	59
Dams	53
Natural Gas Receipt Delivery	5
Brownfields & Superfund Sites	3
Shelters	45
Housing Units	146,180
Commercial Units	37,287

#### AUTHORITY

The Plan is tailored specifically for participating jurisdictions within Brazoria County and plan participants including Planning Team members, stakeholders, and the general public who participated in the Plan Update development process. The Plan complies with all requirements promulgated by the Texas Division of Emergency Management (TDEM) and all applicable provisions of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Section 104 of the Disaster Mitigation Act of 2000 (DMA 2000) (P.L. 106-390), and the Bunning Bereuter-Blumenauer Flood Insurance Reform Act of 2004 (P.L. 108-264), which amended the National Flood Insurance Act (NFIA) of 1968 (42 U.S.C. 4001, et al). Additionally, the Plan complies with the Interim Final Rules for the Hazard Mitigation Planning and Hazard Mitigation Grant Program (44 CFR, Part 201), which specify the criteria for approval of mitigation plans required in Section 322 of the DMA 2000 and standards found in FEMA’s “Local Mitigation Plan Review Guide” (April 2023), and the “Local Mitigation Planning Handbook” (March 2013). Additionally, the Plan is developed in accordance with FEMA’s Community Rating System (CRS) Floodplain Management Plan standards and policies.

## Risk Assessment Survey

The Planning Team ranked the hazards by scoring the frequency, impact, and vulnerability of each. Impact and vulnerability ratings were weighted more heavily than frequency scores when determining overall risk. Additionally, communities described the loss or damage, and provided specific data that expand on the descriptions provided below.

Frequency Ratings	Impact Ratings	Vulnerability Ratings
<b>Unlikely:</b> Rare and isolated occurrences; Unlikely to occur within the next 5 years.	<b>Negligible:</b> Less than 10 percent of property and population impacted in the planning area.	<b>Low:</b> Hazard results in little to no damage, and negligible loss of property, services, and no loss of life. Planning area is not vulnerable to this hazard.
<b>Likely:</b> Frequent and regular occurrences; Likely to occur within the next 5 years.	<b>Limited:</b> 10 to 25 percent of property and population impacted in the planning area.	<b>Moderate:</b> Hazard results in some damage, and moderate loss of property, services, and potentially loss of life. Planning area is moderately vulnerable to this hazard.
<b>Very Likely:</b> Consistent and predictable occurrences; Likely to occur more than once in the next 5 years.	<b>Significant:</b> 25 to 75 percent of property and population impacted in the planning area.	<b>High:</b> Hazard results in extensive damage, and extensive loss of property, services, and potentially loss of life. Planning area is highly vulnerable to this hazard.
	<b>Extensive:</b> 75 to 100 percent of property and population impacted in the planning area.	<b>Extreme:</b> Hazard results in catastrophic damage, loss of property, services, and loss of life. Planning area is extremely vulnerable to this hazard.

## Hazards Ranked by Risk

Each identified hazard poses a risk to Brazoria County. Ranking the hazards from greatest to lowest risk allows the communities to prioritize their resources and focus efforts where they are most needed.

Risk Rating	Ranking	Hazards
High	1	Flooding
	2	Hurricanes and Tropical Storms
	3	Tornadoes
Moderate	4	Drought
	5	Lightning
	6	Heat Events
	7	Winter Weather
Low	8	Expansive Soils
	9	Hail
	12	Coastal Erosion

## Capability Assessment

The participating jurisdictions completed a capability assessment survey to collect data on hazards that affect communities, the communities' ability to mitigate damages from these hazards, and current plans or programs in place to help mitigate natural hazards. The Planning Team used this information to assess the risk within each community and to determine a strategy to integrate the HMAP into their current planning mechanisms.

HMP: Hazard Mitigation Plan	SARA: SARA Title III Emergency Response Plan

Brazoria County has not adopted building codes for developments. Brazoria County does not regulate land use and has not adopted zoning ordinances in the county.

All participating jurisdictions have adopted the NFIP minimum floodplain management criteria.

Brazoria County has a Floodplain administrator and maintains that each participating jurisdiction has adopted the latest effective Flood Insurance Rate Map (FIRM).

Our Floodplain Administrator enforces and regulates the floodplain management regulations and permit development in SFHAs.

Brazoria County Floodplain Administrator implements and addresses commitments and requirements of the NFIP.

### Expand and Improve

All participating jurisdiction examined their existing authorities, policies, programs and resources. Each participating jurisdiction then identified ways to improve upon and expand their existing authorities to support the mitigation strategy.

Jurisdiction	Capability Expansion Opportunities
Unincorporated Brazoria County	Identified their local budget as a factor that decreases their capability to implement mitigation actions and reduce future damages. Brazoria County will apply for state and federal funding to help fund mitigation actions that reduce the impact of natural hazards. They will also expand their mutual aid agreements and continuity of operations plan to include more jurisdictions in the county.
Alvin	Expand and improve their floodplain regulation practices to reduce the effects of flooding on their community.
Angleton	Identified an inadequate budget as a factor that decreases their capability to implement mitigation actions and reduce future damages. Angleton will apply for state and federal funding to help fund mitigation actions that reduce the impact of natural hazards. They also plan to expand their mutual aid agreements to address flood emergency response needs.
Bailey's Prairie	Identified the need to improve their fire protection compliance practices. Bailey's Prairie will also expand their local budget to resolve their shortage of technical and administrative staff needed to more effectively implement the HMAP. Baileys Prairie will apply for state and federal funding to help fund mitigation actions that reduce the impact of natural hazards, send technical staff to continuing education courses, and work with elected officials and the public to increase their budget to meet their administrative staff needs and improve infrastructure.
Bonney	Expand their mutual aid agreement practices, and consider drafting and implementing a disaster recovery plan.
Brazoria	Identified the local budget as a factor that decreases their capability to fund technical staff that can implement the mitigation strategy. Brazoria will apply for state and federal funding to help fund mitigation actions that reduce the impact of natural hazards. They will expand their mutual aid to better coordinate emergency response services with neighboring jurisdictions and Brazoria County.
Brookside	Brookside will supplement their local budget by applying for state and federal funding to help fund mitigation actions that reduce the impact of natural hazards. The jurisdiction will also expand their mutual aid agreements with neighboring jurisdictions in the county.
Clute	Expand their NFIP compliance practices, send technical staff to continuing education courses, and consider the adoption of mutual aid agreements with neighboring jurisdictions.
Danbury	Expand their floodplain regulation practices to reduce the effects of flooding on their community. The city will also consider drafting and implementing a disaster recovery plan and expanding their mutual aid agreements.
Hillcrest	Expand their mutual aid agreement practices, and consider drafting and implementing a disaster recovery plan, and emergency operations plan.
Holiday Lakes	Expand their NFIP compliance practices, improve their current regulation of development in the floodplain, and will consider adopting stronger fire codes.
Iowa Colony	Expand their mutual aid agreements to better coordinate emergency response services with the neighboring jurisdictions and Brazoria County.

Jones Creek	Expand outreach efforts to enroll more residents in their existing education and notification strategy.
Lake Jackson	Expand their mutual aid agreements to better coordinate emergency response services with the neighboring jurisdictions and Brazoria County, and consider the adoption of continuity of operations plan. Lake Jackson identified their Capital Improvements Plan has a program that could be expanded to better mitigate against the natural hazards in their community. Officials will take steps to allocate their budget toward projects that reduce the impacts of natural hazards.
Liverpool	Craft mutual aid agreements and interlocal agreements with the neighboring jurisdictions and Brazoria County.
Manvel	Consider becoming a CRS community to improve NFIP compliance and strengthen flood mitigation practices.
Oyster Creek	Develop and implement a drainage plan or partner with a drainage district to address flooding damages in Oyster Creek.
Quintana	Develop new mutual aid agreements to better coordinate emergency response services with the neighboring jurisdictions and Brazoria County, and consider the adoption of continuity of operations plan.
Richwood	Identified their Capital Improvements Plan has a program that could be expanded to better mitigate against the natural hazards in their community. Richwood will take steps to allocate their budget toward projects that reduce the impacts of natural hazards.
Surfside Beach	Expand their mutual aid agreements to better coordinate emergency response services with the neighboring jurisdictions and Brazoria County.
Sweeny	Sweeny will supplement their local budget by applying for state and federal funding to help fund mitigation actions that reduce the impact of natural hazards. They will also expand their mutual aid agreements and emergency operations plan to include more jurisdictions in the county.
Alvin ISD	Further relationship with County and local emergency coordinators to expand outreach and mitigation efforts across the district
Freeport	Expand outreach efforts to enroll more residents in their existing education and notification strategy.
West Columbia	Expand and improve their Capital Improvements Plan strategy to better mitigate against the natural hazards in their community. West Columbia will take steps to allocate their budget toward projects that reduce the impacts of natural hazards.
Port of Freeport	Improve the Emergency Operations Plan to ensure that communication and utilities are not at risk in the event of a natural disaster.
Velasco Drainage District	Expand their NFIP compliance practices, improve their current regulation of development in the floodplain, and will consider expanding their emergency operations plan.
Brazosport ISD	Collaborate with local and County emergency management officials to implement projects that help to reduce the impacts of natural hazards.
Brazosport College	Work with local jurisdictions and County emergency management officials to implement projects that help to reduce the impacts of natural hazards.
Sweeny ISD	Expand relationships with County and local emergency coordinators to expand outreach and mitigation efforts across the district
Drainage District 11	Identify problem areas, areas for future development and constraints affecting the watershed and expand relationships with County and local emergency coordinators
Danbury ISD	Increase relationships with local and County emergency management officials to implement projects that help to reduce the impacts of natural hazards
Damon ISD	Develop new mutual aid agreements to better coordinate emergency response services with the neighboring jurisdictions and Brazoria County.

# Part 6: Hazard Analysis & Vulnerability Assessment

## **Part 6: HAZARD & VULNERABILITY ANALYSIS**

### **Introduction**

After the potential hazards in the county were identified, the Planning Team reviewed historic data and conducted an analysis in ArcGIS for each hazard. This analysis was presented at the November 9, 2022, Kick-off meeting. At this meeting, stakeholders provided many firsthand accounts of damage caused by natural disasters. These reports were taken into consideration and included in the hazard analysis when possible. The result of that process has determined 12 different natural hazards require mitigation efforts. The maps and the discussion that follow are a compilation of data analysis, historic information, and public feedback.

Damon ISD is a very small school district with only 1 school in the northwest corner of Brazoria County on Highway 36. They would be included with all the Hazards identified with unincorporated Brazoria County for the purposes of this plan. This school district is a noted vulnerability and we are currently working with this under resourced jurisdiction to assist with strategies leading to mitigation actions.

- 6.1 Flooding
- 6.2 Wildfire
- 6.3 Hurricanes and Tropical Storms
- 6.4 Drought
- 6.5 Lightning
- 6.6 Heat Events
- 6.7 Winter Weather
- 6.8 Hail
- 6.9 Tornado
- 6.10 Dam and Levee Failure
- 6.11 Expansive Soils
- 6.12 Coastal Erosion

There has not been any significant historical occurrences and data with hazards since the last plan update in 2017.

# Part 6.1: Flooding

## 6.1 Flooding

Floodplains are the primary tool used by FEMA to determine areas at risk of flooding. The periodic flooding of lands adjacent to rivers, streams, and shorelines is a natural and inevitable occurrence that can be expected based upon established recurrence intervals. The recurrence interval of a flood is the average time interval, in years, that can be anticipated between flood events of a certain magnitude. Using the recurrence interval with land and precipitation modeling, forecasters can estimate the probability and likely location of flooding. These are expressed as floodplains. The most commonly used floodplain measurements are the 100-year floodplain and the 500-year floodplain. The 100-year floodplain has a 1 in 100 chances of flooding each year. The 500-year floodplain is estimated to have a 1 in 500 chances of occurring each year.

Flooding causes widespread and varying degrees of damage. The magnitude or extent of flood damage is expressed by using the maximum depth of flood water during a specific flood event. Structures inundated by 4-feet or more of flood water are considered an absolute loss. Other forms of loss, such as roads, bridges, agriculture, services, or death or injury are also summarized by jurisdiction in this plan.

### Historic Occurrences

The National Oceanic and Atmospheric Administration (NOAA) collects historic climate data for the entire nation. NOAA's storm event data can be accessed on the National Climatic Data Center (NCDC) storm events database. A condensed version of the Brazoria County flood events data from 2000 - present is provided in the table below. No deaths, injuries, or crop damages were reported in the last 17 years in the county.

Jurisdiction	Date	Property Damage	Notes
<b>Unincorporated</b>	9/13/2000	\$150,000	Several roads and railroad underpass impassable in Freeport and Clute. Water inside a house in Clute. Cars flooded and high water in streets in Clute, Freeport, and Danbury. Total of 7.7 inches of rainfall in Angleton.
<b>Unincorporated</b>	6/5/2001	\$0	Flooding from T.S. Allison.
<b>Freeport</b>	6/7/2001	\$0	Flooding from the remnants of T.S. Allison
<b>Unincorporated</b>	6/8/2001	\$0	Flooding from the remnants of T.S. Allison
<b>Unincorporated</b>	6/8/2001	\$0	Flooding from the remnants of T.S. Allison
<b>Countywide</b>	6/9/2001	\$0	Flooding from the remnants of T.S. Allison
<b>Countywide</b>	6/9/2001	\$0	Flooding from the remnants of T.S. Allison
<b>Unincorporated</b>	8/30/2001	\$30,000	Highway 35 underpass, South Johnson Street and surrounding streets underwater in Alvin; street flooding in Angleton.
<b>Unincorporated</b>	8/31/2001	\$500,000	High water in Alvin, Manvel, and Danbury.
<b>Unincorporated</b>	9/2/2001	\$80,000	Homes flooded in the Shadow Bend subdivision on Austin Bayou in Danbury. Numerous streets flooded, including Highway 6 between Manvel and Alvin and Highway 36 in Damon.
<b>Angleton</b>	8/15/2002	\$50,000	Street flooding in Angleton and Lake Jackson.
<b>Alvin</b>	8/15/2002	\$90,000	Several roads in and around Alvin have high water; water is in homes in Alvin.
<b>Freeport</b>	9/6/2002	\$25,000	Numerous roads flooded and impassable from Freeport to Lake Jackson.
<b>Sweeny</b>	9/7/2002	\$250,000	Waist deep water and flooding in Sweeny.
<b>Freeport</b>	9/9/2002	\$30,000	Two feet of water on streets in Freeport.
<b>Countywide</b>	9/10/2002	\$30,000	Countywide flooding due to training cells.
<b>Countywide</b>	11/5/2002	\$35,000	Numerous roads closed due to high water on extremely saturated grounds.
<b>Unincorporated</b>	12/4/2002	\$2,000	Flooding in extreme northeast portion of county.
<b>Lake Jackson</b>	9/4/2003	\$10,000	Bumper-high street flooding. Water threatening homes in the Winding Woods subdivision.

<b>Manvel</b>	10/9/2003	\$15,000	Flooding over County Road 190, west of Highway 146, forced its closure. Subdivision along Highway 6 in Manvel experienced flooding.
<b>Sweeny</b>	6/23/2004	\$5,000	Roads flooded in and around Sweeny.
<b>Brazoria</b>	10/16/2006	\$500,000	Approximately 115 homes flooded in several locations. Several roads flooded including County Road 5995 near Bastrop Bayou, Highway 36 and County Road 304 near Jones Creek, and near County Road 769B.
<b>Freeport</b>	4/25/2007	\$15,000	Water reported in a couple of homes in and around the old Velasco District.
<b>Angleton</b>	5/28/2007	\$110,000	Three flooded homes with over a foot of water in them off Henderson Road. Reports of 50 more flooded homes, or homes with water damage, in Angleton.
<b>Angleton</b>	5/28/2007	0	Flooding across Highway 288 near the intersections of FM 523 and County Roads 340 and 341. Flooding also reported on Highway 35 between Angleton and West Columbia.
<b>Unincorporated</b>	7/1/2010	0	Numerous roads were closed due to high water in Sweeny and West Columbia.
<b>Sweeny</b>	7/1/2010	\$500,000	Heavy rainfall caused flooding of 30 to 35 homes in the town of Sweeny.
<b>West Columbia</b>	7/1/2010	\$1,250,000	Flooding of 40 to 45 homes and businesses in the town of West Columbia.
<b>Brazoria</b>	1/22/2015	\$1,000	The intersection of CR 353 and CR 354 between West Columbia and Brazoria was barricaded.
<b>Lake Jackson</b>	4/14/2015	\$0	Heavy rain caused residential street flooding that left some roadways impassable across northern Lake Jackson.
<b>Unincorporated</b>	4/17/2015	\$5,000	Street flooding in the town of Richwood.
<b>Angleton</b>	5/12/2015	\$75,000	Widespread flooding was reported with water in homes in Angleton.
<b>Unincorporated</b>	8/28/2016	\$12,000	Nearly 6 inches over a relatively short period of time caused flood waters to be reported entering a few homes in northern Freeport. There were reports of water in at least 5 homes in Velasco along 800 north Avenue F. There were numerous reports of flooded roadways and standing water in the Dow Chemical plant.
<b>Danbury</b>	4/18/2017	\$450,000	Over 60 homes had a couple of inches of water in the town of Danbury. The worst flooding occurred in the eastern and western side of town, or near the sloughs. Sections of County Roads 208, 201 and 211 were impassable due to the flooding.
<b>Unincorporated</b>	4/18/2017	\$0	Flood waters from Halls Bayou came over sections of FM 2004, from FM 2917 to near the Galveston County line, forcing road closures.
<b>Iowa Colony</b>	8/26/2017	\$0	There were numerous water rescues within the county; from Pearland down to the Angleton-Lake Jackson area. Flash flood waters, from sheet flooding and bayous/creeks coming out of banks, completely inundated hundreds to thousands of homes and businesses. Roads and highways in and along the Highway 288 corridor were flooded and therefore closed for long time periods. Major record flooding of the Brazos, San Bernard and Oyster Creek caused the flooding of hundreds to thousands of vicinity homes, vehicles and businesses. Numerous roads and homes were inundated with flood waters on east side of Oyster Creek including the Columbia Lakes, Mallard Lakes, Great Lakes, Riverside Estates and Bar X subdivisions as well as homes along CR 39. Other county roads that became impassable due to high flood waters include FM 1462, Highways 35 and 90, FM 950, CR 25, 380A, CR 42 and FM 521. The Phillips refinery outside of the town of Sweeny took on water from the west near Little Linville Bayou. Hanson Riverside County Park along the San Bernard River southwest of West Columbia was inundated and water over-topped the Phillips Terminal.
<b>Unincorporated</b>	8/28/2017	\$0	Sections of FM 523 near Highway 288 north of Angleton was closed due to flooding. Major record flooding of the Brazos, San Bernard and Oyster Creek caused the flooding of hundreds to thousands of vicinity homes, vehicles and businesses. Numerous Roads and homes were inundated with flood waters on east side of Oyster Creek including the Columbia Lakes, Mallard Lakes, Great Lakes, Riverside Estates and Bar X subdivisions as well as homes along CR 39. Other county roads that became impassable due to high flood waters include, but are not limited to, FM 1462, Highways 35 and 90, FM 950, CR 25, 380A, CR 42 and FM 521. The Phillips refinery outside of the town of Sweeny took on water from the west near Little Linville Bayou. Hanson Riverside County Park along the San Bernard River southwest of West Columbia was inundated and water over-topped the Phillips Terminal.
<b>Iowa Colony</b>	8/28/2017	\$0	Sections of FM 521 near FM 1462 in the Rosharon area were closed due to flooding. Major record flooding of the Brazos, San Bernard and Oyster Creek caused the flooding of hundreds to thousands of vicinity homes, vehicles and businesses. Numerous Roads and homes were inundated with flood waters on east

			side of Oyster Creek including the Columbia Lakes, Mallard Lakes, Great Lakes, Riverside Estates and Bar X subdivisions as well as homes along CR 39. Other county roads that became impassable due to high flood waters include, but are not limited to, FM 1462, Highways 35 and 90, FM 950, CR 25, 380A, CR 42 and FM 521. The Phillips refinery outside of the town of Sweeny took on water from the west near Little Linville Bayou. Hanson Riverside County Park along the San Bernard River southwest of West Columbia was inundated and water over-topped the Phillips Terminal.
<b>Brazoria</b>	8/28/2017	\$0	Parts of SH 36 and FM 521 around the town of Brazoria were closed due to flooding. Major record flooding of the Brazos, San Bernard and Oyster Creek caused the flooding of hundreds to thousands of vicinity homes, vehicles and businesses. Numerous Roads and homes were inundated with flood waters on east side of Oyster Creek including the Columbia Lakes, Mallard Lakes, Great Lakes, Riverside Estates and Bar X subdivisions as well as homes along CR 39. Other county roads that became impassable due to high flood waters include, but are not limited to, FM 1462, Highways 35 and 90, FM 950, CR 25, 380A, CR 42 and FM 521. The Phillips refinery outside of the town of Sweeny took on water from the west near Little Linville Bayou. Hanson Riverside County Park along the San Bernard River southwest of West Columbia was inundated and water over-topped the Phillips Terminal.

### Brazoria County Disaster Declarations

There have been twenty-four federally declared flood disasters in Brazoria County since 1973. These events are considered the most significant flood events in Brazoria County's recent history.

Date	Disaster Number	Title	Date (Cont.)	Disaster Number	Title
7/11/1973	398	Severe Storms & Flooding	7/17/2003	1479	Hurricane Claudette
7/28/1979	595	Storms & Flash Floods	9/2/2005	3216	Hurricane Katrina Evacuation
9/25/1979	603	Severe Storms & Flooding	9/21/2005	3261	Hurricane Rita
8/19/1983	689	Hurricane Alicia	9/24/2005	1606	Hurricane Rita
4/12/1991	900	Severe Storms & Tornadoes	8/18/2007	3277	Hurricane Dean
12/26/1991	930	Severe Thunderstorms & Flood	8/29/2008	3290	Hurricane Gustav
10/18/1994	1041	Severe Thunderstorms & Flood	9/10/2008	3294	Hurricane Ike
8/26/1998	1239	Tropical Storm Charlie	9/13/2008	1791	Hurricane Ike
9/23/1998	1245	Hurricane Georges- Texas	5/29/2015	4223	Severe Storms & Tornadoes & Flooding & Straight-line Winds
10/21/1998	1257	Texas Flooding	11/25/2015	4245	Severe Storms & Tornadoes & Flooding & Straight-line Winds
9/26/2002	1434	Tropical Storm Fay	6/11/2016	4272	Severe Storms & Flooding
11/5/2002	1439	Severe Storms & Tornadoes & Flooding	8/25/2017	4332	Hurricane Harvey

## **NFIP Participation**

The National Flood Insurance Program (NFIP) is a voluntary program that aims to reduce the impacts of flooding by incentivizing communities to adopt and enforce floodplain management regulations. The NFIP provides affordable flood insurance for property owners, renters, and businesses in participating communities. This reduces the socio-economic impacts of flooding on communities through risk reduction via flood insurance, and reduces the physical impacts of flooding through beneficial floodplain regulation.

### **NFIP Participants in Brazoria County:**

- City of Alvin
- City of Angleton
- Village of Bailey's Prairie
- Town of Bonney
- Brazoria County
- City of Brazoria
- City of Brookside Village
- City of Clute
- City of Manvel
- Town of Quintana
- City of Sweeny
- City West Columbia
- City of Hillcrest Village
- Town of Holiday Lakes
- City of Iowa Colony
- Village of Jones Creek
- City of Lake Jackson
- City of Danbury
- City of Liverpool
- City of Oyster Creek
- City of Richwood
- City of Surfside Beach
- City of Freeport

Each of the participating jurisdictions has a certified floodplain manager on staff, and/or function under the regulatory umbrella of Brazoria County. To remain NFIP compliant, the CFM's office conducts jurisdiction wide permitting of new development, permit review, flood code enforcement, document flood zones using GIS, educate the public, and provide public assistance. The County CFM regulates new development by determining if the property in question is in a flood hazard area designated by FEMA by the legal description. The next step is to determine the flood elevation for new structures based on the FEMA data.

In May 2005, Commissioners' Court required the elevation to be set at 2-feet above the FEMA elevation based on the large amount of development in the County and to comply with the Countywide Drainage Criteria for new subdivisions. If the property is not located in a flood hazard area, the requirement will be recommended to be 24-inches above existing grade.

To improve flood mitigation efforts and enhance their NFIP program, the participating jurisdictions will adopt and enforce stronger floodplain management regulations for new construction in Special Flood Hazard Areas (SFHAs).

The Port of Freeport, Alvin ISD, Brazoria ISD, Damon ISD, Danbury ISD, Sweeny ISD, Brazosport College and the Drainage Districts do not participate in the NFIP, because they do not regulate the floodplain in their planning area and are therefore not considered communities under the NFIP.

### Repetitive Loss Properties

Repetitive loss properties (RL) are properties that have received a minimum of two insurance payments of \$1,000 or more from the NFIP within the last 10 years. Brazoria County has a total of 1,356 RL properties, and 376 severe repetitive loss properties totaling \$177,892,291.82 in insurance payouts.

An exhaustive and comprehensive list of all RL properties are listed in Appendix D.

Jurisdiction	Residential RLPs	Non-residential RLPs	SRL Properties	Total RLPs
Unincorporated Brazoria County	738	24	76	762
Alvin	106	6	19	112
Angleton	83	9	22	92
Bailey's Point	9	0	0	9
Brazoria	24	0	2	24
Brookside	35	0	5	35
Clute	16	5	2	21
Danbury	9	0	0	9
Freeport	37	7	2	44
Hillcrest Village	6	0	1	6
Holiday Lakes	1	0	0	1
Iowa Colony	6	0	1	6
Jones Creek	16	0	2	16
Lake Jackson	15	3	0	18
Liverpool	4	0	0	4
Manvel	27	1	4	28
Oyster Creek	6	2	0	8
Quintana	1	0	0	1
Richwood	11	0	3	11
Surfside	123	16	8	139
Sweeny	6	1	3	7
West Columbia	14	0	2	14

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within a given year. The analysis calculates the average number of events in each jurisdiction annually and then calculates the chance of the event occurring in a year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history and an estimate of what the jurisdiction could experience in the future. Information from stakeholders, FEMA, NOAA, and the Department of Homeland Security (DHS) are the sources of data for the analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- FEMA's Hazus analysis software
- GIS analysis of critical facilities in the floodplain; and
- Stakeholder identified vulnerabilities.

Hazus was used to determine the economic loss and calculate the buildings stock that's at risk of flooding in Brazoria County. Shelter needs were also projected using this method. The complete HAZUS report is in Appendix C. H-GAC maintains a database of critical facilities in Brazoria County. Using GIS, this plan identifies any critical assets located within the 100-year and 500-year floodplain. Stakeholders then provided valuable insight into additional vulnerabilities within their communities. These findings are provided in condensed charts for each jurisdiction.

### **Brazoria County (All participating jurisdictions)**

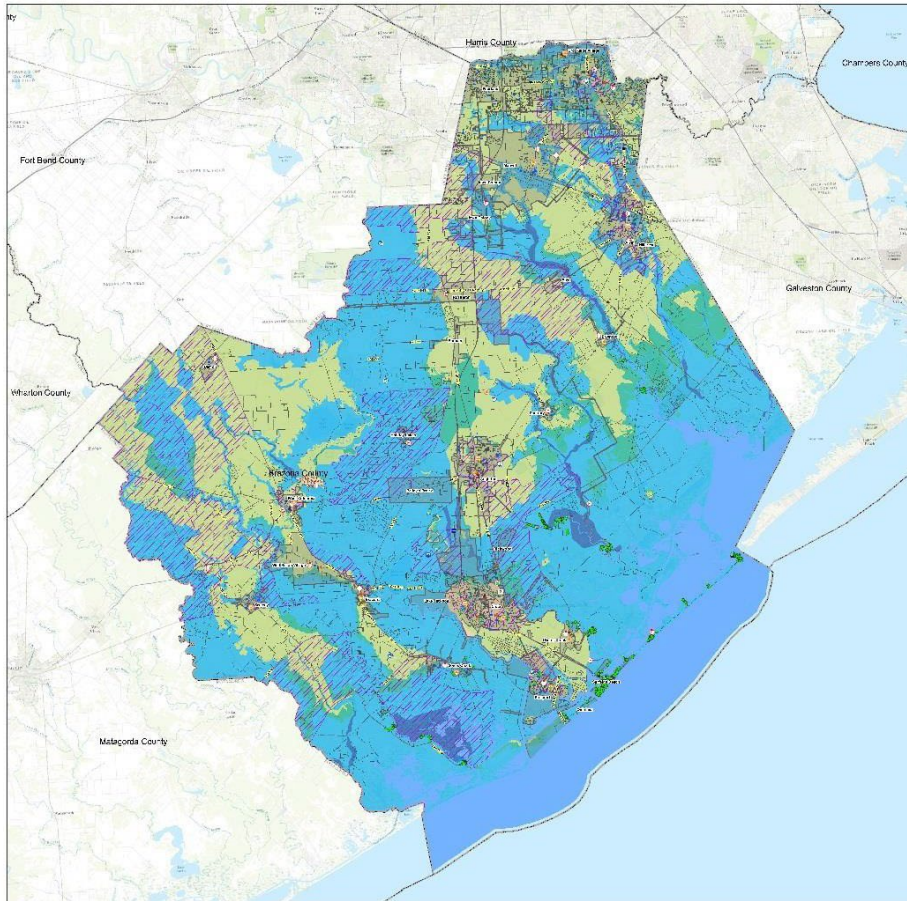

#### **Identified Vulnerabilities:**

- Community members and city staff expressed the concern of major infrastructure, roads and bridges, acting as physical barriers throughout the county, in past major flood events this:
  - Prevented water from certain areas, but also allowed for increased floodwaters in other areas
  - Led to rescuers not being able to reach communities where the main highway was the only way for first responders to reach people in need
- Individuals who reside or work within the 100 year or 500 year floodplain
- Communities without emergency shelters, local hospitals, or fire stations- relying on the county or larger jurisdiction for emergency services/ response
- Local farmers and other business owners whose shops or farmland flood
- Industrial sites located throughout the county particularly along the coast

#### **Identified Impacts:**

- Major roadways blocked by floodwaters may create an increase of serious injuries or loss of life due to responders not being able to reach those injured or in danger
- Lack of shelters and emergency responders throughout the county may lead to an increase in response time which may lead to a loss of life or serious injury
- Economic and financial loss for cities and individuals including property loss and loss of economic activity from loss of major employers including industrial and farming activities

## Brazoria County (Unincorporated)

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	12
<b>Area Affected:</b>	61 %	<b>Annual Event Average:</b>	1.42

**Probability:** Very Likely; 100 percent chance the event will occur in a year

**Extent:** According to past events the county has experienced 5 feet of water; the county can experience 6 to 7 feet of water.

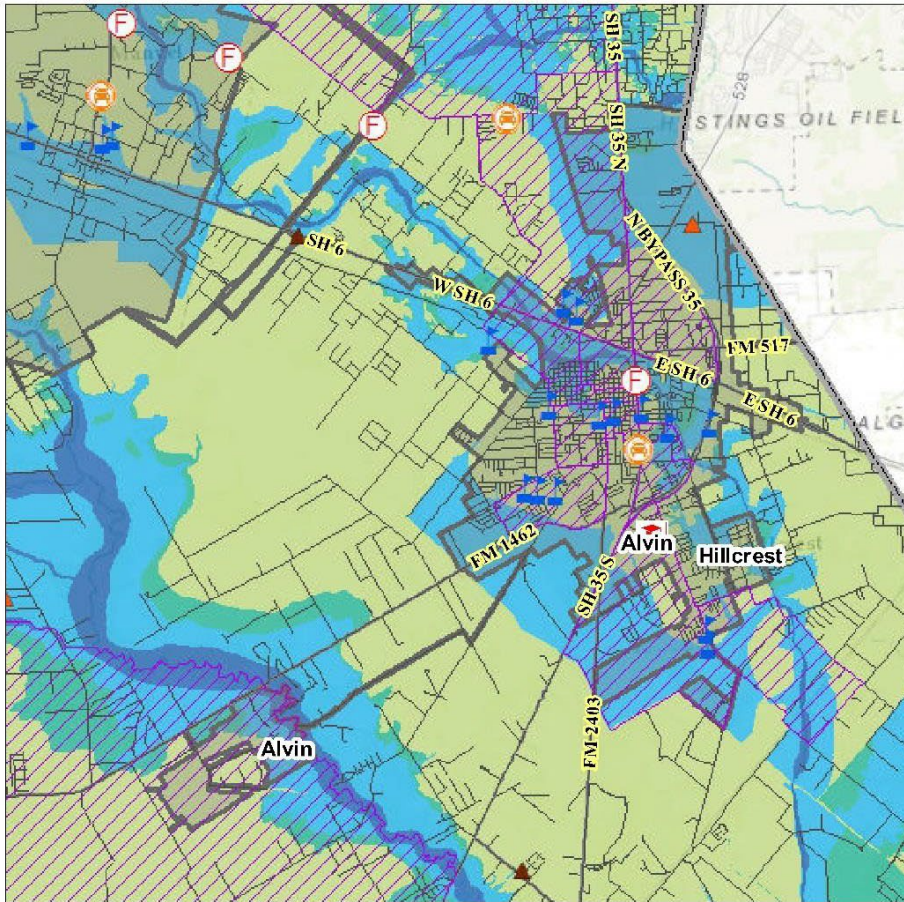

### Identified Vulnerabilities:

- Critical facilities including: 3 fire station, 5 schools, 1 shelter, and 2 correctional facilities
- Vulnerable populations concentrated near Brazoria National Wildlife Refuge

### Identified Impacts:

- Vulnerable populations (defined in the Community Profile Section) include residents without cars, funds or other resources to evacuate in case of a flood event; significant injury, loss of life could occur because of the inability evacuate to dry land
- Roadways during future events may become impassable throughout the county due to high flood waters making it difficult or impossible to reach critical facilities or those most in need.
- More than 500 homes throughout the unincorporated areas and commercial establishments may see damage or complete destruction during future events

Angleton			
<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 2000:</b>	8
<b>Planning Area Affected:</b>	25 %	<b>Annual Event Average:</b>	.47
<b>Probability:</b> Likely; 47 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 3 feet of water; the jurisdiction can experience 4 to 5 feet of water.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>Residential neighborhoods in the north of the city are within the 100-year floodplain along North Valderas Street and North Plantation Drive</li> <li>Sheet flooding occurs throughout the center of the city with the up to 3 feet of water potentially accumulating near Cannan Drive and North Valderas Street. Sheet flooding could potentially affect the police departments, fire station, shelters, EOC and theater within the city</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Potential flooding within critical facilities may lead to first responders not being able to respond to the community's needs such as rescues or calls for help, because of damage sustained to communication systems or equipment within these facilities</li> <li>Residential and commercial property loss. Residents with property within or just outside of the 100 to 500-year floodplain may be more likely to see significant damage from flood events</li> <li>Significant damage to commercial and residential property may lead to residents moving away and a loss of economic activity throughout the jurisdiction</li> </ul>			

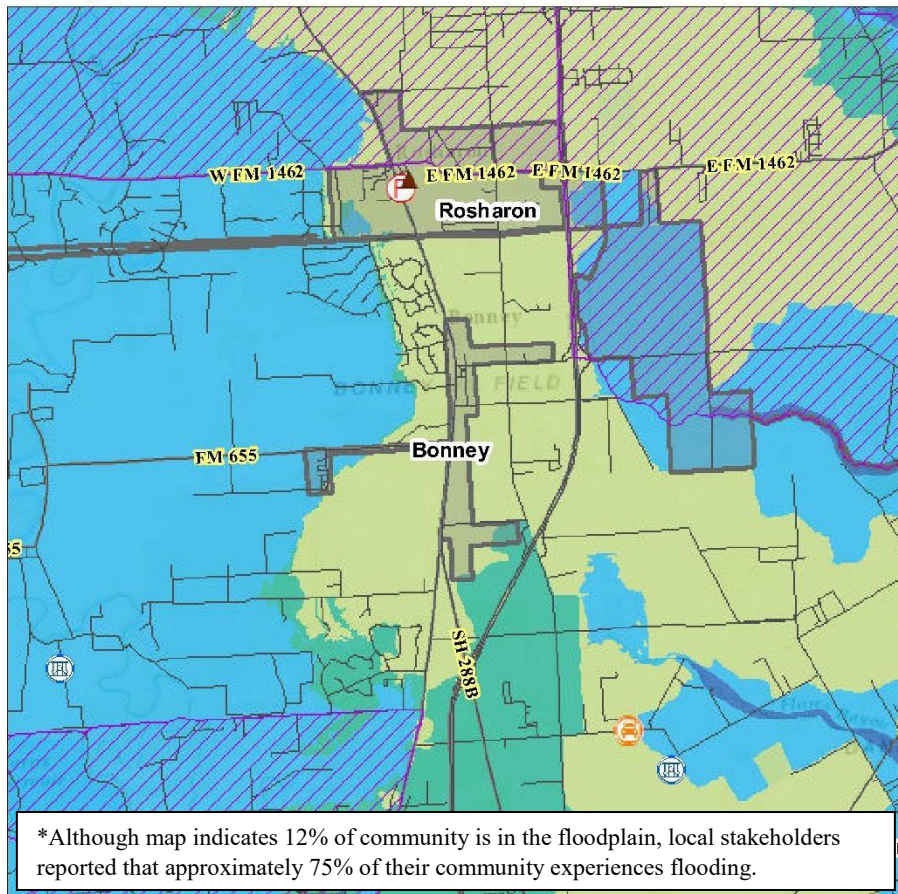

# Floodplains: Bailey's Prairie

Bailey's Prairie			
<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.29
<b>Probability:</b> Likely; 29 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 3 feet of water; the jurisdiction can experience 4 to 5 feet of water.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>The entire city is within the 100-year floodplain; residential areas in the north along Highway 35 and the south towards 521 are most vulnerable to 3 feet of water</li> <li>170 residential structures at risk</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>With the entire city within the 100 year-floodplain there is potentially a greater chance that commercial and residential structures throughout the city will flood leading to loss of life, significant injury, and cost of home and business repair</li> <li>With no police station EMS or fire station, the jurisdiction relies on Angleton's and Brazoria's first responders. If Highway 35 and 521 are impassable due to floodwaters first responders needing to come into the city will have a difficult time reaching residents or visitors within the city. Potentially leading to first responders, residents, and visitors sustaining injuries or a loss of life.</li> </ul>

Clute			
<b>Planning Area (Sq. mi):</b>	5.6	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	75 %	<b>Annual Event Average:</b>	.29
<b>Probability:</b> Likely; 29 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 3 feet of water; the jurisdiction can experience 4 to 6 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>Vulnerable populations are concentrated to the northeast and southwest of the city</li> <li>The vulnerable population to the north east of the city is on the edge of oyster creek which has overflowed in the past.</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Vulnerable populations may have a significantly harder time trying to evacuate during flood events; they may also not have the resources to move away from the floodplain or obtain flood insurance. This may lead to an increase in serious injury or loss of life during events and a loss of residential and commercial property.</li> </ul>			

# Floodplains: Danbury

## Danbury and Danbury ISD

<b>Planning Area (Sq. mi):</b>	1.0	<b>Occurrences since 2000:</b>	6
<b>Area Affected:</b>	62 %	<b>Annual Event Average:</b>	.35

**Probability:** Likely; 35 percent chance the event will occur in a year

**Extent:** According to past events the jurisdiction has experienced 2 feet of water; the jurisdiction can experience 3 to 4 feet of water

### Identified Vulnerabilities:

- The southeast of the city is within the 100-year flood plan and has a concentration of industry and residential areas
- In the north of the city the Danbury oil field and Fish Farms are also located in the 100-year floodplain

### Identified Impacts:

- Residential and commercial property loss due to floodwaters
- A potential for a domino effect; flooding could create a technical hazard because of the location of the oil and industrial sites leading to potential serious injury or loss of life
- Economic loss for the city if main industry and employment centers are flooded and damaged

<b>Area Affected:</b>	87 %	<b>Annual Event Average:</b>	.41
<b>Probability:</b> Likely; 41 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 3 feet of water; the jurisdiction can experience 4 to 5 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>30 homes flooded throughout the city and City Hall flooded with 1.5 feet to 3 feet of water</li> <li>City Hall currently located within the 100-year floodplain.</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Residential and commercial property loss</li> <li>Residents displaced from their homes</li> <li>Delay in city services, because of the loss of City Hall</li> </ul>			

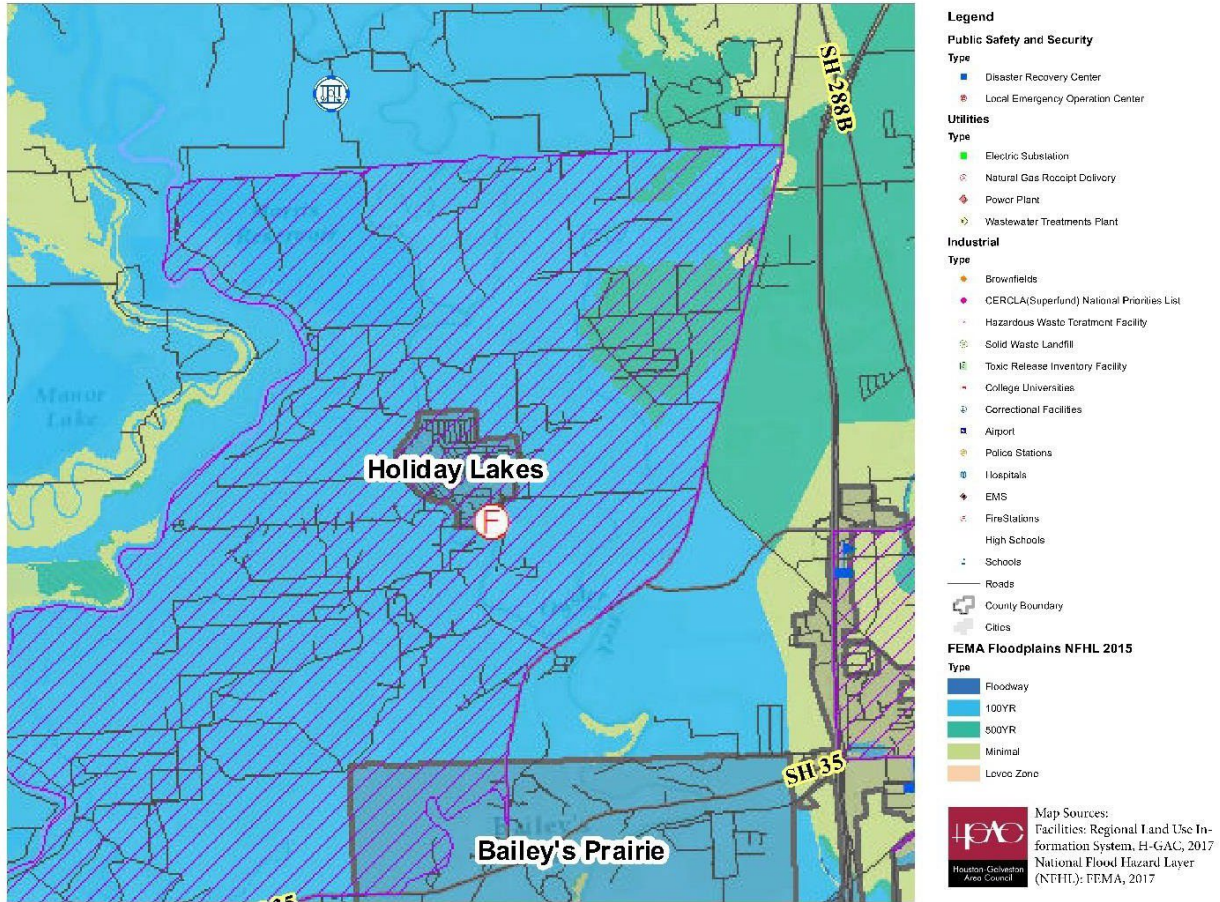

## Floodplains: Hillcrest Village

<b>Hillcrest Village</b>			
<b>Planning Area (Sq. mi):</b>	0.4	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	75 %	<b>Annual Event Average:</b>	.29
<b>Probability:</b> Likely; 29 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 5 feet of water; the jurisdiction can experience 6 to 8 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>The most vulnerable population in the city is in the northeast. This population is within and just out of the 100-year floodplain in the city.</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Vulnerable populations may have a harder time evacuating during flooding events, potentially leading to an increase loss of life or serious injury</li> <li>Vulnerable populations may not have the resources to move away from the floodplain; this may lead to reoccurring injuries, property loss, and damage</li> </ul>			

# Floodplains: Holiday Lakes

Holiday Lakes			
<b>Planning Area (Sq. mi):</b>	1	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.29
<b>Probability:</b> Likely; 29 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 3 feet of water; the jurisdiction can experience 4 to 6 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Approximately 60 percent of the city’s residential areas are within the 100-year floodplain</li> <li>• The city is surrounded by the 100-year floodplain</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Loss of or significant damage to commercial and residential property due to flood damage</li> <li>• With the city surrounded by the 100-year flood plain and the city depending on the Angleton fire department there may be loss of life or serious injury due to a potential delay in response during large scale events</li> </ul>

### Liverpool

<b>Planning Area (Sq. mi):</b>	1.1	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.29

**Probability:** Likely; 29 percent chance the event will occur in a year

**Extent:** According to past events the jurisdiction has experienced 3.5 feet of water; the jurisdiction can experience 5 to 7 feet of water

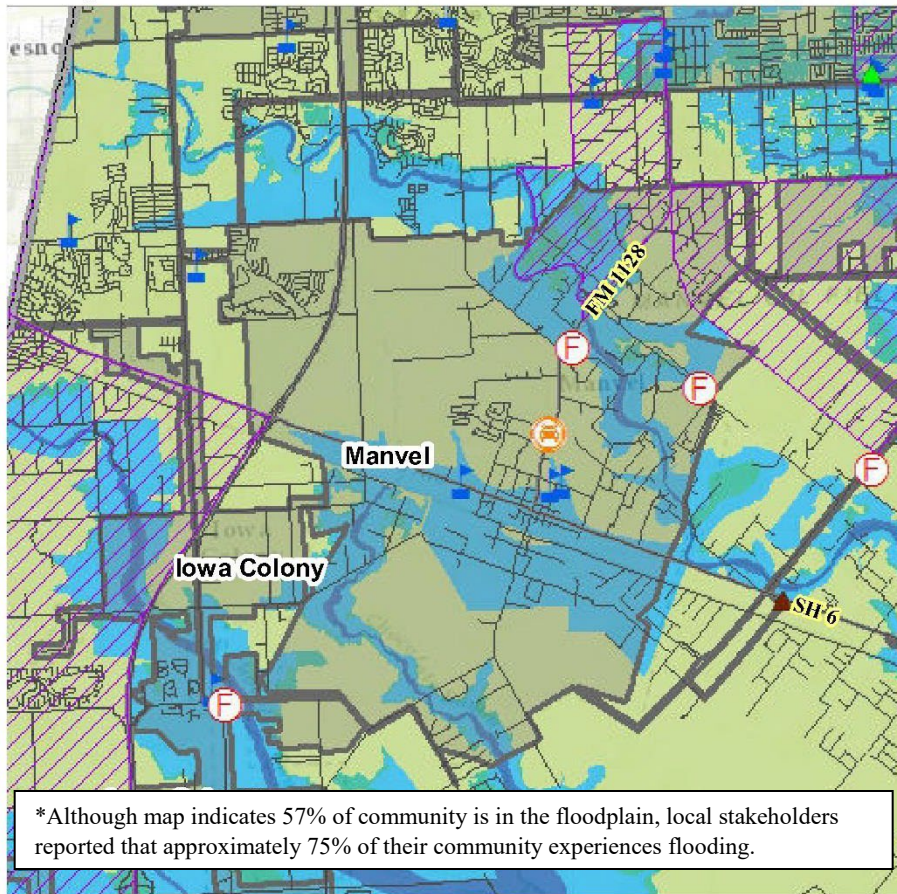

#### Identified Vulnerabilities:

- The far east of the city along Chocolate Bayou is within the 100-year floodplain; residential areas are prone to flooding throughout this area

#### Identified Impacts:

- Residential and commercial property loss throughout the east of the city
- Loss of life or serious injury for those trying to evacuate from their homes and neighborhoods

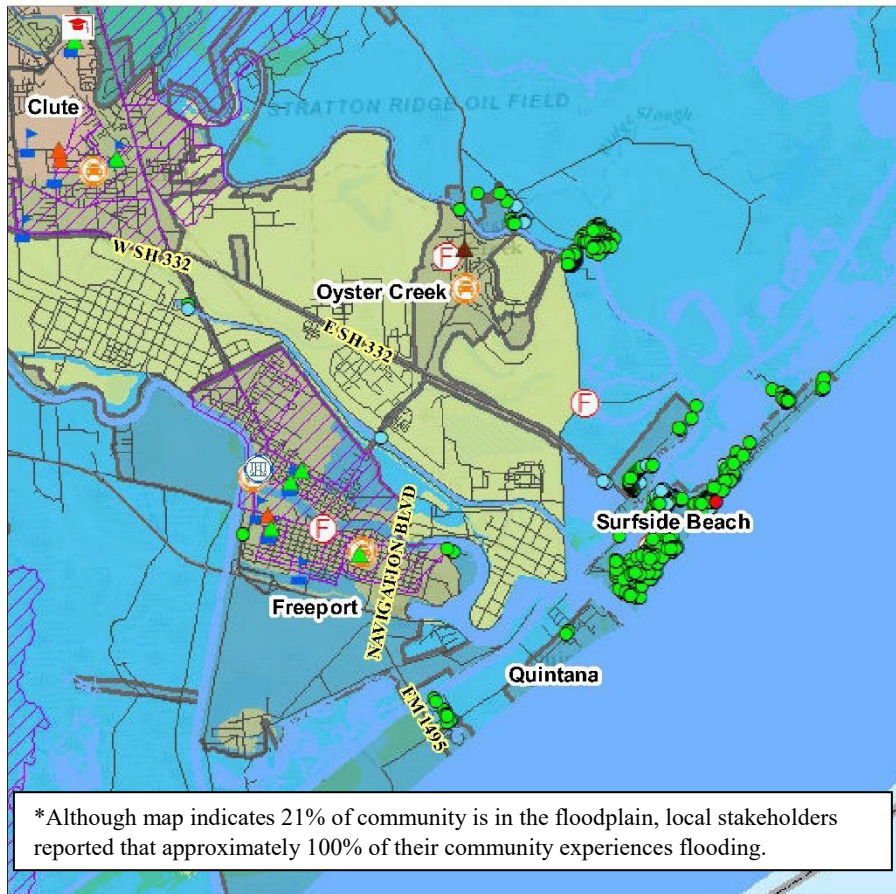

## Floodplains: Manvel

### Oyster Creek

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.29

**Probability:** Likely; 29 percent chance the event will occur in a year

**Extent:** According to past events the jurisdiction has experienced 3 feet of water; the jurisdiction can experience 4 to 5 feet of water

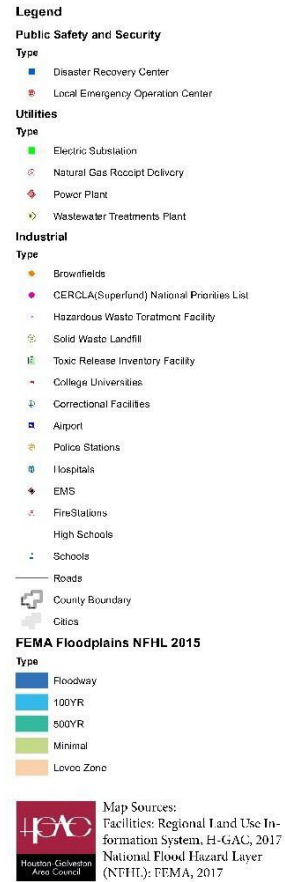

#### Identified Vulnerabilities:

- The northeast of the city is adjacent to oyster creek and is within the 100-year floodplain
- The city's largest retail center is in this area as well as residential areas; these areas are prone to flooding.

#### Identified Impacts:

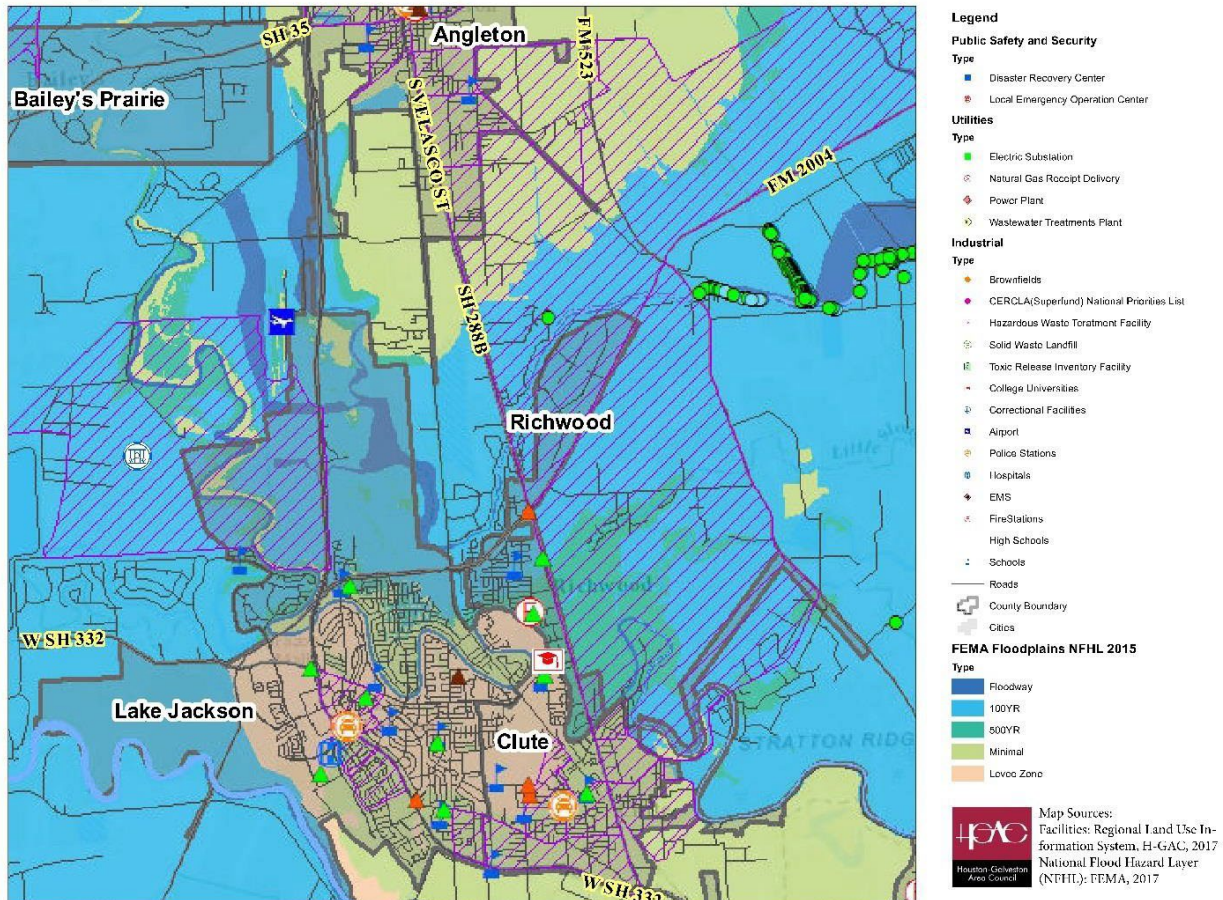

- Commercial and residential property loss throughout the city, particularly in the northeast of the city
- Economic loss for the city and local business that could be damaged during flooding
- Financial loss for residents who were displaced because of the event and/ or whose homes were destroyed or damaged due to the event.

## Floodplains: Quintana

<b>Quintana</b>			
<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.29
<b>Probability:</b> Likely; 29 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 1.6 feet of water; the jurisdiction can experience 3 to 4 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>The entire city is within the 100-year floodplain</li> <li>The port facility to the northeast is considered a critical facility and is within the 100-year floodplain</li> <li>Residential and commercial areas throughout the city are prone to flooding</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Residential, commercial and public property loss due to flood events</li> <li>Loss of basic city services with the potential for the entire city to flood during events</li> <li>Economic loss for the city with a loss of public and commercial activity</li> <li>Financial loss for residents whose homes were destroyed or damaged</li> </ul>			

## Floodplains: Richwood

### Richwood

<b>Planning Area (Sq. mi):</b>	3.1	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.29

**Probability:** Likely; 29 percent chance the event will occur in a year

**Extent:** According to past events the jurisdiction has experienced 5 feet of water; the jurisdiction can experience 6 to 7 feet of water

#### Identified Vulnerabilities:

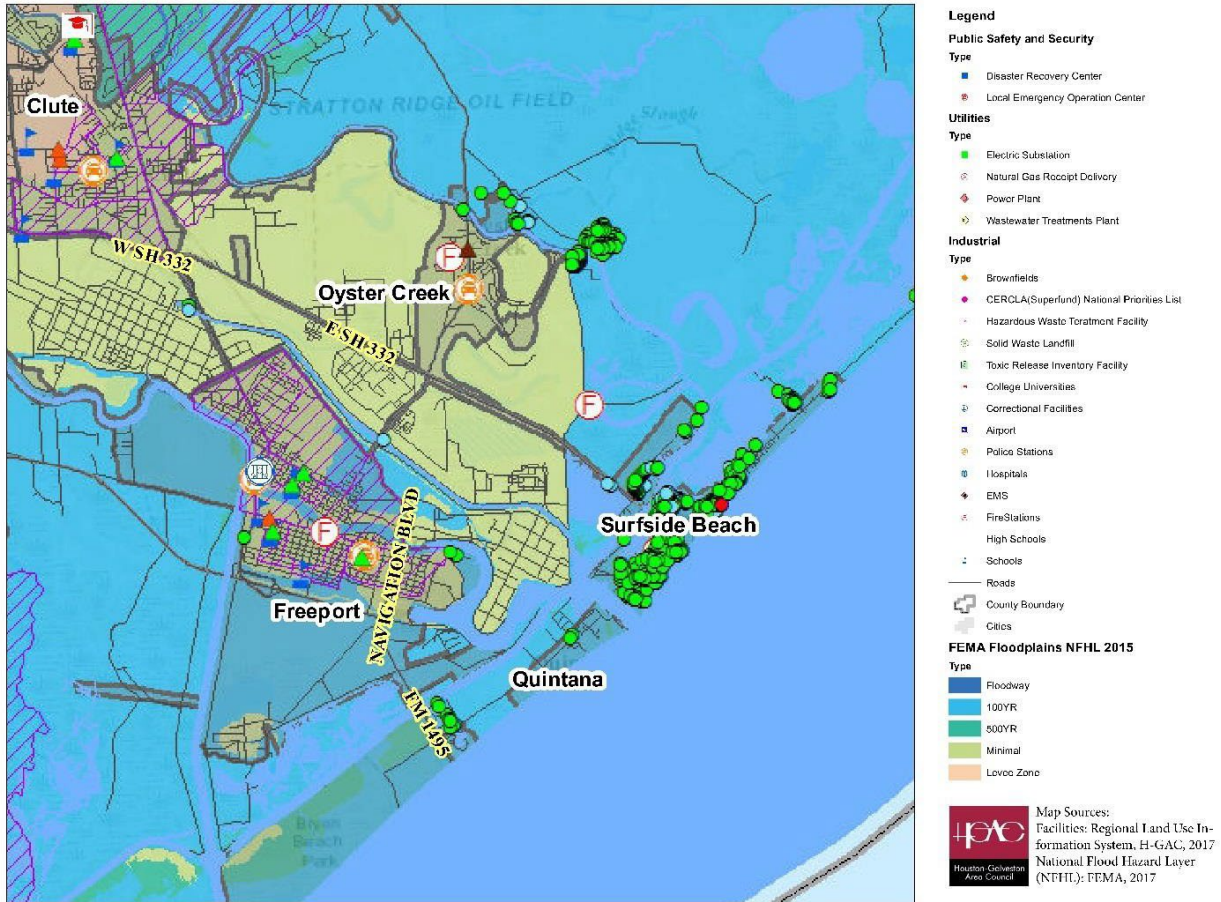

- 264 homes have flooded in the past from a single event; homes to the southwest of the city along Oyster Creek are prone to flooding
- Highway 2004 and Brazos Crossing neighborhood is prone to flooding

#### Identified Impacts:

- Residential property loss throughout the southwest of the city
- Financial loss for residents displaced by the event

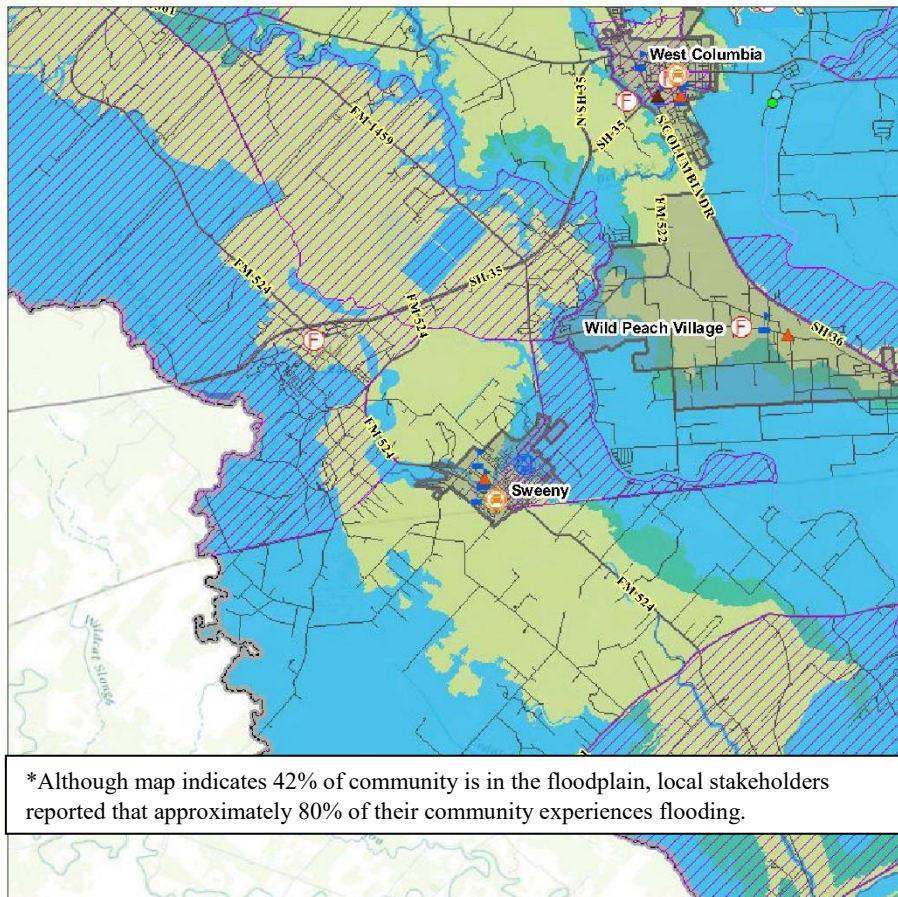

# Floodplains: Surfside Beach

Surfside Beach			
<b>Planning Area (Sq. mi):</b>	2.2	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.29
<b>Probability:</b> Likely; 29 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 1.7 feet of water; the jurisdiction can experience 3 to 4 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• The entire jurisdiction is located within the 100-year floodplain.</li> <li>• Toxic release site located in the center of town within the 100-year floodplain</li> <li>• Port facility and police station are located within the 100-year floodplain</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Loss of public, commercial, and residential property throughout the city</li> <li>• Financial and economic loss for residents and the city due to a lack of public services, commercial activity and damage to homes</li> <li>• Potential for a compounding hazard; if the toxic release site is flooded this may result in a technical hazard that leads to further injuries, loss of life or property damage</li> </ul>

## Sweeny and Sweeny ISD

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	6
<b>Area Affected:</b>	80 %	<b>Annual Event Average:</b>	.35

**Probability:** Likely; 35 percent chance the event will occur in a year

**Extent:** According to past events the jurisdiction has experienced 1 foot of water; the jurisdiction can experience 2 to 3 feet of water

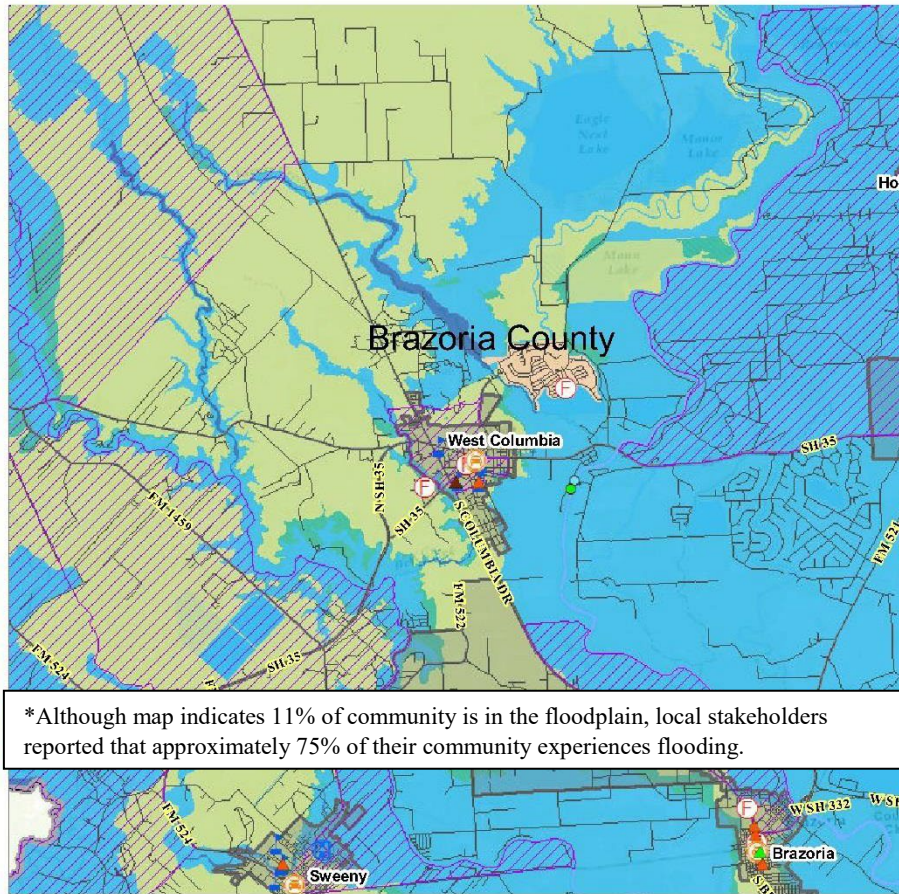

### Identified Vulnerabilities:

- Electric substation and hospital are in the AO flood zone; where sheet flooding could be expected
- Roads throughout the city are prone to flooding; in past events road 524 was the only way out of the city

### Identified Impacts:

- Loss of power throughout the city potentially leading to loss of communication with residents needing assistance
- Loss of available hospital beds or needed medical devices and medical help in the city- leading to serious injury or death and stress on neighboring jurisdictions first responders and hospital systems
- Serious injury or loss of life due to residents and visitors unable to evacuate due to flooded major roadways

West Columbia			
<b>Planning Area (Sq. mi):</b>	2.58	<b>Occurrences since 2000:</b>	6
<b>Area Affected:</b>	75 %	<b>Annual Event Average:</b>	.35
<b>Probability:</b> Likely; 35 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 3 feet of water; the jurisdiction can experience 4 to 5 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>80 homes throughout the city flooded during past events, greatest damage seen along Bell Creek and along Humble Drive</li> <li>Wastewater treatment facility flooded in past events due to backup</li> <li>Police department and several lift stations flooded in the city due to the Brazos River</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Residential and commercial property loss throughout the city</li> <li>Serious injury or loss of life due to delayed response because of damage to police station</li> <li>Reduced water quality during and after event due to potential damage to waste water treatment facility</li> </ul>			

# Floodplains: Brazosport ISD

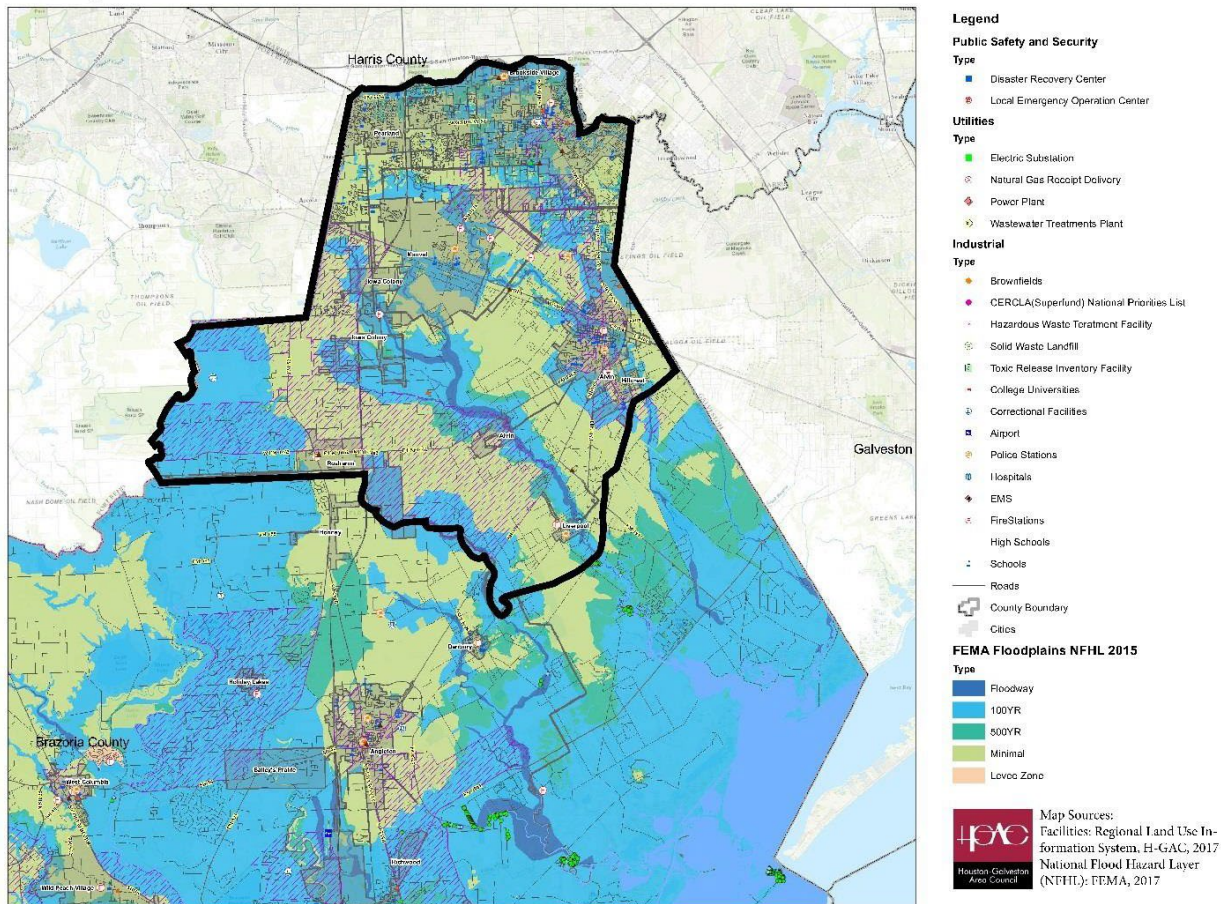

<b>Brazosport ISD</b>			
<b>Planning Area (Sq. mi):</b>	200	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	66 %	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although there have been no reported events in the schools or administrative buildings, the school district has schools and buildings across the county. In considering this, the probability may be similar to Unincorporated Areas in the county: Very Likely; 100 percent chance the event will occur in a year			
<b>Extent:</b> All school buildings within the district were reopened 2 weeks after the most extensive flooding event in the county (flooding from Hurricane Harvey). Although there have been no recorded events in the district extent may be similar to the Unincorporated Areas in the county: According to past events the county has experienced 5 feet of water; the county can experience 6 to 7 feet of water.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>19 schools- 10 elementary schools, 3 high schools, 5 middle schools, 1 alternative school</li> <li>12,000 children 18 years and younger</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Serious injury or loss of life due to students and staff trying to evacuate from a potentially flooding building or trying to get to school after an event and debris is still on roadways</li> <li>Property and financial loss due to flood damage to schools or administrative buildings and schools closed for a prolonged period</li> </ul>			

# Floodplains: Velasco Drainage District

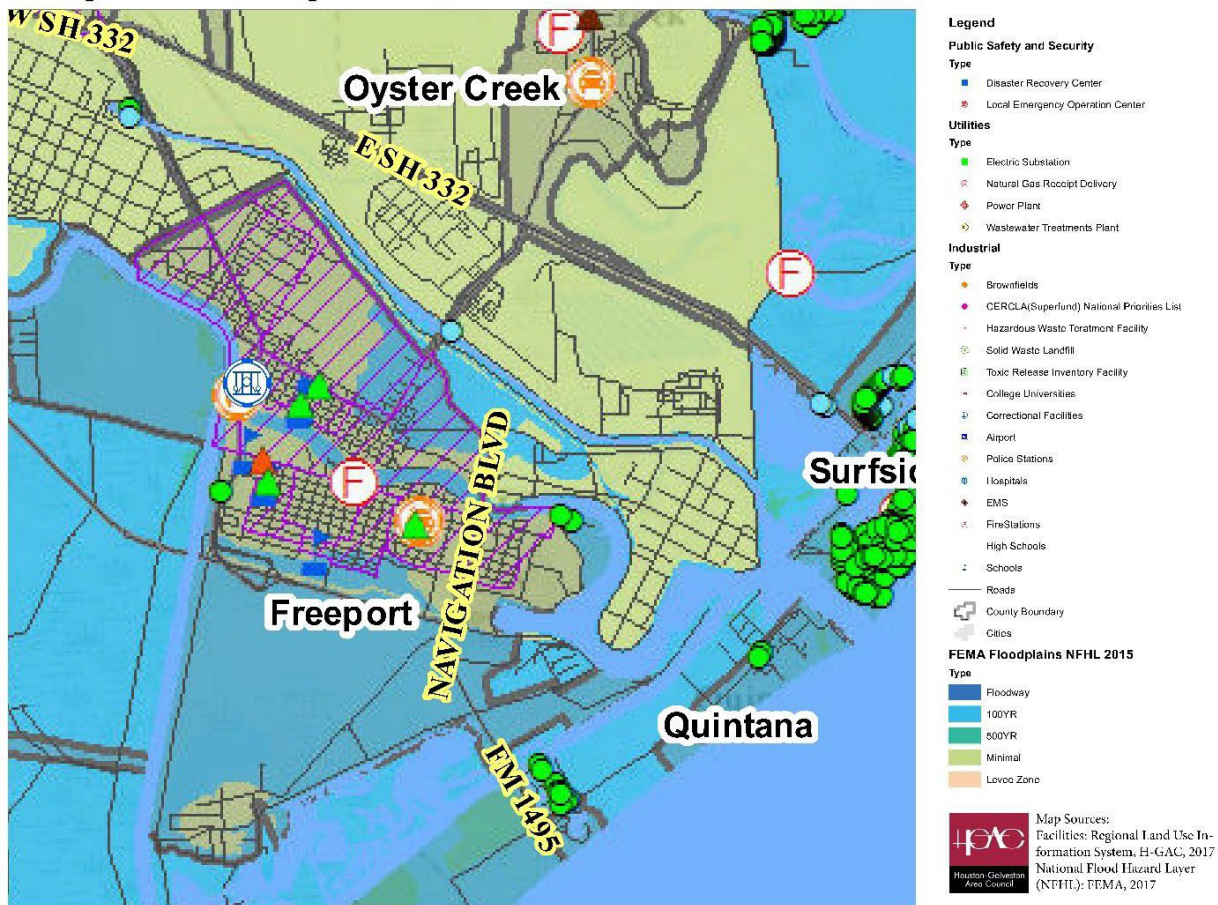

<b>Velasco Drainage District</b>			
<b>Planning Area (Sq. mi):</b>	236	<b>Occurrences since 2000:</b>	5
<b>Area Affected:</b>	69 %	<b>Annual Event Average:</b>	.29
<b>Probability:</b> Likely; 29 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 3 feet of water; The jurisdiction can experience 4 to 5 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>Headquarters are directly adjacent to Oyster Creek in Clute, just outside the 100-year floodplain</li> <li>14 pumps and levees</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Potential delay in service due to potential damage to administrative buildings</li> <li>Pump failure could result in a levee or dam failure leading to property loss, loss of life, and an increase in needed shelters</li> </ul>			

# Floodplains: Alvin ISD

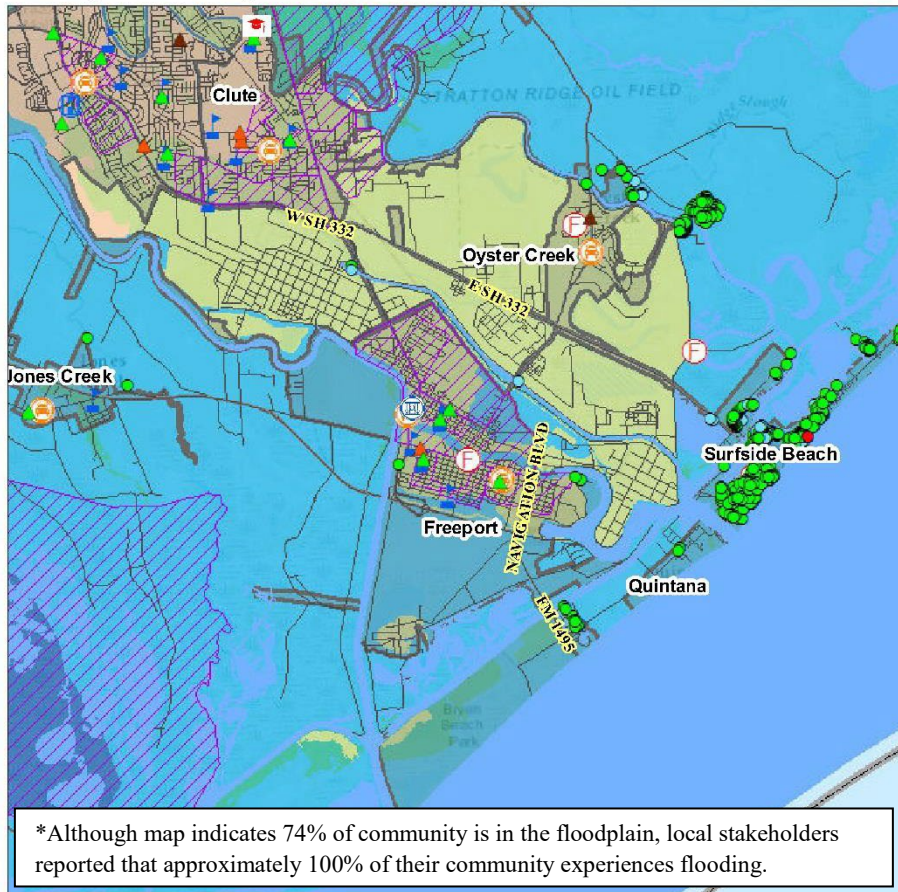

Alvin ISD			
<b>Planning Area (Sq. mi):</b>	252	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	39 %	<b>Annual Event Average:</b>	0
<p><b>Probability:</b> Although there have been no reported events in the schools or administrative buildings, the school district has schools and buildings across the county. In considering this the probability may be similar to Unincorporated Areas in the county: Very Likely; 100 percent chance the event will occur in a year</p>			
<p><b>Extent:</b> All school buildings within the district were reopened less than 2 weeks after the most extensive flooding event in the county (flooding from Hurricane Harvey). Although there have been no recorded events in the district extent may be similar to the Unincorporated Areas in the county: According to past events the county has experienced 5 feet of water; the county can experience 6 to 7 feet of water.</p>			
<p><b>Identified Vulnerabilities:</b></p> <ul style="list-style-type: none"> <li>• 31 schools- 17 elementary schools, 3 high schools, 6 middle schools, 1 alternative school</li> <li>• 22,000 children 18 years and younger</li> </ul>			
<p><b>Identified Impacts:</b></p> <ul style="list-style-type: none"> <li>• Serious injury or loss of life due to students and staff trying to evacuate from a potentially flooding building or trying to get to school after an event and debris is still on roadways</li> <li>• Property and financial loss due to flood damage to schools or administrative buildings and schools closed for a prolonged period</li> </ul>			

# Floodplains: Port Freeport

Port Freeport			
Planning Area (Sq. mi):	2.81	Occurrences since 2000:	5
Area Affected:	100 %	Annual Event Average:	.29
<b>Probability:</b> Likely; 29 percent chance the event will occur in a year			
<b>Extent:</b> According to past events the jurisdiction has experienced 3 feet of water; The jurisdiction can experience 4 to 5 feet of water			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>Brazos Harbor wraps around the south and east of the city. The port is in the floodplain</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Potential for a flood hazard to turn into a technical hazard which may lead to an increase in potential injuries or loss of life</li> <li>Financial loss for residents who may lose their jobs and economic loss for the city and state with one of the main ports down for a prolonged time</li> </ul>

<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>Brazos Harbor wraps around the northeast of the city. The largest industrial site in the city is in the floodplain</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Commercial and residential property loss due to potential flood damage</li> <li>Economic loss from the harbor being potentially closed due to flooding</li> <li>Delay in city services due to potential impassable roadways from debris</li> </ul>			

## Part 6.2: Wildfire

## 6.2 Wildfire

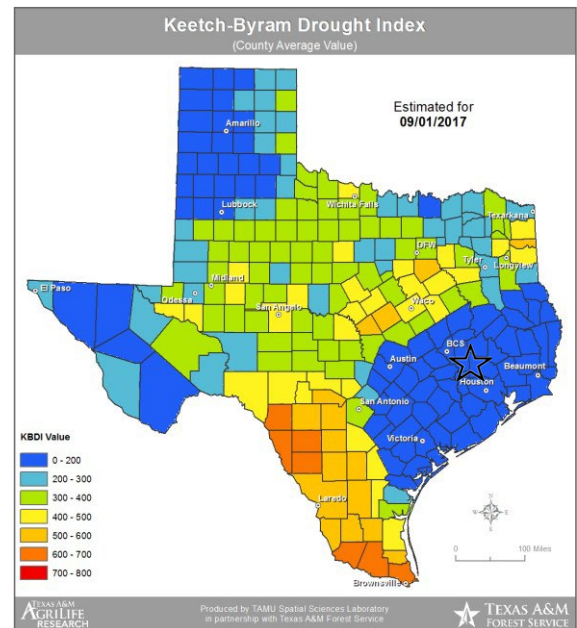

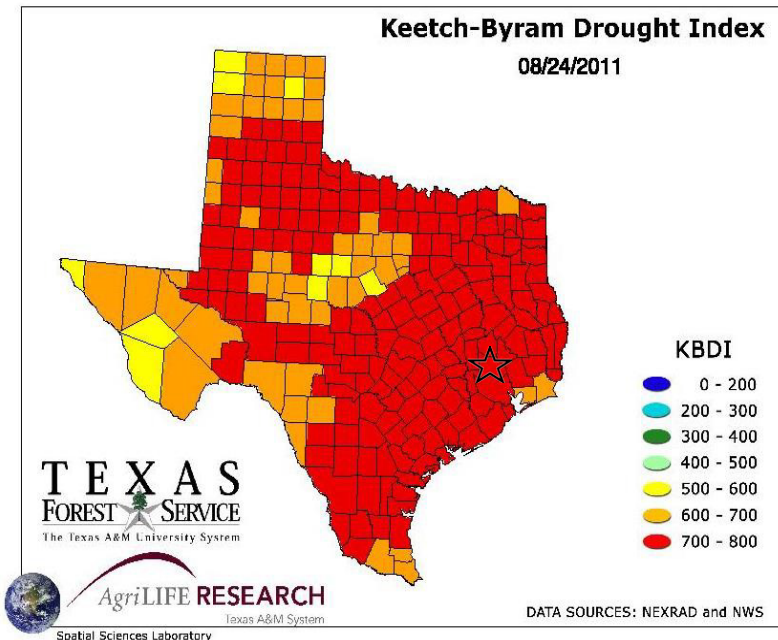

A combination of the Keetch-Byram Drought Index (KBDI) and the Texas Wildfire Risk Assessment are used to assess the risk of wildfire. KBDI is an index that measures the daily water balance, precipitation, and moisture in the soil to determine the potential for wildfires. KBDI ranges from 0 to 800 units. Zero represents fully saturated soil or no indication of drought. A measurement of 800 is the maximum measurement for drought and indicates no moisture is present in the soil. In August 2011, the maximum KBDI value recorded in Brazoria County was 792. The minimum KBDI value, 41, was recorded in September of 2017. KBDI conditions can change rapidly based on short-term weather conditions, so the most extreme values should be considered when addressing wildfire risk.

The Texas Wildfire Risk Assessment uses a variety of factors, such as fuels, vegetation, weather, and topography, to determine the fire potential of a specific land area. Particularly vulnerable are the Wildland Urban Interface (WUI) areas. These areas occur at the intersection of development and wildland. With continued population growth throughout the county, the WUI zones will become more abundant. Because most wildfires are caused by human activities, the intersection of WUI and drought are particularly dangerous.

### Wildland Fire Assessment System (WFAS) KBDI Value Scale:

KBDI Value	Score	Description
0 - 200	0 - 200	Soil moisture and large class fuel moistures are high and do not contribute much to fire intensity. Typical of early spring following winter precipitation.
200 - 300	200 - 400	Fuels are beginning to dry and contribute to wildfire intensity. Heavier fuels will still not readily ignite and burn. This is often seen in late spring or early summer.
300 - 400	400 - 600	Lower litter and duff layers contribute to fire intensity and will burn actively. Wildfire intensity begins to increase significantly. Larger fuels could burn or smolder for several days. This is often seen in late summer and early fall.
400 - 500	600 - 800	Often associated with more severe drought with increased wildfire occurrence. Intense, deep-burning fires with extreme intensities can be expected. Live fuels can also be expected to burn actively at these levels.
500 - 600		
600 - 700		
700 - 800

### Fire Ignition Point ( 2000 - 2015 ) : Brazoria County

### Brazoria County Wildfire Disaster Declarations

Year	Title	Disaster Number
1999	Extreme Fire Hazard	3142
2006	Extreme Wildfire Threat	1624

<https://www.FEMA.gov/>

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within a given year. The analysis calculates the average number of events in each jurisdiction annually and then calculates the percent chance of the event occurring within a year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. The extent data also includes an estimate of what the jurisdiction could experience in the future. Information from stakeholders, Texas Forest Service, FEMA, and NOAA are the sources of data for the analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- American Community Survey (5-year, 2016) data on residential structures
- GIS analysis of residential structures within 500 to 800 KBDI zones; and
- Stakeholder identified vulnerabilities

### **Brazoria County (All Participating Jurisdictions)**

#### **Identified Vulnerabilities:**

- Agriculture is a major source of revenue for the county and farmers throughout the participating jurisdictions
- Industrial sites are located throughout the county including chemical plants
- A significant proportion of individuals throughout the county are under the age of 18 or above the age of 65 years old

#### **Identified Impacts:**

- Loss of agriculture land throughout the county (631,021 acres) may lead to an economic loss for the county of approximately 118,236,00 dollars in revenue and a loss for local farmers throughout the county as well
- If an industrial or chemical site catches fire this may lead to a technical hazard leading to an increase in property loss, serious injuries or loss of life
- Residential and commercial property loss throughout the county (identified by local jurisdictions below) may lead to a financial loss for residents and jurisdictions
- Significant injury or loss of life particularly for children and older individuals (identified by local jurisdiction below)

# Wildfire Risk Assessment: Brazoria County

## Brazoria County (Unincorporated Area)

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2005:</b>	286
<b>Area Affected:</b>	22 %	<b>Annual Event Average:</b>	24 events a year

**Probability:** Very Likely; 100 percent chance event will occur in a year

**Extent:** The largest wildfire in the past 12 years has been a 560-acre fire. The unincorporated areas can expect a 600-acre fire.

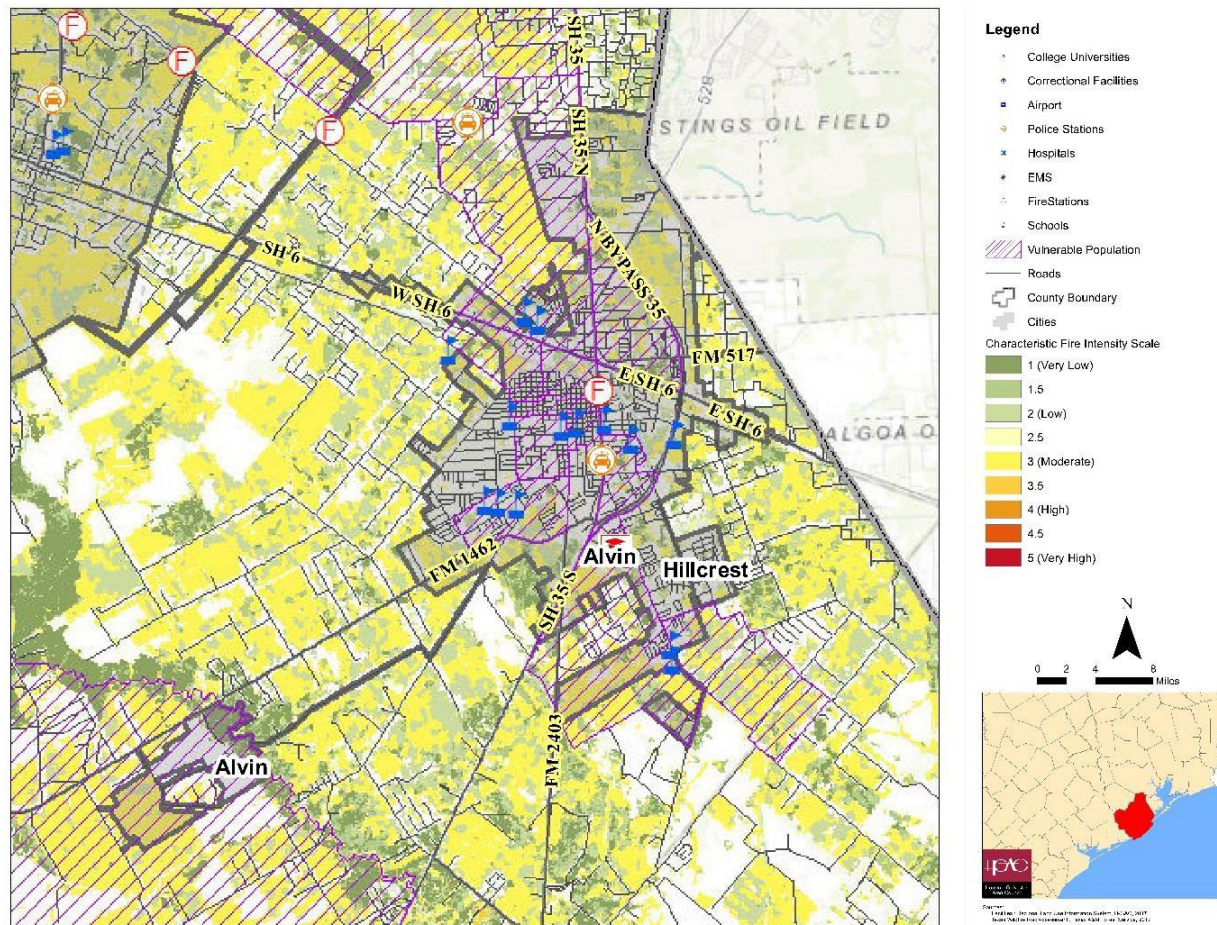

### Identified Vulnerabilities:

- 19,898 residential structures at risk
- Reliance on neighboring jurisdictions' and county healthcare and first responder's systems

### Identified Impacts:

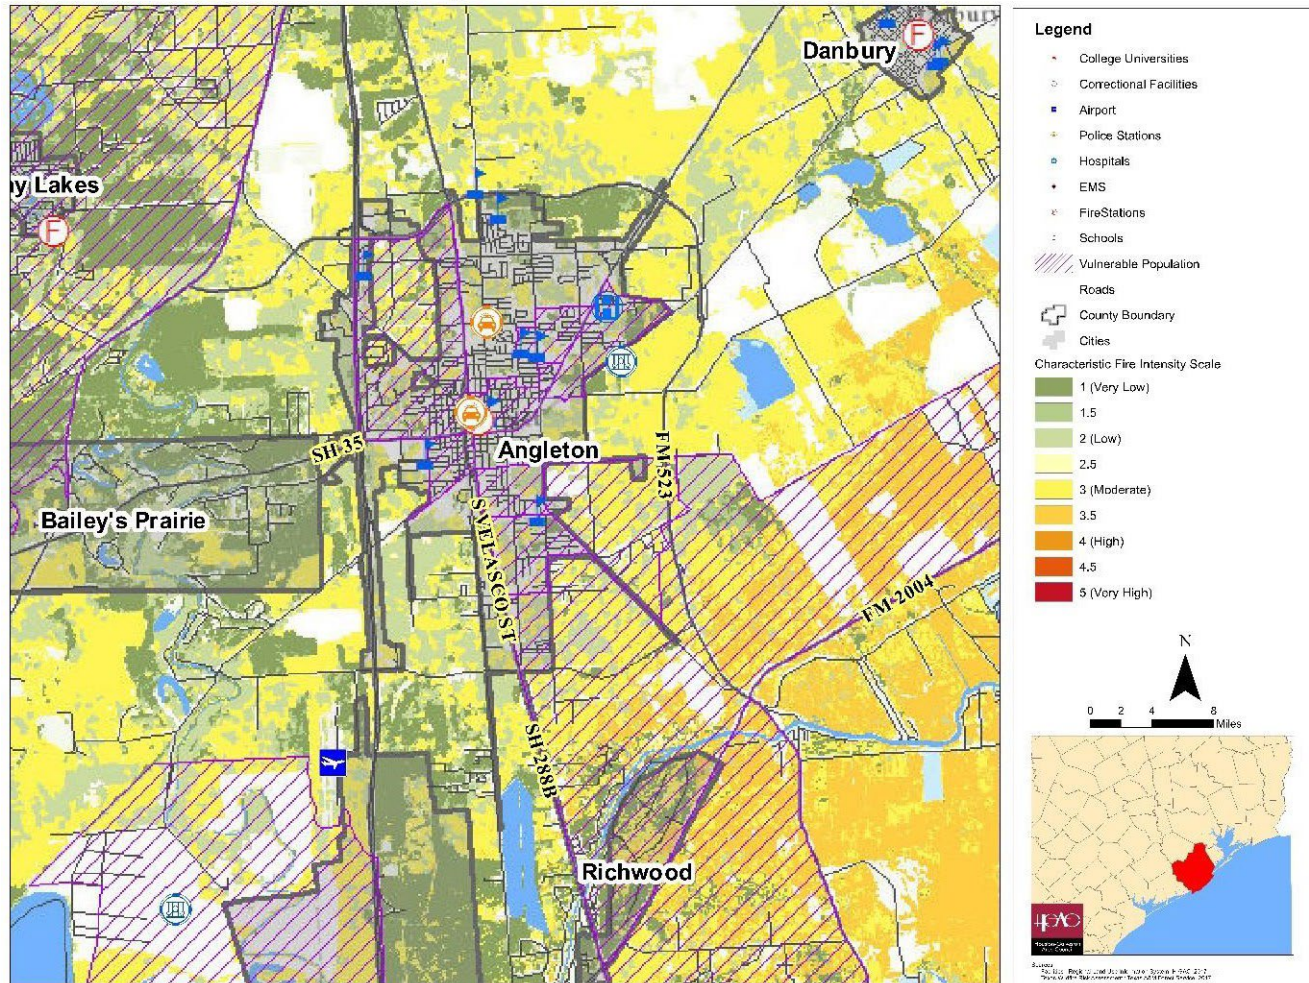

- Residential and commercial property loss throughout the county
- Increased response times which may lead to greater injuries, loss of life, or property loss

# Wildfire Risk Assessment: Alvin

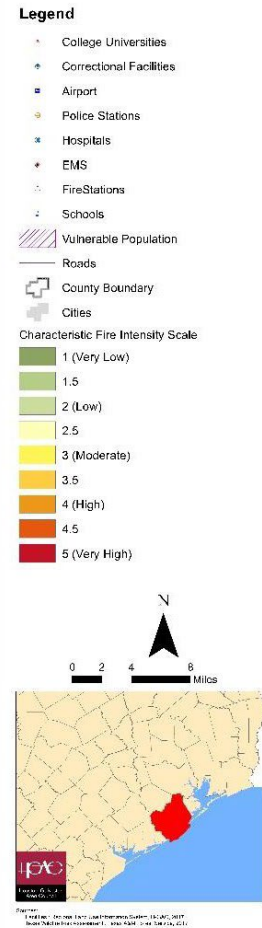

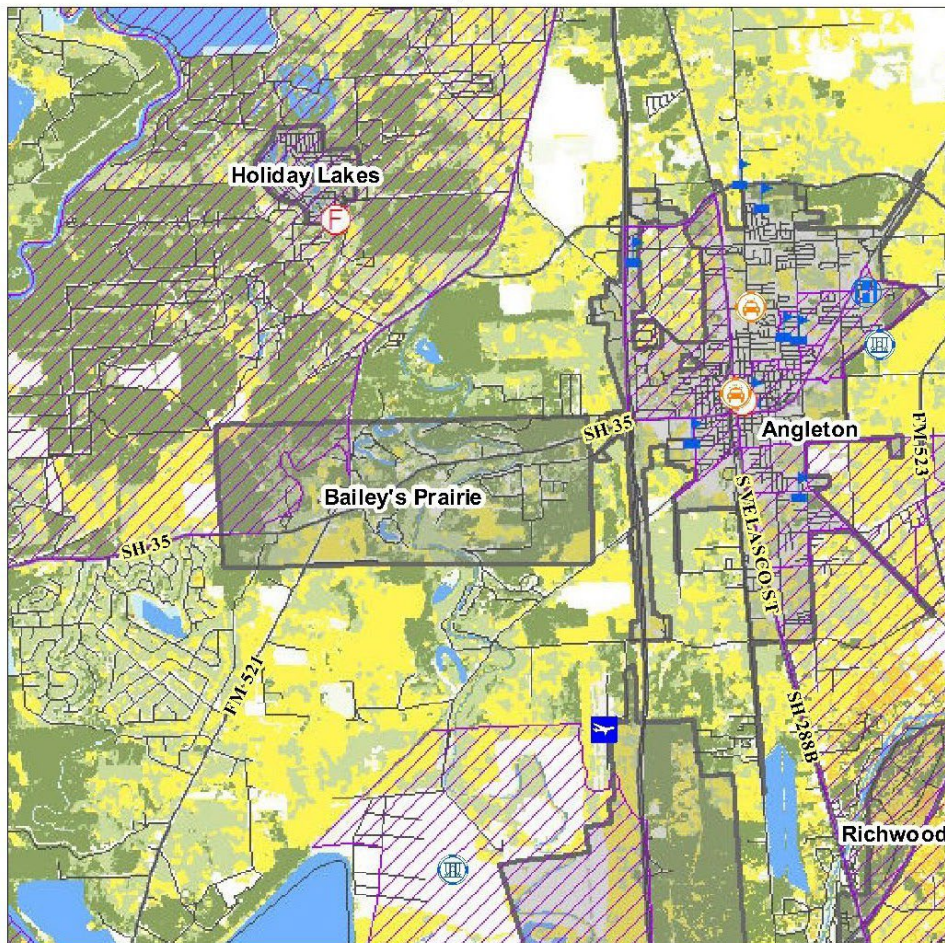

Alvin			
<b>Planning Area (Sq. mi):</b>	25.6	<b>Occurrences since 2005:</b>	9
<b>Area Affected:</b>	4 %	<b>Annual Event Average:</b>	.75 events a year
<b>Probability:</b> Very Likely; 75 percent chance event will occur in a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 5-acre fire. The jurisdiction can expect a 6 to 8-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 1,431 residential structures at risk</li> <li>• 29 percent of population are individuals 18 years and younger (7,370 children)</li> <li>• 13 percent of population are individuals 65 and older (3,264 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 42 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Angleton

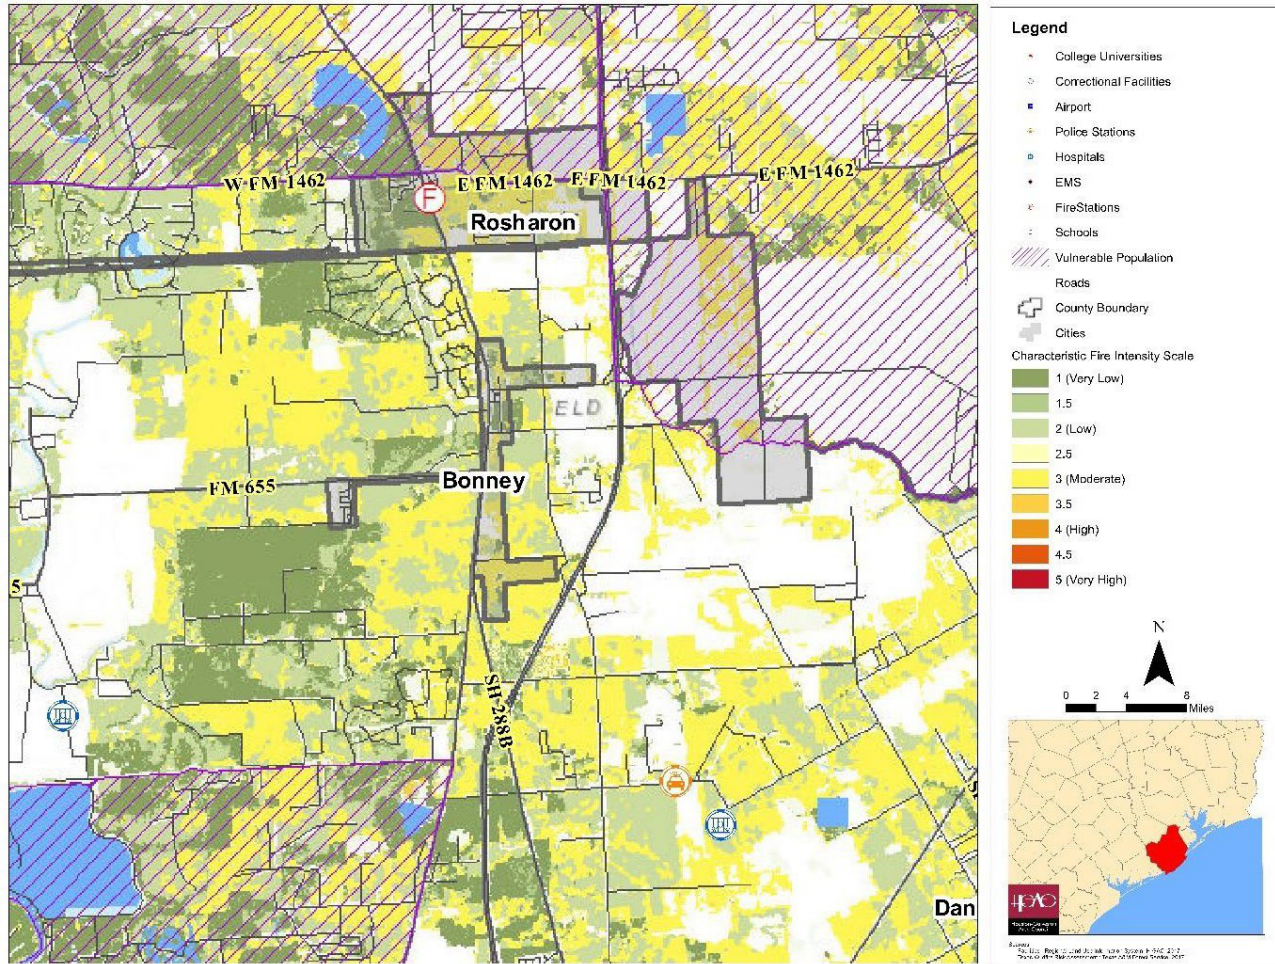

<b>Angleton</b>			
<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 2005:</b>	14
<b>Area Affected:</b>	9 %	<b>Annual Event Average:</b>	1.2 events a year
<b>Probability:</b> Very Likely; 100 percent chance event will occur in a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 6-acre fire. The jurisdiction can expect an 8 to 10-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 803 residential structures at risk</li> <li>• 30 percent of population are individuals 18 years and younger (5,793 children)</li> <li>• 13 percent of population are individuals 65 and older (2,540 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 43 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Bailey's Prairie

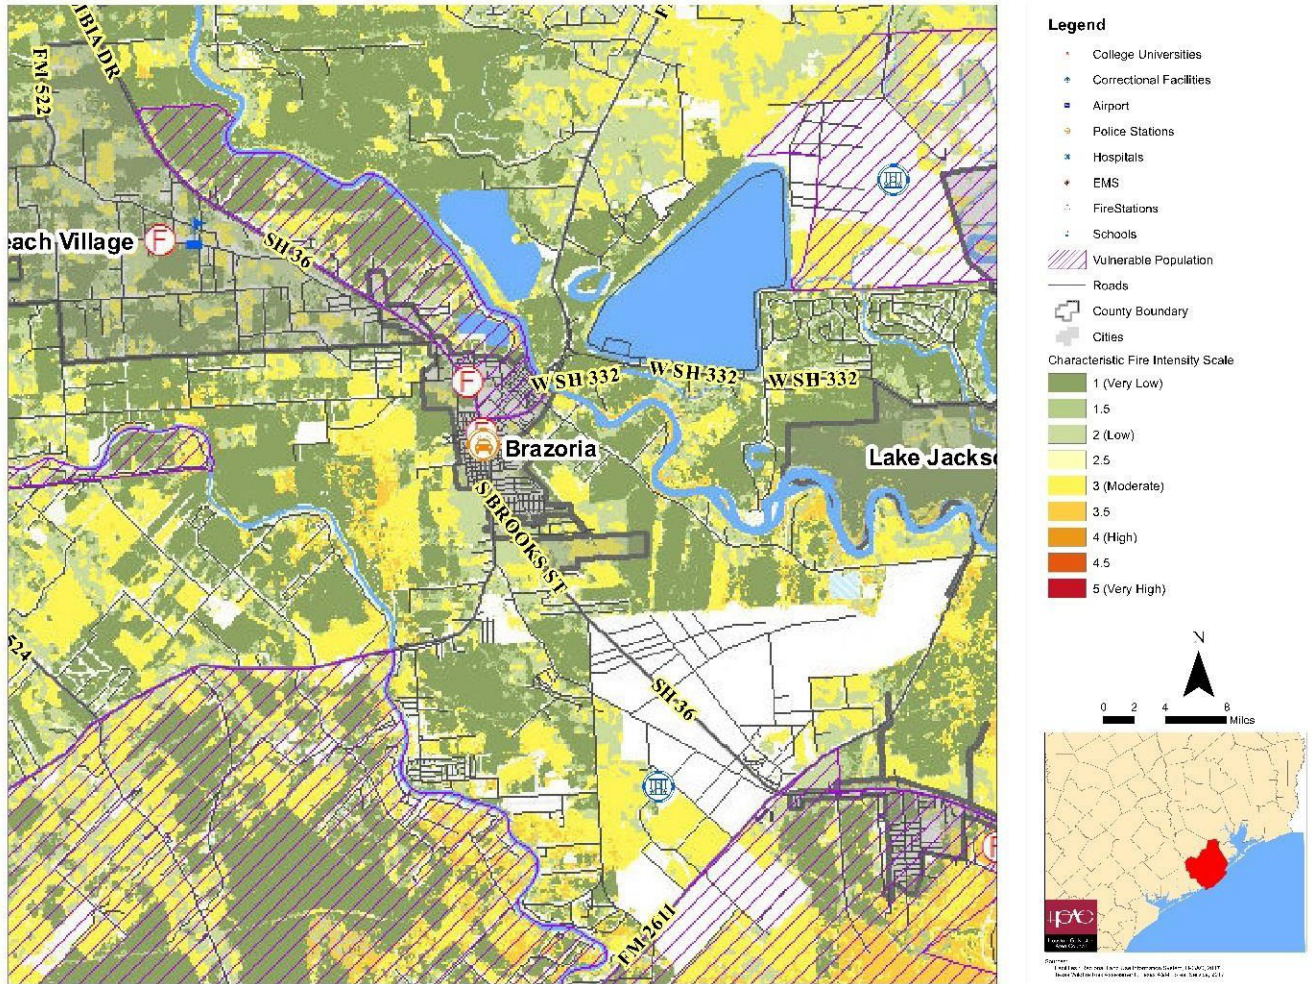

<b>Bailey's Prairie</b>			
<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2005:</b>	1
<b>Area Affected:</b>	22 %	<b>Annual Event Average:</b>	.08 events a year
<b>Probability:</b> Unlikely; 8.3 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 2-acre fire. The jurisdiction can expect a 4 to 6-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 170 residential structures at risk</li> <li>• 26 percent of population are individuals 18 years and younger (215 children)</li> <li>• 14 percent of population are individuals 65 and older (114 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 40 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Bonney

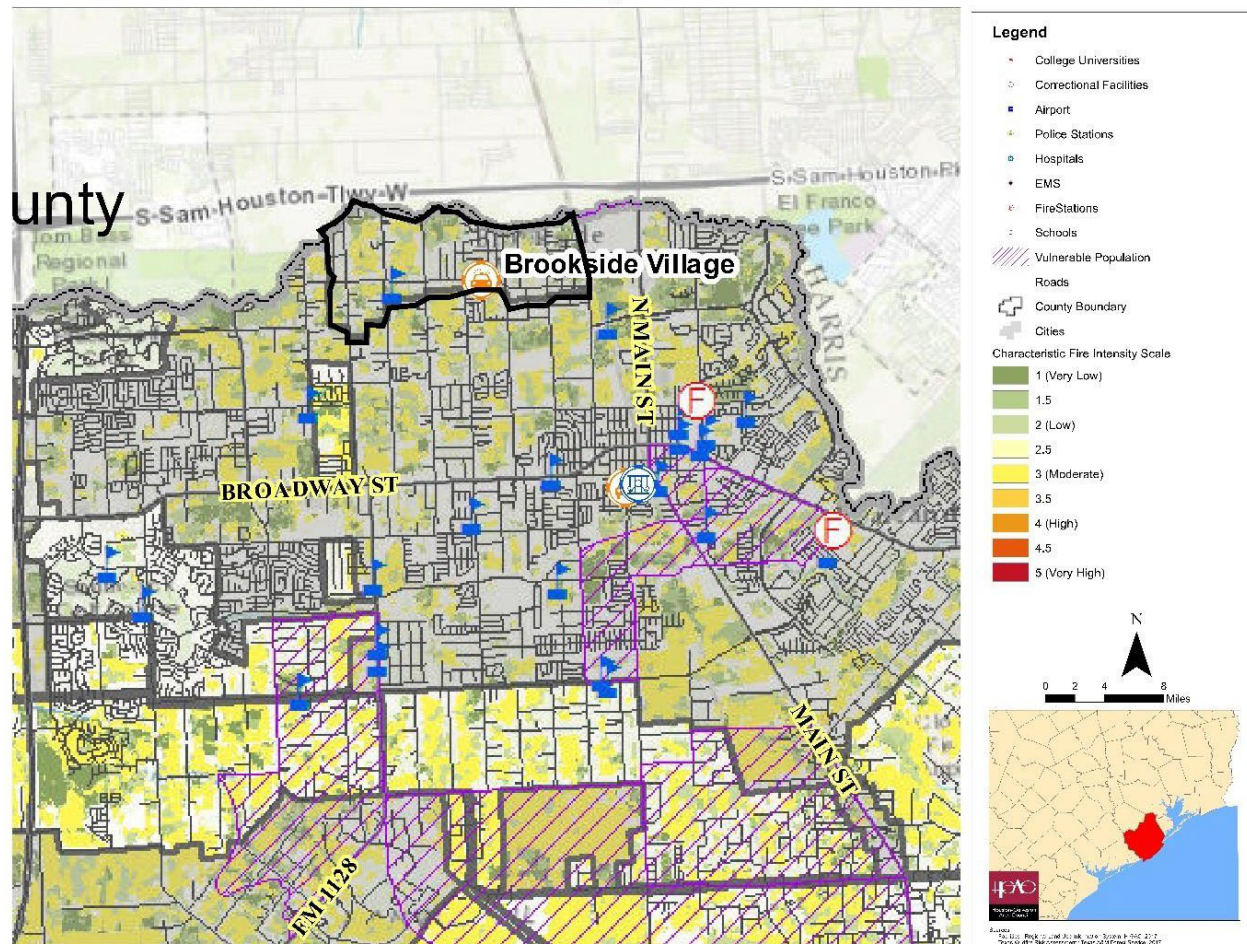

<b>Bonney</b>			
<b>Planning Area (Sq. mi):</b>	1.66	<b>Occurrences since 2005:</b>	5
<b>Area Affected:</b>	18 %	<b>Annual Event Average:</b>	.42
<b>Probability:</b> Likely; 41 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 10-acre fire. The jurisdiction can expect a 12 to 14-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 22 residential structures at risk</li> <li>• 35 percent of population are individuals 18 years and younger (104 children)</li> <li>• 3 percent of population are individuals 65 and older (8 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 42 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Brazoria

<b>Brazoria</b>			
<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2005:</b>	2
<b>Area Affected:</b>	5 %	<b>Annual Event Average:</b>	.17
<b>Probability:</b> Unlikely; 17 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 2-acre fire. The jurisdiction can expect a 4 to 6-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 282 residential structures at risk</li> <li>• 28 percent of population are individuals 18 years and younger (872 children)</li> <li>• 14 percent of population are individuals 65 and older (429 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 42 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Brookside Village

## Brookside Village

<b>Planning Area (Sq. mi):</b>	2.085	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	7 %	<b>Annual Event Average:</b>	0

**Probability:** Although the jurisdiction has no recorded events, the jurisdiction is near Manvel perhaps the jurisdiction has a similar likelihood that the event will occur. Manvel’s probability is: Unlikely; 5.83 percent chance event will occur in each year.

**Extent:** Similarly, Manvel’s extent is: The largest wildfire in the past 12 years has been a 10-acre fire. The jurisdiction can expect a 12 to 14-acre fire.

### Identified Vulnerabilities:

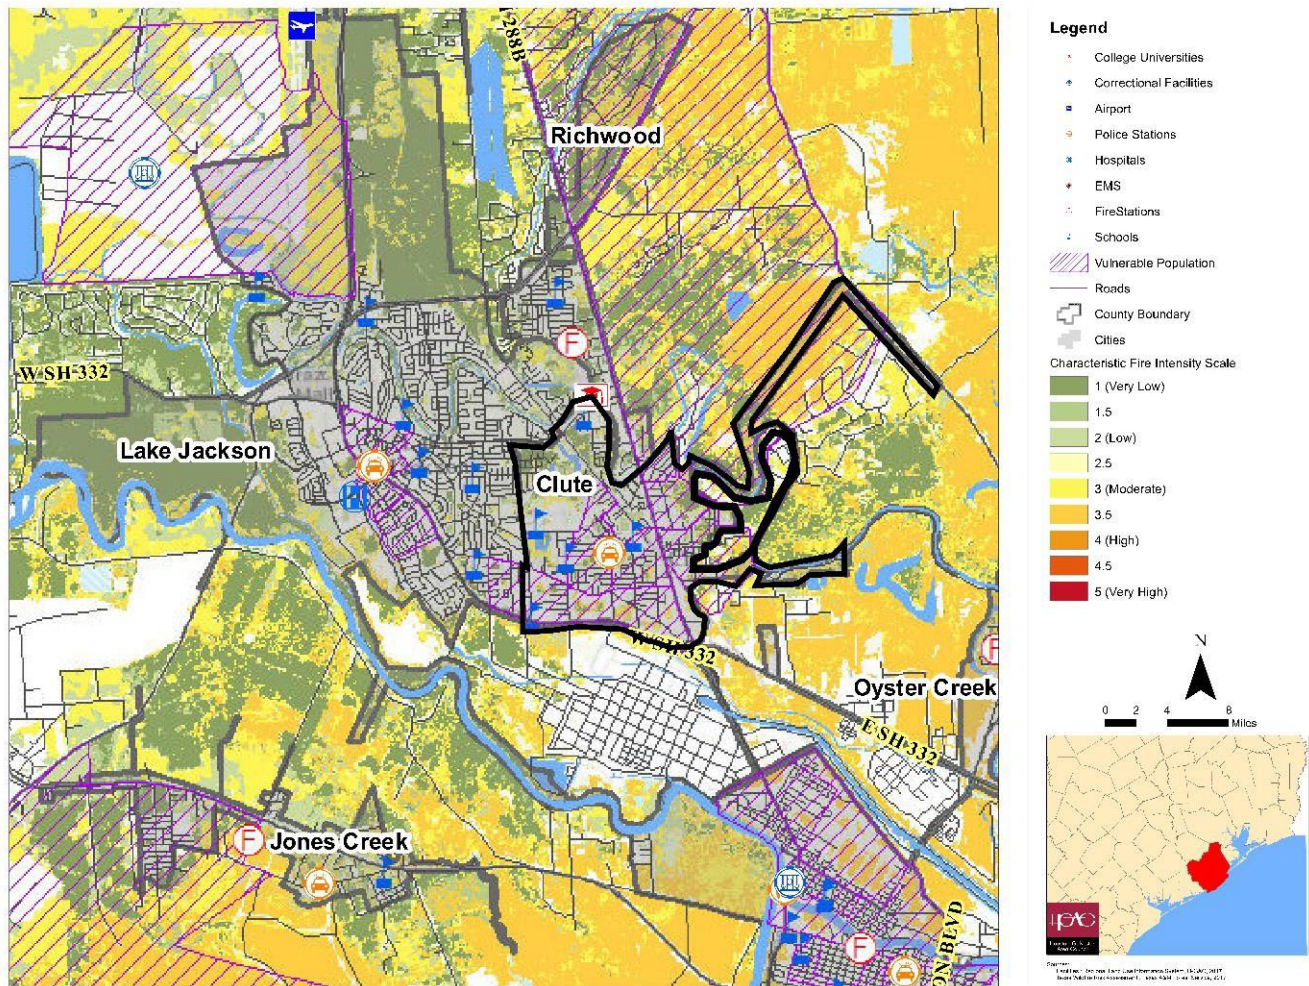

- 122 residential structures at risk
- 25 percent of population are individuals 18 years and younger (419 children)
- 15 percent of population are individuals 65 and older (259 older individuals)

### Identified Impacts:

- 40 percent of the total population may face serious illness or health conditions due to poor air quality
- Residential and commercial property loss throughout the jurisdiction

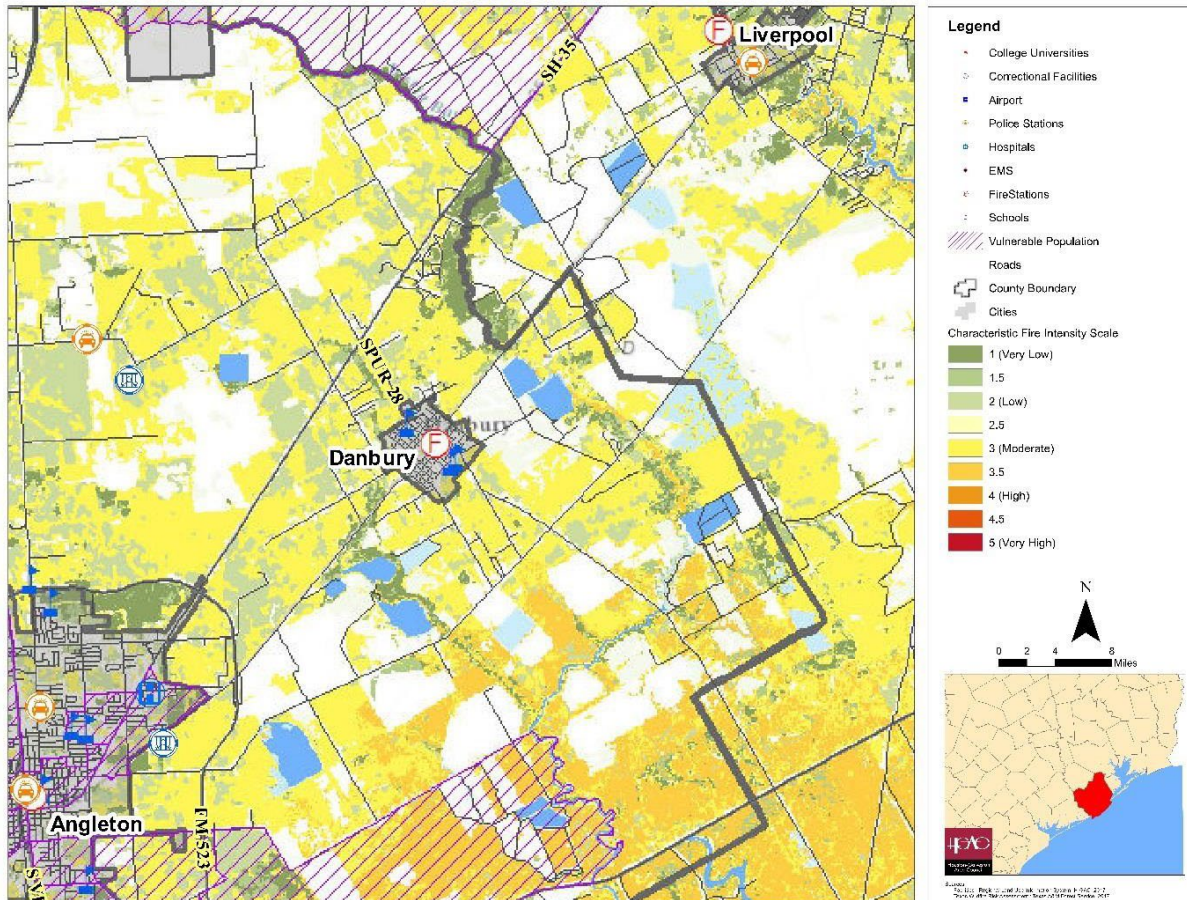

# Wildfire Risk Assessment: Clute

<b>Clute</b>			
<b>Planning Area (Sq. mi):</b>	5.6	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	9%	<b>Annual Event Average:</b>	.25
<b>Probability:</b> Likely; 25 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 1-acre fire. The jurisdiction can expect a 2 to 4-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 775 residential structures at risk</li> <li>• 35 percent of population are individuals 18 years and younger (104 children)</li> <li>• 3 percent of population are individuals 65 and older (8 older individuals)</li> </ul>			
<b>Identified Impacts</b>			
<ul style="list-style-type: none"> <li>• 38 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Danbury

## Danbury and Danbury ISD

<b>Planning Area (Sq. mi):</b>	1.0	<b>Occurrences since 2005:</b>	0
<b>Area Affected:</b>	40%	<b>Annual Event Average:</b>	0

**Probability:** Although the jurisdiction has no recorded events, the jurisdiction is near Angleton. Perhaps Danbury has a similar likelihood that the event will occur. Angleton’s probability is: Highly Likely; 100 percent chance event will occur in each year.

**Extent:** Similarly, Angleton’s extent is: The largest wildfire in the past 12 years has been a 6-acre fire. The jurisdiction can expect an 8 to 10-acre fire.

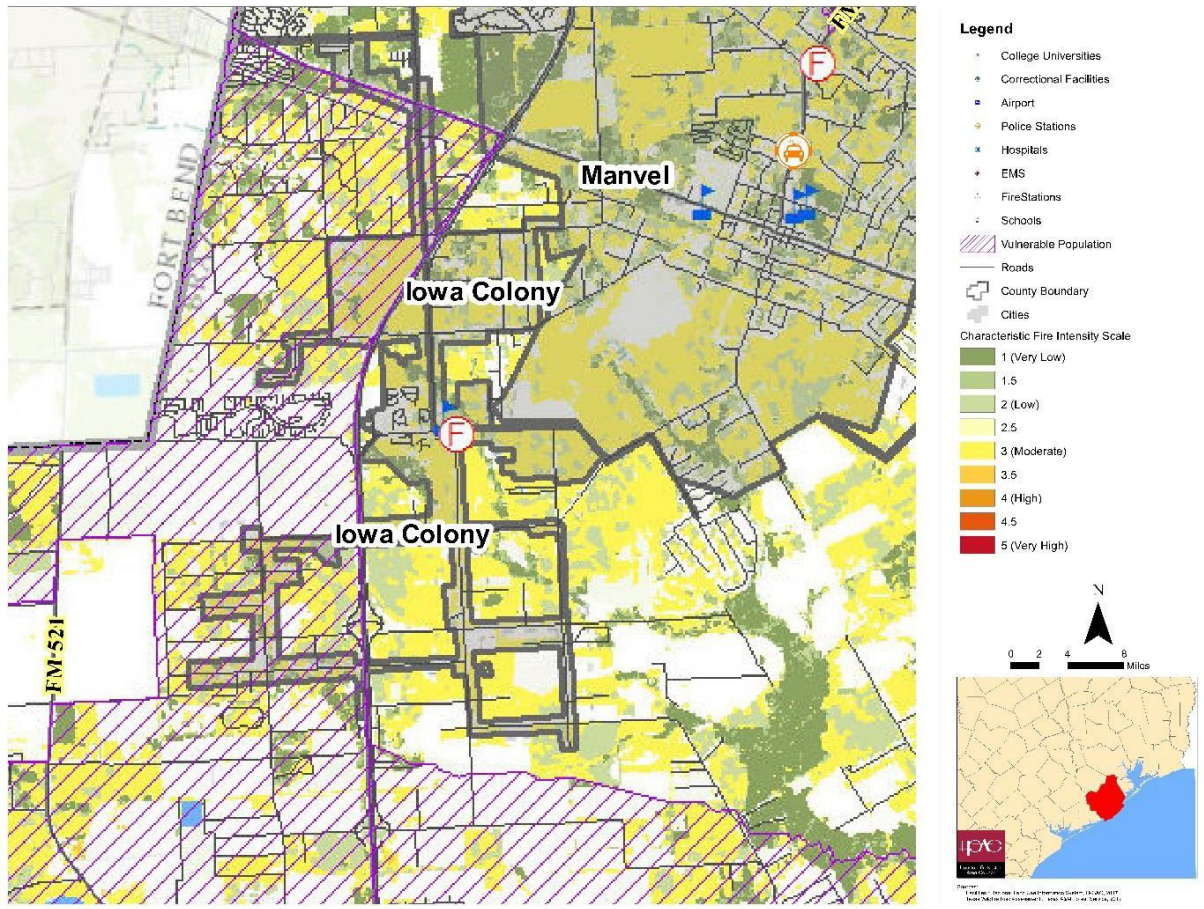

### Identified Vulnerabilities:

- 92 residential structures at risk
- 28 percent of population are individuals 18 years and younger (414 children)
- 8 percent of population are individuals 65 and older (120 older individuals)

### Identified Impacts:

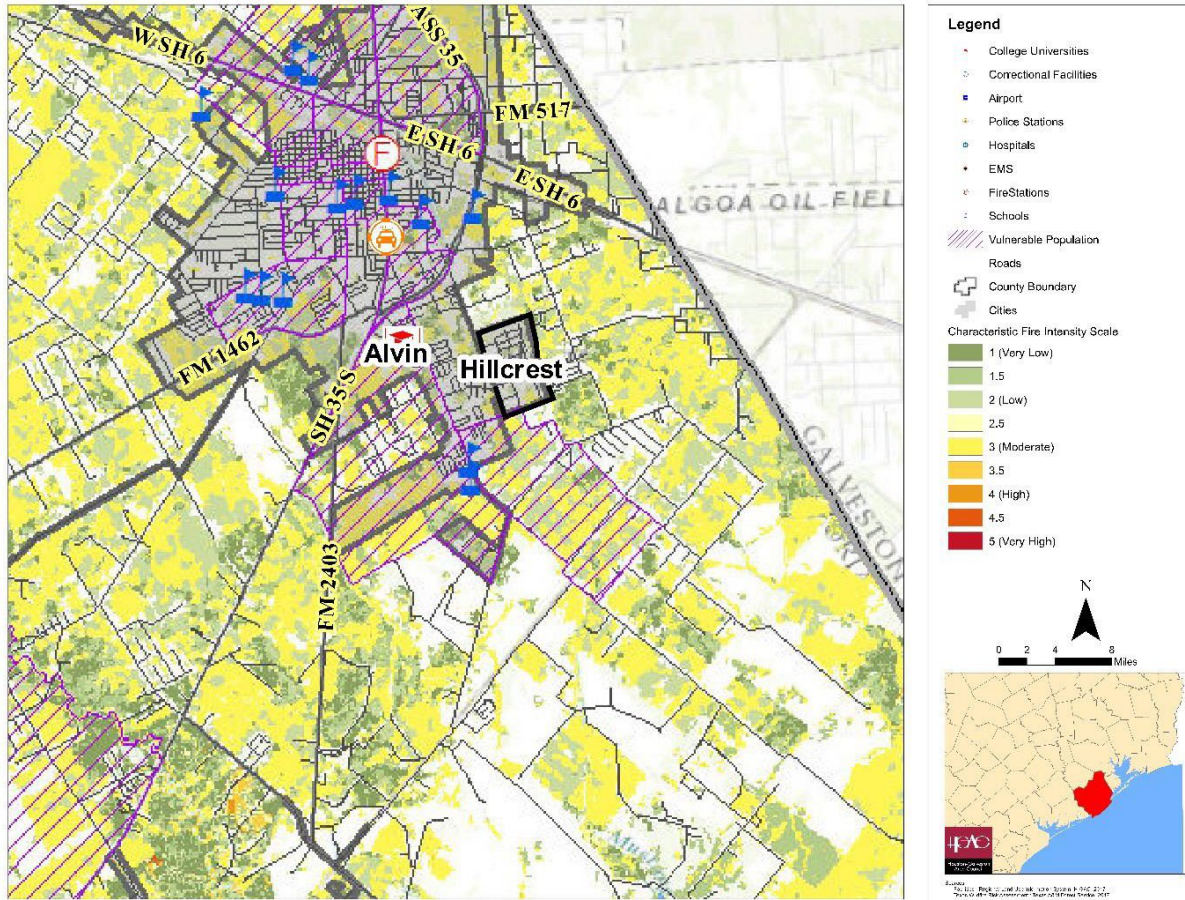

- 36 percent of the total population may face serious illness or health conditions due to poor air quality
- Residential and commercial property loss throughout the jurisdiction

# Wildfire Risk Assessment: Iowa Colony

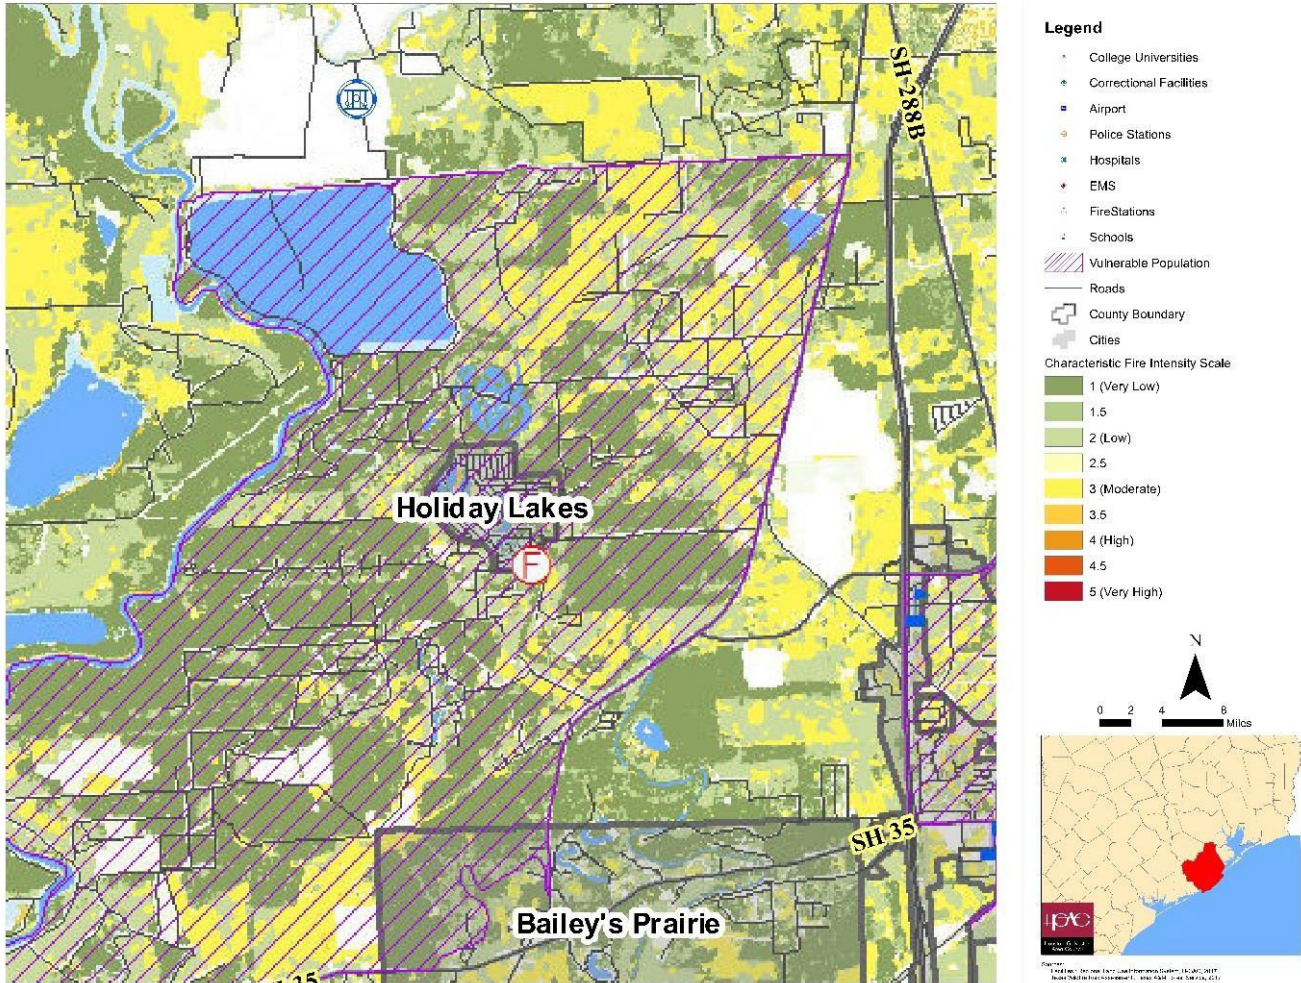

<b>Iowa Colony</b>			
<b>Planning Area (Sq. mi):</b>	7.33	<b>Occurrences since 2005:</b>	5
<b>Area Affected:</b>	64 %	<b>Annual Event Average:</b>	.42
<b>Probability:</b> Likely; 42 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 2-acre fire. The jurisdiction can expect a 4 to 6-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 88 residential structures at risk</li> <li>• 21 percent of population are individuals 18 years and younger (104 children)</li> <li>• 14 percent of population are individuals 65 and older (185 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 42 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Hillcrest Village

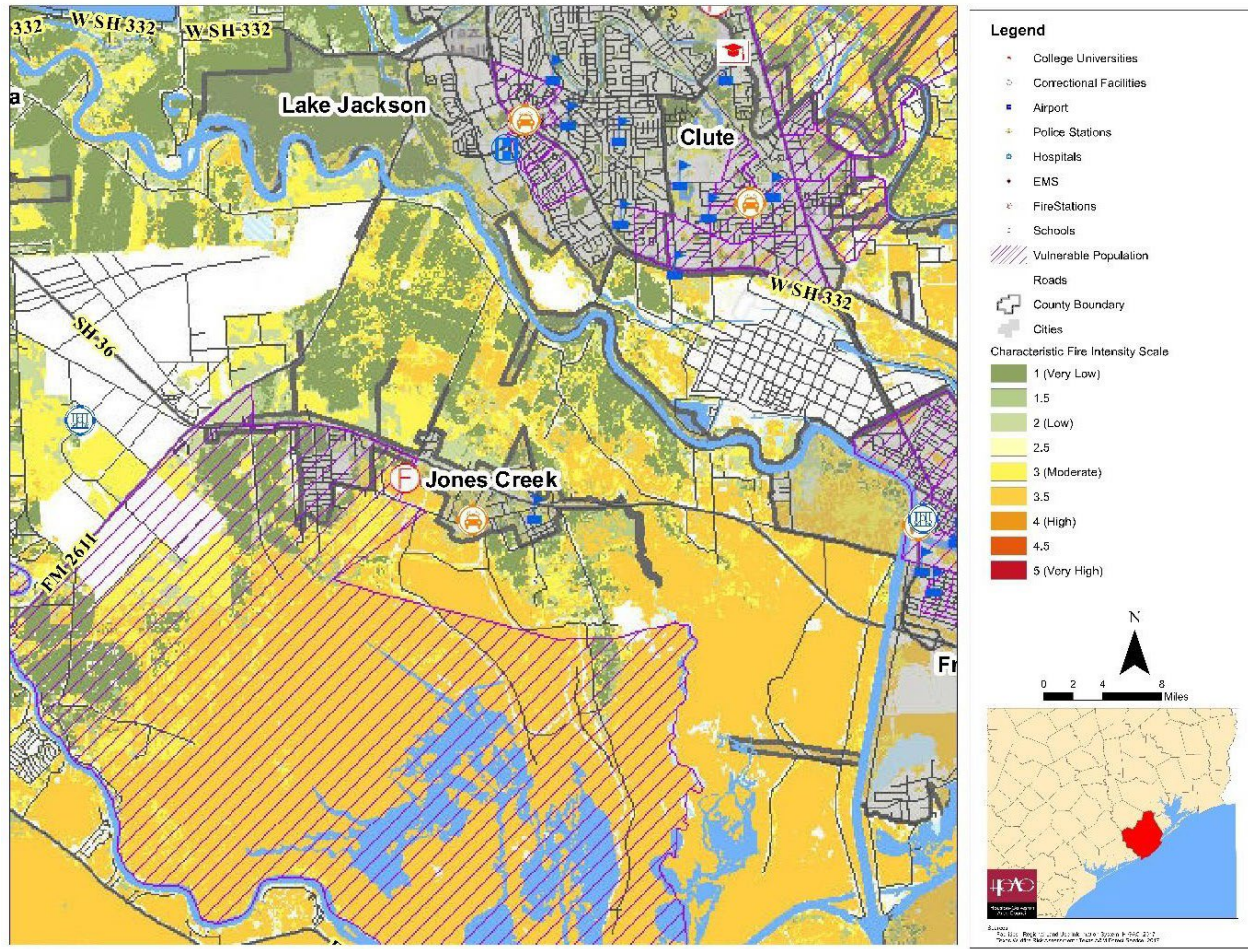

<b>Hillcrest Village</b>			
<b>Planning Area (Sq. mi):</b>	0.4	<b>Occurrences since 2005:</b>	0
<b>Area Affected:</b>	8 %	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is near Alvin. Perhaps Hillcrest Village has a similar likelihood that the event will occur. Alvin’s probability is: Likely; 75 percent chance event will occur within a year.			
<b>Extent:</b> Similarly, Alvin’s extent is: The largest wildfire in the past 12 years has been a 5-acre fire. The jurisdiction can expect a 6 to 8-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 53 residential structures at risk</li> <li>• 16 percent of population are individuals 18 years and younger (129 children)</li> <li>• 39 percent of population are individuals 65 and older (325 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 42 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Holiday Lakes

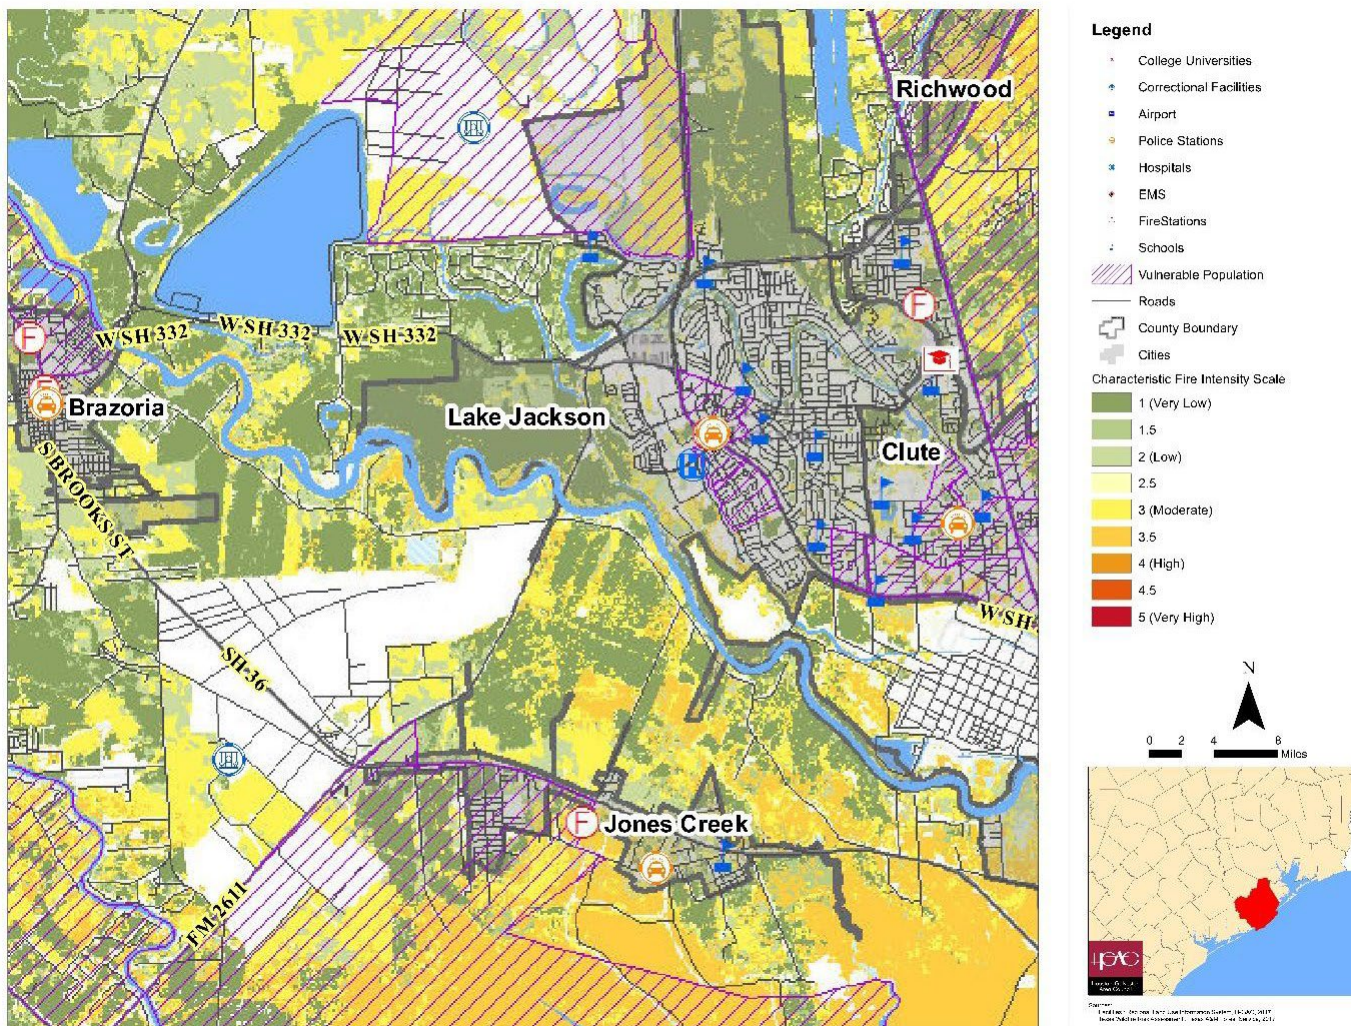

<b>Holiday Lakes</b>			
<b>Planning Area (Sq. mi):</b>	1	<b>Occurrences since 2005:</b>	1
<b>Area Affected:</b>	3 %	<b>Annual Event Average:</b>	.08
<b>Probability:</b> Unlikely; 8.3 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 1-acre fire. The jurisdiction can expect a 2 to 4-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 84 residential structures at risk</li> <li>• 39 percent of population are individuals 18 years and younger (401 children)</li> <li>• 7 percent of population are individuals 65 and older (71 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 46 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Jones Creek

<b>Jones Creek</b>			
<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2005:</b>	1
<b>Area Affected:</b>	10 %	<b>Annual Event Average:</b>	.08
<b>Probability:</b> Unlikely; 8.3 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 100-acre fire. The jurisdiction can expect a 120 to 140-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 130 residential structures at risk</li> <li>• 28 percent of population are individuals 18 years and younger (604 children)</li> <li>• 14 percent of population are individuals 65 and older (307 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 42 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Lake Jackson

## Lake Jackson

<b>Planning Area (Sq. mi):</b>	20.9	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	6%	<b>Annual Event Average:</b>	0

**Probability:** Although the jurisdiction has no recorded events, the jurisdiction is near Jones Creek. Perhaps Lake Jackson has a similar likelihood that the event will occur. Jones Creek’s probability is: Unlikely; 8.3 percent chance to occur within a year

**Extent:** Similarly, Jones Creek’s extent is: The largest wildfire in the past 12 years has been a 100-acre fire. The jurisdiction can expect a 120 to 140-acre fire.

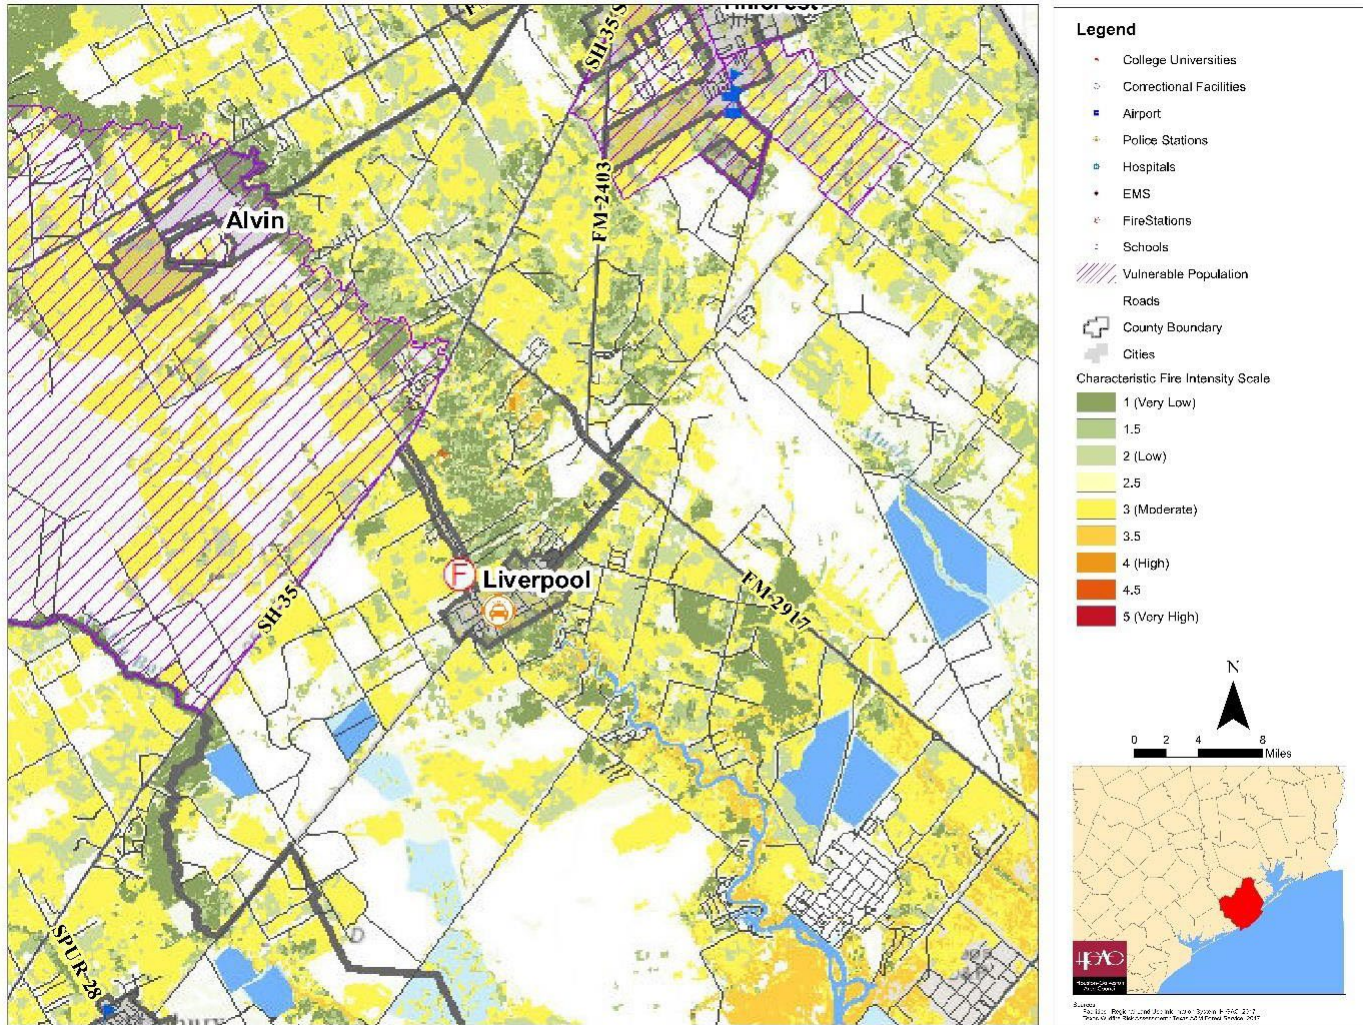

### Identified Vulnerabilities:

- 11,729 residential structures
- 35 percent of population are individuals 18 years and younger (7,372 children)
- 14 percent of population are individuals 65 and older (3,700 older individuals)

### Identified Impacts:

- 49 percent of the total population may face serious illness or health conditions due to poor air quality
- Residential and commercial property loss throughout the jurisdiction

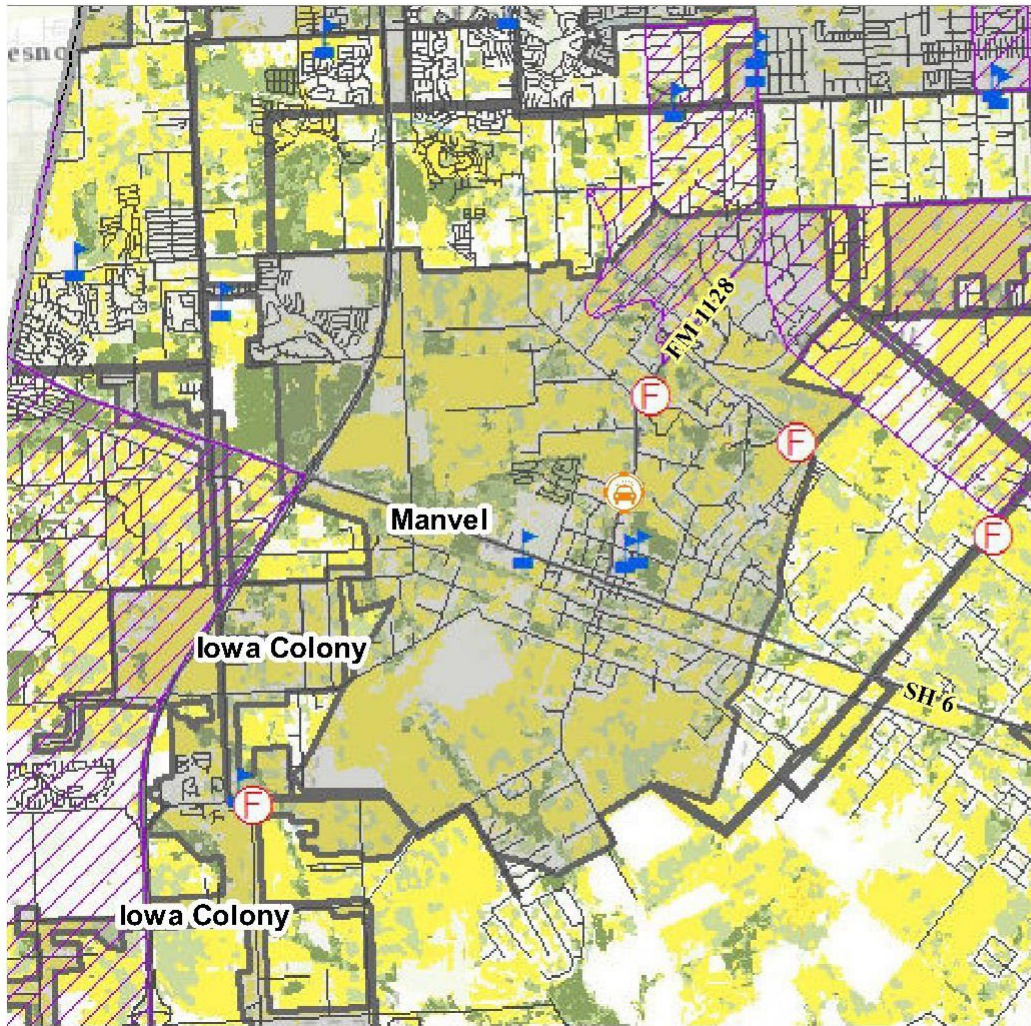

# Wildfire Risk Assessment: Liverpool

<b>Liverpool</b>			
<b>Planning Area (Sq. mi):</b>	1.1	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	19 %	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is near Alvin. Perhaps Liverpool has a similar likelihood that the event will occur. Alvin’s probability is: Likely; 75 percent chance event will occur in a given year.			
<b>Extent:</b> Similarly, Alvin’s extent is: The largest wildfire in the past 12 years has been a 5-acre fire. The jurisdiction can expect a 6 to 8-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 37 residential structures at risk</li> <li>• 28 percent of population are individuals 18 years and younger (121 children)</li> <li>• 14 percent of population are individuals 65 and older (61 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 42 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

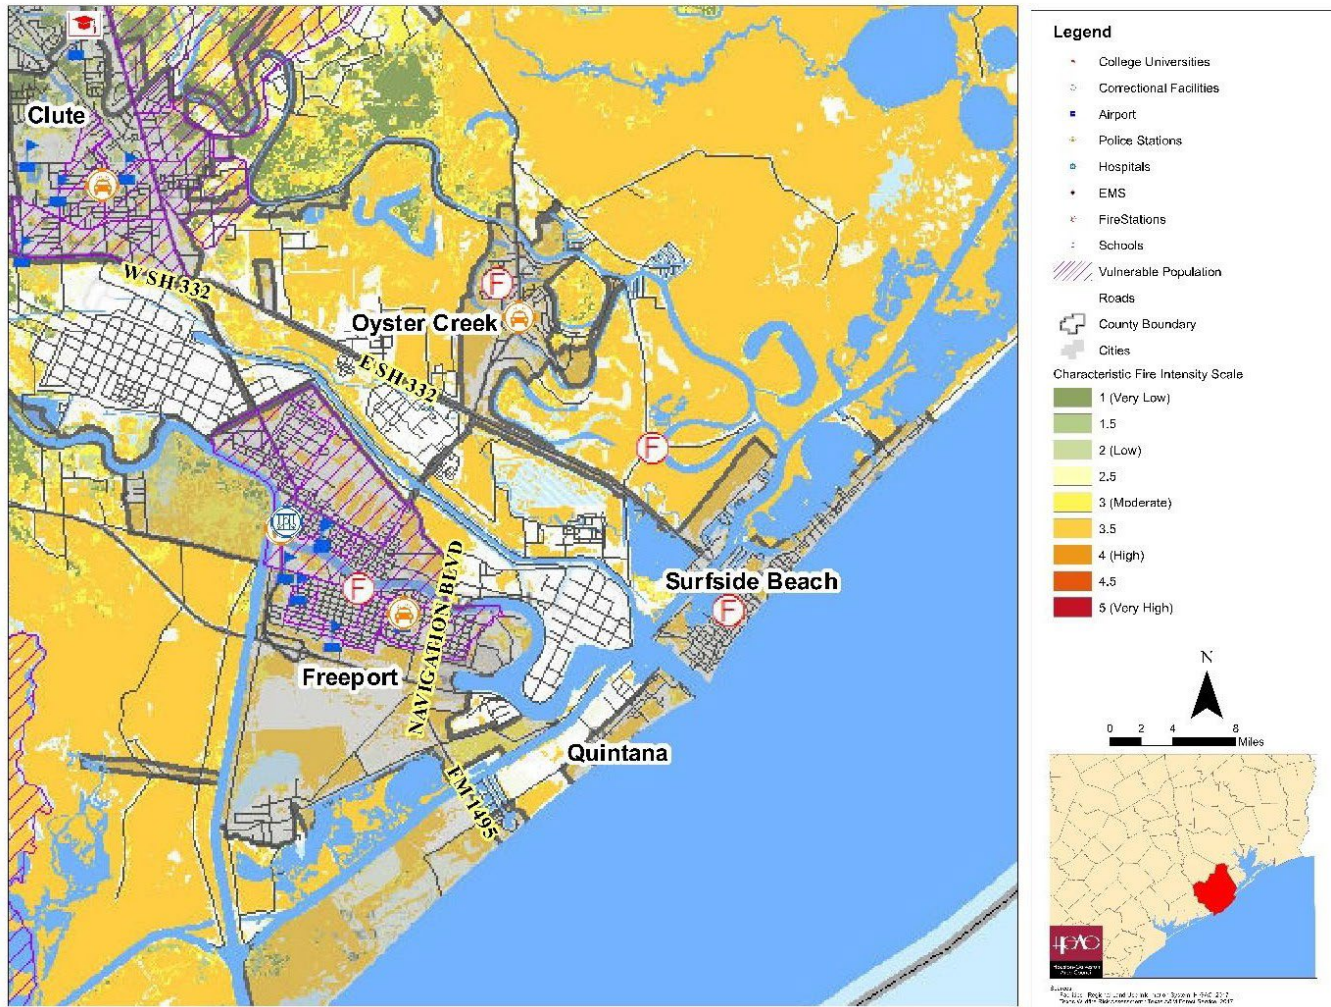

# Wildfire Risk Assessment: Manvel

<b>Manvel</b>			
<b>Planning Area (Sq. mi):</b>	23.6	<b>Occurrences since 2005:</b>	70
<b>Area Affected:</b>	41 %	<b>Annual Event Average:</b>	5.83
<b>Probability:</b> Unlikely; 5.83 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 10-acre fire. The jurisdiction can expect a 12 to 14-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 443 residential structures at risk</li> <li>• 31 percent of population are individuals 18 years and younger (2,265 children)</li> <li>• 10 percent of population are individuals 65 and older (740 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 41 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Oyster Creek

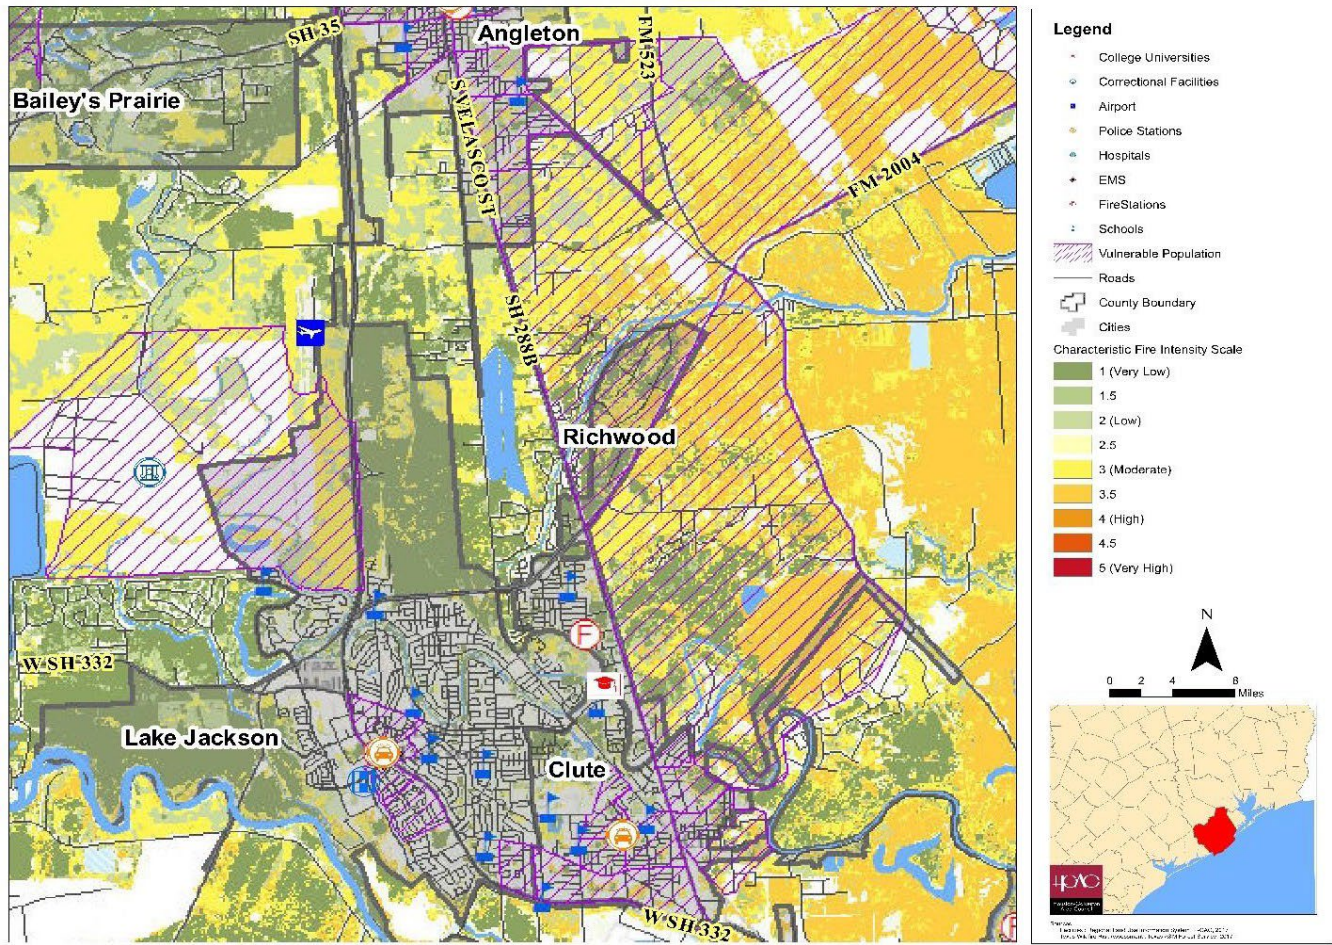

<b>Oyster Creek</b>			
<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2005:</b>	0
<b>Area Affected:</b>	78%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is near Freeport. Oyster Creek has a similar likelihood that the event will occur. Freeport’s probability is: Highly Likely; 100 percent chance to occur within a year			
<b>Extent:</b> Similarly, Freeport’s extent is: The largest wildfire in the past 12 years has been a 10-acre fire. The jurisdiction can expect a 12 to 14-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 78 residential structures at risk</li> <li>• 35 percent of population are individuals 18 years and younger (439 children)</li> <li>• 14 percent of population are individuals 65 and older (307 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 49 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Quintana

<b>Quintana</b>			
<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	74%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is near Surfside Beach. Perhaps Quintana has a similar likelihood that the event will occur. Surfside Beach’s probability is: Unlikely; 8.3 percent chance to occur within a year.			
<b>Extent:</b> Similarly, Surfside Beach’s extent is: The largest wildfire in the past 12 years has been a 1-acre fire. The jurisdiction can expect a 2 to 4-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 5 residential structures at risk</li> <li>• 16 percent of population are individuals 18 years and younger (6 children)</li> <li>• 3 percent of population are individuals 65 and older (1 older individual)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 19 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Richwood

## Richwood

<b>Planning Area (Sq. mi):</b>	3.1	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	59 %	<b>Annual Event Average:</b>	0

**Probability:** Although the jurisdiction has no recorded events, the jurisdiction is near Clute. Perhaps Richwood has a similar likelihood that the event will occur. Clute’s probability is: Unlikely; 8.3 percent chance to occur within a year.

**Extent:** Similarly, Clute’s extent is: The largest wildfire in the past 12 years has been a 1-acre fire. The jurisdiction can expect a 2 to 4-acre fire.

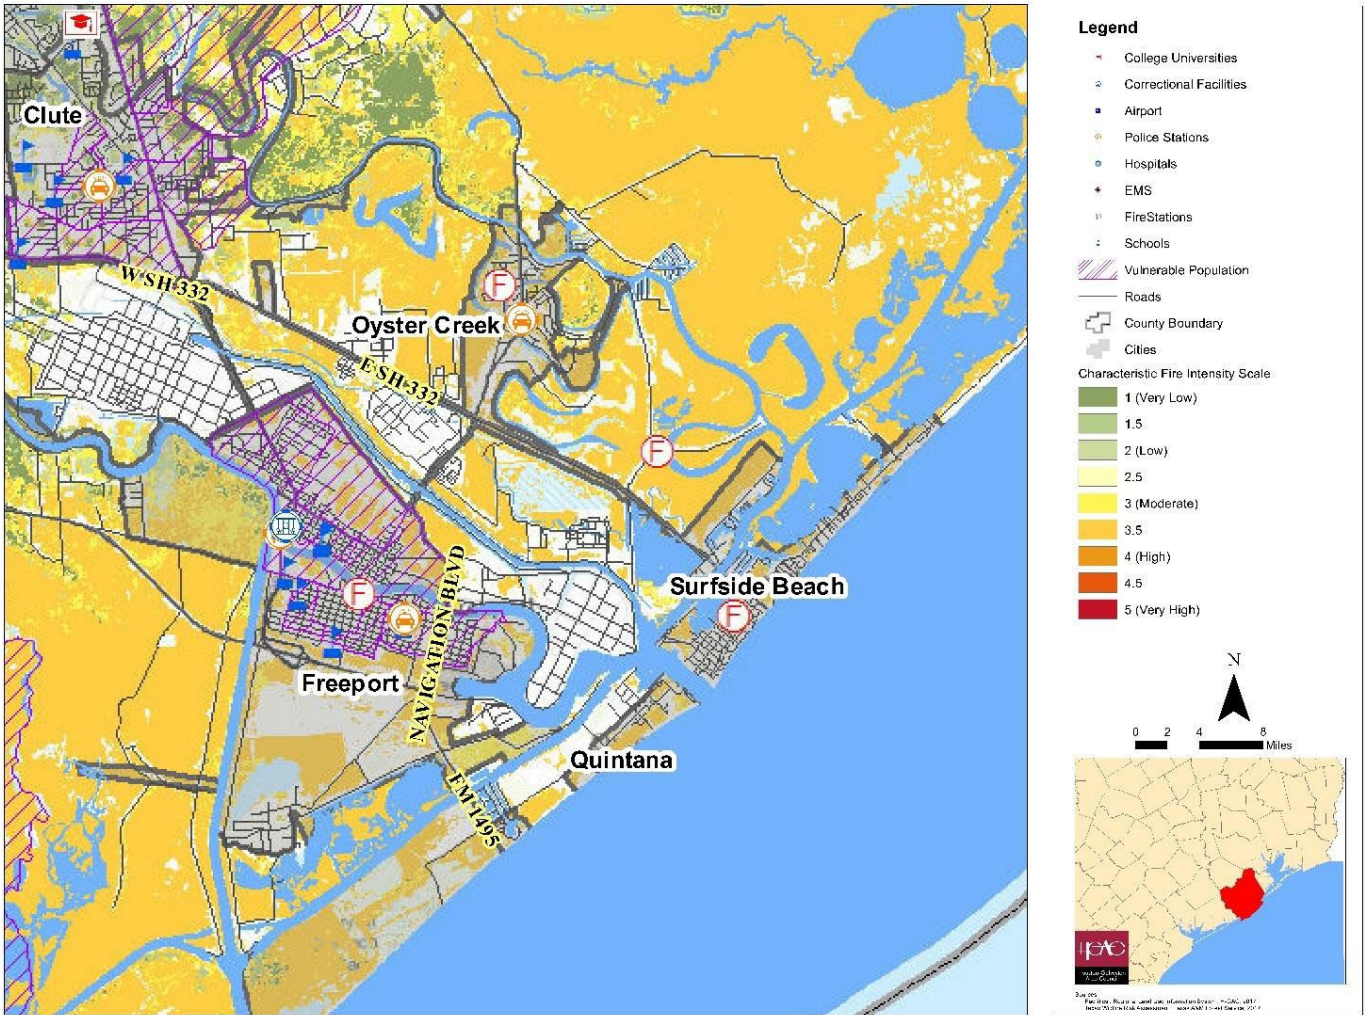

### Identified Vulnerabilities:

- 246 residential structures at risk
- 26 percent of population are individuals 18 years and younger (987 children)
- 19 percent of population are individuals 65 and older (101older individuals)

### Identified Impacts:

- 45 percent of the total population may face serious illness or health conditions due to poor air quality
- Residential and commercial property loss throughout the jurisdiction

# Wildfire Risk Assessment: Surfside Beach

<b>Surfside Beach</b>			
<b>Planning Area (Sq. mi):</b>	2.2	<b>Occurrences since 2005:</b>	10
<b>Area Affected:</b>	60 %	<b>Annual Event Average:</b>	.83
<b>Probability:</b> Unlikely; 8.3 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 1-acre fire. The jurisdiction can expect a 2 to 4-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 205 residential structures at risk</li> <li>• 16 percent of population are individuals 18 years and younger (84 children)</li> <li>• 19 percent of population are individuals 65 and older (101)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 35 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Wildfire Risk Assessment: Sweeny

## Sweeny and Sweeny ISD

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	3 %	<b>Annual Event Average:</b>	0

**Probability:** Although the jurisdiction has no recorded events, the jurisdiction is near Brazoria. Sweeny has a similar likelihood that the event will occur. Brazoria’s probability is: Unlikely; 17 percent chance to occur within a year.

**Extent:** Similarly, Brazoria’s extent is: The largest wildfire in the past 12 years has been a 2-acre fire. The jurisdiction can expect a 4 to 6-acre fire.

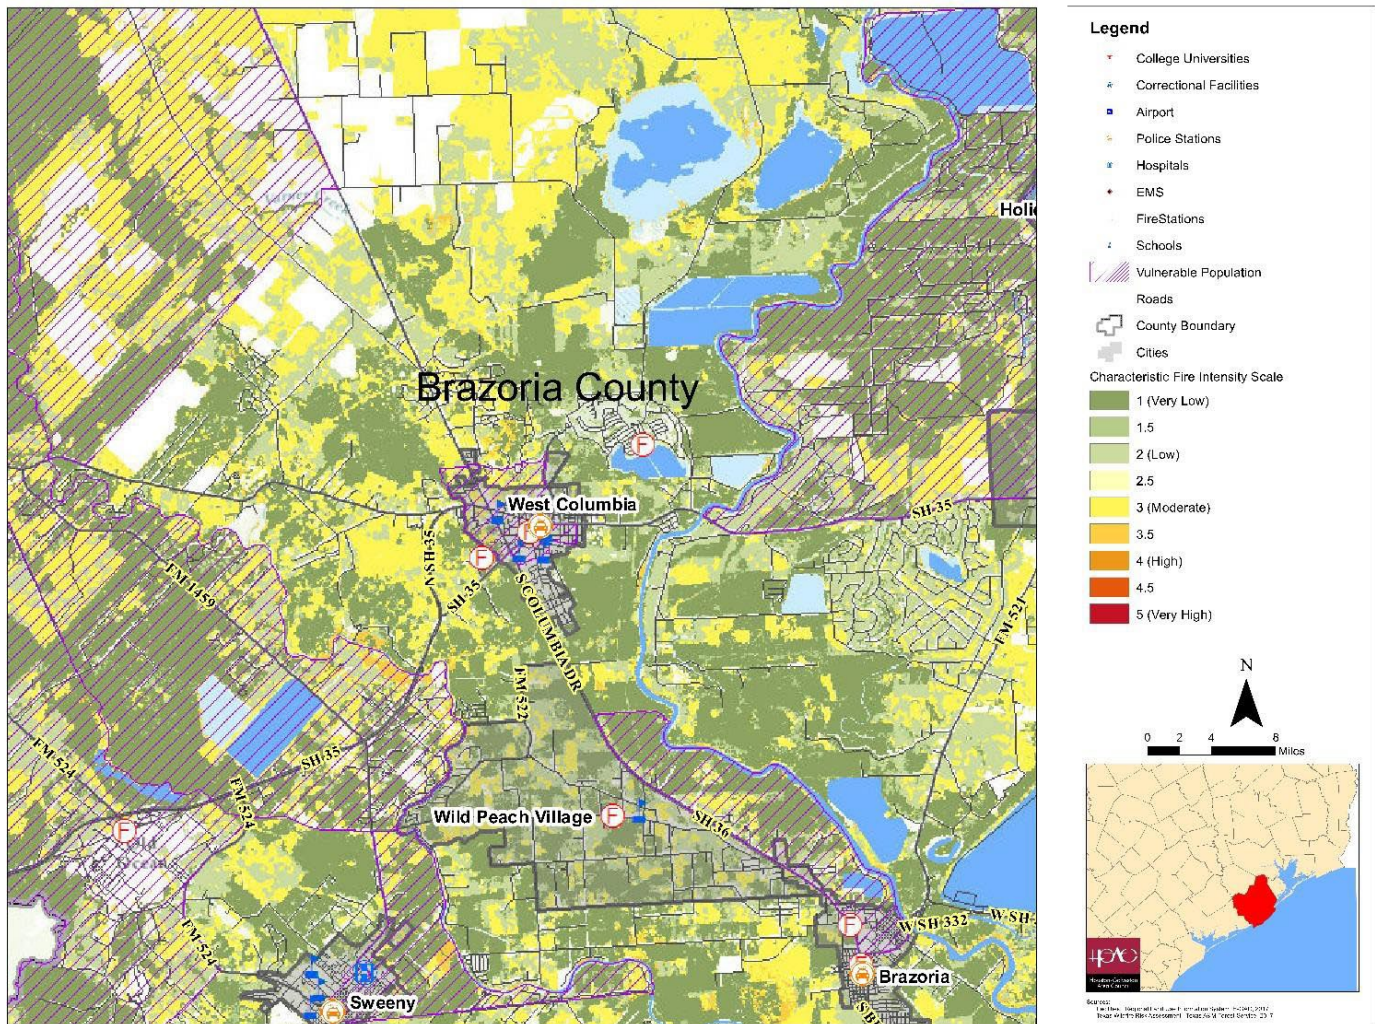

### Identified Vulnerabilities:

- 251 structures at risk
- 28 percent of population are individuals 18 years and younger (1,058 children)
- 18 percent of population are individuals 65 and older (686 older individuals)

### Identified Impacts:

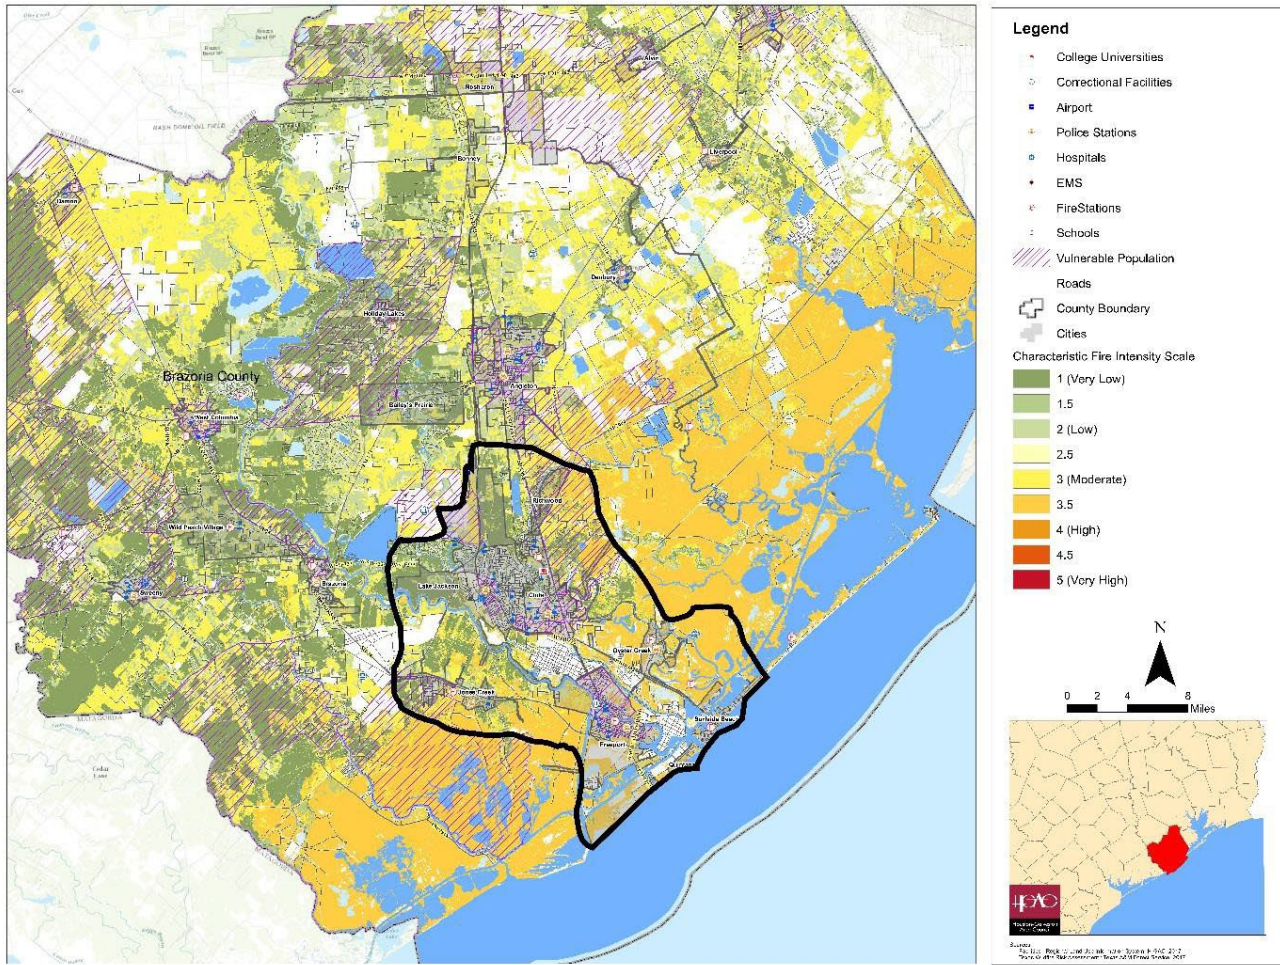

- 46 percent of the total population may face serious illness or health conditions due to poor air quality
- Residential and commercial property loss throughout the jurisdiction

# Wildfire Risk Assessment: West Columbia

<b>West Columbia</b>			
<b>Planning Area (Sq. mi):</b>	2.58	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	8 %	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is near Brazoria. West Columbia has a similar likelihood that the event will occur. Brazoria's probability is: Unlikely; 8.3 percent chance to occur within a year.			
<b>Extent:</b> Similarly, Brazoria's extent is: The largest wildfire in the past 12 years has been a 2-acre fire. The jurisdiction can expect a 4 to 6-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 246 residential structures at risk</li> <li>• 29 percent of population are individuals 18 years and younger (1,120 children)</li> <li>• 12 percent of population are individuals 65 and older (482 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 41 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>• Residential and commercial property loss throughout the jurisdiction</li> </ul>			

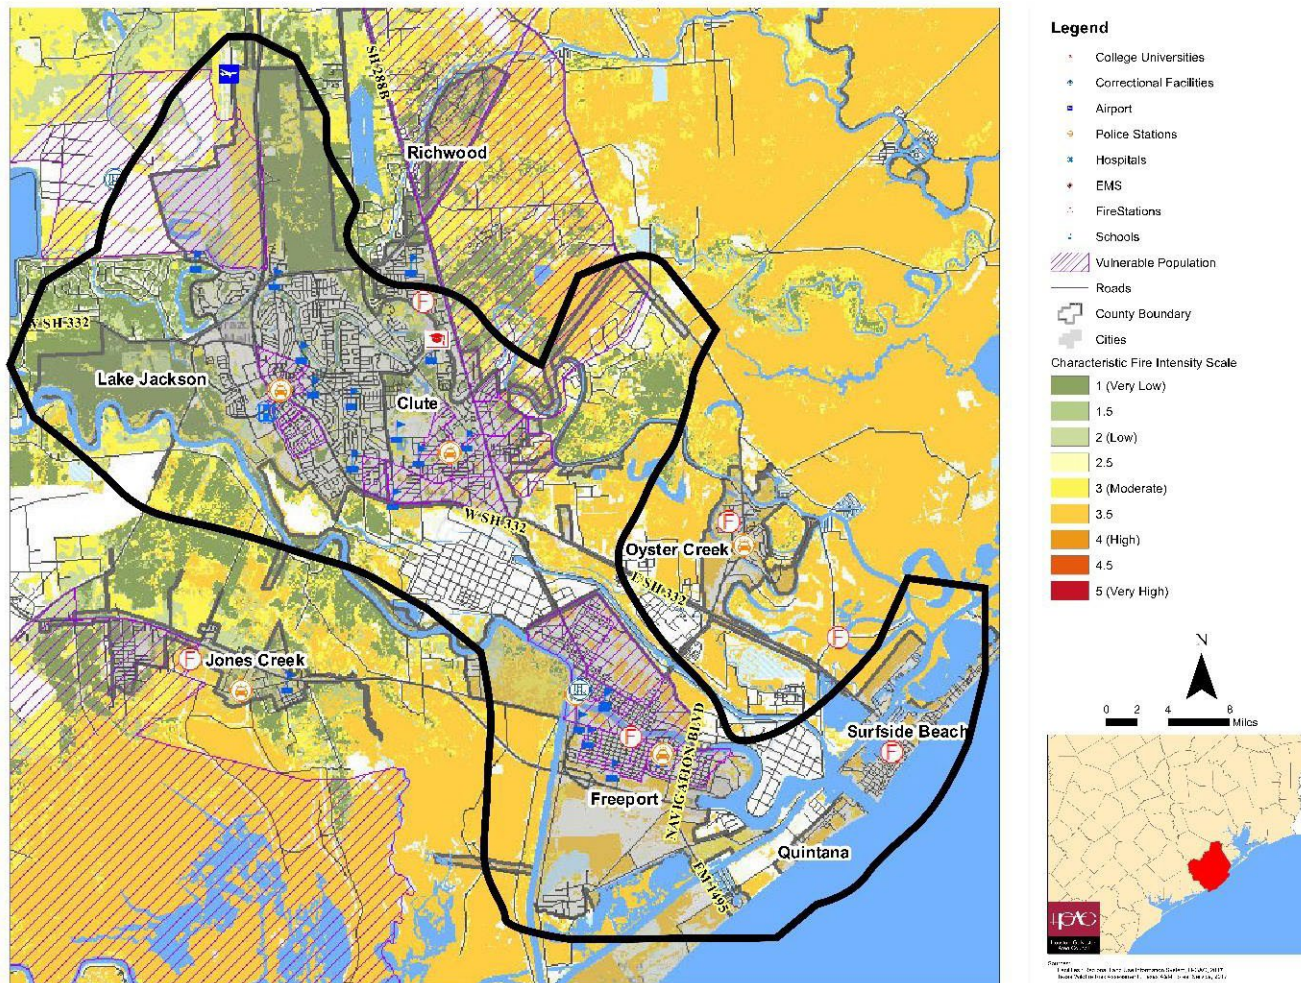

# Wildfire Risk Assessment: Brazosport ISD

<b>Brazosport ISD</b>			
<b>Planning Area (Sq. mi):</b>	200	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	46 %	<b>Annual Event Average:</b>	0
<p><b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is throughout Brazoria County. The ISD has a similar likelihood that the event will occur as unincorporated areas of the county. Brazoria County unincorporated area's probability is: Very Likely; 100 percent chance event will occur in a year.</p>			
<p><b>Extent:</b> The ISD areas can expect a 75-acre fire.</p>			
<p><b>Identified Vulnerabilities:</b></p> <ul style="list-style-type: none"> <li>12,000 students 18 years and younger</li> <li>19 schools- 10 elementary schools, 3 high schools, 5 middle schools, 1 alternative school</li> </ul>			
<p><b>Identified Impacts:</b></p> <ul style="list-style-type: none"> <li>100 percent of the total identified population may face serious illness or health conditions due to poor air quality</li> <li>If administration or schools need to close due to fire damage or poor air quality this may lead to a financial loss for families needing to take off work or find childcare for their children.</li> <li>Academic/ educational loss for children missing school and potentially falling behind in course work</li> </ul>			

# Wildfire Risk Assessment: Velasco Drainage District

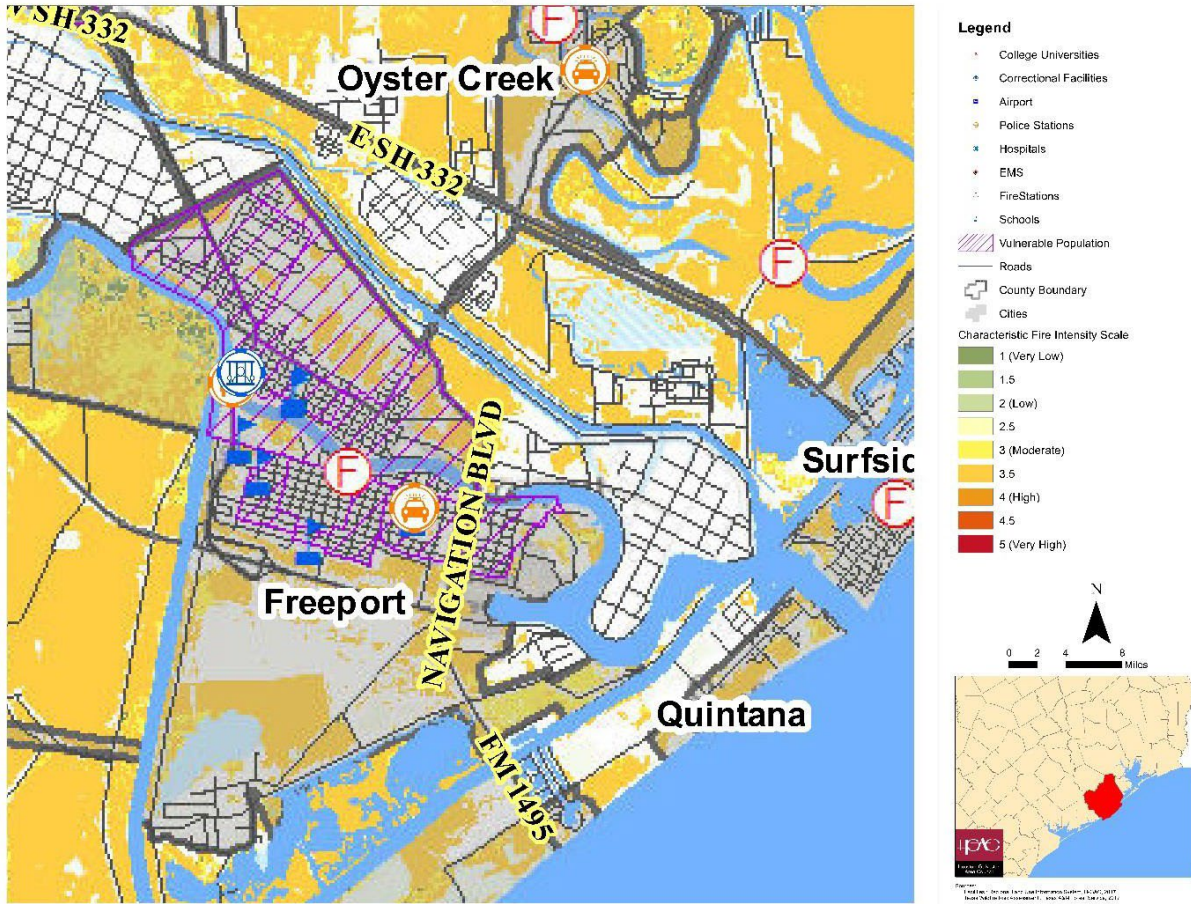

Velasco Drainage District			
<b>Planning Area (Sq. mi):</b>	236	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	37%	<b>Annual Event Average:</b>	0
<p><b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is throughout Brazoria County. Perhaps the District has a similar likelihood that the event will occur as unincorporated areas of the county. Brazoria County unincorporated area's probability is: Very Likely; 100 percent chance event will occur in a year.</p>			
<p><b>Extent:</b> Similarly, Brazoria County unincorporated area's extent is: The largest wildfire in the past 12 years has been a 560-acre fire. The unincorporated areas can expect a 600-acre fire.</p>			
<p><b>Identified Vulnerabilities:</b></p> <ul style="list-style-type: none"> <li>• Administrative building</li> <li>• 14 pump stations and levees</li> </ul>			
<p><b>Identified Impacts:</b></p> <ul style="list-style-type: none"> <li>• If the district's infrastructure becomes damaged this may lead to a decrease in service or slower services, in extreme circumstances this may lead to a decrease in agriculture production</li> <li>• Financial cost of repairing administration building, pumps and levees damaged</li> </ul>			

# Wildfire Risk Assessment: Alvin ISD

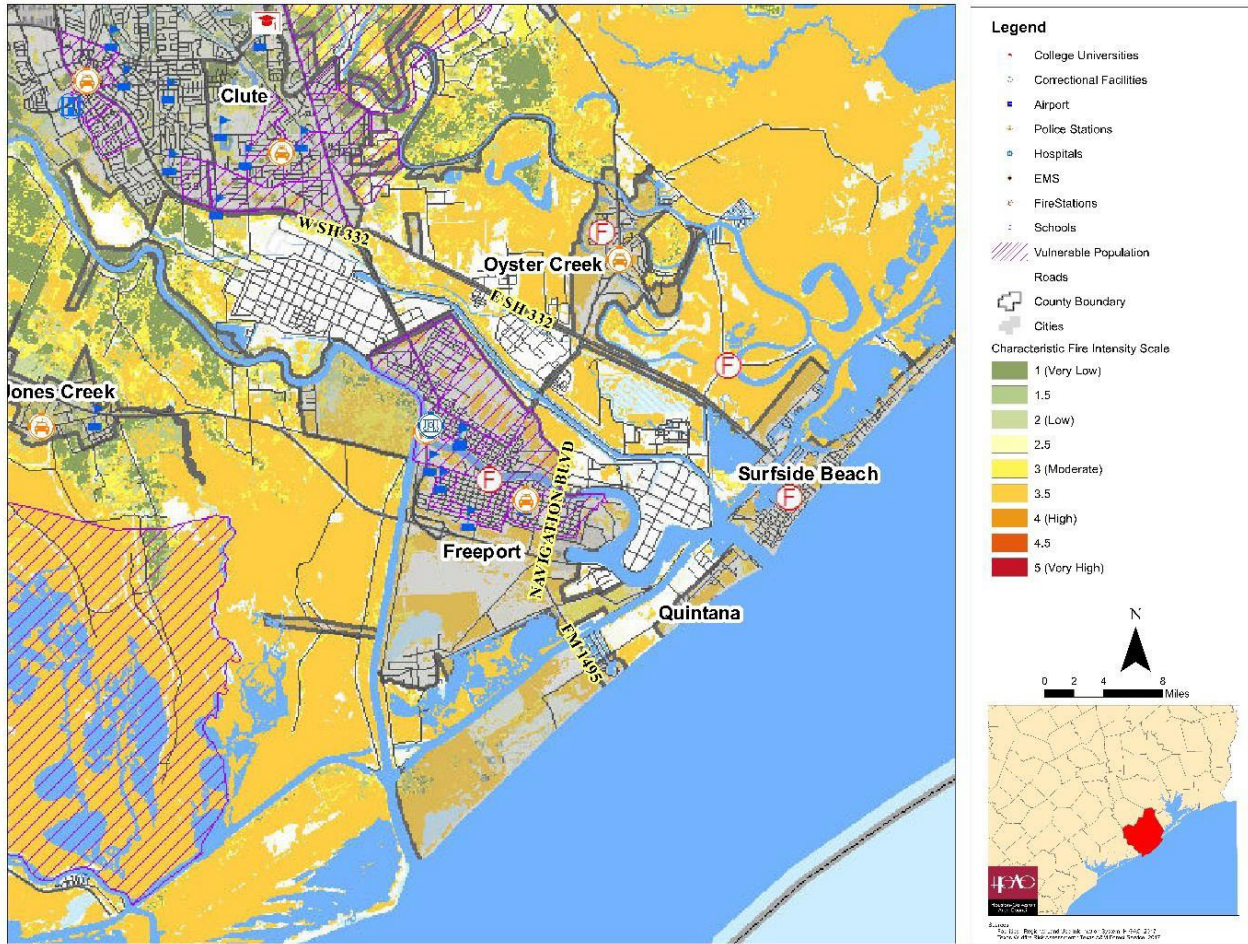

<b>Alvin ISD</b>			
<b>Planning Area (Sq. mi):</b>	252	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	23 %	<b>Annual Event Average:</b>	0
<p><b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is throughout Brazoria County. Perhaps the ISD has a similar likelihood that the event will occur as unincorporated areas of the county. Brazoria County unincorporated area's probability is: Very Likely; 100 percent chance event will occur in a year.</p>			
<p><b>Extent:</b> The ISD area can expect a 103-acre fire.</p>			
<p><b>Identified Vulnerabilities:</b></p> <ul style="list-style-type: none"> <li>• 31 schools- 17 elementary schools, 3 high schools, 6 middle schools, 1 alternative school</li> <li>• 22,000 children 18 years and younger</li> </ul>			
<p><b>Identified Impacts:</b></p> <ul style="list-style-type: none"> <li>• 100 percent of the total identified population may face serious illness or health conditions due to poor air quality</li> <li>• If administration or schools need to close due to fire damage or poor air quality this may lead to a :               <ul style="list-style-type: none"> <li>○ financial loss for families needing to take off work or find childcare for their children</li> <li>○ Academic/ educational loss for children missing several days of school and potentially falling behind in course work</li> </ul> </li> </ul>			

# Wildfire Risk Assessment: Port Freeport

<b>Port Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	26
<b>Area Affected:</b>	12 %	<b>Annual Event Average:</b>	2.2
<b>Probability:</b> Highly Likely; 100 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 10-acre fire. The jurisdiction can expect a 12 to 14-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>Port facilities, equipment, and administrative buildings</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>If a wildfire spreads throughout the port facilities this could endanger employees and may create a loss of life and serious injury</li> <li>The port is one of 18 ports in Texas, if the port had to close due to a fire this may have an impact on the local and state economy; leading to a potential loss of \$226.6 million dollars per day</li> </ul>			

# Wildfire Risk Assessment: Freeport

<b>Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	26
<b>Area Affected:</b>	31 %	<b>Annual Event Average:</b>	2.2
<b>Probability:</b> Highly Likely; 100 percent chance to occur within a year			
<b>Extent:</b> The largest wildfire in the past 12 years has been a 10-acre fire. The jurisdiction can expect a 12 to 14-acre fire.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>697 residential structures at risk</li> <li>29 percent of population are individuals 18 years and younger (1,120 children)</li> <li>12 percent of population are individuals 65 and older (482 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>45 percent of the total population may face serious illness or health conditions due to poor air quality</li> <li>Residential and commercial property loss throughout the jurisdiction</li> </ul>			

# Part 6.3: Hurricanes & Tropical Storms

### 6.3 Hurricanes and Tropical Storms

The Saffir-Simpson Scale ranks hurricanes that are formed in the Atlantic Ocean and Northern Pacific Ocean east of the international date line. The scale considers winds and the amount of damages that could be sustained by the storm. Category 1 is the lowest category of storm, while Category 5 is the strongest level storm. Tropical storms are tropical cyclones that have winds between 39 to 73 mph. While tropical cyclone winds do not reach the wind speeds for the Saffir- Simpson scale, according to the Beaufort Wind Scale, tropical storms are capable of producing winds that could break or uproot trees or create considerable structural damage.

Category	Sustained Winds	Types of Damage Due to Hurricane Winds
1	74-95 mph 64-82 kt. 119-153 km/h	Very dangerous winds will produce some damage: Well-constructed frame homes could have damage to roof, shingles, vinyl siding and gutters. Large branches of trees will snap and shallowly rooted trees may be toppled. Extensive damage to power lines and poles likely will result in power outages that could last a few to several days.
2	96-110mph 83-95 kt. 154-177 km/h	Extremely dangerous winds will cause extensive damage: Well-constructed frame homes could sustain major roof and siding damage. Many shallowly rooted trees will be snapped or uprooted and block numerous roads. Near-total power loss is expected with outages that could last from several days to weeks.
3 (Major)	111-129 mph 96-112 kt. 178-208 km/h	Devastating damage will occur: Well-built framed homes may incur major damage or removal of roof decking and gable ends. Many trees will be snapped or uprooted, blocking numerous roads. Electricity and water will be unavailable for several days to weeks after the storm passes.
4 (Major)	130-156 mph 113-136 kt. 209-251 km/h	Catastrophic damage will occur: Well-built framed homes can sustain severe damage with loss of most of the roof structure and/or some exterior walls. Most trees will be snapped or uprooted and power poles downed. Fallen trees and power poles will isolate residential areas. Power outages will last weeks to possibly months. Most of the area will be uninhabitable for weeks or months
5 (Major)	157 mph min. 137 kt. min. 252 km/h	Catastrophic damage will occur: A high percentage of framed homes will be destroyed, with total roof failure and wall collapse. Fallen trees and power poles will isolate residential areas. Power outages will last for weeks to possibly months. Most of the area will be uninhabitable for weeks or months.

### Historic Occurrence

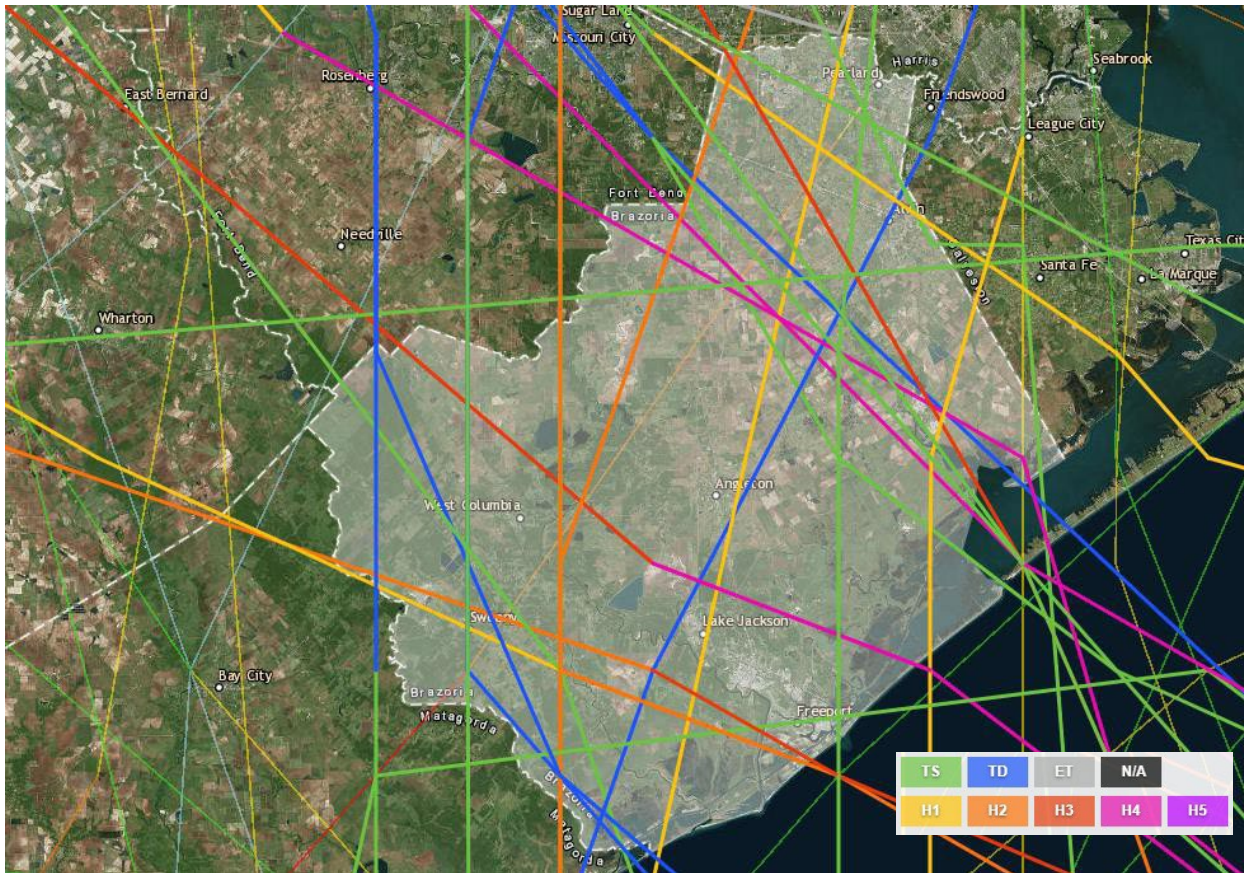

Based on recorded data, twelve hurricanes and tropical storms have direct paths over Brazoria County. Hurricanes and tropical storms since 2000 are included in the list below, and their monetary impact is also noted. There were no reported injuries or deaths from these events or crop damage.

Date	Event Type	Property Damage (2015 Dollars)	Notes
6/5/2001	Tropical Storm	\$22,200,000	None
9/5/2002	Tropical Storm	\$0	None
7/14/2003	Hurricane (Typhoon)	\$1,270,000	Hurricane Claudette. In Brazoria County, 2 single family homes were destroyed, 10 received major damage, and 39 received minor damage. 2 businesses were destroyed and 9 received major damage totaling \$655,000. The highest recorded tide level, 6.99 feet above mean low water, occurred in Freeport at the Brazos River levee.
8/30/2003	Tropical Storm	\$30,000	Tropical Storm Grace became the second tropical cyclone in less than two months to make landfall around Port O'Connor. There was no damage due to Grace's winds. Total rainfall amounts included 5.57 inches in Freeport
9/1/2003	Tropical Storm	\$8,000	This flash flood event was from the remnants of Tropical Storm Grace. Rainfall totals from the 1st and 2nd were 4.75 inches in Freeport.

8/29/2005	Storm Surge/Tide	\$40,000	Minor coastal flooding from swells created by Hurricane Katrina caused a bulkhead to break in Surfside. Washed out some roads and broke a few sewer lines.
9/23/2005	Hurricane (Typhoon)	\$500,000	None
9/12/2008	Storm Surge/Tide	\$1,000,000,000	Significant damage occurred due to surge along gulf facing sections including Quintana and Surfside areas. Surge estimates of 7 to 10 feet were obtained from high water marks.
9/12/2008	Hurricane (Typhoon)	\$700,000,000	Ike produced damage due to high storm surge and high winds over the region. Brazoria County was located to the left of the landfall where winds and surge were not quite as high, but still enough to produce significant damage. Storm surge estimates were 7 to 10 feet with wind gusts to hurricane force.
6/15/2015	Tropical Storm	\$0	Surge flooded impacted Surfside beaches, the Treasure Island subdivision and San Luis Pass Park. In the village of Surfside Beach, Seashell, Surf and Beach Roads were closed due to high water form storm surge. All countywide beach access roads were closed. Storm surge flooding was two feet deep in the Treasure Island subdivision. Heavy rain caused the flooding of Chocolate and Halls Bayous. There were trees downed by winds that were blocking roads in the town of Angleton.
6/21/2017	Tropical Storm	\$0	There was minor coastal flooding around Surfside and Blue Water Highway with minimal impact.
8/25/2017	Tropical Storm	\$2,000,000,000	Slow moving Tropical Storm Harvey produced torrential rains and catastrophic flooding. Several tornadoes touched down. Major to record flooding occurred along the Brazos and San Bernard Rivers and several other creeks and tributaries including Oyster Creek.

### NOAA: Historical Hurricane Tracks in Brazoria County Map (1871 -Present)

Source: NOAA <https://coast.noaa.gov/hurricanes/>

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring within a given year. The analysis calculates the average number of events in each jurisdiction annually and then calculates the percent chance of the event occurring within a year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Information from stakeholders, FEMA, NOAA, and the Department of Homeland Security (DHS) are the sources of data for the analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- FEMA's Hazus analysis software
- Stakeholder identified vulnerabilities
- American Community Survey (ACS, 5-year, 2016) Data on building stock and residents

Hazus was used to determine the economic loss and calculate the building stock at risk of hurricane damage in Brazoria County. The complete Hazus report is in Appendix C. Stakeholders provided valuable insight into additional vulnerabilities within their communities. These findings are provided in condensed charts for each jurisdiction.

### **Brazoria County (All participating jurisdictions)**

#### **Identified Vulnerabilities:**

While participating jurisdictions identified flooding as one of the main effects of hurricanes, flooding is addressed in the first section. In this section vulnerabilities from hurricane winds are addressed. High winds can tear down powerlines, trees, barns, fences, and multitude of other debris can be blown into roadways and homes during the event.

Additionally, residences and commercial buildings could be damaged or destroyed due to events; older residential neighborhoods and structures without a permanent foundation were identified as one of the main vulnerabilities throughout the county. While current building codes address the vulnerability of wind damage to structures, older buildings (particularly residential buildings) were built when less stringent building codes were in place; therefore, older residential building and residences without a permanent foundation are a focus in this section.

- According to Hazus 4,086 commercial residential buildings are at risk
- According to Hazus 90,641 residential buildings are at risk
- According to Hazus 26,654 individuals will be displaced from their homes
- Based on the Hazus reports residential buildings in comparison to commercial buildings are most at risk of the effects of hurricanes throughout the county

## Brazoria County (All participating jurisdictions)

### Identified Impacts:

- Downed powerlines could impact communication and daily active leading to a financial loss for the county, cities and individuals, and could impede first responders from reaching those in need or residents evacuating
- Strong winds could prevent first responders from traveling to assist individuals, because of unsafe driving conditions such as debris hitting emergency vehicles
- Critical facilities could sustain wind damage, potentially delaying first responders reaching those in need and city services after the event
- Economic and financial loss for cities and individuals including property loss:
  - According to Hazus there could be a potential of \$ 29,401,709 in residential loss or 87 percent of total loss
  - According to Hazus there could be a potential of \$2,672,546 in commercial property loss or 8 percent of total loss

## Brazoria County (Unincorporated)

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 1871:</b>	26
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year

**Probability:** Unlikely; 17 percent chance to occur a year

**Extent:** The strongest hurricane in the past was a category 5 hurricane; the unincorporated areas can expect to see a category 5 hurricane in the future

### Identified Vulnerabilities:

- Vulnerable populations are concentrated near the coast near the San Bernard Wildlife Refuge
- Critical facilities including: 3 fire station, 5 schools, 1 shelter, and 2 correctional facilities

### Identified Impacts:

- Vulnerable populations located near the coast could sustain greater injury or loss of life due to the lack of resources to evacuate or to contact responders when they need help
- Critical facilities and equipment could be damaged with windows broken or roofs blown off or destroyed by high winds
- First responders could be delayed, this may increase serious injury or loss of life throughout the county

## Alvin

<b>Planning Area (Sq. mi):</b>	25.6	<b>Occurrences since 2000:</b>	4
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.24

**Probability:** Unlikely; 24 percent chance occurring within a given year

**Extent:** According to past events, the strongest tornado was an F0; the jurisdiction can see a EF1 to EF2 in the future.

### Identified Vulnerabilities:

- 6,275 Residential buildings built before 1980 (65.8% of housing stock)
- 1,334 Mobile Homes (14% of housing stock)
- 42 Boats/ RVs/ Vans acting as main housing (.4 % of housing stock)

### Identified Impacts:

- Almost 85 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and potential increase in serious injuries or loss of life throughout the jurisdiction.

## Angleton

<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 1871:</b>	7
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.048 events a year

**Probability:** Unlikely; 4.8 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 1 hurricane; the jurisdiction can expect to see a category 3 to 5 hurricane in the future

### Identified Vulnerabilities:

- 6,426 Residential buildings built before 1980 (80 % of housing stock)
- 685 Mobile Homes (8.5 % of housing stock)

### Identified Impacts:

- Almost 90 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and potential increase in serious injuries or loss of life throughout the jurisdiction.

## Bailey's Prairie

<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 1871:</b>	4
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.027 events a year

**Probability:** Unlikely; 2.7 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 3 to 5 hurricane in the future

### Identified Vulnerabilities:

- 82 Residential buildings built before 1980 (80.5% of housing stock)
- 22 Mobile Homes (19.5% of housing stock)

### Identified Impacts:

- 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Bonney

<b>Planning Area (Sq. mi):</b>	1.66	<b>Occurrences since 1871:</b>	5
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.034 events a year

**Probability:** Unlikely; 3.4 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 3 to 5 hurricane in the future

### Identified Vulnerabilities:

- 107 Residential buildings built before 1980 (73.1% of housing stock)
- 30 Mobile Homes (20.5% of housing stock)
- 4 Boats/ RVs/ Vans acting as main housing (2.7% of housing stock)

### Identified Impacts:

- 96 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

<b>Brazoria</b>			
<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 1871:</b>	8
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.055 events a year
<b>Probability:</b> Unlikely; 5.5 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 3 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 1,129 Residential buildings built before 1980 (80% of housing stock)</li> <li>• 144 Mobile Homes (10.2% of housing stock)</li> <li>• 14 Boats/ RVs/ Van acting as main housing (1% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 91 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Brookside Village</b>			
<b>Planning Area (Sq. mi):</b>	2.085	<b>Occurrences since 1871:</b>	5
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.034 events a year
<b>Probability:</b> Unlikely; 3.4 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 1 hurricane; the jurisdiction can expect to see a category 2 to 4 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 480 Residential buildings built before 1980 (79.1% of housing stock)</li> <li>• 7 Mobile Homes (1.2% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Almost 81 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Clute</b>			
<b>Planning Area (Sq. mi):</b>	5.6	<b>Occurrences since 1871:</b>	7
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.048 events a year
<b>Probability:</b> Unlikely; 4.8 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 3,347 Residential buildings built before 1980 (64.8% of housing stock)</li> <li>• 312 Mobile Homes (6% of housing stock)</li> <li>• 26 Boats/ RVs/ Vans acting as main housing (.5% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Approximately 71 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Danbury and Danbury ISD</b>			
<b>Planning Area (Sq. mi):</b>	1.0	<b>Occurrences since 1871:</b>	4
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.027 events a year
<b>Probability:</b> Unlikely; 2.7 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 500 Residential buildings built before 1980 (86.2% of housing stock)</li> <li>• 4 Mobile Homes (.7% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Almost 87 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

## Iowa Colony

<b>Planning Area (Sq. mi):</b>	7.33	<b>Occurrences since 1871:</b>	6
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.041 events a year

**Probability:** Unlikely; 4.1 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future

### Identified Vulnerabilities:

- 263 Residential buildings built before 1980 (60% of housing stock)
- 122 Mobile Homes (27.9% of housing stock)

### Identified Impacts:

- Almost 83 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Hillcrest Village

<b>Planning Area (Sq. mi):</b>	0.4	<b>Occurrences since 1871:</b>	9
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.062 events a year

**Probability:** Unlikely; 6.2 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 3 to 5 hurricane in the future

### Identified Vulnerabilities:

- 289 Residential buildings built before 1980 (82.9% of housing stock)

### Identified Impacts:

- Almost 83 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Holiday Lakes

<b>Planning Area (Sq. mi):</b>	1	<b>Occurrences since 1871:</b>	4
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.027

**Probability:** Unlikely; 2.7 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 3 to 5 hurricane in the future

### Identified Vulnerabilities:

- 271 Residential buildings built before 1980 (64.8% of housing stock)
- 216 Mobile Homes (51.8% of housing stock)
- 5 Boats/ RVs/ Van acting as main housing (1.2% of housing stock)

### Identified Impacts:

- 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Jones Creek

<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 1871:</b>	7
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.048 events a year

**Probability:** Unlikely; 4.8 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 3 to 5 hurricane in the future

### Identified Vulnerabilities:

- 3,347 Residential buildings built before 1980 (64.8% of housing stock)
- 165 Mobile Homes (19.1% of housing stock)
- 4 Boats/ RVs/ Van acting as main housing (.5% of housing stock)

### Identified Impacts:

- About 85 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Lake Jackson

<b>Planning Area (Sq. mi):</b>	20.9	<b>Occurrences since 1871:</b>	7
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.048 events a year

**Probability:** Unlikely; 4.8 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 5 hurricane in the future

### Identified Vulnerabilities:

- 8,272 Residential buildings built before 1980 (70.1% of housing stock)
- 6 Mobile Homes (.1% of housing stock)
- 9 Boats/ RVs/ Vans acting as main housing (.1% of housing stock)

### Identified Impacts:

- About 71 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Liverpool

<b>Planning Area (Sq. mi):</b>	1.1	<b>Occurrences since 1871:</b>	9
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.062 events a year

**Probability:** Unlikely; 6.2 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 5 hurricane in the future

### Identified Vulnerabilities:

- 177 Residential buildings built before 1980 (72.2% of housing stock)
- 37 Mobile Homes (15.1% of housing stock)

### Identified Impacts

- Approximately, 87 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Manvel

<b>Planning Area (Sq. mi):</b>	23.6	<b>Occurrences since 1871:</b>	4
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.027 events a year

**Probability:** Unlikely; 2.7 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future

### Identified Vulnerabilities:

- 971 Residential buildings built before 1980 (32.8% of housing stock)
- 329 Mobile Homes (11.1% of housing stock)
- 77 Boats/ RVs/ Van acting as main housing (2.6% of housing stock)

### Identified Impacts:

- 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Oyster Creek

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 1871:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.034 events a year

**Probability:** Unlikely; 3.4 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future

### Identified Vulnerabilities:

- 356 Residential buildings built before 1980 (68.6% of housing stock)
- 231 Mobile Homes (44.5% of housing stock)
- 23 Boats/ RVs/ Vans acting as main housing (4.4% of housing stock)

### Identified Impacts:

- 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Quintana

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 1871:</b>	6
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.041 events a year

**Probability:** Unlikely; 4.1 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future

### Identified Vulnerabilities:

- 554 Residential buildings built before 1980 (83.9% of housing stock)
- 59 Mobile Homes (8.9% of housing stock)

### Identified Impacts:

- About 94 percent of the housing stock was either built before 1980 or does not have a permanent foundation this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Richwood

<b>Planning Area (Sq. mi):</b>	3.1	<b>Occurrences since 1871:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.021 events a year

**Probability:** Unlikely; 2.1 percent chance to occur within a year

**Extent:** The strongest hurricane in the past was a category 1 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future

### Identified Vulnerabilities:

- 356 Residential buildings built before 1980 (68.6% of housing stock)
- 231 Mobile Homes (44.5% of housing stock)
- 23 Boats/ RVs/ Vans acting as main housing (4.4% of housing stock)

### Identified Impacts:

- 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

<b>Surfside Beach</b>			
<b>Planning Area (Sq. mi):</b>	2.2	<b>Occurrences since 1871:</b>	6
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.041 events a year
<b>Probability:</b> Unlikely; 4.1 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>739 Residential buildings built before 1980 (72.2% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>72 percent of the housing stock was either built before 1980; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Sweeny and Sweeny ISD</b>			
<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 1871:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.034
<b>Probability:</b> Unlikely; 3.4 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>1,220 Residential buildings built before 1980 (73% of housing stock)</li> <li>127 Mobile Homes (7.6% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>100 percent of the housing stock was either built before 1980 or does not have a permanent foundation this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>West Columbia</b>			
<b>Planning Area (Sq. mi):</b>	2.58	<b>Occurrences since 1871:</b>	4
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.027 events a year
<b>Probability:</b> Unlikely; 2.7 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 1,447 Residential buildings built before 1980 (88.3% of housing stock)</li> <li>• 38 Mobile Homes (2.3% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• About 93 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Brazosport ISD</b>			
<b>Planning Area (Sq. mi):</b>	200	<b>Occurrences since 1871:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although there have been no recorded events in the ISD, the ISD is throughout the county. Consequently, the ISD's probability may be like unincorporated areas of Brazoria County. Brazoria County's unincorporated area's probability is: Unlikely; 17 percent chance to occur a year			
<b>Extent:</b> Similarly, Brazoria County's unincorporated area's extent is: The strongest hurricane in the past was a category 5 hurricane; the unincorporated areas can expect to see a category 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 12,000 students</li> <li>• 19 schools- 10 elementary schools, 3 high schools, 5 middle schools, 1 alternative school</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Serious injury or loss of life if an event occurs during school hours or during extracurricular activities</li> <li>• Financial loss for the school district if any of the schools or administrative buildings are damaged due to the event</li> <li>• If administration or schools need to close due to flood damage or flooding throughout the community this may lead to a: <ul style="list-style-type: none"> <li>○ financial loss for families needing to take off work or find childcare for their children</li> <li>○ Academic/ educational loss for children missing several days of school and potentially falling behind in course work</li> </ul> </li> </ul>			

## Velasco Drainage District

<b>Planning Area (Sq. mi):</b>	236	<b>Occurrences since 1871:</b>	5
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.034 events a year
<b>Probability:</b> Unlikely; 3.4 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 5 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>Administrative building just outside of the 100-year floodplain and along the coast.</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Financial loss for the port, local area, and the state if the port must close for a prolonged time</li> </ul>			

## Alvin ISD

<b>Planning Area (Sq. mi):</b>	256	<b>Occurrences since 1871:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although there have been no recorded events in the ISD, the ISD is throughout the county. Consequently, the ISD's probability may be like unincorporated areas of Brazoria County. Brazoria County's unincorporated area's probability is: Unlikely; 17 percent chance to occur a year			
<b>Extent:</b> Similarly, Brazoria County's unincorporated area's extent is: The strongest hurricane in the past was a category 5 hurricane; the unincorporated areas can expect to see a category 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>31 schools- 17 elementary schools, 3 high schools, 6 middle schools, 1 alternative school</li> <li>22,000 children 18 years and younger, adds an additional 1,000 students per year</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>Serious injury or loss of life if an event occurs during school hours or during extracurricular activities</li> <li>Financial loss for the school district if any of the schools or administrative buildings are damaged due to the event.</li> <li>If administration or schools need to close due to flood damage or flooding throughout the community this may lead to a: <ul style="list-style-type: none"> <li>financial loss for families needing to take off work or find childcare for their children</li> <li>Academic/ educational loss for children missing several days of school and potentially falling behind in course work</li> </ul> </li> </ul>			

<b>Port Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 1871:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.034 events a year
<b>Probability:</b> Unlikely; 3.4 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Port facilities, equipment, and administrative buildings</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Serious injury or loss of life if an event occurs while staff or visitors are at the port</li> <li>• Financial loss for the port if damage occurs and needs repair or replacement</li> <li>• Economic loss for the surrounding cities and state if the port is closed for a prolonged time.</li> </ul>			

<b>Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 1871:</b>	5
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.034 events a year
<b>Probability:</b> Unlikely; 3.4 percent chance to occur within a year			
<b>Extent:</b> The strongest hurricane in the past was a category 3 hurricane; the jurisdiction can expect to see a category 4 to 5 hurricane in the future			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 4,004 Residential buildings built before 1980 (86.2% of housing stock)</li> <li>• 229 Mobile Homes (4.9% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• About 91 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

## Part 6.4: Drought

## 6.4 Drought

The Palmers Hydrological Drought Severity Index (PHDI) is the typical way extent of drought is observed throughout the United States. This regional index considers dry and wet spells over an extended period to calculate the range in the Index. The greater the number the more extreme the drought in a specific area.

Drought has particularly adverse effects on agriculture which is major industry in Brazoria County. The most extreme conditions occurred in 2011. The county's PHDI rating was < -4.0 (Extreme Drought) from March 2011 through January 2012. There were periods of severe drought preceding and following this period from August 2010 through October 2014. The agricultural losses are estimated at \$5.2 billion, though specific numbers by county are not available for this event.

Palmer's Drought Severity Index	
< -4.0	Extreme Drought
-3.99 to -3.0	Severe Drought
-2.99 to -2.0	Moderate Drought
-1.99 to -1.0	Mild Drought
-0.99 to -0.5	Incipient Drought
-0.49 to 0.49	Near Normal
0.5 to 0.99	Incipient Moist Spell
1.0 to 1.99	Moist Spell
2.0 to 2.99	Unusual Moist Spell
3.0 to 3.99	Very Moist Spell
> 4.0	Extreme Moist Spell
Source: <a href="https://www.ncdc.noaa.gov/">https://www.ncdc.noaa.gov/</a>	

### Historic Occurrence

In Brazoria County's recent history, there have been two major droughts. Zero injuries, deaths, crop or property damage was reported during these events in the county. This information is listed below at the county level. There is no county-level data available for property and agricultural losses for the most recent and most extreme drought event.

Date	Notes
8/1/2000	Severe drought continued across southeast Texas through the month of August. Rainfall for the month of August averaged only 30 to 50 percent of normal across southeast Texas. Several cities were placed under water rationing with large crop losses were noted across the area. Wildfires became increasingly common, especially toward the end of the month. Drought losses in dollars will be computed at the end of the summer growing season.
9/1/2000	Severe drought continued across southeast Texas through September 2000. The combination of excessive heat and dryness caused many wildfires to burn during the first week of the month. Water rationing continued during the first half of the month in several small communities. Water line breaks and small grass fires were a common problem across southeast Texas, especially at the beginning of the month. By the end of September, damage estimates for the season to cotton, wheat, and forage crops and increased irrigation reached \$102.3 million for southeast Texas.
10/1/2011	No notes were recorded for this event from the NCDC. However, the map directly below demonstrates the extent of the drought in 2011. Additionally, 5.2 billion dollars in agriculture loss throughout the state of Texas was reported during this event. ( <a href="http://twri.tamu.edu/publications/txh2o/fall-2011/timeline-of-droughts-in-texas/">http://twri.tamu.edu/publications/txh2o/fall-2011/timeline-of-droughts-in-texas/</a> )

## Palmer's Drought Severity Index: October 2011

Maps source: <https://www.ncdc.noaa.gov/>

### Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within the next five years. The analysis calculates the average number of events in each jurisdiction annually and then calculates the percentage of that event occurring within a year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Information from stakeholders, USDA, CDC, and NOAA are the sources of data for the analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- GIS analysis of vulnerable populations
- USDA livestock production projections; and
- Stakeholder identified vulnerabilities

## All Participating Jurisdictions

<b>Area Impacted:</b>	Drought is not contained to a boundary and is measured by region through the Palmers Drought Severity Index. Consequently, it can arise equally in all participating jurisdictions and in the unincorporated areas of the county.	<b>Occurrences since 2000</b>	3
		<b>Annual Event Average</b>	.18
<b>Probability:</b> Likely; 18 % chance that an event will occur within a year			
<b>Extent:</b> As shown above through the Palmers Drought Severity Index maps, drought can vary greatly in terms of extent and duration. Based on the historical events in the county, all participating jurisdictions can expect moist to extreme drought throughout the planning area. The planning area can expect to see extreme drought in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>Drought can greatly affect agriculture production. While Brazoria County has a diverse economy, agriculture remains a prominent part of the economy. For example, Brazoria County ranks fourth in Texas for rice production. In addition, the county has hay, cattle, soybean crops with crops representing 61% of production and cattle 39 %. In total, agriculture represents 118.2 million dollars for the county annually.</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>The potential loss of crops and the loss of revenue for local farmers and the entire county may impact economic standing and mental wellbeing of farmers and those taking a financial loss from the occurrence.</li> </ul>			

# Part 6.5: Lightning

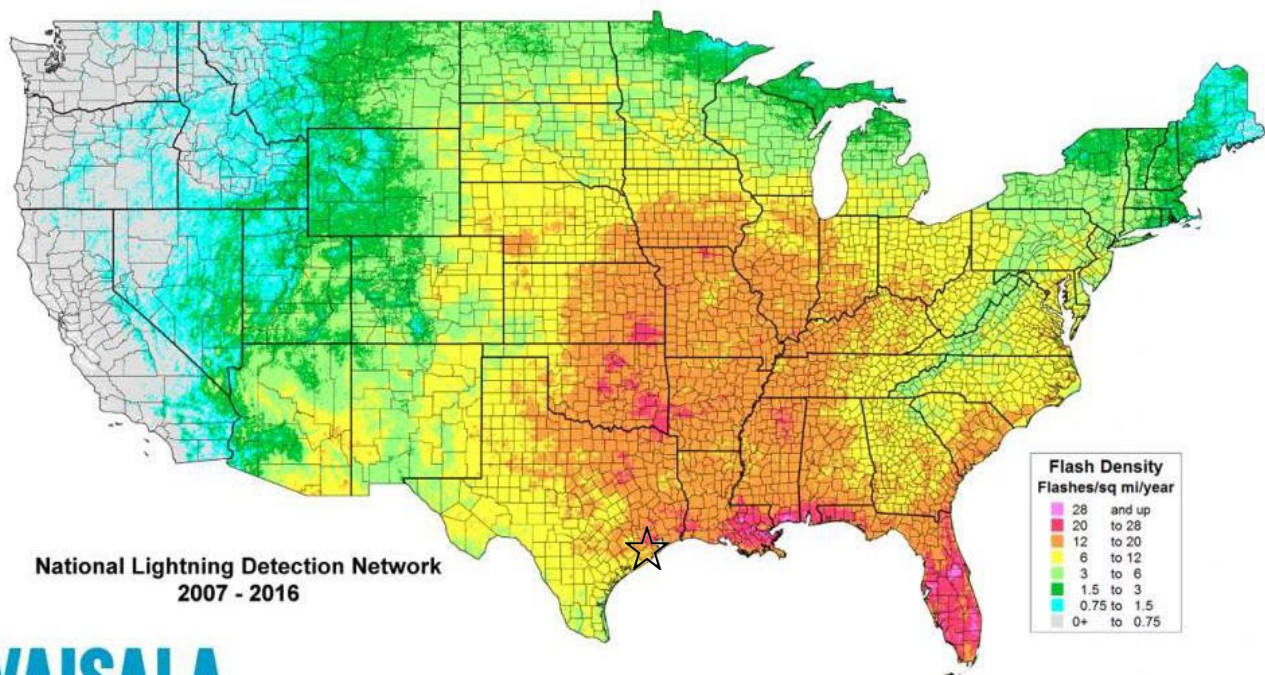

## 6.5 Lightning

There are two typical ways the magnitude of lightning is measured. The first is through the Lightning Activity Levels (LAL) grid. The National Oceanic and Atmospheric Administration (NOAA) considers how many cloud-to-ground strikes occur over a given period as well as rainfall to measure the amount of lightning activity occurring.

LAL	Cloud & Storm Development	Lightning Strikes/15 per minute
1	No thunderstorms	None
2	Isolated thunderstorms. Light rain will occasionally reach the ground. Lightning is very infrequent, 1 to 5 clouds to ground strikes in a five-minute period.	1 to 8
3	Widely scattered thunderstorms. Light to moderate rain will reach the ground. Lightning is infrequent, 6 to 10 clouds to ground strikes in a 5-minute period.	9 to 15
4	Scattered thunderstorms. Moderate rain is commonly produced. Lightning is frequent, 11 to 15 clouds to ground strikes in a 5-minute period.	16 to 25
5	Numerous thunderstorms. Rainfall is moderate to heavy. Lightning is frequent and intense, greater than 15 clouds to ground strikes in a 5-minute period.	Greater than 25
6	Dry lightning (same as LAL 3 but without rain). This type of lightning has the potential for extreme fire activity and is normally highlighted in fire weather forecasts with a Red Flag Warning.	Greater than 25

Source: <https://www.ncdc.noaa.gov/>

The second method is through the National Lightning Detection Network by Vaisala. This Network works by recording when lightning strikes the ground, considering the location, time, and polarity of the strike. According to this Network, Brazoria County is rated 12-20 flashes per square mile per year.

## Historic Occurrences

There have been 2 deaths in the county due to lightning in the past 17 years; one death was reported in Angleton on August 24<sup>th</sup>, 2000. Another death was reported in Danbury on October 7<sup>th</sup>, 2007. Three injuries were reported from lightning since 2000; two injuries were reported in Quintana in 2006 and one injury was reported in Danbury on June 25<sup>th</sup>, 2007.

Jurisdiction	Date	Property Damage	Notes
Angleton	8/24/2000	\$0	Lightning struck and killed 31-year-old man on motorcycle.
Quintana	6/30/2006	\$0	Two victims sought shelter under a cabana on Surfside Beach when lightning struck. Both went to the hospital, but were released with minor injuries.
Unincorporated	4/25/2007	\$50,000	Lightning strike to residential home caused home fire.
Lake Jackson	6/5/2007	\$30,000	Lightning struck a home on the 200 block of Peppermint Drive causing a fire.
Unincorporated	6/15/2007	\$210,000	Home was destroyed by fire caused by a lightning strike.
Danbury	6/25/2007	\$0	Lightning strike at a Brazoria County golf course, seriously injuring one golfer.
Danbury	10/7/2007	\$0	A 30-year-old male was killed by a lightning strike while standing underneath a tree.
Manvel	4/17/2014	\$1,000	A lightning strike caused a grass fire on a golf course.
Iowa Colony	4/17/2014	\$1,000	A lightning strike set a palm tree on fire.
Iowa Colony	4/17/2014	\$15,000	A lightning strike caused a fire at a two-story residential home.
Manvel	4/17/2014	\$15,000	A lightning strike set fire to a structure in Manvel.
Lake Jackson	4/14/2015	\$5,000	A lightning strike caused damage to a structure.
Freeport	5/21/2016	\$3,000	Lightning that struck a power pole in Freeport caused power outages throughout the city.

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within a given year. The analysis calculates the average number of events in each jurisdiction annually and then calculates the percent chance of the event occurring within a year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Information from stakeholders, Texas Forest Service, and NOAA are the sources of data.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- American Community Survey (ACS 5-year 2016) Data on structures
- GIS analysis of structures and critical facilities exposed to lightning damage; and
- Stakeholder identified vulnerabilities

### Extent

The magnitude of lightning was not recorded for each historical event; not all participating jurisdictions have a history of all lightning strikes that may have occurred in their jurisdiction; and lightning flashes per event for each jurisdiction was not found. Due to these data limitations and considering that lightning is not contained to a particular geographic area or jurisdiction, extent for the entire county was estimated; NOAA's Severe Weather Data Inventory does provide a history of flashes per event on the county level. According to the Data Inventory, the entire planning area saw approximately a range of lightning flashes per event between an average of 12 to 61 flashes per event from 2000 to 2017.

## Brazoria County (All Jurisdictions)

### Identified Vulnerabilities:

As described in the hazard identification section, lightning can strike anywhere, but is more likely to strike tall trees and structures, and in open fields. As noted in the historical occurrences above, lightning can cause serious injury to residents and property in these places. Lightning can also cause wildfires that could destroy or damage residential, commercial, public property or agricultural lands. Additionally, lightning could hit a structure directly and cause a structural fire. In considering this, vulnerabilities throughout the county include:

- Agricultural and parkland areas throughout the county including the Brazoria National Wildlife Refuge, Justin Hurst Wildlife and San Bernard National Wildlife Refuge
- Residential buildings throughout the county (identified below by jurisdiction)
- Communication towers (no data was found for the exact number of towers throughout the county)
- Critical facilities throughout the county (identified below by jurisdiction)

### Identified Impacts:

- Residential, commercial, and public property loss throughout the county due to wildfires or structural fires started by lightning
- In total, 631,021 acres in total throughout the county in farmland at risk if a lightning strike causes a wildfire (accounting for 118,236,00 dollars in revenue). Leading to financial and economic loss for individual farmers and the county
- Lightning striking a communication tower may lead to a loss of communication for a particular jurisdiction or for a large portion of the county. This could lead to an inability to reach people in need.
- In the instance that lightning does strike a critical facility without a generator or the generator does not work, critical facilities could lose power. This may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events

## Brazoria County (Unincorporated)

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	2
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.12 events a year

**Probability:** Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been .12 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 3 fire station, 5 schools, 1 shelter, 2 correctional facilities

### Identified Impacts:

- 11 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.

## Alvin

<b>Planning Area (Sq. mi):</b>	25.6	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 14 schools, 5 electrical substations, 4 fire stations, 2 EMS, 1 wastewater treatment plant, 2 shelters, 6 police stations, and 1 emergency operation center
- 1,431 residential structures at risk

### Identified Impacts:

- 29 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lighting is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Angleton

<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.05 events a year

**Probability:** Unlikely; 5 percent chance of the event occurring within a year

**Extent:** According to past events there have been .05 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 3 correctional facilities, 1 electrical substation, 1 EMS, 2 fire stations, 9 schools, 3 shelters, 9 police stations, and 2 hospitals
- 803 residential structures at risk

### Identified Impacts:

- 29 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lighting is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Bailey's Prairie

<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- 170 residential structures at risk

### Identified Impacts:

- Relying on first responders in neighboring jurisdictions may lead to a delayed response time which could increase the loss of life, serious injuries, or structures damaged
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Bonney

<b>Planning Area (Sq. mi):</b>	1.66	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- 22 residential structures at risk

### Identified Impacts:

- Relying on first responders in neighboring jurisdictions may lead to a delayed response time which could increase the loss of life, serious injuries, or structures damaged
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Brazoria

<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2000:</b>	0
--------------------------------	-----	--------------------------------	---

<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
-----------------------	------	------------------------------	---

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 correctional facility, 1 electrical substation, 1 EMS, 4 fire stations, 9 schools, 6 shelters, 2 police stations, 2 hospitals, 6 shelters, and 2 emergency operation centers
- 282 residential structures at risk

### Identified Impacts:

- 36 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Brookside Village

<b>Planning Area (Sq. mi):</b>	2.085	<b>Occurrences since 2000:</b>	0
--------------------------------	-------	--------------------------------	---

<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0
-----------------------	-------	------------------------------	---

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- 1 police station
- 122 residential structures at risk

### Identified Impacts:

- 1 critical facility could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Clute

<b>Planning Area (Sq. mi):</b>	5.6	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 EMS, 1 electrical substation, 1 fire station, 5 schools, 5 shelters, 2 police stations, 2 hospitals, 1 emergency operation center, and 1 wastewater treatment
- 775 residential structures at risk

### Identified Impacts:

- 19 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Lightning striking a wastewater treatment facility without a generator could impede water quality throughout the area
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Danbury and Danbury ISD

<b>Planning Area (Sq. mi):</b>	1.0	<b>Occurrences since 2000:</b>	2
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.12

**Probability:** Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been .12 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 electrical substation, 1 EMS, 1 fire station, 3 schools, and 1 police station
- 92 residential structures at risk

### Identified Impacts:

- 7 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Iowa Colony

<b>Planning Area (Sq. mi):</b>	7.33	<b>Occurrences since 2000:</b>	2
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.12

**Probability:** Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been .12 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 EMS and 1 school
- 88 residential structures at risk

### Identified Impacts:

- 2 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Hillcrest Village

<b>Planning Area (Sq. mi):</b>	0.4	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. . According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- 53 residential structures at risk

### Identified Impacts:

- Relying on first responders in neighboring jurisdictions may lead to a delayed response time which could increase the loss of life, serious injuries, or structures damaged
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Holiday Lakes

<b>Planning Area (Sq. mi):</b>	1	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- 84 residential structures at risk

### Identified Impacts:

- Relying on first responders in neighboring jurisdictions may lead to a delayed response time which could increase the loss of life, serious injuries, or structures damaged
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Jones Creek

<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 school and 1 shelter
- 130 residential structures at risk

### Identified Impacts:

- 2 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Lake Jackson

<b>Planning Area (Sq. mi):</b>	20.9	<b>Occurrences since 2000:</b>	2
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.12

**Probability:** Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been .12 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 dam, 1 electrical substation, 2 EMS, 2 fire stations, 1 hospital, 2 police stations, 7 schools, 9 shelters, and 1 wastewater treatment facility

### Identified Impacts:

- 2 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Lightning striking a wastewater treatment facility without a generator could impede water quality throughout the area
- Lightning striking an electrical substation could allow for
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Liverpool

<b>Planning Area (Sq. mi):</b>	1.1	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 fire station and 2 police stations
- 37 residential structures at risk

### Identified Impacts:

- 3 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Manvel

<b>Planning Area (Sq. mi):</b>	23.6	<b>Occurrences since 2000:</b>	2
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.12

**Probability:** Unlikely; 12 percent chance event occurs within a year

**Extent:** According to past events there have been .12 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 EMS, 2 fire stations, 3 police stations, 4 schools, and 1 shelter
- 443 residential structures at risk

### Identified Impacts:

- 11 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Oyster Creek

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 fire station, 1 police station, 1 power plant, and 1 shelter
- 78 residential structures at risk

### Identified Impacts:

- 4 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Quintana

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.059

**Probability:** Unlikely; 5 percent chance of the event occurring within a year

**Extent:** According to past events there have been .05 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- 5 residential structures at risk

### Identified Impacts:

- Relying on first responders in neighboring jurisdictions may lead to a delayed response time which could increase the loss of life, serious injuries, or structures damaged
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Richwood

<b>Planning Area (Sq. mi):</b>	3.1	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 police station, 1 school, and 1 shelter
- 246 residential structures at risk

### Identified Impacts:

- 3 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Surfside Beach

<b>Planning Area (Sq. mi):</b>	2.2	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 fire station, and 1 police station
- 205 residential structures at risk

### Identified Impacts:

- 2 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Sweeny and Sweeny ISD

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 electrical substation, 1 EMS, 2 fire stations, 1 hospital, 2 emergency operations centers, 3 police stations, 2 schools, 1 shelter, 3 schools, 2 power plants
- 251 structures at risk

### Identified Impacts:

- 4 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## West Columbia

<b>Planning Area (Sq. mi):</b>	2.58	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. . According to NOAA’s data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- Critical facilities including: 1 electrical substation, 1 EMS, 1 fire station, 3 schools, 3 shelters, 4 police stations, and 1 powerplant
- 246 residential structures at risk

### Identified Impacts:

- 4 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lighting is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Brazosport ISD

<b>Planning Area (Sq. mi):</b>	200	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** The ISD has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.

**Extent:** According to past events there have been 0 events recorded per year. According to NOAA’s data inventory, the jurisdiction could see 12 to 61 flashes per event.

### Identified Vulnerabilities:

- 19 schools- 10 elementary schools, 3 high schools, 5 middle schools, 1 alternative school
- 12,000 children 18 years and younger

### Identified Impacts:

- Serious injury or loss of life due to students and staff outside or trying to get inside during an event
- Property and financial loss due to a lightning strike hitting a building or hitting equipment or trees on school property

## Velasco Drainage District

<b>Planning Area (Sq. mi):</b>	236	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<b>Probability:</b> The jurisdiction has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.			
<b>Extent:</b> According to past events there have been 0 events recorded per year. According to NOAA's data inventory, the jurisdiction could see 12 to 61 flashes per event.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Administrative buildings and equipment</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• If lightning strikes the administrative building or equipment this may lead to a loss or reduction in service, in extreme cases this may impact proper drainage throughout the planning areas and could lead to a decrease in agriculture production.</li> </ul>			

## Alvin ISD

<b>Planning Area (Sq. mi):</b>	252	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0
<b>Probability:</b> The ISD has no recorded lightning strikes. However, lightning strikes have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.			
<b>Extent:</b> According to past events there have been 0 events recorded per year. According to Vaisala, the jurisdiction could see 6 to 20 strikes per square mile per year.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 31 schools- 17 elementary schools, 3 high schools, 6 middle schools, 1 alternative school</li> <li>• 22,000 children 18 years and younger</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Serious injury or loss of life due to students and staff outside or trying to get inside during an event</li> <li>• Property and financial loss due to a lightning strike hitting a building or hitting equipment or trees on school property</li> <li>• Financial loss for families if parents/ guardians need to take off work/ find childcare during a school closure</li> </ul>			

<b>Port Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0
<b>Probability:</b> The jurisdiction has 3 recorded lightning strikes. These have been recorded in other areas of the county and are not geographically based. Therefore, probability may be similar to surrounding jurisdictions: Unlikely; 12 percent chance event occurs within a year.			
<b>Extent:</b> According to past events there have been 0 events recorded per year. According to Vaisala, the jurisdiction could see 6 to 20 strikes per square mile per year.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Tall cranes, metal warehouses, stack metal cargo containers, and maritime vessels are all a potential target for lightning strikes</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Damage to administrative building, port facilities and equipment could have a financial impact on the port and an economic loss for the county, state and federal levels. (\$157.3 billion economic potential)</li> <li>• Serious injury or loss of life for staff or visitors at the port during an event</li> <li>• The port is one of 18 ports in Texas, if the port had to close due to a fire this may have an impact on the local and state economy; leading to a potential loss of \$226.6 million dollars per day</li> </ul>			

Damage to administrative building, port facilities and equipment could have an economic impact at a local, state, and federal level (\$157.3 billion in total national economic output).

- Negative impact to local, state, and federal tax revenues (\$5.3 billion in local and state tax revenues nationally and \$5.4 billion in federal tax revenues nationally)
- Increase in unemployment rate (266,300 jobs supported nationally).
- Decrease in consumer spending at a local, state, and national level (\$22.5 billion in labor income nationally).
- Serious injury or loss of life for staff and/or Port users at the port during an event (8,600 individual entries/week).
- Port Freeport is ranked number 6<sup>th</sup> in chemical exports in the US, so a port closure would have a large impact on the gasoline, LNG, and other chemical supply chains.
- Port Freeport is ranked number 11<sup>th</sup> in foreign tonnage, so a port closure could have a negative impact on foreign affairs.

## Freeport

<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.059

**Probability:** Unlikely; 6 percent chance of the event occurring within a year

**Extent:** According to past events there have been .05 events recorded per year. According to Vaisala, the jurisdiction could see 6 to 20 strikes per square mile per year.

### **Identified Vulnerabilities:**

- Critical facilities including: 1 correctional facility, 5 electrical substation, 2 EMS, 3 fire stations, 6 schools, 5 shelters, 8 police stations, 1 emergency operations center, 2 wastewater treatment plants, and 1 power plant
- 697 residential structures at risk

### **Identified Impacts:**

- 4 critical facilities could lose power or catch on fire if lightning strikes; this may slow down first responders and allow for greater loss of life, injury, or property damage particularly when lightning is accompanied by flooding or other hazardous events.
- Damage to homes caused by lightning may lead to a financial loss for residents and/ or injury or loss of life in a house fire or electrical shock

## Part 6.6: Heat Events

## 6.6 Heat Event

Heat Events are defined by NOAA as a period of heat resulting from the combination of elevated temperatures and relative humidity. A Heat Event occurs whenever heat index values meet or exceed locally/regionally established advisory thresholds. Fatalities or major impacts on human health occurring when ambient weather conditions meet heat advisory criteria are reported using the Heat Event (NCDC).

### NOAA's National Weather Service Heat Index

		Temperature °F (°C)															
		80(27)	82(28)	84(29)	86(30)	88(31)	90(32)	92(34)	94(34)	96(36)	98(37)	100(38)	102(39)	104(40)	106(41)	108(43)	110(47)
Relative Humidity (%)	40	80(27)	81(27)	83(28)	85(29)	88(31)	91(33)	94(34)	97(36)	101(38)	105(41)	109(43)	114(46)	119(48)	124(51)	130(54)	136(58)
	45	80(27)	82(28)	84(29)	87(31)	89(32)	93(34)	96(36)	100(38)	104(40)	109(43)	114(46)	119(48)	124(51)	130(50)	137(58)	
	50	80(27)	83(28)	85(29)	88(31)	91(33)	95(35)	99(37)	103(39)	108(42)	113(45)	118(48)	124(51)	131(55)	137(58)		
	55	80(27)	84(29)	86(30)	89(32)	93(34)	97(36)	101(38)	106(41)	112(44)	117(47)	124(51)	130(54)	137(58)			
	60	82(28)	84(29)	88(31)	91(33)	95(35)	100(38)	105(41)	110(43)	116(47)	123(51)	129(54)	137(58)				
	65	82(28)	85(29)	89(32)	93(34)	98(37)	103(39)	108(43)	114(46)	121(49)	128(53)	136(58)					
	70	82(28)	86(30)	90(32)	95(35)	100(38)	105(41)	112(46)	119(48)	126(52)	134(57)						
	75	84(29)	88(31)	92(33)	97(36)	103(39)	109(43)	116(47)	124(51)	132(56)							
	80	84(29)	89(32)	94(34)	100(38)	106(41)	113(45)	121(49)	129(54)								
	85	84(29)	90(32)	96(36)	102(39)	110(43)	117(47)	126(52)	135(57)								
	90	86(30)	91(33)	98(37)	105(41)	113(45)	122(50)	131(55)									
	95	86(30)	93(34)	100(38)	108(42)	117(47)	127(53)										
100	87(31)	95(35)	103(39)	112(44)	121(49)	132(56)											

#### Likelihood of Heat Disorders with Prolonged Exposure or Strenuous Activity

Caution	Extreme Caution	Danger	Extreme Danger
---------	-----------------	--------	----------------

## Historic Occurrences

June to August are the months that Brazoria County could experience the most severe heat, with average temperatures between 90 and 100 degrees. According to NOAA's database, zero deaths, injuries, crop or property damage were reported from 2000 to 2017 due to Heat Events.

Date	Event	Jurisdiction	Notes
7/6/2000	Heat Event	County wide	Excessive heat impacted southeast Texas for much of the month of July. High temperatures ranged from 98 to 105 degrees daily over all but the immediate coast during a 2-week period. Only traces of rainfall were observed during this period.
8/29/2000	Heat Event	County wide	Excessive heat occurred over southeast Texas during the last 3 days of August.
9/1/2000	Heat Event	County wide	A record setting heat wave continued over southeast Texas through the first week of September 2000. A heat wave with temperatures of this duration and magnitude is unprecedented for southeast Texas.
6/24/2009	Heat Event	County wide	Hot, humid conditions led to heat indices above 105 degrees for several days in late June.

Source: <https://www.ncdc.noaa.gov>

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within a given year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Additionally, extent estimates the worst event the jurisdiction could experience in the future. Information from stakeholders, USDA, CDC, and NOAA are the sources of data for the analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- American Community Survey (ACS, 2016, 5-year) Data on residents
- GIS analysis of vulnerable populations
- USDA production projections; and
- Stakeholder identified vulnerabilities

All Participating Jurisdictions		
<b>Area Affected:</b> Heat events are not contained to a specific boundary and past events are measured by county; this event can arise in all participating jurisdictions equally.	<b>Occurrences since 1990:</b>	4
	<b>Annual Event Average:</b>	.15
<b>Probability:</b> Unlikely; .75 events to occur in the next 5 years. A 14 percent chance of the event happening in the next year.		
Although the probability based on past occurrences appears low, participating jurisdictions at the public meeting voiced that all jurisdictions experience high temperatures and humidity particularly during summer months.		
<b>Extent:</b> Based on past occurrences recorded above, the highest temperature recorded for the planning area is 105 degrees. The planning area can see temperatures from 110 degrees Fahrenheit to 120 degrees Fahrenheit.		
<b>Vulnerabilities:</b> While heat events have the potential to damage buildings and crops, vulnerable populations are most at risk in the county during these events. According to the Centers for Disease Control and Prevention (CDC), adults over 65 years of age, infants, children, individuals with chronic illnesses, low-income, outdoor workers, and athletes are the most vulnerable populations to heat related illnesses. The data available on these specified populations suggests that approximately 48% of the population in Brazoria County is vulnerable to heat related illnesses.		
<b>Impacts:</b> <ul style="list-style-type: none"> <li>• 631,021 acres in total throughout the county in farmland (accounting for 118,236,00 dollars in revenue) may be impacted resulting in financial loss for farmers and the county as a whole</li> <li>• Serious illness or loss of life throughout the county</li> </ul>		

### Brazoria County (Unincorporated)

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	4
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.15 events a year
<b>Probability:</b> Unlikely; .75 events to occur in the next 5 years. A 14 percent chance of the event happening in the next year.			
<b>Extent:</b> Based on past occurrences recorded above, the highest temperature recorded for the planning area is 105 degrees. The planning area can see temperatures from 110 degrees Fahrenheit to 120 degrees Fahrenheit			
<b>Identified Vulnerabilities:</b> <ul style="list-style-type: none"><li>• Critical facilities including: 3 fire station, 5 schools, and 1 shelter</li></ul>			
<b>Identified Impacts:</b> <ul style="list-style-type: none"><li>• Potential lack of shelters throughout the unincorporated areas could lead to an increase of serious illness or loss of life or stress on other shelters and critical facilities throughout the other areas in the county</li></ul>			

### Alvin

<b>Planning Area (Sq. mi):</b>	25.6	<b>Occurrences since 2000:</b>	4
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.15 events a year
<b>Probability:</b> Unlikely; .75 events to occur in the next 5 years. A 14 percent chance of the event happening in the next year.			
<b>Extent:</b> Based on past occurrences recorded above, the highest temperature recorded for the planning area is 105 degrees. The planning area can see temperatures from 110 degrees Fahrenheit to 120 degrees Fahrenheit			
<b>Identified Vulnerabilities:</b> <ul style="list-style-type: none"><li>• 29 percent of population are individuals 18 years and younger (7,370 children)</li><li>• 13 percent of population are individuals 65 and older (3,264 older individuals)</li></ul>			
<b>Identified Impacts:</b> <ul style="list-style-type: none"><li>• 42 percent of the total population may face serious illness or health conditions due to high temperatures and humidity</li></ul>			

<b>Angleton</b>			
<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 2000:</b>	4
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.15 events a year
<b>Probability:</b> Unlikely; .75 events to occur in the next 5 years. A 14 percent chance of the event happening in the next year.			
<b>Extent:</b> Based on past occurrences recorded above, the highest temperature recorded for the planning area is 105 degrees. The planning area can see temperatures from 110 degrees Fahrenheit to 120 degrees Fahrenheit			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 30 percent of population are individuals 18 years and younger (5,793 children)</li> <li>• 13 percent of population are individuals 65 and older (2,540 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 43 percent of the total population may face serious illness or health conditions due to high temperatures and humidity</li> </ul>			

<b>Bailey's Prairie</b>			
<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2000:</b>	4

<ul style="list-style-type: none"> <li>• 47 percent of the total population may face serious illness or health conditions due to high temperatures and humidity</li> </ul>			

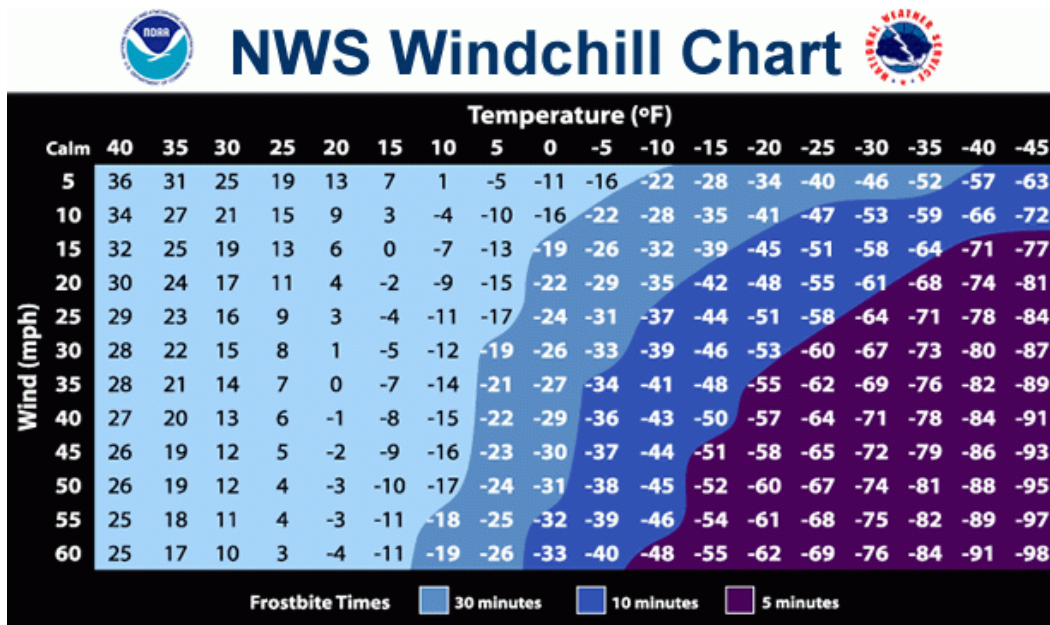

## Part 6.7: Winter Weather

## 6.7 Winter Weather

The two main charts used to measure the magnitude of winter storms is the Sperry-Piltz Ice Accumulation (SPIA) Index Parameters and the National Weather Service's Windchill Chart. The SPIA chart measures the extent of ice in a region considering wind speed and the depth of ice on surfaces. The NWS Windchill Chart considers wind speed and temperatures to determine the amount of time frostbite may occur.

ICE DAMAGE INDEX	* AVERAGE NWS ICE AMOUNT (in inches) <small>* Revised-October, 2011</small>	WIND (mph)	DAMAGE AND IMPACT DESCRIPTIONS
<b>0</b>	< 0.25	< 15	Minimal risk of damage to exposed utility systems; no alerts or advisories needed for crews, few outages.
<b>1</b>	0.10 – 0.25	15 - 25	Some isolated or localized utility interruptions are possible, typically lasting only a few hours. Roads and bridges may become slick and hazardous.
	0.25 – 0.50	> 15	
<b>2</b>	0.10 – 0.25	25 - 35	Scattered utility interruptions expected, typically lasting 12 to 24 hours. Roads and travel conditions may be extremely hazardous due to ice accumulation.
	0.25 – 0.50	15 - 25	
	0.50 – 0.75	< 15	
<b>3</b>	0.10 – 0.25	> = 35	Numerous utility interruptions with some damage to main feeder lines and equipment expected. Tree limb damage is excessive. Outages lasting 1 – 5 days.
	0.25 – 0.50	25 - 35	
	0.50 – 0.75	15 - 25	
	0.75 – 1.00	< 15	
<b>4</b>	0.25 – 0.50	> = 35	Prolonged & widespread utility interruptions with extensive damage to main distribution feeder lines & some high voltage transmission lines/structures. Outages lasting 5 – 10 days.
	0.50 – 0.75	25 - 35	
	0.75 – 1.00	15 - 25	
	1.00 – 1.50	< 15

Source: [http://www.nws.noaa.gov/om/cold/wind\\_chill.shtml](http://www.nws.noaa.gov/om/cold/wind_chill.shtml)

The national weather service and NOAA also have a variety of watches and warnings for freeze, frost, wind, and ice events; these have been organized in a chart below.

Watch/ Warning/ Advisory	Description
Winter Storm Watch	Issued when there is the potential for significant and hazardous winter weather within 48 hours. It is possible hazardous weather may occur. Significant and hazardous winter weather is defined as: 5 inches or more of snow/sleet within a 12-hour period or 7 inches or more of snow/sleet within a 24-hour period. And/ or enough ice accumulation to cause damage to trees or powerlines and/or a life threatening or damaging combination of snow and/or ice accumulation with wind.
Winter Storm Warning	Issued when a significant combination of hazardous winter weather is occurring or imminent. Significant and hazardous winter weather is defined as above.
Ice Storm Warning	¼ inch or more of ice accumulation.
Winter Weather Advisory	Issued for any amount of freezing rain, or when 2 to 4 inches of snow (alone or in combination with sleet and freezing rain) is expected to cause a significant inconvenience, but not serious enough to warrant a warning.
Freeze Watch	Issued when there is a potential for significant, widespread freezing temperatures within the next 24-36 hours.
Freeze Warning	Issued when significant, widespread freezing temperatures are expected.
Frost Advisory	Issued when the minimum temperature is forecast to be 33 to 36 degrees on clear and calm nights during the growing season.
Wind Chill Advisory	Issued when wind chills of -5F to -19F are expected east of the Blue Ridge Mountains and when wind chills of -10 to -24F are expected along and west of the Blue Ridge Mountains and in Frederick and Carroll Counties in Maryland.
Wind Chill Warning	Issued when wind chills of -20F or lower are expected east of the Blue Ridge Mountains, and when wind chills of -25F or lower are expected along and west of the Blue Ridge Mountains and in Frederick and Carroll Counties in Maryland.

## Historic Occurrences

There have been no occurrences where deaths, injuries, or property or crop damage was reported.

Jurisdiction	Date	Event	Notes
Brazoria County	2/3/2011	Ice Storm	A period of freezing rain and freezing drizzle led to icy roads, especially bridges and overpasses, and numerous accidents. Between one and two tenths of an inch of ice accumulated.
Brazoria County	1/28/2014	Winter Weather	Light snow was observed just to the west of the Pearland area. No accumulation was reported.
Brazoria County	12/8/2017	Heavy Snow	1 to 3 inches of snow were measured around Pearland, Alvin and the Lake Jackson area.
Brazoria County	2/15/2021	Freeze	Winter storm Uri was a major freeze event that enveloped the entire county for multiple days.

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within a given year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Additionally, extent information provides an estimate of the worst event the jurisdiction could experience in the future. Information from stakeholders, Centers for Disease Control and Prevention (CDC), and NOAA are the sources of data for the analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- American Community Survey (ACS, 5-year, 2016) data on residents
- GIS analysis of vulnerable populations
- Stakeholder identified vulnerabilities

According to the CDC, adults over 65 years of age and children are the most vulnerable populations to winter weather related illnesses. The data available on these populations suggests that approximately 48% of the population in Brazoria County is vulnerable to winter weather.

<b>All Participating Jurisdictions</b>		
<b>Area Affected:</b> Like heat events winter weather does not have a geographic boundary. This hazard can affect all planning areas equally.	<b>Occurrences since 2000:</b>	3
	<b>Annual Event Average:</b>	.18
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.		
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2		
<b>Identified Vulnerabilities:</b>		
From the public meeting participating jurisdictions identified icy roads as a main vulnerability; icy road conditions create dangerous roadways that make people unable to drive to work school etc. at most a few days a year during the winter. Additionally, according to the CDC, adults over 65 years of age and children are the most vulnerable populations to winter weather related illnesses. The data available on these populations suggests that approximately 48% of the population in Brazoria County is vulnerable to winter weather.		
<b>Identified Impacts:</b>		
<ul style="list-style-type: none"> <li>• Power outages caused by frozen limbs that fall and damage powerlines has a far-reaching impact on the jurisdictions participating in this plan. It can cause loss of life, loss of wages for closed businesses, and can cause students to miss school.</li> <li>• Frozen falling limbs can also cause harm to individuals and costly damage to homes, vehicles, and other property.</li> <li>• Icy roadways may lead to accidents with severe injury or loss of life and monetary loss for residents</li> <li>• Extreme and/or prolonged freezing temperatures can cause damage to levee and dam pumps throughout the county. This may result in expensive financial repairs.</li> </ul>		

<b>Brazoria County (Unincorporated)</b>			
<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Critical facilities including: 3 fire station, 5 schools, 1 shelter, 2 correctional facilities</li> <li>• All county-owned roadways</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Ice on power lines may lead to power outages throughout the unincorporated areas leading to the 1 shelter being overwhelmed with individuals</li> <li>• Icy roadways may lead to accidents with serious injury or loss of life and financial loss for residents</li> </ul>			

<b>Alvin</b>			
<b>Planning Area (Sq. mi):</b>	25.6	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 29 percent of population are individuals 18 years and younger (7,370 children)</li> <li>• 13 percent of population are individuals 65 and older (3,264 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 42 percent of the total population may face serious illness or health conditions due to low temperatures</li> </ul>			

<b>Angleton</b>			
<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance of the event occurring within a year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 30 percent of population are individuals 18 years and younger (5,793 children)</li> <li>• 13 percent of population are individuals 65 and older (2,540 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 43 percent of the total population may face serious illness or health conditions due to low temperatures</li> </ul>			

<b>Bailey's Prairie</b>			
<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 26 percent of population are individuals 18 years and younger (215 children)</li> <li>• 14 percent of population are individuals 65 and older (114 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 50 percent of the total population may face serious illness or health conditions due to low temperatures</li> </ul>			

<b>Bonney</b>			
<b>Planning Area (Sq. mi):</b>	1.66	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 35 percent of population are individuals 18 years and younger (104 children)</li> <li>• 3 percent of population are individuals 65 and older (8 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 38 percent of the total population may face serious illness or health conditions due to low temperatures</li> </ul>			

<b>Brazoria</b>			
<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 28 percent of population are individuals 18 years and younger (872 children)</li> <li>• 14 percent of population are individuals 65 and older (429 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 32 percent of the total population may face serious illness or health conditions due to low temperatures</li> </ul>			

<b>Brookside Village</b>			
<b>Planning Area (Sq. mi):</b>	2.085	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 25 percent of population are individuals 18 years and younger (419 children)</li> <li>• 15 percent of population are individuals 65 and older (259 older individuals)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 40 percent of the total population may face serious illness or health conditions due to low temperatures</li> </ul>			

<b>Clute</b>			
<b>Planning Area (Sq. mi):</b>	5.6	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b>

<ul style="list-style-type: none"> <li>• An event may lead to damage to levees or pumps throughout the district. This may result in financial loss for the district in time and funds needed to fix a broken structure or equipment, which could lead to a delay in service for the county</li> </ul>			

## Alvin ISD

<b>Planning Area (Sq. mi):</b>	252	<b>Occurrences since 2000:</b>	4
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.15 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Based on past occurrences recorded above, the highest temperature recorded for the planning area is 105 degrees. The planning area can see temperatures from 110 degrees Fahrenheit to 120 degrees Fahrenheit			
<b>Identified Vulnerabilities:</b> <ul style="list-style-type: none"><li>• 22,000 students 18 years and younger</li><li>• Traveling on icy roads to school</li></ul>			
<b>Identified Impacts:</b> <ul style="list-style-type: none"><li>• 100 percent of the identified population may face serious illness or health conditions due to low temperatures</li><li>• School closures may lead to:<ul style="list-style-type: none"><li>○ A financial loss for families needing to find childcare or take off work</li><li>○ Students falling behind in course work</li></ul></li></ul> <p>A potential increase in car crashes/ injuries if school closes during the middle of the day and parents are traveling on icy roads to pick up their students</p>			

## Port Freeport

<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year
<b>Probability:</b> Unlikely; 18 percent chance to occur within a given year.			
<b>Extent:</b> Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2			
<b>Identified Vulnerabilities:</b> <ul style="list-style-type: none"><li>• Over 20 staff and numerous visitors throughout the port</li></ul>			
<b>Identified Impacts:</b> <ul style="list-style-type: none"><li>• Ice or cold conditions may lead to the port closing for a period leading to a potential economic loss for the surrounding areas and state</li><li>• If staff or visitors are present during icy conditions they may fall on ice leading to injury</li></ul>			

## Freeport

<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.18 events a year

**Probability:** Unlikely; 18 percent chance to occur within a given year.

**Extent:** Past events described above demonstrate that the county has experienced a winter weather advisory and an ice damage index of 1; all participating jurisdiction could potentially see a winter storm warning and an Ice Damage Index of 2

**Identified Vulnerabilities:**

- 40 percent of population are individuals 18 years and younger (4,861 children)
- 7 percent of population are individuals 65 and older (836 older individuals)

**Identified Impacts:**

- 47 percent of the total population may face serious illness or health conditions due to low temperatures

# Part 6.8: Hail

## 6.8 Hail

NOAA's National Centers for Environmental Information (NCEI) intensity scale for hail is the typical way to measure the extent for hail storms. This scale considers the size of an individual piece of hail. A hail storm is considered severe if hail reaches one inch in diameter or roughly the size of a quarter.

Size	Hail Diameter (Inches)	Description
H0	1/4	Pea Size
H1	1/2	Small Marble Size
H2	3/4	Penny or Large Marble Size
H3	7/8	Nickel Size
H4	1	Quarter Size
H5	1 1/4	Half Dollar Size
H6	1 1/2	Walnut or Ping Pong Ball Size
H7	1 3/4	Golfball Size
H8	2	Hen Egg Size
H9	2 1/2	Tennis Ball Size
H10	2 3/4	Baseball Size
H11	3	Teacup Size
H12	4	Grapefruit Size
H13	4 1/2	Softball Size

### Historic Occurrences

Since 2000, Brazoria County experienced 47 hail events. Twenty-eight were considered severe (quarter sized and above). Baseball sized hail or size H10 is the largest size hail the County experienced.

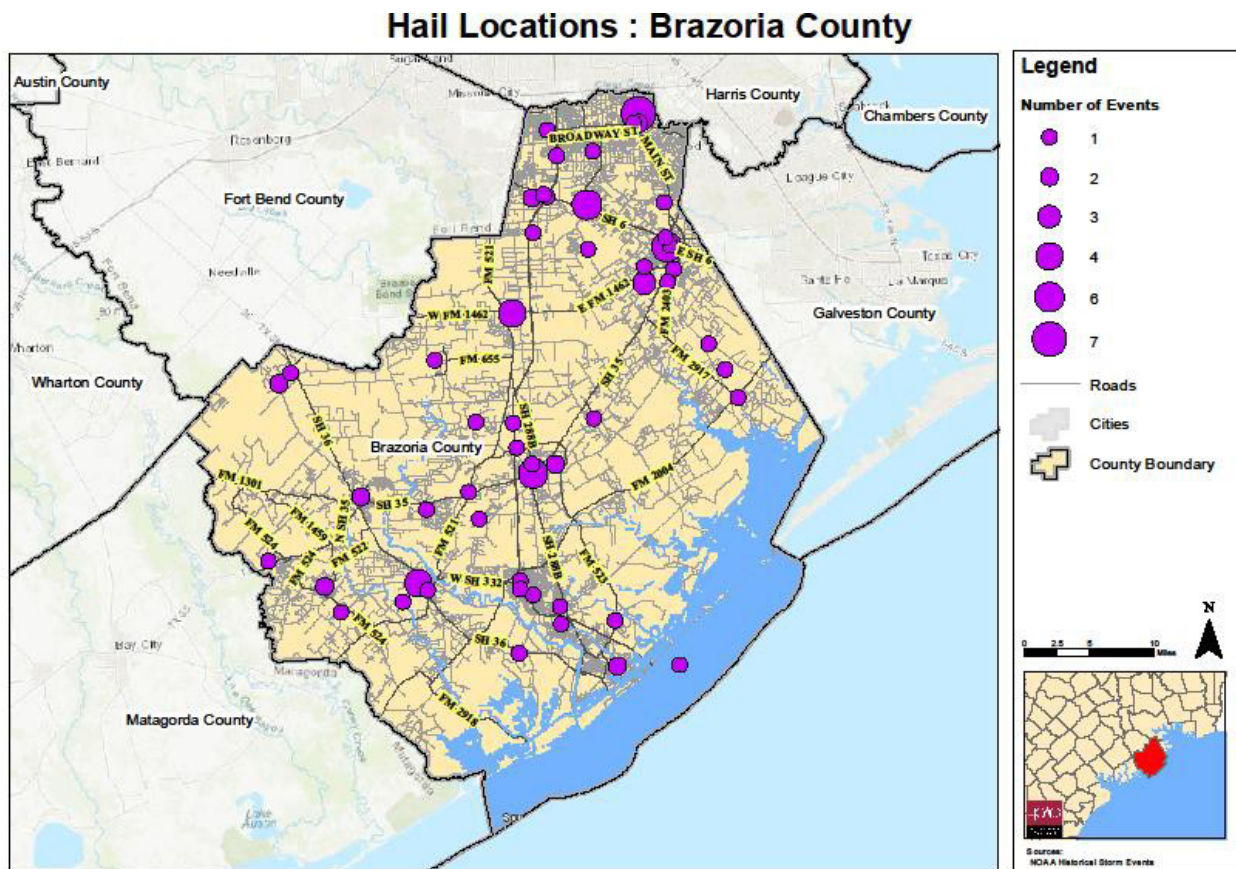

Jurisdiction	Date	Magnitude	Property Damage	Notes
Clute	4/2/2000	1.75	\$50,000	
Alvin	5/2/2000	0.88	\$15,000	
Manvel	5/2/2000	0.88	\$15,000	
Manvel	4/16/2001	0.75	\$10,000	
Manvel	9/21/2001	0.75	\$2,000	Dime size hail at State Highway 288 and County Road 58.
Unincorporated	3/30/2002	1	\$10,000	Quarter sized hail occurred at FM 762 and Meyer Field
Lake Jackson	4/8/2002	0.75	\$5,000	Lake Jackson and Richwood Village received 3/4 inch
Brazoria	4/8/2002	1	\$10,000	Sheriff reported quarter sized Hail at CR 521 in Brazoria.
Alvin	5/30/2002	1.75	\$15,000	CR 435 just south of FM 1462.
Sweeny	8/27/2002	0.75	\$10,000	Dime size hail.
Iowa Colony	12/30/2002	0.75	\$5,000	3/4-inch hail.
Danbury	8/11/2003	0.75	\$3,000	
Alvin	6/5/2004	0.75	\$7,000	
Sweeny	6/14/2004	0.75	\$10,000	
Freeport	7/29/2005	1	\$9,000	
Unincorporated	4/21/2006	0.75	\$2,000	
Unincorporated	4/21/2006	0.75	\$2,000	
Unincorporated	5/14/2006	1	\$8,000	Quarter size hail near FM 521.
Unincorporated	5/14/2006	0.75	\$3,000	

<b>Alvin</b>	10/12/2006	0.75	\$0	Penny-sized hail between Angleton and Alvin.
<b>Bailey's Prairie</b>	3/12/2007	2.5	\$35,000	Quarter to tennis ball size hail between Lake Jackson and Sweeny.
<b>Brazoria</b>	3/12/2007	2.25	\$200,000	Residence and 2 cars damaged by near Tennis ball-size hail. Roof damage to a city facility. 43 vehicles damaged. Damage reported to two other businesses and few homes in Brazoria.
<b>Angleton</b>	3/14/2007	0.75	\$5,000	Penny size hail.
<b>Bailey's Prairie</b>	6/3/2009	1.75	\$2,000	Golfball sized hail was observed near Baileys Prairie.
<b>Iowa Colony</b>	6/6/2011	1.75	\$0	Golf ball size hail fell near the intersection of State Highway 288 and State Highway 6.
<b>Alvin</b>	4/4/2012	1	\$1,000	Quarter sized hail reported in Alvin.
<b>Alvin</b>	4/4/2012	2.75	\$5,000	Baseball sized hail reported along Community Drive in Alvin.
<b>Alvin</b>	4/4/2012	1.75	\$4,000	Golfball sized hail reported at a gas station in Alvin.
<b>Alvin</b>	4/4/2012	1.75	\$4,000	Golfball sized hail reported at Alvin Community College.
<b>Lake Jackson</b>	4/4/2012	1	\$1,000	Quarter sized hail reported in Lake Jackson.
<b>Brazoria</b>	4/4/2012	1.75	\$1,000	Golfball sized hail reported by television viewers in Brazoria.
<b>Unincorporated</b>	4/20/2012	1	\$0	Quarter sized hail reported.
<b>Manvel</b>	3/31/2013	0.75	\$0	The penny size hail was reported in the town of Manvel.
<b>Iowa Colony</b>	4/2/2013	1	\$0	A severe thunderstorm produced quarter sized hail along Highway 6 between Fresno and Manvel.
<b>Iowa Colony</b>	6/8/2013	0.75	\$0	The hail was reported at the intersection of Highway 288 and FM Road 101.
<b>Angleton</b>	4/17/2015	2.5	\$15,000	Egg to tennis ball sized hail was reported in Angleton.
<b>Oyster Creek</b>	4/17/2015	1	\$0	Quarter sized hail was reported at Landers Road.
<b>Angleton</b>	4/17/2015	1	\$0	There were multiple reports of quarter sized hail in and around the Angleton area.
<b>Lake Jackson</b>	4/17/2015	1.5	\$2,000	Ping pong sized hail was observed in the Lake Jackson area.
<b>Unincorporated</b>	4/17/2015	2	\$0	Two-inch hail observed to the west of Danbury along SH 288.
<b>Angleton</b>	4/17/2015	1	\$0	Quarter sized hail was observed in the Angleton area.
<b>Iowa Colony</b>	4/17/2015	1	\$0	Quarter sized hail was observed south of Iowa Colony.
<b>Iowa Colony</b>	4/19/2015	0.88	\$0	Nickel sized hail was reported near the intersection of FM 521 and FM 2234.
<b>Iowa Colony</b>	4/19/2015	1	\$0	Quarter sized hail was reported near the intersection of FM 518 and Kirby Drive.
<b>Manvel</b>	5/26/2015	0.75	\$0	Dime size hail was reported between Manvel and Pearland.
<b>Unincorporated</b>	5/13/2016	1	\$0	Quarter size hail was reported about two miles southeast of Sweeny.
<b>Jones Creek</b>	5/21/2016	1.5	\$2,000	Ping pong ball size hail was observed in Jones Creek from this severe thunderstorm.

# Hail Location Map: Brazoria

Location and quantity of hail events that have occurred throughout the County from 2002 to present.

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within a given year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Information from stakeholders, ACS, and NOAA are the sources of data for the analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- American Community Survey (ACS, 2016, 5-year) data on residential buildings
- GIS analysis of structures and critical facilities exposed to hail damage; and
- Stakeholder identified vulnerabilities

### **Brazoria County (All participating jurisdictions)**

#### **Identified Vulnerabilities:**

- During the county-wide public meeting attendees described critical facilities including emergency response vehicles (fire trucks, ambulances etc.) as vulnerabilities throughout the county.
  - Uncovered parking lots may lead to damaged vehicles
  - Facility's generators located outside may be damaged.
  - Damage to critical facilities, including roof damage or window damage, may occur as well.
- Identified vulnerable populations throughout the county, identified in the county profile, may be more vulnerable financially if they sustain damage to a personal vehicle, property

#### **Identified Impacts:**

- Strong winds or hail could prevent first responders from traveling to assist individuals, because of unsafe driving conditions such as debris hitting emergency vehicles
- Critical facilities could sustain hail damage- windows of response vehicles broken, potentially delaying first responders reaching those in need and city services during and after the event
- Financial loss for individuals whose vehicles or homes are damaged by hail-including cost to repair hail damage and potential financial loss from potential loss of a job because of the lack of transportation to and from their job
- Financial loss for jurisdictions that need to replace damaged buildings or infrastructure, including damaged roofs or equipment

**Brazoria County (Unincorporated)**

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	8
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.47

**Probability:** Likely; 47 percent chance event will occur in a year

**Extent:** According to past events, the jurisdiction has recorded 2-inch hail (H8); the jurisdiction could see H9 to H10 hail in the future.

**Identified Vulnerabilities:**

- Critical facilities including: 3 fire station, 5 schools, 1 shelter, and 2 correctional facilities

**Identified Impacts:**

- Damage to critical facilities and equipment including uncovered emergency vehicles may impede response time and lead to increase loss of life or serious injury

**Alvin**

<b>Planning Area (Sq. mi):</b>	25.6	<b>Occurrences since 2000:</b>	8
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.47

**Probability:** Likely; 47 percent chance event will occur in a year

**Extent:** According to past events, the jurisdiction has recorded 2.75-inch hail (H10); the jurisdiction could see H11 to H12 hail in the future.

**Identified Vulnerabilities:**

- Critical facilities including: 14 schools, 5 electrical substations, 4 fire stations, 2 EMS, 1 wastewater treatment plant, 2 shelters, 6 police stations, and 1 emergency operation center
- 1,431 residential structures at risk

**Identified Impacts:**

- Damage to critical facilities and equipment including uncovered emergency vehicles may impede response time and lead to increase loss of life or serious injury
- Financial loss for individuals whose homes or cars are damaged due to the event
- Economic loss for the city due to public facilities that may be damaged

<b>Angleton</b>			
<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 2000:</b>	4
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.235
<b>Probability:</b> Likely; 23.5 percent chance event will occur in a year			
<b>Extent:</b> According to past events, the jurisdiction has recorded 2.5-inch hail (H9); the jurisdiction could see H10 to H11 hail in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Critical facilities including: 3 correctional facilities, 1 electrical substation, 1 EMS, 2 fire stations, 9 schools, 3 shelters, 9 police stations, and 2 hospitals</li> <li>• 803 residential structures at risk</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Damage to critical facilities and equipment including uncovered emergency vehicles may impede response time and lead to increase loss of life or serious injury</li> <li>• Financial loss for individuals whose homes or cars are damaged due to the event</li> <li>• Economic loss for the city due to public facilities that may be damaged</li> </ul>			

<b>Bailey's Prairie</b>			
<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2000:</b>	2
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.12
<b>Probability:</b> Unlikely; 12 percent chance event will occur in a year			
<b>Damage:</b> According to past events, the jurisdiction has recorded 2.5-inch hail (H9); the jurisdiction could see H10 to H11 hail in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 170 residential structures at risk</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Financial loss for individuals whose homes or cars are damaged due to the event</li> <li>• Economic loss for the city due to public facilities that may be damaged</li> </ul>			

<b>Bonney</b>			
<b>Planning Area (Sq. mi):</b>	1.66	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although there have been no recorded events, hail is not contained to a specific area; the probability of hail can be similar to neighboring jurisdictions. Considering surrounding jurisdictions, the probability is: Likely; 47 percent chance event will occur in a year.			
<b>Extent:</b> In considering surrounding jurisdictions the extent is: the largest hail recorded is 2.75-inch hail (H10); the jurisdiction could see H11 to H12 hail in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 22 residential structures at risk</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Financial loss for individuals whose homes or cars are damaged due to the event</li> <li>• Economic loss for the city due to public facilities that may be damaged</li> </ul>			

<b>Brazoria</b>			
<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.18
<b>Probability:</b> Unlikely; 12 percent chance event will occur in a year			
<b>Extent:</b> According to past events, the jurisdiction has recorded 2.5-inch hail (H9); the jurisdiction could see H10 to H11 hail in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Critical facilities including: 1 correctional facility, 1 electrical substation, 1 EMS, 4 fire stations, 9 schools, 6 shelters, 2 police stations, 2 hospitals, 6 shelters, and 2 emergency operation centers</li> <li>• 282 residential structures at risk</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Damage to critical facilities and equipment including uncovered emergency vehicles may impede response time and lead to increase loss of life or serious injury</li> <li>• Financial loss for individuals whose homes or cars are damaged due to the event</li> <li>• Economic loss for the city due to public facilities that may be damaged</li> </ul>			

<b>Brookside Village</b>			
<b>Planning Area (Sq. mi):</b>	2.085	<b>Occurrences since 2000:</b>	0

## Brazosport ISD

<b>Planning Area (Sq. mi):</b>	200	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0

**Probability:** Although there have been no recorded events, hail is not contained to a specific area; the probability of hail can be similar to neighboring jurisdictions. Considering surrounding jurisdictions, the probability is: Likely; 47 percent chance event will occur in a year.

**Extent:** In considering surrounding jurisdictions the extent is: the largest hail recorded is 2.75-inch hail (H10); the jurisdiction could see H11 to H12 hail in the future.

### Identified Vulnerabilities:

- 19 schools- 10 elementary schools, 3 high schools, 5 middle schools, 1 alternative school
- 12,000 children 18 years and younger

### Identified Impacts:

- Serious injury could occur if students or staff are outside during event
- Financial loss for the school district if buildings are damaged due to hail
- 100 percent of the identified population may face serious illness or health conditions due to low temperatures
- School closures may lead to:
  - A financial loss for families needing to find childcare or take off work
  - Students falling behind in course work
- A potential increase in car crashes/ injuries if school closes during the middle of the day and parents are traveling to pick up their students during a hail event

## Velasco Drainage District

<b>Planning Area (Sq. mi):</b>	236	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** Although there have been no recorded events, hail is not contained to a specific area; the probability of hail can be similar to neighboring jurisdictions. Considering surrounding jurisdictions, the probability is: Likely; 47 percent chance event will occur in a year.

**Extent:** In considering surrounding jurisdictions the extent is: the largest hail recorded is 2.75-inch hail (H10); the jurisdiction could see H11 to H12 hail in the future.

### Identified Vulnerabilities:

- 14 pump stations and administrative building

### Identified Impacts:

- If pump stations are damaged due to hail or administrative building is damaged, there could be a delay in service and a financial loss for the District

## Alvin ISD

<b>Planning Area (Sq. mi):</b>	252	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0

**Probability:** Although there have been no recorded events, hail is not contained to a specific area; the probability of hail can be similar to neighboring jurisdictions. Considering surrounding jurisdictions, the probability is: Likely; 47 percent chance event will occur in a year.

**Extent:** In considering surrounding jurisdictions the extent is: the largest hail recorded is 2.75-inch hail (H10); the jurisdiction could see H11 to H12 hail in the future.

### Identified Vulnerabilities:

- 31 schools- 17 elementary schools, 3 high schools, 6 middle schools, 1 alternative school
- 22,000 children 18 years and younger

### Identified Impacts:

- Serious injury could occur if students or staff are outside during event
- Financial loss for the school district if buildings are damaged due to hail
- School closures may lead to:
  - A financial loss for families needing to find childcare or take off work
  - Students falling behind in course work
- A potential increase in car crashes/ injuries if school closes during the middle of the day and parents are traveling to pick up their students during a hail event

## Port Freeport

<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059

**Probability:** Although there have been no recorded events, Port Freeport is near the City of Freeport. The likelihood of the event happening in the Port maybe similar to the city. Freeport's probability is: Unlikely; 5.9 percent chance event will occur in a year.

**Extent:** Similarly, the City of Freeport's extent is: According to past events, the jurisdiction has recorded 1-inch hail (H2); the jurisdiction could see H3 to H4 hail in the future.

### Identified Vulnerabilities:

- Port facilities, equipment, and administrative buildings

### Identified Impacts:

- Serious injury or loss of life if an event occurs while staff or visitors are at the port
- Financial loss for the port if damage occurs and economic loss for the surrounding cities and state if the port is closed for a prolonged time.

<b>Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059
<b>Probability:</b> Unlikely; 5.9 percent chance event will occur in a year.			
<b>Extent:</b> According to past events, the jurisdiction has recorded 1-inch hail (H2); the jurisdiction could see H3 to H4 hail in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Critical facilities including: 1 correctional facility, 5 electrical substations, 2 EMS, 3 fire stations, 6 schools, 5 shelters, 8 police stations, 1 emergency operations center, 2 wastewater treatment plants, and 1 power plant</li> <li>• 697 residential structures at risk</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Financial loss for individuals whose homes or cars are damaged due to the event</li> <li>• Economic loss for the city due to public facilities that may be damaged</li> </ul>			

# Part 6.9: Tornado

## 6.9 Tornado

Before 2007, tornadoes were ranked through the Fujita Scale. The Enhanced Fujita Scale replaced the Fujita Scale in 2007 and is a set of wind estimates (not measurements) based on damage. The higher the number the more intense the tornado. Both the Fujita Scale and the Enhanced Fujita Scale are below.

Fujita Scale		Enhanced Fujita Scale			Typical Damage
Scale	Fastest 1/4 mile (mph)	3 second gust (mph)	EF Number	3 Second Gust (mph)	
F0	40-72	45-78	0	65-85	Light damage. Peels surface off some roofs; some damage to gutters or siding; branches broken off trees; shallow-rooted trees pushed over.
F1	73-112	79-117	1	86-109	Moderate damage. Roofs severely stripped; mobile homes overturned or badly damaged; loss of exterior doors; windows and other glass broken.
F2	113-157	118-161	2	110-137	Considerable damage. Roofs torn off well-constructed houses; foundations of frame homes shifted; mobile homes destroyed; large trees snapped or uprooted; light-object missiles generated; cars lifted off ground.
F3	158-207	162-209	3	138-167	Severe damage. Entire stories of well-constructed houses destroyed; severe damage to large buildings such as shopping malls; trains overturned; trees debarked; heavy cars lifted off the ground and thrown; structures with weak foundations blown away some distance.
F4	208-260	210-261	4	168-199	Devastating damage. Whole frame houses Well-constructed houses and whole frame houses completely leveled; cars thrown and small missiles generated.
F5	261-318	262-317	5	200-234	Incredible damage. Strong frame houses leveled off foundations and swept away; automobile-sized missiles fly more than 109 yards; high-rise buildings have significant structural deformation; incredible phenomena will occur.

Source: <http://www.spc.noaa.gov/>

## Historic Occurrence

There has been no crop damage or deaths reported due to tornadoes in the county. There have been six injuries reported over the last 17 years due to tornadoes. One injury was reported in the City of Brazoria in 2003. Three injuries were reported in Manvel and two injuries were reported in unincorporated Brazoria County in 2015.

Jurisdiction	Date	Event Type	Magnitude	Property Damage	Notes
<b>Unincorporated</b>	5/2/2000	Tornado	F0	\$25,000	Barn damaged at FM 521 and FM 1462.
<b>Angleton</b>	9/14/2000	Funnel Cloud		\$0	Numerous funnel clouds sighted.
<b>Angleton</b>	9/14/2000	Funnel Cloud		\$0	Numerous funnel clouds sighted.
<b>Quintana</b>	5/7/2001	Funnel Cloud		\$0	
<b>Freeport</b>	5/7/2001	Funnel Cloud		\$0	
<b>Angleton</b>	5/31/2001	Funnel Cloud		\$0	
<b>Manvel</b>	6/5/2001	Tornado	F0	\$40,000	A tornado touched down near Highway 6 and County Road 99, downing trees and damaging one home.
<b>Liverpool</b>	6/5/2001	Funnel Cloud		\$0	
<b>Alvin</b>	8/30/2001	Tornado	F0	\$45,000	Fire Department reported a tornado near FM 2351 and County Road 129. Damage included a few metal roofs torn off buildings and trees down.
<b>Brazoria</b>	8/30/2001	Tornado	F0	\$5,000	tornado touched down 2.5 miles southeast of Wild Peach Village.
<b>Unincorporated</b>	9/4/2001	Funnel Cloud		\$0	A waterspout moved over land as a funnel near Chocolate Bayou and dissipated near Liverpool.
<b>Brazoria</b>	12/12/2001	Tornado	F1	\$200,000	Several homes in the Lazy Oak Ranch Subdivision on CR 461A had roof damage. A machine shop on CR 461 sustained heavy damage, along with the cars and boats in its parking lot. Numerous trees were down from the San Bernard River to the Lazy Oak subdivision.
<b>Brazoria</b>	12/12/2001	Tornado	F0	\$200,000	There was roof and structural damage to homes and businesses, in a 10-block area, along TX Highway 36 in Brazoria. A 175-foot internet tower was blown down, signs were bent over, and minor roof damage to Brazoria Elementary school.
<b>Lake Jackson</b>	9/6/2002	Tornado	F0	\$5,000	Tornado sighted west Lake Jackson and CR 332
<b>West Columbia</b>	9/7/2002	Tornado	F0	\$25,000	Downed trees in West Columbia along Hwy 36.
<b>Iowa Colony</b>	10/9/2003	Tornado	F0	\$2,000	Tornado caused damage to a barn.
<b>Brazoria</b>	11/17/2003	Tornado	F0	\$75,000	Tornado touch down in downtown Brazoria. Roof damage to several buildings along Highway 36 with tree damage in Old Town Brazoria. A semi-trailer was lifted and over-turned on its side at intersection of Road 332 and Highway 36.
<b>Unincorporated</b>	6/30/2004	Funnel Cloud		\$0	Several reports of funnel cloud off FM 521.
<b>Oyster Creek</b>	5/14/2006	Tornado	F0	\$5,000	Tornado sighted by restaurant customers near FM 523 caused minimal damage.
<b>Oyster Creek</b>	4/25/2007	Tornado	EF0	\$0	CR 459 and FM 227 in the community of Demi-John.
<b>Alvin</b>	5/11/2007	Funnel Cloud		\$0	
<b>Angleton</b>	7/1/2007	Funnel Cloud		\$0	
<b>Clute</b>	7/27/2007	Funnel Cloud		\$0	
<b>Unincorporated</b>	7/10/2008	Funnel Cloud		\$0	Sighted near the intersection of FM 521 and CR 32.
<b>Unincorporated</b>	1/9/2012	Tornado	EF0	\$15,000	Damaged a barn and a shed near the Brazos Bend State Park.
<b>Unincorporated</b>	1/9/2012	Tornado	EF0	\$20,000	This EF-0 tornado destroyed a shed and blew off the top of a rice dryer.

<b>Bonney</b>	1/9/2012	Tornado	EF0	\$10,000	This EF-0 tornado rolled over two semi-tractor trailers on Highway 288 near the intersection of Highway 288 and South County Road 48.
<b>Unincorporated</b>	9/12/2012	Funnel Cloud		\$0	At the Brazoria National Wildlife Refuge near the intersection of FM 2004 and FM 523.
<b>Alvin</b>	9/12/2012	Funnel Cloud		\$0	Intersection of Highway 6 and Highway 35.
<b>Alvin</b>	5/28/2014	Funnel Cloud		\$0	Three were reported off of Highway 6 west of the town of Alvin.
<b>Angleton</b>	7/6/2014	Funnel Cloud		\$0	State Highway 35 just to the west of Angleton.
<b>Angleton</b>	7/6/2014	Funnel Cloud		\$0	Just to the north of Angleton.
<b>Unincorporated</b>	7/24/2014	Funnel Cloud		\$0	A funnel cloud was sighted to the east of Danbury.
<b>Bonney</b>	7/24/2014	Funnel Cloud		\$0	Spotted just outside the town of Bonney.
<b>Unincorporated</b>	4/26/2015	Funnel Cloud		\$0	A funnel cloud was sighted in Damon.
<b>Unincorporated</b>	5/5/2015	Funnel Cloud		\$0	Two funnel clouds were sighted.
<b>Unincorporated</b>	5/17/2015	Funnel Cloud		\$0	Near the intersection of FM 2004 and FM 2917.
<b>Jones Creek</b>	10/31/2015	Tornado	EF1	\$50,000	One mile southwest south of Jones Creek where it uprooted several large trees. The tornado then crossed Highway 36 and severely damaged a mobile home just north of the roadway. Estimated peak wind speed was 90 mph.
<b>Lake Jackson</b>	10/31/2015	Tornado	EF0	\$50,000	Tracked from a subdivision south of the Brazos Mall knocking down fences and shallow rooted trees. It then continued into a subdivision to the northeast of the mall uprooting several large trees. Estimated peak wind speed was 85 mph.
<b>Unincorporated</b>	10/31/2015	Tornado	EF0	\$50,000	In a field south of Liverpool and damaged a cattle handling area. The tornado tracked into the town of Liverpool and produced minor damage to trees and structures. The tornado lifted north of town. The estimated peak wind was 80 mph.
<b>Angleton</b>	10/31/2015	Tornado	EF0	\$200,000	Severely damaged a farm house and barn then flipped three trailers over at an RV park before weakening. Estimated peak wind was 90 mph.
<b>Manvel</b>	10/31/2015	Tornado	EF1	\$50,000	Tracked along Wink Road. The tornado injured 3 people as it destroyed one mobile home and damaged several other mobile homes. The estimated peak wind was 100 mph.
<b>Unincorporated</b>	10/31/2015	Tornado	EF1	\$200,000	Damaged 15 to 20 trailers and overturned 1 trailer. An elderly couple sustained injuries in the overturned trailer. The estimated peak wind was 90 mph.
<b>Unincorporated</b>	10/31/2015	Tornado	EF2	\$2,000,000	Down just east of Clover Field Airport. Expanded in size and weakened in intensity as it approached FM 518 over the last half of its track. There was extensive tree damage along the entire track. Estimated peak wind was 115 mph.
<b>Unincorporated</b>	10/31/2015	Tornado	EF2	\$2,000,000	East of Clover Field Airport. This tornado expanded in size and weakened in intensity as it approached FM 518 over the last half of its track. There was extensive tree damage along the entire track. Estimated peak wind was 115 mph.
<b>Sweeny</b>	2/14/2017	Tornado	EF0	\$100,000	Along CR 321 and intersection of FM 524 and CR 321. Damage was mainly to trees and power lines. Estimated peak winds were 75 mph.
<b>Unincorporated</b>	3/5/2017	Tornado	EF0	\$0	Touched down around FM 2611 and CR 659.
<b>Unincorporated</b>	5/22/2017	Tornado	EF0	\$200,000	Damaged a porch roof in the back of a home, destroyed a pump house and damaged a trailer, and knocked over several trees.
<b>Liverpool</b>	5/22/2017	Funnel Cloud		\$0	Funnel cloud was sighted in the Liverpool area.

<b>Unincorporated</b>	8/25/2017	Tornado	EF0	\$30,000	Touched down near HWY 36 with numerous trees snapped or downed. Barn also damaged.
<b>Bailey's Prairie</b>	8/25/2017	Tornado	EF0	\$100,000	East of West Columbia damaging trees, roofs, and outbuildings off of highway 35. A barn and several outbuildings were also destroyed on the east side of the Brazos River. Property was flooded.
<b>Oyster Creek</b>	8/25/2017	Funnel Cloud		\$0	
<b>Danbury</b>	8/25/2017	Tornado	EF0	\$100,000	Damaged a barn along with several trees off of County Road 207. Crossed Hwy 35. Snapped and/or downed several trees along County Rd 45 before lifting at the Crocodile Encounter on County Rd 48.
<b>Liverpool</b>	8/25/2017	Tornado	EF0	\$50,000	West of Liverpool. 4 power poles downed on highway 35 along with trees near the Gulf Coast Speedway. Damaged some barns and outbuildings as well as trees on County Road 511.
<b>Iowa Colony</b>	8/25/2017	Tornado	EF0	\$500,000	It struck a new subdivision along county road 56 and highway 288. Roofs and fences were damaged and several trees snapped and/or downed.

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within a given year. The analysis calculates the average number of events in each jurisdiction annually and then calculates the percent chance of the event occurring within a year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Information from stakeholders and NOAA are the sources of data for the analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- American Community Survey (5-year, 2016)
- GIS analysis of structures exposed to tornado damage; and
- Stakeholder identified vulnerabilities.

### **Brazoria County (All participating jurisdictions)**

#### **Identified Vulnerabilities:**

Similar to the hurricane section, this section identifies vulnerabilities from high winds. High winds can tear down powerlines, trees, barns, fences, and multitude of other debris can be blown into roadways and homes during the event.

Additionally, residences and commercial buildings could be damaged or destroyed due to wind events; older residential neighborhoods and structures without a permanent foundation were identified as one of the main vulnerabilities throughout the county. While current building codes address the vulnerability of wind damage to structures, older buildings (particularly residential buildings) were built when less stringent building codes were in place; therefore, older residential building and residences without a permanent foundation are a focus in this section.

#### **Identified Impacts:**

- Downed powerlines could impact communication and daily active leading to a financial loss for the county, cities and individuals, and could impede first responders from reaching those in need or residents evacuating
- Strong winds could prevent first responders from traveling to assist individuals, because of unsafe driving conditions such as debris hitting emergency vehicles
- Critical facilities could sustain wind damage, potentially delaying first responders reaching those in need and city services during and after the event
- Economic and financial loss for cities and individuals including property loss

**Brazoria County (Unincorporated)**

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	18
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	1.06
<b>Probability:</b> Highly Likely; 100 percent chance of event occurring in each year			
<b>Extent:</b> According to past events, the strongest tornado was an EF1; the jurisdiction can see an EF1 to EF2 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Critical facilities including: 3 fire station, 5 schools, 1 shelter, 2 correctional facilities</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Critical facilities and equipment could be damaged with windows broken or roofs blown off or destroyed by high winds</li> <li>• First responders could be delayed, this may increase serious injury or loss of life throughout the county</li> </ul>			

**Alvin**

<b>Planning Area (Sq. mi):</b>	25.6	<b>Occurrences since 2000:</b>	4
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.24
<b>Probability:</b> Likely; 24 percent chance occurring within a given year			
<b>Extent:</b> According to past events, the strongest tornado was an F0 (EF0); the jurisdiction can see a EF1 to EF2 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 6,275 Residential buildings built before 1980 (65.8% of housing stock)</li> <li>• 1,334 Mobile Homes (14% of housing stock)</li> <li>• 42 Boats/ RVs/ Vans acting as main housing (.4 % of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Almost 81 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Angleton</b>			
<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 2000:</b>	7
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.41
<b>Probability:</b> Likely; 41 percent chance of event occurring in each year			
<b>Extent:</b> According to past events, the strongest tornado was an EF0; the jurisdiction can see a EF1 to EF2 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 6,426 Residential buildings built before 1980 (80 % of housing stock)</li> <li>• 685 Mobile Homes (8.5 % of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Almost 90 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Bailey's Prairie</b>			
<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059
<b>Probability:</b> Unlikely; 5.9 percent chance of event occurring in a year			
<b>Extent:</b> According to past events, the strongest tornado was an EF0; the jurisdiction can see a EF1 to EF2 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 82 Residential buildings built before 1980 (85.5% of housing stock)</li> <li>• 22 Mobile Homes (22.9% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Bonney</b>			
<b>Planning Area (Sq. mi):</b>	1.66	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059
<b>Probability:</b> Unlikely; 5.9 percent chance of event occurring in a year			
<b>Extent:</b> According to past events, the strongest tornado was a funnel cloud; the jurisdiction can see a EF0 to EF1 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 107 Residential buildings built before 1980 (73.1% of housing stock)</li> <li>• 30 Mobile Homes (20.5% of housing stock)</li> <li>• 4 Boats/ RVs/ Vans acting as main housing (2.7% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 96 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Brazoria</b>			
<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2000:</b>	4
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.24
<b>Probability:</b> Likely; 24 percent chance occurring within a given year			
<b>Extent:</b> According to past events, the strongest tornado was an F1(EF1); the jurisdiction can see a EF2 to EF3 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 1,129 Residential buildings built before 1980 (80% of housing stock)</li> <li>• 144 Mobile Homes (10.2% of housing stock)</li> <li>• 14 Boats/ RVs/ Vans acting as main housing (1% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 91 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Brookside Village</b>			
<b>Planning Area (Sq. mi):</b>	2.085	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is near Manvel perhaps the jurisdiction has a similar likelihood that the event will occur Manvel's probability is: Unlikely; 12 percent chance event will occur in each year.			
<b>Extent:</b> Similarly, Manvel's extent is: According to past events, the strongest tornado was an EF0; the jurisdiction can see a EF2 to EF3 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 480 Residential buildings built before 1980 (79.1% of housing stock)</li> <li>• 7 Mobile Homes (1.2% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Almost 81 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Clute</b>			
<b>Planning Area (Sq. mi):</b>	5.6	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059
<b>Probability:</b> Unlikely; 5.9 percent chance of event occurring in a year			
<b>Extent:</b> According to past events, the strongest event was a funnel cloud; the jurisdiction can see a EF10 to EF1 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 3,347 Residential buildings built before 1980 (64.8% of housing stock)</li> <li>• 312 Mobile Homes (6% of housing stock)</li> <li>• 26 Boats/ RVs/ Vans acting as main housing (.5% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Approximately 71 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>

<b>Jones Creek</b>			
<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059
<b>Probability:</b> Unlikely; 5.9 percent chance of event occurring in a year			
<b>Extent:</b> According to past events, the strongest tornado was an EF1; the jurisdiction can see a EF2 to EF3 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 3,347 Residential buildings built before 1980 (64.8% of housing stock)</li> <li>• 165 Mobile Homes (19.1% of housing stock)</li> <li>• 4 Boats/ RVs/ Van acting as main housing (.5% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• About 85 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Lake Jackson</b>			
<b>Planning Area (Sq. mi):</b>	20.9	<b>Occurrences since 2000:</b>	2
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.12
<b>Probability:</b> Unlikely; 12 percent chance event will occur in each year			
<b>Extent:</b> According to past events, the strongest tornado was an EF0; the jurisdiction can see a EF1 to EF2 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 8,272 Residential buildings built before 1980 (70.1% of housing stock)</li> <li>• 6 Mobile Homes (.1% of housing stock)</li> <li>• 9 Boats/ RVs/ Vans acting as main housing (.1% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• About 71 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Liverpool</b>			
<b>Planning Area (Sq. mi):</b>	1.1	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.18
<b>Probability:</b> Unlikely; 18 percent chance event will occur in each year			
<b>Extent:</b> According to past events, the strongest tornado was an EF0; the jurisdiction can see a EF1 to EF2 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 177 Residential buildings built before 1980 (72.2% of housing stock)</li> <li>• 37 Mobile Homes (15.1% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Approximately, 87 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Manvel</b>			
<b>Planning Area (Sq. mi):</b>	23.6	<b>Occurrences since 2000:</b>	2
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.12
<b>Probability:</b> Unlikely; 12 percent chance event will occur in each year			
<b>Extent:</b> According to past events, the strongest tornado was an EF0; the jurisdiction can see a EF2 to EF3 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 971 Residential buildings built before 1980 (32.8% of housing stock)</li> <li>• 329 Mobile Homes (11.1% of housing stock)</li> <li>• 77 Boats/ RVs/ Van acting as main housing (2.6% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

## Oyster Creek

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	3
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.18

**Probability:** Unlikely; 18 percent chance event will occur in each year

**Extent:** According to past events, the strongest tornado was an EF0; the jurisdiction can see a EF1 to EF2 in the future.

### Identified Vulnerabilities:

- 356 Residential buildings built before 1980 (68.6% of housing stock)
- 231 Mobile Homes (44.5% of housing stock)
- 23 Boats/ RVs/ Vans acting as main housing (4.4% of housing stock)

### Identified Impacts:

- 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Quintana

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059

**Probability:** Unlikely; 5.9 percent chance of event occurring in a year

**Extent:** According to past events, the strongest event was a funnel cloud; the jurisdiction can see an EF0 to EF1 in the future.

### Identified Vulnerabilities:

- 554 Residential buildings built before 1980 (83.9% of housing stock)
- 59 Mobile Homes (8.9% of housing stock)

### Identified Impacts:

- About 94 percent of the housing stock was either built before 1980 or does not have a permanent foundation this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

<b>Richwood</b>			
<b>Planning Area (Sq. mi):</b>	3.1	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is near Clute. Perhaps Richwood has a similar likelihood that the event will occur. Clute's probability is: Unlikely; 5.9 percent chance to occur within a given year.			
<b>Extent:</b> Similarly, Clute's extent is: According to past events, the strongest event was a funnel cloud; the jurisdiction can see a EF10 to EF1 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 356 Residential buildings built before 1980 (68.6% of housing stock)</li> <li>• 231 Mobile Homes (44.5% of housing stock)</li> <li>• 23 Boats/ RVs/ Vans acting as main housing (4.4% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 100 percent of the housing stock was either built before 1980 or does not have a permanent foundation this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Surfside Beach</b>			
<b>Planning Area (Sq. mi):</b>	2.2	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Although there have been no recorded events, the city of Surfside is near the jurisdiction of Quintana which has experienced one tornado; the probability maybe like Quintana's which is: Unlikely; 5.9 percent chance of event occurring in a year.			
<b>Extent:</b> Similarly, Surfside Beach's extent maybe like Quintana's which is: According to past events, the strongest event was a funnel cloud; the jurisdiction can see an EF0 to EF1 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 356 Residential buildings built before 1980 (68.6% of housing stock)</li> <li>• 231 Mobile Homes (44.5% of housing stock)</li> <li>• 23 Boats/ RVs/ Van acting as main housing (4.4% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 72 percent of the housing stock was either built before 1980; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Sweeny and Sweeny ISD</b>			
<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059
<b>Probability:</b> Unlikely; 5.9 percent chance of event occurring in a year			
<b>Extent:</b> According to past events, the strongest tornado was an F0; the jurisdiction can see a EF1 to EF2 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 1,220 Residential buildings built before 1980 (73% of housing stock)</li> <li>• 127 Mobile Homes (7.6% of housing stock)</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• 81 percent of the housing stock was either built before 1980 or does not have a permanent foundation this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>West Columbia</b>			
<b>Planning Area (Sq. mi):</b>	2.58	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	.059
<b>Probability:</b> Unlikely; 5.9 percent chance of event occurring in a year			
<b>Extent:</b> According to past events, the strongest tornado was an F0 (EF0); the jurisdiction can see a EF1 to EF2 in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 1,447 Residential buildings built before 1980 (88.3% of housing stock)</li> <li>• 38 Mobile Homes (2.3% of housing stock)</li> </ul>			
<b>Identified Impacts</b>			
<ul style="list-style-type: none"> <li>• About 92 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.</li> </ul>			

<b>Brazosport ISD</b>			
<b>Planning Area (Sq. mi):</b>	200	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<p><b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is throughout Brazoria County. Perhaps the ISD has a similar likelihood that the event will occur as unincorporated areas of the county. Brazoria County unincorporated area's probability is: Very Likely; 100 percent chance event will occur in a year.</p>			
<p><b>Extent:</b> Similarly, Brazoria's extent is: According to past events, the strongest tornado was an EF1; the jurisdiction can see an EF1 to EF2 in the future.</p>			
<p><b>Identified Vulnerabilities:</b></p> <ul style="list-style-type: none"> <li>• 12,000 students</li> <li>• 19 schools- 10 elementary schools, 3 high schools, 5 middle schools, 1 alternative school</li> </ul> <p><b>Identified Impacts:</b></p> <ul style="list-style-type: none"> <li>• Serious injury or loss of life if an event occurs during school hours or during extracurricular activities</li> <li>• Financial loss for the school district if any of the schools or administrative buildings are damaged due to the event.</li> <li>• School closures due to damage or during the day of the event may lead to: <ul style="list-style-type: none"> <li>○ A financial loss for families needing to find childcare or take off work</li> <li>○ Students falling behind in course work</li> </ul> </li> <li>• A potential increase in car crashes/ injuries if school closes during the middle of the day and parents are traveling to pick up their students during an event</li> </ul>			

<b>Velasco Drainage District</b>			
<b>Planning Area (Sq. mi):</b>	236	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<p><b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is throughout Brazoria County. Perhaps the district has a similar likelihood that the event will occur as unincorporated areas of the county. Brazoria County unincorporated area's probability is: Very Likely; 100 percent chance event will occur in a year.</p>			
<p><b>Extent:</b> Similarly, Brazoria's extent is: According to past events, the strongest tornado was an EF1; the jurisdiction can see an EF1 to EF2 in the future.</p>			
<p><b>Identified Vulnerabilities:</b></p> <ul style="list-style-type: none"> <li>• Administrative building 14 pump stations and levees throughout the district</li> </ul> <p><b>Identified Impacts:</b></p> <ul style="list-style-type: none"> <li>• Financial loss for the district if buildings, equipment or levees are damaged during the event</li> </ul>			

## Alvin ISD

<b>Planning Area (Sq. mi):</b>	256	<b>Occurrences since 1871:</b>	0
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0
<p><b>Probability:</b> Although the jurisdiction has no recorded events, the jurisdiction is throughout Brazoria County. Perhaps the ISD has a similar likelihood that the event will occur as unincorporated areas of the county. Brazoria County unincorporated area's probability is: Very Likely; 100 percent chance event will occur in a year.</p>			
<p><b>Extent:</b> Similarly, Brazoria's extent is: According to past events, the strongest tornado was an EF1; the jurisdiction can see an EF1 to EF2 in the future.</p>			
<p><b>Identified Vulnerabilities:</b></p> <ul style="list-style-type: none"> <li>• 31 schools- 17 elementary schools, 3 high schools, 6 middle schools, 1 alternative school</li> <li>• 22,000 children 18 years and younger, adds an additional 1,000 students per year</li> </ul>			
<p><b>Identified Impacts:</b></p> <ul style="list-style-type: none"> <li>• Serious injury or loss of life if an event occurs during school hours or during extracurricular activities</li> <li>• Financial loss for the school district if any of the schools or administrative buildings are damaged due to the event.</li> <li>• School closures due to damage or during the day of the event may lead to: <ul style="list-style-type: none"> <li>○ A financial loss for families needing to find childcare or take off work</li> <li>○ Students falling behind in course work</li> </ul> </li> <li>• A potential increase in car crashes/ injuries if school closes during the middle of the day and parents are traveling to pick up their students during an event</li> </ul>			

## Port Freeport

<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	100%	<b>Annual Event Average:</b>	0
<p><b>Probability:</b> Although there have been no recorded events, the Port of Freeport is near the jurisdiction of Freeport which has experienced one tornado; the probability maybe like Freeport's which is: Unlikely; 5.9 percent chance of event occurring in a year</p>			
<p><b>Extent:</b> Similarly, the Port of Freeport's extent maybe like the Jurisdiction of Freeport's which is: According to past events, the strongest event was a funnel cloud; the jurisdiction can see an EF0 to EF1 in the future.</p>			
<p><b>Identified Vulnerabilities:</b></p> <ul style="list-style-type: none"> <li>• Port facilities, equipment, and administrative buildings</li> </ul>			
<p><b>Identified Impacts:</b></p> <ul style="list-style-type: none"> <li>• Serious injury or loss of life if an event occurs while staff or visitors are at the port</li> <li>• Financial loss for the port if damage occurs and economic loss for the surrounding cities and state if the port is closed for a prolonged time.</li> </ul>			

## Freeport

<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	.059

**Probability:** Unlikely; 5.9 percent chance of event occurring in a year

**Extent:** According to past events, the strongest event was a funnel cloud; the jurisdiction can see an EF0 to EF1 in the future.

### Identified Vulnerabilities:

- 4,004 Residential buildings built before 1980 (82.9% of housing stock)
- 229 Mobile Homes (4.9% of housing stock)

### Identified Impacts:

- About 88 percent of the housing stock was either built before 1980 or does not have a permanent foundation; this may lead to an increase in home damage, a financial loss for residents, and a potential increase in serious injuries or loss of life throughout the jurisdiction.

## Part 6.10: Dam & Levee Failure

## 6.10 Dam and Levee Failure

According to FEMA’s Federal Guidelines for Dam Safety: Hazard Potential Classification System for Dams, extent is measured through judging the potential for human, economic, lifeline, and environmental loss.

Hazard Potential Classification	Loss of Human Life	Economic, Environmental, Lifeline Losses
Low	None Expected	Low and generally limited to owner
Significant	None Expected	Yes
High	Probable. One or more expected.	Yes (But not necessary for this classification)

Source: <https://www.fema.gov/>

### Historic Occurrence

Brazoria County does not have any dam or levee failures identified since 2000. There was a levee breach near West Columbia in a neighborhood to the north, Columbia Lakes, during Hurricane Harvey on August 27<sup>th</sup>, 2017. While this levee protects hundreds of homes and during this event the county evacuated these neighborhoods and residents to the south-east, this incident was not a levee break. The breached levee increased flooding in the nearby neighborhoods.

There are 51 known dams and levees in Brazoria County. These dams are maintained by public, state, federal, local, or partnering entities. All dams have been classified as 'Low' in the hazard potential classification.

Jurisdiction	Name	Hazard Potential Classification
Unincorporated County	Beal Reservoir Levee	Low
Unincorporated County	Black Ranch Lake Levee	Low
Unincorporated County	Brazos River Club Levee	Low
Unincorporated County	Mallard Lake Club Dam	Low
Alvin	Division Lake Levee	Low

Unincorporated County	Lagoon Reservoir Dam	Low
Unincorporated County	Live Oak 1 Levee	Low
Unincorporated County	Live Oak 2 Levee	Low
Unincorporated County	Pappas Lakes and Lodge Levee	Low
Alvin	Amoco Chemicals Reservoir Levee	Low
Unincorporated County	Dingle Lake 2 Levee	Low
Unincorporated County	Mustang Lake East Dam	Low
Unincorporated County	Mustang Lake West Dam	Low

# Hazard Analysis & Vulnerability Identification

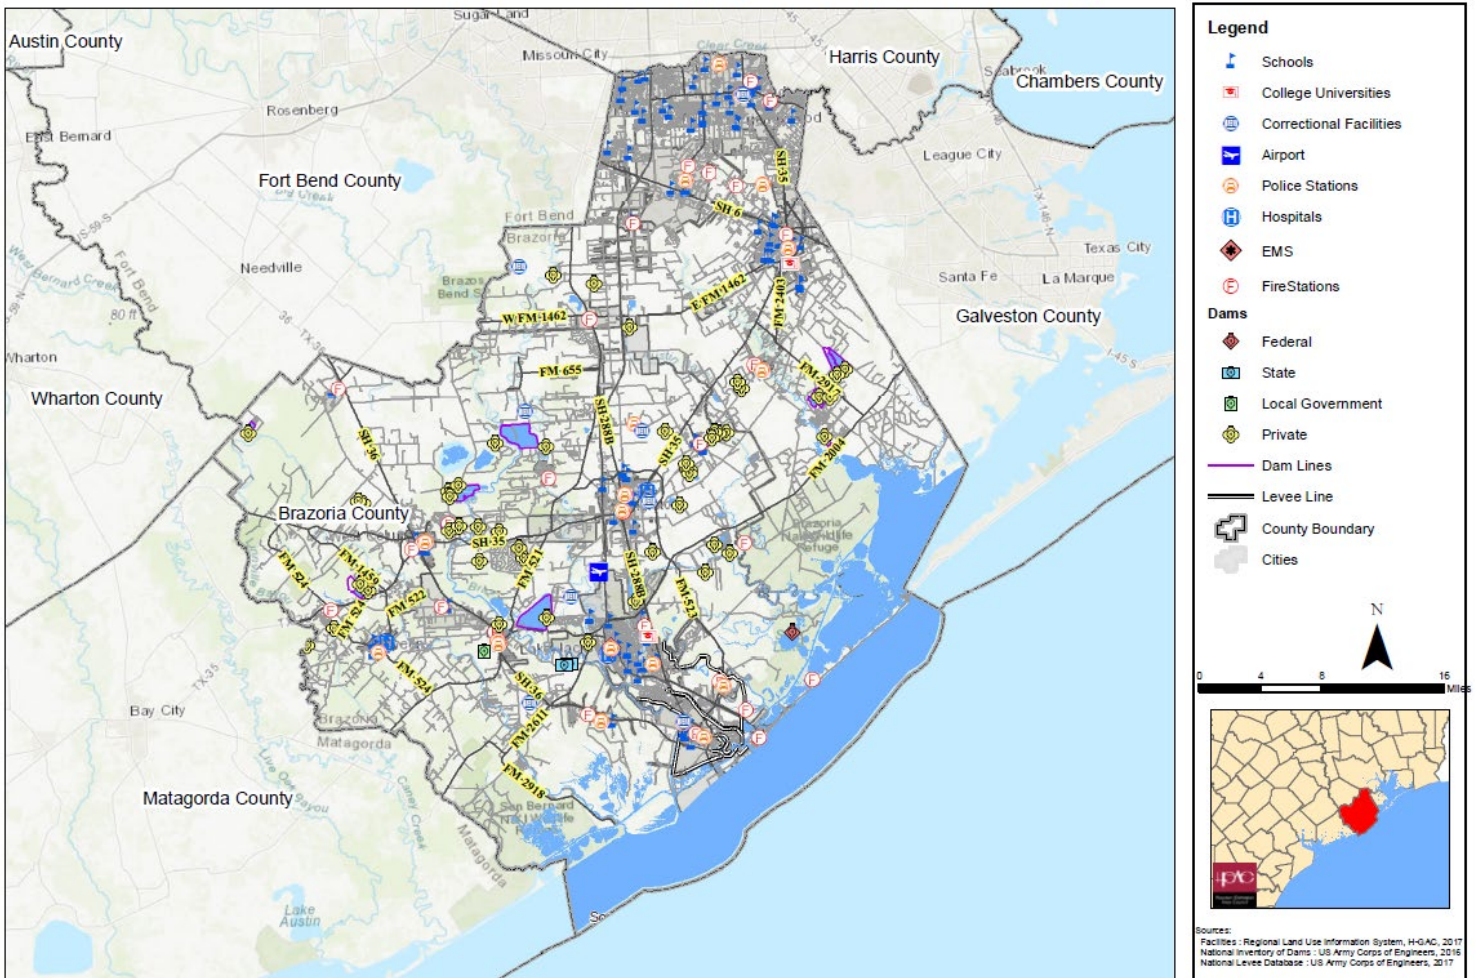

A data deficiency exists for dams throughout the county. An inundation map and modeling a dam failure could not be completed with current information available. More research and information regarding dams is needed and is included as a mitigation action in this plan.

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within the next five years. The analysis calculates the average number of events in each jurisdiction annually and then multiplies by five. With no recorded occurrences in the last 17 years and limited data there is unknown information.

The hazard analysis also provides hazard extent data for each affected jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Information from stakeholders, FEMA, and H-GAC's critical facilities database were used for this analysis.

Only the communities at risk of experiencing impacts from a dam or levee failure are profiled. Those jurisdictions include Unincorporated Brazoria County, Holiday Lakes, West Columbia, Bailey's Prairie, Brazoria, Freeport, Port of Freeport, and Oyster Creek. The remaining jurisdictions participating in this plan are not at risk for dam and failure and will not be profiled.

## Dam & Levee Map : Brazoria County

## **Brazoria County (All Jurisdictions)**

### **Identified Vulnerabilities:**

As described in the hazard identification section, there are no records of failed dams or levees in the county and no available inundation maps. For the purposes of this plan, all immediately downstream critical facilities, residences, and human life will be treated as vulnerable to dam and levee failures. Each dam and levee has a low hazard classification, and some flooding can be expected in the event of a complete or partial failure. Because of the low hazard classification, this analysis only considered structures and property within 1 mile of dams and levees. Based on this assumption, the following vulnerabilities have been identified:

- 667 residences immediately downstream of dam and levees are considered vulnerable.
- Approximately 1,057 acres of agricultural land is vulnerable
- 84 downstream critical facilities are vulnerable to a dam and levee failure

### **Potential Impacts:**

- Residential, commercial, and public property loss throughout the county due to flooding in localized areas or throughout the county
- In total, 631,021 acres in total throughout the county in farmland at risk of flooding due to a dam or levee failure
- Mass evacuations during a levee breach or failure may strain shelters throughout the county or may create a potential for an increase in car accidents leading to serious injury or financial loss for residents throughout the county
- Destroyed powerlines or electrical substations may lead to a loss of communication for a particular jurisdiction or for a large portion of the county. This could lead to an inability to reach people in need.
- In the instance that flooding occurs at critical facility without a generator or the generator does not work, critical facilities could lose power and may not be usable due to flooding or power outage. This may slow down first responders and allow for a greater loss of life, injury, or property damage particularly when dam or levee failure is accompanied by other hazardous events.

**Brazoria County (Unincorporated)**

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	6%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Not Likely, Less than 10% chance event will occur within the next 5 years			
<b>Greatest Extent of Damage:</b> Complete failure of dam and levees during major rain event.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 312 residential structures</li> <li>• Vulnerable populations are concentrated near the coast near the San Bernard Wildlife Refuge</li> <li>• Critical facilities including: 3 fire station, 5 schools, 1 shelter, 2 correctional facilities</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Expensive repairs and rebuilding associated with flooding of properties and structures.</li> </ul>			

**Bailey's Prairie**

<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	6%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Not Likely, Less than 10% chance event will occur within the next 5 years			
<b>Greatest Extent of Damage:</b> Complete failure of dam and levees during major rain event.

<ul style="list-style-type: none"> <li>• Expensive repairs and rebuilding associated with flooding of properties and structures.</li> </ul>			

<b>West Columbia</b>			
<b>Planning Area (Sq. mi):</b>	2.58	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	27%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Not Likely, Less than 10% chance event will occur within the next 5 years			
<b>Greatest Extent of Damage:</b> Complete failure of dam and levees during major rain event.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Critical facilities including: 1 electrical substation, 1 EMS, 1 fire station, 3 schools, 3 shelters, 4 police stations, and 1 powerplant</li> <li>• 66 residential structures at risk</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Expensive repairs and rebuilding associated with flooding of properties and structures.</li> </ul>			

<b>Port Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	45%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Not Likely, Less than 10% chance event will occur within the next 5 years			
<b>Greatest Extent of Damage:</b> Complete failure of dam and levees during major rain event.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Administrative buildings, cargo ships, equipment, semi-trucks</li> <li>• Over 20 staff and visitors at the port</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Expensive repairs and rebuilding associated with flooding of properties and structures.</li> <li>• Economic losses would also be expected if port activities were to be halted due to levee failures.</li> <li>• Loss of staff wages due to closing of port.</li> </ul>			

<b>Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	33%	<b>Annual Event Average:</b>	0
<b>Probability:</b> Not Likely, Less than 10% chance event will occur within the next 5 years			
<b>Greatest Extent of Damage:</b> Complete failure of dam and levees during major rain event.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Critical facilities including: 1 correctional facility, 5 electrical substations, 2 EMS, 3 fire stations, 6 schools, 5 shelters, 8 police stations, 1 emergency operations center, 2 wastewater treatment plants, and 1 power plant</li> <li>• 230 residential structures exposed to hazard</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Expensive repairs and rebuilding associated with flooding of properties and structures.</li> </ul>			

# Part 6.11: Expansive Soils

## 6.11 Expansive Soils

The chart below shows the Linear Extensibility Percent (LEP) and Coefficient of Linear Extent (COLE) to show the Shrink-Swell Class of expansive soils. COLE is a test frequently used to characterize expansive soils. COLE is a measure expressed as a fraction of the change in a soil sample dimension from the moist to dry state. The LEP is a measure expressed as a percentage of the change in a soil sample dimension from the moist to dry state. The Shrink-Swell Class is found in comparing these two measurements. A Moderate to Very High rating marks soils that have the potential to contract and expand, leading to broken foundations and water pipes, for example.

Shrink-Swell Class	Linear Extensibility Percent (LEP)	Coefficient of Linear Extent (COLE)
Low	3	0.03
Moderate	3 to 6	.03-.06
High	6 to 9	.06-.09
Very High	Greater than or equal to 9	Greater than or equal to 0.09

## Hazard Analysis & Vulnerability Identification

The hazard analysis provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. A data deficiency for "Occurrences" was addressed by assigning 1 occurrence for any jurisdiction that had Moderate to High shrink swell classes.

Information from stakeholders, USDA's Natural Resource Conservation Services, and H-GAC's critical facilities database were used for this analysis.

To identify vulnerabilities for each jurisdiction, this plan used the following methods:

- American Community Survey (ACS 2016, 5 year) data on residential structures
- GIS analysis of structures within the high to very high shrink swell classes; and
- Stakeholder identified vulnerabilities.

### Brazoria County (All Jurisdictions)

#### Identified Vulnerabilities:

Broken foundations and water pipes in commercial and residential buildings and public property. While newer buildings can be impacted; older buildings including critical facilities and homes are more likely to be impacted; this is due to older buildings being exposed to numerous weather events and seasons, having building standards that do not take expansive soils into account, and the lack of engineering solutions to mitigate expansive soils in the past. Therefore, the vulnerabilities focus on older buildings in each of the jurisdictions.

#### Identified Impacts:

Jurisdictions can be impacted by expensive financial costs to repair foundations and water lines for public facilities. School districts, home owners, and business owners could also be impacted by broken pipes, cracked foundations, and other structural repairs caused by expanding and contracting soils. Pipes in critical facilities may also lead to a loss of service, or damaged roads/bridges can increase response time to get to someone in need.

### Brazoria County (Unincorporated)

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	85%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

#### Identified Vulnerabilities:

- Critical facilities including: 3 fire station, 5 schools, 1 shelter, and 2 correctional facilities

#### Identified Impacts:

- Financial cost to county to repair foundations for public facilities
- Cracked pipes in critical facilities may lead to a loss of service or increased response time to get to someone in need.

## Alvin

<b>Planning Area (Sq. mi):</b>	25.6	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 6,275 Residential buildings built before 1980 (65.8% of housing stock)
- Critical facilities including: 14 schools, 5 electrical substations, 4 fire stations, 2 EMS, 1 wastewater treatment plant, 2 shelters, 6 police stations, and 1 emergency operation center

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responders take to get to someone in need.

## Angleton

<b>Planning Area (Sq. mi):</b>	11.27	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 6,426 Residential buildings built before 1980 (80 % of housing stock)
- Critical facilities including: 3 correctional facilities, 1 electrical substation, 1 EMS, 2 fire stations, 9 schools, 3 shelters, 9 police stations, and 2 hospitals

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Bailey's Prairie

<b>Planning Area (Sq. mi):</b>	7.7	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 82 Residential buildings built before 1980 (85.5% of housing stock)

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Bonney

<b>Planning Area (Sq. mi):</b>	1.66	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75 %	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 107 Residential buildings built before 1980 (73.1% of housing stock)

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities

## Brazoria

<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 1,129 Residential buildings built before 1980 (80% of housing stock)
- Critical facilities including: 1 correctional facility, 1 electrical substation, 1 EMS, 4 fire stations, 9 schools, 6 shelters, 2 police stations, 2 hospitals, 6 shelters, and 2 emergency operation centers

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Brookside Village

<b>Planning Area (Sq. mi):</b>	2.085	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	50%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 480 Residential buildings built before 1980 (79.1% of housing stock)
- 1 police station

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

<b>Clute</b>			
<b>Planning Area (Sq. mi):</b>	5.6	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75 %	<b>Annual Event Average:</b>	.06
<b>Probability:</b> Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.			
<b>Extent:</b> Based off Brazoria County’s expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 3,347 Residential buildings built before 1980 (64.8% of housing stock)</li> <li>• Critical facilities including: 1 EMS, 1 electrical substation, 1 fire station, 5 schools, 5 shelters, 2 police stations, 2 hospitals, 1 emergency operation center, and 1 wastewater treatment</li> </ul>			
<b>Identified Impacts</b>			
<ul style="list-style-type: none"> <li>• Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities</li> <li>• Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.</li> </ul>			

<b>Danbury and Danbury ISD</b>			
<b>Planning Area (Sq. mi):</b>	1.0	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75%	<b>Annual Event Average:</b>	.06
<b>Probability:</b> Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.			
<b>Extent:</b> Based off Brazoria County’s expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 500 Residential buildings built before 1980 (86.2% of housing stock)</li> <li>• Critical facilities including: 1 electrical substation, 1 EMS, 1 fire station, 3 schools, and 1 police station</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities</li> <li>• Cracked pipes in critical facilities may lead to a loss of service or length the time first responders take to get to someone in need.</li> </ul>			

## Iowa Colony

<b>Planning Area (Sq. mi):</b>	7.33	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	50%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 263 Residential buildings built before 1980 (60% of housing stock)
- Critical facilities including: 1 EMS and 1 school

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Hillcrest Village

<b>Planning Area (Sq. mi):</b>	0.4	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	25%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 289 Residential buildings built before 1980 (82.9% of housing stock)

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities

## Holiday Lakes

<b>Planning Area (Sq. mi):</b>	1	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	25%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

**Identified Vulnerabilities:**

- 3,347 Residential buildings built before 1980 (64.8% of housing stock)

**Identified Impacts:**

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities

## Jones Creek

<b>Planning Area (Sq. mi):</b>	2.6	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	25 %	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

**Identified Vulnerabilities:**

- 3,347 Residential buildings built before 1980 (64.8% of housing stock)
- Critical facilities including: 1 school and 1 shelter

**Identified Impacts:**

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Lake Jackson

<b>Planning Area (Sq. mi):</b>	20.9	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	25%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 8,272 Residential buildings built before 1980 (70.1% of housing stock)
- Critical facilities including: 1 dam, 1 electrical substation, 2 EMS, 2 fire stations, 1 hospital, 2 police stations, 7 schools, 9 shelters, and 1 wastewater treatment facility

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Liverpool

<b>Planning Area (Sq. mi):</b>	1.1	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	25 %	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 177 Residential buildings built before 1980 (72.2% of housing stock)
- Critical facilities including: 1 fire station and 2 police stations

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Manvel

<b>Planning Area (Sq. mi):</b>	23.6	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	25 %	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 971 Residential buildings built before 1980 (32.8% of housing stock)
- Critical facilities including: 1 EMS, 2 fire stations, 3 police stations, 4 schools, and 1 shelter

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Oyster Creek

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	25%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 356 Residential buildings built before 1980 (68.6% of housing stock)
- Critical facilities including: 1 fire station, 1 police station, 1 power plant, and 1 shelter

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Quintana

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	10%	<b>Annual Event Average:</b>	0

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of low; the jurisdiction can see a moderate to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 554 Residential buildings built before 1980 (83.9% of housing stock)

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities

## Richwood

<b>Planning Area (Sq. mi):</b>	3.1	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	50 %	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 356 Residential buildings built before 1980 (68.6% of housing stock)
- Critical facilities including: 1 police station, 1 school, and 1 shelter

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Surfside Beach

<b>Planning Area (Sq. mi):</b>	2.2	<b>Occurrences since 2000:</b>	0
<b>Area Affected:</b>	10%	<b>Annual Event Average:</b>	0

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of low; the jurisdiction can see a moderate to high shrink swell class in the future.

### Identified Vulnerabilities:

- 356 Residential buildings built before 1980 (68.6% of housing stock)
- Critical facilities including: 1 fire station, and 1 police station

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Sweeny and Sweeny ISD

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75 %	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 1,220 Residential buildings built before 1980 (73% of housing stock)
- Critical facilities including: 1 electrical substation, 1 EMS, 2 fire stations, 1 hospital, 2 emergency operations centers, 3 police stations, 2 schools, 1 shelter, 3 schools, 2 power plants

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## West Columbia

<b>Planning Area (Sq. mi):</b>	2.58	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	50%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 1,447 Residential buildings built before 1980 (88.3% of housing stock)
- Critical facilities including: 1 electrical substation, 1 EMS, 1 fire station, 3 schools, 3 shelters, 4 police stations, and 1 powerplant

### Identified Impacts:

- Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities
- Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.

## Brazosport ISD

<b>Planning Area (Sq. mi):</b>	200	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the ISD has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County's expansive soils map above, the ISD has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

### Identified Vulnerabilities:

- 19 schools- 10 elementary schools, 3 high schools, 5 middle schools, 1 alternative school

### Identified Impacts:

- Cracked pipes and foundations in buildings may lead to a financial loss for the school district
- A disruption in school services for repairs could result in loss wages for parents who cannot find alternative childcare, and disrupt educational progress of students.

**Velasco Drainage District**

<b>Planning Area (Sq. mi):</b>	236	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	75%	<b>Annual Event Average:</b>	.06

**Probability:** Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County’s expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

- Identified Vulnerabilities:**
- Administrative building
  - 14 pump stations and levees
- Identified Impacts:**
- Financial cost of repairing the foundation of the administration building and pumps and levees damaged

**Alvin ISD**

<b>Planning Area (Sq. mi):</b>	256	<b>Occurrences since 1871:</b>	0
<b>Area Affected:</b>	75 %	<b>Annual Event Average:</b>	0

**Probability:** Very Likely; based off the frequency of expansive soils map above, the ISD has a high chance of seeing expansive soils within the year.

**Extent:** Based off Brazoria County’s expansive soils map above, the ISD has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.

- Identified Vulnerabilities:**
- 31 schools- 17 elementary schools, 3 high schools, 6 middle schools, 1 alternative school
- Identified Impacts:**
- Cracked pipes and foundations in buildings may lead to a finical loss for the school district
  - A disruption in school services for repairs could result in loss wages for parents who cannot find alternative childcare and disrupt educational progress of students.

<b>Port Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	10%	<b>Annual Event Average:</b>	.06
<b>Probability:</b> Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.			
<b>Extent:</b> Based off Brazoria County’s expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Port facilities and administrative buildings</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Cracked pipes and foundations in buildings may lead to a financial loss for the port.</li> <li>• A disruption of economic activities at the port due to required repairs</li> </ul>			

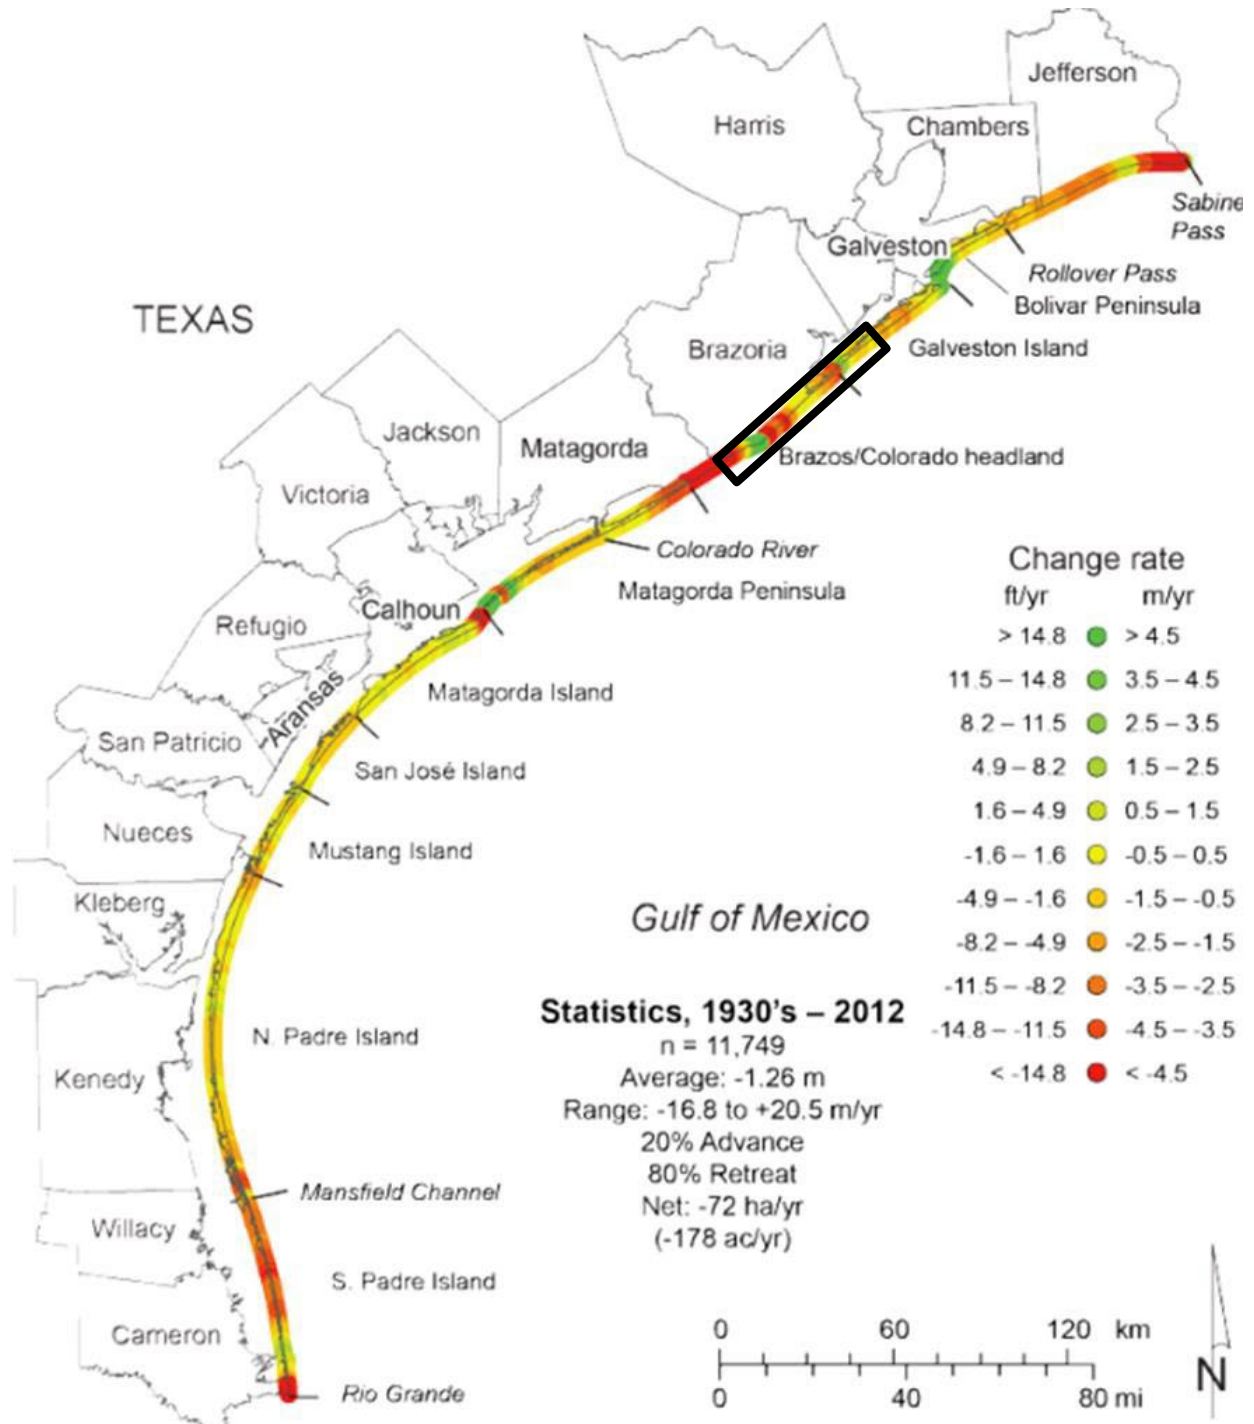

<b>Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	1
<b>Area Affected:</b>	10%	<b>Annual Event Average:</b>	
<b>Probability:</b> Very Likely; based off the frequency of expansive soils map above, the jurisdiction has a high chance of seeing expansive soils within the year.			
<b>Extent:</b> Based off Brazoria County’s expansive soils map above, the jurisdiction has a current shrink-swell class of high; the jurisdiction can see a high to very high shrink swell class in the future.			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• 4,004 Residential buildings built before 1980 (82.9% of housing stock)</li> <li>• Critical facilities including: 1 correctional facility, 5 electrical substations, 2 EMS, 3 fire stations, 6 schools, 5 shelters, 8 police stations, 1 emergency operations center, 2 wastewater treatment plants, and 1 power plant</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Financial cost to residents and jurisdiction of repairing foundations for homes and public facilities</li> <li>• Cracked pipes in critical facilities may lead to a loss of service or length the time first responder take to get to someone in need.</li> </ul>			

## Part 6.12: Coastal Erosion

## 6.12 Coastal Erosion

Coastal Erosion is measured through feet or meters lost per year. The map below shows the southeast coast of Texas with Brazoria County labeled between Galveston and Matagorda counties.

Source: Coastal Erosion Planning & Response Act. Black rectangle shows general Brazoria area

## Historic Occurrence

There have been no recorded erosion events in the county between 2000 to 2017.

## Hazard Analysis & Vulnerability Identification

The hazard analysis uses historic hazard event data to determine the probability of an event occurring again within a given year.

The hazard analysis also provides hazard extent data for each participating jurisdiction. The extent data is the most extreme data recorded during a storm or hazard event and represents the worst damage a jurisdiction has experienced in recent history. Information from stakeholders, FEMA, and H-GAC's critical facilities database were used for this analysis.

The jurisdictions below are alongside the coast and are profiling this hazard. All other participating jurisdictions are not profiling coastal erosion.

### **Brazoria County (All Participating Jurisdictions Impacted by Coastal Erosion)**

#### **Identified Vulnerabilities:**

- Local shops and businesses that depend on tourism
- Community infrastructure include roads, bridges, and critical facilities along the coast
- Residents living along the coast
- Port infrastructure

#### **Identified Impacts:**

- Economic loss for jurisdictions and the county if local businesses have to close due to damage or loss of tourists/ customers
- Financial loss for business owners along the coast that need to make repairs to buildings or have less customers over time
- Closure of the port due to repairs may lead to an economic loss for the county
- Residential and commercial property loss throughout the county along the coast may lead to a financial loss for residents and jurisdictions that need to repair or replace property

### Brazoria County (Unincorporated)

<b>Planning Area (Sq. mi):</b>	1,475	<b>Occurrences since 2000:</b>	0; Ongoing
<b>Area Affected:</b>	30 %	<b>Annual Event Average:</b>	0; Ongoing
<b>Probability:</b> Likely; coasts are affected by storms and other natural events as well as development along the coast on a day-to-day basis.			
<b>Greatest Extent of Damage:</b> According to the map above the county is seeing < 14.8 feet per year; the county could expect to see greater than 14.8 feet per year			
<b>Identified Vulnerabilities:</b> <ul style="list-style-type: none"><li>• Treasure Island Beach- Beach erosion</li><li>• Follett's Island- Wetlands protection in southeast of the county</li></ul>			
<b>Identified Impacts:</b> <ul style="list-style-type: none"><li>• Financial cost of beach replenishment for the county</li><li>• Potential loss of revenue from tourism along the coast</li><li>• Loss of natural habitat and wildlife along the coast</li></ul>			

### Quintana

<b>Planning Area (Sq. mi):</b>	2	<b>Occurrences since 2000:</b>	0; Ongoing
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0; Ongoing
<b>Probability:</b> Likely; coasts are affected by storms and other natural events as well as development along the coast on a day-to-day basis.			
<b>Greatest Extent of Damage:</b> According to the map above the jurisdiction is seeing < 14.8 feet per year; the jurisdiction could expect to see greater than 14.8 feet per year			
<b>Identified Vulnerabilities:</b> <ul style="list-style-type: none"><li>• Residential and commercial property along the coast</li></ul>			
<b>Identified Impacts:</b> <ul style="list-style-type: none"><li>• Financial cost of beach replenishment for the jurisdiction</li><li>• Potential loss of revenue from tourism along the coast</li><li>• Loss of natural habitat and wildlife along the coast</li></ul>			

<b>Surfside Beach</b>			
<b>Planning Area (Sq. mi):</b>	2.2	<b>Occurrences since 2000:</b>	0; Ongoing
<b>Area Affected:</b>	100 %	<b>Annual Event Average:</b>	0; Ongoing
<b>Probability:</b> Likely; coasts are affected by storms and other natural events as well as development along the coast on a day-to-day basis.			
<b>Greatest Extent of Damage:</b> According to the map above the jurisdiction is seeing < 14.8 feet per year; the jurisdiction could expect to see greater than 14.8 feet per year			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Breakaways</li> <li>• Residential and commercial property along the coast</li> <li>• Land near Beach Drive</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Financial cost of beach replenishment for the jurisdiction</li> <li>• Potential loss of revenue from tourism along the coast</li> <li>• Loss of natural habitat and wildlife along the coast</li> </ul>			

<b>Port Freeport</b>			
<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	0; Ongoing
<b>Area Affected:</b>	75 %	<b>Annual Event Average:</b>	0; Ongoing
<b>Probability:</b> Likely; coasts are affected by storms and other natural events as well as development along the coast on a day-to-day basis.			
<b>Greatest Extent of Damage:</b> According to the map above the jurisdiction is seeing < 14.8 feet per year; the jurisdiction could expect to see greater than 14.8 feet per year			
<b>Identified Vulnerabilities:</b>			
<ul style="list-style-type: none"> <li>• Erosion along the fence line</li> <li>• Safety of vessels throughout the port</li> </ul>			
<b>Identified Impacts:</b>			
<ul style="list-style-type: none"> <li>• Financial cost of land lost and equipment or infrastructure damaged</li> <li>• Loss of natural habitat and wildlife along the coast</li> </ul>			

## Freeport

<b>Planning Area (Sq. mi):</b>	2.81	<b>Occurrences since 2000:</b>	0; Ongoing
<b>Area Affected:</b>	75%	<b>Annual Event Average:</b>	0; Ongoing

**Probability:** Likely; coasts are affected by storms and other natural events as well as development along the coast on a day-to-day basis.

**Greatest Extent of Damage:** According to the map above the jurisdiction is seeing < 14.8 feet per year; the jurisdiction could expect to see greater than 14.8 feet per year

### Identified Vulnerabilities:

- Residential and commercial property along the coast particularly near the Brazos River Delta

### Identified Impacts:

- Financial cost of beach replenishment for the jurisdiction
- Potential loss of revenue from tourism along the coast
- Loss of natural habitat and wildlife along the coast

# Part 7: Mitigation Strategy

## **Part 7: MITIGATION STRATEGY**

The planning process, hazard analysis, and vulnerability assessment serve as a foundation for a meaningful hazard mitigation strategy. The mitigation strategy provides an outline for how the county and the local jurisdictions aim to address and reduce the risks associated with the natural hazards identified in the HMAP and reduce the potential impact on residents and structures identified through the Vulnerability Analysis. The mitigation strategy is divided into three sections the mission statement, goals and objectives, and the mitigation action plan. The mission statement provides the overall purpose of the mitigation strategy and the HMAP. The goals and objectives provide milestones for how the county aims to meet this purpose. The mitigation action plan details specific mitigation actions, or projects, programs, and polices the county aims to meet these goals and objectives.

### **Mission Statement**

The HMAP aims to implement new policies, programs, and projects to reduce the risks and impacts associated with natural hazards, including public education and partnerships between local officials and residents.

### **Goal**

Reduce the loss of public and private infrastructure throughout the county due to natural hazards

#### ***Objective***

Raise and remove structures in the 500- year floodplain through creating, implementing, and updating county programs and local codes

#### ***Objective***

Retrofit coastal roads to prevent loss from coastal erosion

#### ***Objective***

Create levees or berms to protect sewage treatment facilities throughout the county

### **Goal**

Create predictability along the Brazos river floodplain

#### ***Objective***

Through collaborative projects with public and private partners rid oyster creek of obstructions in order to allow river to flow naturally

#### ***Objective***

Raise and repair lost river bank to keep flood waters in the river

#### ***Objective***

Partner with local and county officials to identify at least three additional measures to keep water where it should be throughout the county

**Goal**

Improve collaboration and communication between fire, police, medical units, and local jurisdictions

***Objective***

The county and all local jurisdictions shall share a common radio or communications network

***Objective***

Provide educational opportunities for municipalities to understand the importance of staying in contact with MACC (Multi-Agency Coordination Center)

***Objective***

Develop a common dispatch procedure for the county and local jurisdictions

**Mitigation Action Plan**

The mitigation action plan explains the specific programs, policies, and projects that the county and the local jurisdictions aim to implement for the county to reach its HMAP objectives and goals. The mitigation action plan provides the details of each mitigation action including which local department will be in charge of implementing the actions, how the county or local jurisdiction plan to pay for these actions, and the estimated time for implementing these actions.

Each jurisdiction and the county prioritized their mitigation actions based on their greatest vulnerabilities and needs. Actions were rated 1, 2, or 3 with 1 being the highest priority. Within each of the priority categories, a sub-category for feasibility was created. Each action was evaluated for feasibility using FEMA's mitigation action evaluation worksheet (Appendix A). After evaluating the mitigation actions based on priorities and feasibility, the actions were ranked. The actions are separated by jurisdiction and then ranked as described. The charts below demonstrate the final ranking of mitigation actions based on their scoring.

**Ongoing Mitigation Strategies**

Past mitigation strategies, that were not complete due to unavailable funding opportunities, are still viable projects and will be carried over to this updated plan. Careful review of past projects by each participating jurisdiction will be monitored and ready to move forward, as funding becomes available. New projects have been added to the mitigation strategies and a new plan addition, Annex E, will be a placeholder for future projects as ideas and funding are presented and attainable.

Mitigation Strategy N6 – Project Title – “Elevate Structures in Flood Zone” is currently in progress.

All other mitigation strategies were unable to be started or completed due to funding opportunities. Some are being discussed with current grant opportunities and will be noted as they progress.

## All Participating Jurisdictions

<b>Jurisdiction:</b>	All participating jurisdictions		<b>Action Number:</b>	P1
<b>Hazard(s) Addressed:</b>	Flooding, Hurricane, Wildfire, Drought, Lightning, Heat Events, Hail, Winter Weather, Tornado, Expansive Soils			
<b>Project Title:</b>	Educating public on mitigation techniques			
<b>Project Description:</b>	Implement an outreach and education campaign to educate the public on mitigation techniques for all hazards to reduce loss of life and property.			
<b>Responsible Entity:</b>	County Emergency Managers, All participating jurisdictions mayors and city councils			
<b>Losses avoided:</b>	Residents and business owners			
<b>Cost Estimate:</b>	10,000	<b>Timeframe:</b>	3 months	
<b>Potential Funding Sources:</b>	Local budget and salary, HMPG, Fire Prevention and Safety Grants	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	Brazoria County, Quintana, Surfside Beach, Port Freeport, Freeport		<b>Action Number:</b>	P2
<b>Hazard(s) Addressed:</b>	Coastal Erosion			
<b>Project Title:</b>	Educating public on mitigation techniques			
<b>Project Description:</b>	Implement an outreach and education campaign to educate the public on mitigation techniques for coastal erosion to reduce loss of life and property.			
<b>Responsible Entity:</b>	County Emergency Managers, jurisdictions mayors, and city councils			
<b>Losses avoided:</b>	Residents and businesses			
<b>Cost Estimate:</b>	9,000	<b>Timeframe:</b>	3-6 months	
<b>Potential Funding Sources:</b>	Local budget and salary, HMPG,	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	Unincorporated Brazoria County, Holiday Lakes, West Columbia, Bailey's Prairie, Brazoria, Freeport, Port of Freeport, and Oyster Creek	<b>Action Number:</b>	P3
<b>Hazard(s) Addressed:</b>	Dam and Levee Failure		
<b>Project Title:</b>	Educating public on mitigation techniques		
<b>Project Description:</b>	Implement an outreach and education campaign to educate the public on mitigation techniques for dam and levee failure to reduce loss of life and property.		
<b>Responsible Entity:</b>	County Emergency Managers, jurisdictions, mayors and city councils		
<b>Losses avoided:</b>	Residents and businesses		
<b>Cost Estimate:</b>	9,000	<b>Timeframe:</b>	3-6 months
<b>Potential Funding Sources:</b>	Local budget and salary, HMPG	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	All participating jurisdictions	<b>Action Number:</b>	P4
<b>Hazard(s) Addressed:</b>	Hail, Tornado, Hurricane		
<b>Project Title:</b>	Retrofitting structures for hail and wind protection		
<b>Project Description:</b>	All participating jurisdictions will retrofit city and county owned structures with roofs and window panes that can withstand hail and high wind damage.		
<b>Responsible Entity:</b>	Emergency Coordinator, Brazoria County		
<b>Losses avoided:</b>	Buildings, residents, and city/ county employees in county and city buildings when a hail storm hits.		
<b>Cost Estimate:</b>	60,000	<b>Timeframe:</b>	60 months
<b>Potential Funding Sources:</b>	HMGP, PDM, Local budgets	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	All participating jurisdictions		<b>Action Number:</b>	P5
<b>Hazard(s) Addressed:</b>	Wildfire			
<b>Project Title:</b>	Technical support for residents to reduce the risk of wildfire			
<b>Project Description:</b>	The county and partnering cities will provide incentives and technical support for property owners to reduce underbrush throughout the county to properly cut back trees, upgrade fences, and replace landscape materials with nonflammable materials			
<b>Responsible Entity:</b>	County's Emergency Management Coordinator			
<b>Losses avoided:</b>	Homes within the wild-urban interface and residents living within these areas			
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	3 months	
<b>Potential Funding Sources:</b>	HMPG, Current county and city budget/ staff time	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	All participating jurisdictions		<b>Action Number:</b>	P6
<b>Hazard(s) Addressed:</b>	Wildfire			
<b>Project Title:</b>	Rebate program for wildfire protection			
<b>Project Description:</b>	The city will develop a rebate program for residents who use non-combustible material when renovating properties or building new homes			
<b>Responsible Entity:</b>	Mayors and County Emergency Management Coordinator			
<b>Losses avoided:</b>	Residents and existing and new properties			
<b>Cost Estimate:</b>	150,000	<b>Timeframe:</b>	12 to 24 months	
<b>Potential Funding Sources:</b>	HMPG, current city and staff time	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	All participating jurisdictions		<b>Action Number:</b>	P7
<b>Hazard(s) Addressed:</b>	Heat Events			
<b>Project Title:</b>	Installing misting stations			
<b>Project Description:</b>	The county and partnering cities will install misting stations throughout city and county owned parks and property.			
<b>Responsible Entity:</b>	County Emergency Coordinator			
<b>Losses avoided:</b>	Loss of life; Especially the elderly and children in the county			
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	6 to 12 months	
<b>Potential Funding Sources:</b>	HMPG, current city and staff time	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	All participating jurisdictions		<b>Action Number:</b>	P8
<b>Hazard(s) Addressed:</b>	Drought			
<b>Project Title:</b>	Adopting ordinance for drought tolerant plants			
<b>Project Description:</b>	All participating jurisdictions will develop an ordinance to require incorporating drought tolerant landscape design into all new county and city owned properties.			
<b>Responsible Entity:</b>	Emergency Coordinators for the county and partnering jurisdictions.			
<b>Losses avoided:</b>	Structures throughout the jurisdiction impacted by drought			
<b>Cost Estimate:</b>	1,000	<b>Timeframe:</b>	3 months	
<b>Potential Funding Sources:</b>	Current staff time	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	All participating jurisdictions		<b>Action Number:</b>	P9
<b>Hazard(s) Addressed:</b>	Lightning			
<b>Project Title:</b>	Rebate program for lightning rods			
<b>Project Description:</b>	All participating jurisdictions will work to develop a program that offers reduced price lightning rods and technical assistance for homeowners throughout the county.			
<b>Responsible Entity:</b>	County Emergency Coordinator			
<b>Losses avoided:</b>	Homes and residents who could be affected by lightning throughout the county.			
<b>Cost Estimate:</b>	150,000	<b>Timeframe:</b>	12 months	
<b>Potential Funding Sources:</b>	HMGP, FP&S Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	All participating jurisdictions		<b>Action Number:</b>	P10
<b>Hazard(s) Addressed:</b>	Expansive Soils, Drought			
<b>Project Title:</b>	Drip irrigation			
<b>Project Description:</b>	All participating jurisdictions will install drip irrigation around critical facilities' foundations throughout the county. This action mitigates the damage that shrinking and expanding soils cause on foundations and pipes.			
<b>Responsible Entity:</b>	Emergency Coordinator			
<b>Losses avoided:</b>	Cost of repair to critical facilities' foundations, water and sewer lines.			
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	12 months	
<b>Potential Funding Sources:</b>	HMGP, FP&S Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	All participating jurisdictions	<b>Action Number:</b>	P11
<b>Hazard(s) Addressed:</b>	Winter Weather		
<b>Project Title:</b>	Warning system for icy roadways		
<b>Project Description:</b>	All participating jurisdictions will install signage and sensors to alert drivers during winter weather on major roadways, curved roads, and steep roads.		
<b>Responsible Entity:</b>	County Emergency Coordinator		
<b>Losses avoided:</b>	Residents and visitors traveling throughout the county.		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	12-24 months
<b>Potential Funding Sources:</b>	HMGP, FP&S Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	All participating jurisdictions	<b>Action Number:</b>	P12
<b>Hazard(s) Addressed:</b>	Flooding, Hurricane/Tropical Storm, Wildfire, Drought, Dam and Levee Failure		
<b>Project Title:</b>	Non-structural mitigation		
<b>Project Description:</b>	Preserve natural lands and green space to reduce the impacts of natural hazards. Up to 35,000 acres of land tracts could be purchased from willing sellers for their natural ecosystem services. Including floodwater storage, groundwater recharge, erosion control, drought mitigation, and wildfire damage reduction. The land will be converted to parks, wildlife management areas, community forests, and/or other public open spaces.		
<b>Responsible Entity:</b>	The Trust for Public Land and voluntary partnering jurisdictions.		
<b>Losses avoided:</b>	Reduce the loss of life and property by preserving pervious surface and open space to reduce the effects of flooding. Reduce agricultural and water reservoir losses during droughts, and reduce the loss of life and property during wildfires, floods, and dam/ levee failures by using wetlands and wetland forests as natural fire breaks and storm infrastructure.		
<b>Cost Estimate:</b>	65,000,000.00	<b>Timeframe:</b>	60 months – currently in process
<b>Potential Funding Sources:</b>	HMGP, FMA, PDM, Philanthropic Institutions, the Deep Water Horizon Settlement, and Local budgets.	<b>Benefit-Cost Ratio:</b>	Greater than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Unincorporated Brazoria County, Holiday Lakes, West Columbia, Bailey's Prairie, Brazoria, Freeport, Port of Freeport, and Oyster Creek.	<b>Action Number:</b>	P13
<b>Hazard(s) Addressed:</b>	Flood, Dam and Levee Failure		
<b>Project Title:</b>	Updating Maps		
<b>Project Description:</b>	Each jurisdiction will work to update their dam and levee failure inundation maps to identify the probability and impact of a dam and levee failures in their jurisdiction. The mapping action will also identify the homes, critical facilities and agricultural lands that are vulnerable to a complete dam or levee failure, determine the extent of damage that can be expected, and show the probability and impact of dam failure. The updated inundation maps will also be made available to public.		
<b>Responsible Entity:</b>	County Emergency Coordinator		
<b>Losses avoided:</b>	Homes and residents (loss of life) who could be affected by flooding throughout the county		
<b>Cost Estimate:</b>	150,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	HMGP, FP&S Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

## Multi-Jurisdiction Mitigation Actions

<b>Jurisdiction:</b>	Lake Jackson, Clute, Velasco Drainage District	<b>Action Number:</b>	M1
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Flag Lake Drainage Infrastructure Project		
<b>Project Description:</b>	Lake Jackson, Clute, and Velasco Drainage District will conduct a Flag Lake drainage study. Runoff from Lake Jackson flows into Clute. Using the study, Clute and Velasco Drainage District would implement a drainage project that lessens the flooding impact from the Lake Jackson runoff.		
<b>Responsible Entity:</b>	Lake Jackson EMC, Mayor, Clute EMC, Mayor and Drainage District Director		
<b>Partners:</b>	Clute, Velasco Drainage District		
<b>Losses avoided:</b>			
<b>Cost Estimate:</b>	350,000	<b>Timeframe:</b>	24 months
<b>Potential Funding Sources:</b>	USACE Planning Assistance to States, Flood Mitigation Assistance Program, HMGP, TWDB Research and Planning Fund	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Quintana, Freeport	<b>Action Number:</b>	M2
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms and Coastal Erosion		
<b>Project Title:</b>	Prevention, Property Protection		
<b>Project Description:</b>	Develop and implement a beach nourishment project on each jurisdiction's shoreline to mitigate the effects of coastal erosion.		
<b>Responsible Entity:</b>	Quintana Mayor, Freeport Parks Engineering Department Manager		
<b>Losses avoided:</b>	Life safety and public property		
<b>Cost Estimate:</b>	6,000,000	<b>Timeframe:</b>	48 to 60 months
<b>Potential Funding Sources:</b>	FEMA, HMG, CEPRA, CIAP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

## Bailey's Prairie

<b>Jurisdiction:</b>	Bailey's Prairie	<b>Action Number:</b>	A1
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Project will clear obstacles, widen and reshape ditches, and upgrade culverts to restore adequate drainage to mitigate flooding		
<b>Responsible Entity:</b>	City Engineer and Mayor		
<b>Losses avoided:</b>	Homes, businesses, and public facilities		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	24 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Bailey's Prairie	<b>Action Number:</b>	A2
<b>Hazard(s) Addressed:</b>	Hail		
<b>Project Title:</b>	Educate Public of Home Improvement Opportunities		
<b>Project Description:</b>	Educate elderly, low-income residents of grant funding opportunities to insulate the foundation of pier and beam homes, and update homes to withstand strong winds and hail.		
<b>Responsible Entity:</b>	City Council		
<b>Losses avoided:</b>	Life, health, and safety of vulnerable populations, and property damage		
<b>Cost Estimate:</b>	2,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	Local Budget, HMGP, USDA Home Repair grant	<b>Benefit-Cost Ratio:</b>	Less than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Bailey's Prairie	<b>Action Number:</b>	A3
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Adopting City Ordinance		
<b>Project Description:</b>	The city shall adopt a land use ordinance which requires any structure within the 100-year floodplain to be elevated 2 feet above base flood elevation.		
<b>Responsible Entity:</b>	City Council and mayor		
<b>Losses avoided:</b>	Homes, businesses, and residents within the 100-year flood plain.		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	HMGP, current city budget and staff time.	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Bailey's Prairie	<b>Action Number:</b>	A4
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Adopting land-use ordinance		
<b>Project Description:</b>	The city shall adopt a land-use ordinance which prohibits building residential or commercial structures in the 100-year floodplain.		
<b>Responsible Entity:</b>	City Manager, City Council, Office of Code Enforcement		
<b>Losses avoided:</b>	Future buildings and infrastructure that may have been built within the 100-year flood plain		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	Current city budget and salary, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

## Surfside Beach

<b>Jurisdiction:</b>	Surfside Beach	<b>Action Number:</b>	B1
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Coastal Erosion		
<b>Project Title:</b>	Installing Shoreline Structures		
<b>Project Description:</b>	Install groins along the beach front throughout the city specifically near Breakaway to decrease coastal erosion and damage caused by storm surge and hurricanes.		
<b>Responsible Entity:</b>	Mayor and EMC		
<b>Losses avoided:</b>	Shoreline erosion, loss of natural wildlife habitat, etc.		
<b>Cost Estimate:</b>	12,000,000	<b>Timeframe:</b>	48 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Surfside Beach	<b>Action Number:</b>	B2
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Coastal Erosion		
<b>Project Title:</b>	Installing Shoreline Structures		
<b>Project Description:</b>	Extend revetment wall to jetties throughout the city to reduce coastal erosion and decrease the impacts caused by hurricanes and storm surge.		
<b>Responsible Entity:</b>	Mayor and EMC		
<b>Losses avoided:</b>	Coastal erosion, wildlife habitat, infrastructure, etc.		
<b>Cost Estimate:</b>	2,500,000	<b>Timeframe:</b>	48 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Surfside Beach	<b>Action Number:</b>	B3
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Install hurricane shutters on city hall/court/police station.		
<b>Responsible Entity:</b>	Mayor and EMC		
<b>Losses avoided:</b>	Loss of municipal buildings, lives, essential documents, and equip		
<b>Cost Estimate:</b>	35,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Surfside Beach	<b>Action Number:</b>	B4
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Coastal Erosion		
<b>Project Title:</b>	Protecting Shorelines		
<b>Project Description:</b>	Develop and implement a shoreline protection program.		
<b>Responsible Entity:</b>	Mayor and EMC		
<b>Losses avoided:</b>	Natural wildlife habitat, property, shoreline		
<b>Cost Estimate:</b>	3,500,000	<b>Timeframe:</b>	24 months
<b>Potential Funding Sources:</b>	TX Coastal Coordination Council - TX Coastal Management Program, USACE- Emergency Rehabilitation of Flood Control Works	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Surfside Beach	<b>Action Number:</b>	B5
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Coastal Erosion		
<b>Project Title:</b>	Natural Resource Protection		
<b>Project Description:</b>	Acquisition of seaward property and re-establish stabilizing vegetation.		
<b>Responsible Entity:</b>	Mayor and EMC		
<b>Losses avoided:</b>	Life and property along the coast		
<b>Cost Estimate:</b>	1,000,000	<b>Timeframe:</b>	36 to 60 months
<b>Potential Funding Sources:</b>	HMGP, PDM Program, Flood Mitigation Assistance Program, HUD-Disaster Recovery Initiative, TX Coastal Coordination Council - TX	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

### West Columbia

<b>Jurisdiction:</b>	West Columbia	<b>Action Number:</b>	C1
<b>Hazard(s) Addressed:</b>	Flooding, Hurricane, Wildfire, Drought, Lightning, Heat Events, Hail, Winter Weather, Tornado, Dam and Levee Failure		
<b>Project Title:</b>	Structure Hardening		
<b>Project Description:</b>	Harden and reinforce critical facilities throughout the city: Purchase and install generators for all critical facilities, harden windows to withstand hurricane, tornado, and hail, and install irrigation system around foundations to prevent foundation cracking and breaking pipes.		
<b>Responsible Entity:</b>	City Manager, EMC and Mayor		
<b>Losses avoided:</b>	Reduce the risk to critical facilities and assets during a natural hazard event		
<b>Cost Estimate:</b>	2,500,000	<b>Timeframe:</b>	24-36 months
<b>Potential Funding Sources:</b>	HMGP, CDBG, PDM, FP&S Grants, Weatherization Assistance Program	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	West Columbia	<b>Action Number:</b>	C2
<b>Hazard(s) Addressed:</b>	Floods, Hurricane, Tropical Storms, Drought, Heat Events, and Winter Storms		
<b>Project Title:</b>	Upgrade water & maintain/Improve existing water storage capacity		
<b>Project Description:</b>	Upgrade older water storage tanks throughout the city with newer and/or improvements to existing water storage tanks.		
<b>Responsible Entity:</b>	Public Works Director, TCEQ and Mayor		
<b>Losses avoided:</b>	Upgrading or maintaining water storage capacities to enable proper firefighting capabilities, to sufficiently handle potential breaks in water lines or the dripping of faucets during extreme cold, ample capacity for watering, misting stations and firefighting during drought conditions, and ample water storage to supply the community during any emergency that may increase the stay-at-home population, such as during COVID-19.		
<b>Cost Estimate:</b>	\$3,500,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	West Columbia	<b>Action Number:</b>	C3
<b>Hazard(s) Addressed:</b>	Floods, Hurricane, Tropical Storms, Severe Thunderstorms		
<b>Project Title:</b>	Develop and implement a Master Drainage Plan for the City		
<b>Project Description:</b>	This action proposes creating a drainage master plan for the City that will provide a comprehensive planning document that provides basic information and necessary guidance for the county-wide drainage system, including but not limited to an H&H study.		
<b>Responsible Entity:</b>	City of West Columbia Mayor and Brazoria County EMC		
<b>Losses avoided:</b>	Protection to property and life.		
<b>Cost Estimate:</b>	\$100,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants such as FEMA BRIC, FEMA FMA, FEMA HMGP, CDBG-MIT	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	West Columbia	<b>Action Number:</b>	C4
<b>Hazard(s) Addressed:</b>	Floods, Hurricane, Tropical Storms, Severe Thunderstorms		
<b>Project Title:</b>	Highway Drainage and Evacuation Routes		
<b>Project Description:</b>	SH 36 (Columbia Dr.) drainage ditches to be widened and reshaped. Upgrade culverts to restore adequate drainage to prevent flooding, relocate and improve one lift station to minimize damage from potential flooding, and widening highway for evacuation of surrounding areas to include the addition of an overpass at SH 35 & SH36, project location is from Westview to City Limits.		
<b>Responsible Entity:</b>	TxDOT and City Manager		
<b>Losses avoided:</b>	Reduce the loss of property due to flooding and improve evacuation routes.		
<b>Cost Estimate:</b>	\$125,000,000	<b>Timeframe:</b>	60 months
<b>Potential Funding Sources:</b>	TxDOT	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	West Columbia	<b>Action Number:</b>	C5
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/Tropical Storms, Severe Thunderstorms		
<b>Project Title:</b>	Drainage Improvements		
<b>Project Description:</b>	Partner with local drainage district to maintain and improve drainage in and around the City. Widen and reshape drainage ditches and upgrade culverts to restore adequate drainage to mitigate flooding.		
<b>Responsible Entity:</b>	City Manager, Mayor, Brazoria County EMC and Brazoria Co. Drainage District No. 11 Director		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$5,000	<b>Timeframe:</b>	As funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, County and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

## Lake Jackson

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D1
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Dam/ Levee Failure		
<b>Project Title:</b>	Jackson Oaks II Levee Service Road Repair		
<b>Project Description:</b>	Repair service road/levee on north side of Jackson Oaks II subdivision to reduce the flooding of home and streets.		
<b>Responsible Entity:</b>	Velasco Drainage District Director and City Manager		
<b>Losses avoided:</b>	Reduce flood waters in streets and homes.		
<b>Cost Estimate:</b>	75,000	<b>Timeframe:</b>	Nearing completion
<b>Potential Funding Sources:</b>	Local funds: Velasco Drainage will provide manpower and equipment and Lake Jackson will provide materials to bring the berm and service road back to its original height.	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D2
<b>Hazard(s) Addressed:</b>	Hurricane/Tropical Storms, Lightning		
<b>Project Title:</b>	Lightning Protection of Critical Facilities		
<b>Project Description:</b>	Conduct a city-wide lightning vulnerability assessment for key infrastructure. Communications, fuel storage tanks and distribution, pump systems, wells and install surge protectors or other lightning protection for property.		
<b>Responsible Entity:</b>	Public Works Director		
<b>Losses avoided:</b>	Reduce risk to critical facilities and assets during a storm event.		
<b>Cost Estimate:</b>	25,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	Local Budget	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D3
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Tornado, Hail, Winter Weather		
<b>Project Title:</b>	Protect Powerlines from winds and falling limbs		
<b>Project Description:</b>	Remove or trim trees that pose a threat to power lines in the event of strong winds, winter weather, or hail.		
<b>Responsible Entity:</b>	Public Works Director and Parks Department Director		
<b>Losses avoided:</b>	Reduce risk to critical facilities and assets during storms.		
<b>Cost Estimate:</b>	300,000	<b>Timeframe:</b>	24-60 months
<b>Potential Funding Sources:</b>	City and Center Point funding of private contractors. Center Point has become more active in removing trees near power lines as part of their efforts to harden the system. The City would work on trees in parks and parkways near power lines.	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D4
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Tornado, Hail, Winter Weather		
<b>Project Title:</b>	Shy Pond Drainage		
<b>Project Description:</b>	Remove old, damaged drainage piping and restore the drainage system.		
<b>Responsible Entity:</b>	Public Works Director and Parks Department Director		
<b>Losses avoided:</b>	Reduce flood waters in the pond, streets, and homes		
<b>Cost Estimate:</b>	\$1,500,000.00	<b>Timeframe:</b>	0-24 months
<b>Potential Funding Sources:</b>	City Funding	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D5
<b>Hazard(s) Addressed:</b>	Drought		
<b>Project Title:</b>	Harris Reservoir Expansion		
<b>Project Description:</b>	Expand the reservoir in size to hold more water to ensure enough water during drought conditions. Shore up the riverbank to help prevent erosion.		
<b>Responsible Entity:</b>	A collaboration: Dow Chemical, BWA, and the 7 local city's Mayors		
<b>Losses avoided:</b>	Ensuring the area has enough water for drinking and other necessary needs		
<b>Cost Estimate:</b>	750,000,000.00	<b>Timeframe:</b>	0-60 months
<b>Potential Funding Sources:</b>	All partners will share the cost. Lake Jackson's portion in 15%	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D6
<b>Hazard(s) Addressed:</b>	Flooding		
<b>Project Title:</b>	City of Lake Jackson Flood Study		
<b>Project Description:</b>	Have a flood study performed for the City of Lake Jackson for evaluation purposes, to identify areas of concern for future hazard mitigation.		
<b>Responsible Entity:</b>	City of Lake Jackson Mayor and City Manager		
<b>Losses avoided:</b>	Flooding		
<b>Cost Estimate:</b>	6,000,000.00	<b>Timeframe:</b>	0-60
<b>Potential Funding Sources:</b>	City Funds & Grants	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D7
<b>Hazard(s) Addressed:</b>	Flooding		
<b>Project Title:</b>	Eastside Drainage		
<b>Project Description:</b>	Flood mitigation for the Eastside Drainage area of Lake Jackson. Restore ditches, resize culverts, slop panels, prevent erosion. Area is roughly south of Oyster Creek Drive, west of Dixie Drive and Flag Lake Drive, and east of Sycamore, to Highway 332.		
<b>Responsible Entity:</b>	Engineering Director and Public Works Director		
<b>Losses avoided:</b>	Reduce flood waters in streets and homes		
<b>Cost Estimate:</b>	\$15,000,000.00	<b>Timeframe:</b>	24-60 months
<b>Potential Funding Sources:</b>	City funds and GLO funding	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D8
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Tornadoes, Extreme Heat, Winter Weather, Electrical Infrastructure Failure.		
<b>Project Title:</b>	Standby Generators for Critical Infrastructure Sites		
<b>Project Description:</b>	9 standby generators at 9 city critical infrastructure sites. Generator sizes are specific for each site. This includes engineering and installation to completion.		
<b>Responsible Entity:</b>	City of Lake Jackson Mayor, City Manager and EMC		
<b>Losses avoided:</b>	During any sustained power outages, this project would ensure that the city will be able to maintain the critical infrastructure sites to operate in an emergency state. This includes generators needed for the Municipal Water System, thereby providing power to maintain pumps and pressure during a sustained power outage. The generators for the water system are required to meet Senate Bill 3		
<b>Cost Estimate:</b>	5,000,000.00	<b>Timeframe:</b>	6 to 36 months
<b>Potential Funding Sources:</b>	HMPG & City Funds	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Lake Jackson	<b>Action Number:</b>	D9
<b>Hazard(s) Addressed:</b>	Flooding		
<b>Project Title:</b>	Moss-Chestnut Street Drainage Outfall		
<b>Project Description:</b>	Flood mitigation for the Moss-Chestnut Street drainage area of Lake Jackson. The mitigation project includes the replacement of roadway crossings, enlarging channels, resizing culverts, and installing slope paving for erosion control for pollution prevention plan. The area is roughly south of Oyster Creek Drive, west of Dixie Drive, and east of Sycamore.		
<b>Responsible Entity:</b>	Engineering Department Director and Public Works Director		
<b>Losses avoided:</b>	Reduce flood waters in streets and homes		
<b>Cost Estimate:</b>	\$11,000,000.00, which includes a cost contingency	<b>Timeframe:</b>	24-60 months
<b>Potential Funding Sources:</b>	City funds, Bonds, and HMGP	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

## Holiday Lakes

<b>Jurisdiction:</b>	Holiday Lakes	<b>Action Number:</b>	E1
<b>Hazard(s) Addressed:</b>	Wildfire		
<b>Project Title:</b>	Becoming an active participant in Firewise USA program, and implement the program in the community.		
<b>Project Description:</b>	The City will become an active participant in the Firewise USA program and encourage local neighborhoods to join the program as well.		
<b>Responsible Entity:</b>	Mayor and city council		
<b>Losses avoided:</b>	Property and residents throughout the city		
<b>Cost Estimate:</b>	4,000	<b>Timeframe:</b>	24 Months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

## Velasco Drainage District

<b>Jurisdiction:</b>	Velasco Drainage District		<b>Action Number:</b>	F1
<b>Hazard(s) Addressed:</b>	Floods			
<b>Project Title:</b>	Structural Project			
<b>Project Description:</b>	Construct a 75-acre detention pond south of the Sea Center adjacent to the Clute/Lake Jackson Drainage Channel. Provide 800,000 gallons per minute of diverted flood water into pond.			
<b>Responsible Entity:</b>	Velasco Drainage District Director			
<b>Losses avoided:</b>	Mitigated damage of homes, businesses, and public facilities of Lake Jackson and Clute			
<b>Cost Estimate:</b>	2,000,000	<b>Timeframe:</b>	36-60 months	
<b>Potential Funding Sources:</b>	TWDB Small Flood Control Projects, NRCS Watershed Protection and Flood Prevention Program, Disaster Relief/Urgent needs Fund for CDBG, PDM, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				Yes

<b>Jurisdiction:</b>	Velasco Drainage District		<b>Action Number:</b>	F2
<b>Hazard(s) Addressed:</b>	Floods			
<b>Project Title:</b>	Structural Project			
<b>Project Description:</b>	Construct detention pond in the Clute/Lake Jackson watershed. Propose to build near the East Levee Pump Station adjacent to the Clute/Lake Jackson Pump Station.			
<b>Responsible Entity:</b>	Velasco Drainage District Director			
<b>Losses avoided:</b>	Mitigated damage of homes, businesses, and public facilities of Lake Jackson and Clute			
<b>Cost Estimate:</b>	2,000,000	<b>Timeframe:</b>	24-36 months	
<b>Potential Funding Sources:</b>	TWDB Small Flood Control Projects, NRCS Watershed Protection and Flood Prevention Program, Disaster Relief/Urgent needs Fund or CDBG, PDM, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				Yes

<b>Jurisdiction:</b>	Velasco Drainage District	<b>Action Number:</b>	F3
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Property Protection, Structural Project		
<b>Project Description:</b>	Purchase and install additional pump equipment in the East Levee Pump Station. Would provide an additional 780,000 gallons capacity per minute stormwater infrastructure capacity to the Clute/Lake Jackson watershed.		
<b>Responsible Entity:</b>	Velasco Drainage District Director		
<b>Losses avoided:</b>	Flooding of Dow Chemical & Other Industrial & Residential areas		
<b>Cost Estimate:</b>	4,500,000	<b>Timeframe:</b>	24-36 months
<b>Potential Funding Sources:</b>	TWDB, Small Flood Control Projects, NRCS Watershed Protection and Flood Prevention Program, Disaster Relief/Urgent Needs Fund for CDBG, PDM, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Velasco Drainage District	<b>Action Number:</b>	F4
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Project will clear obstacles, widen and reshape ditches, and upgrade culverts to restore adequate drainage to mitigate flooding throughout the entire drainage district.		
<b>Responsible Entity:</b>	Velasco Board of Supervisors and Drainage District Director		
<b>Losses avoided:</b>	Homes, business, and public facilities		
<b>Cost Estimate:</b>	2,500,000	<b>Timeframe:</b>	48 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Velasco Drainage District	<b>Action Number:</b>	F5
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms		
<b>Project Title:</b>	Hurricane resistant powerline poles		
<b>Project Description:</b>	All new power line poles installed within the district will be resistant to hurricane winds.		
<b>Responsible Entity:</b>	Engineering Department Director		
<b>Losses avoided:</b>	Homes, business, and public facilities		
<b>Cost Estimate:</b>	120,000	<b>Timeframe:</b>	36 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

## Manvel

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G1
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Structural Project		
<b>Project Description:</b>	Street drainage improvements: widen and reshape ditches, and upgrade culverts to restore adequate drainage to mitigate flooding in Manvel neighborhoods.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	100,000	<b>Timeframe:</b>	48 months
<b>Potential Funding Sources:</b>	FEMA-HMGP, PDM, FMA, City, County, Drainage Districts	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G2
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Structural Project		
<b>Project Description:</b>	All road drainage improvements, including storm sewer rehabilitation and ditch deepening.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	500,000	<b>Timeframe:</b>	48 months
<b>Potential Funding Sources:</b>	FEMA-HMGP, PDM, FMA, City, County, Drainage Districts	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G3
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Structural Project		
<b>Project Description:</b>	State Highway 6 drainage improvements, including storm sewer upgrades to meet current capacities, ditch deepening, and sub regional detention ponds. Project will also widen and reshape ditches, and upgrade culverts.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	3,000,000	<b>Timeframe:</b>	48 months
<b>Potential Funding Sources:</b>	FEMA-HMGP, PDM, FMA, City, County, Drainage Districts, Gulf Coast Water Authority TXDOT	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G4
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Structural Project		
<b>Project Description:</b>	Gates Loop subdivision drainage improvements including deepening and widening ditches around Gates Loop and Sandy Point Rd.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	100,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	FEMA-HMGP, PDM, FMA, City, County, Drainage Districts	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G5
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Structural Project		
<b>Project Description:</b>	Reed Lane, Sherri Circle, Booth Plummer Road and 1128 South of Hwy 6, drainage improvements, including storm sewer rehabilitation and ditch deepening.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	150,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	FEMA-HMGP, PDM, FMA, City, County, Drainage Districts	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G6
<b>Hazard(s) Addressed:</b>	Floods, Hurricanes /Tropical Storms		
<b>Project Title:</b>	Public Education and Planning		
<b>Project Description:</b>	Improve GIS database to include repetitive loss properties areas and flooded structure data. Data to be used for future drainage infrastructure planning and to provide outreach and emergency services to residents in substantial risk zones.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	20,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	FEMA-HMGP, PDM, FMA, SRL, City, County, Drainage Districts	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G7
<b>Hazard(s) Addressed:</b>	Wildfire and Drought		
<b>Project Title:</b>	Public Education		
<b>Project Description:</b>	Conduct wildfire outreach and education campaign. Make presentations at civic club meetings and local schools. Work with Texas A&M Forest Service to develop and implement a Wild Land Urban Interface loss reduction plan.		
<b>Responsible Entity:</b>	Mayor, City Manager and County EMC		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	10,000	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	PGM, HMGP, Texas Forest Service	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G8
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Acquire Repetitive Loss (RL) and Severe Repetitive Loss (SRL) properties in the 100-year flood plain, as identified by FEMA and NFIP		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	1,700,000	<b>Timeframe:</b>	60 months
<b>Potential Funding Sources:</b>	FEMA-HMGP, PDM, FMA, SRL, City, County, Drainage Districts	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G9
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	City Ordinance		
<b>Project Description:</b>	The city shall adopt a land use ordinance which requires any structure within the 100-year floodplain to be elevated 2 feet above base flood elevation.		
<b>Responsible Entity:</b>	City council, Mayor and City Manager		
<b>Losses avoided:</b>	Homes, businesses, and residents within the 100-year flood plain		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	HGMP, current city and staff time	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G10
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Adopting land-use ordinance		
<b>Project Description:</b>	The city shall adopt a land-use ordinance which prohibits building residential or commercial structures in the 100-year floodplain		
<b>Responsible Entity:</b>	City Manager, City Council, Office of Code Enforcement Director		
<b>Losses avoided:</b>	Future buildings and infrastructure that may have been built within the 100-year flood plain.		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	Current city budget and salary, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G11
<b>Hazard(s) Addressed:</b>	Wildfire		
<b>Project Title:</b>	Education and Outreach: Firewise USA program		
<b>Project Description:</b>	The City will become an active participant in the Firewise USA program and implement a Firewise plan and outreach campaign in the community.		
<b>Responsible Entity:</b>	Mayor and city council		
<b>Losses avoided:</b>	Property and residents throughout the city		
<b>Cost Estimate:</b>	4,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	HMP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G12
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms		
<b>Project Title:</b>	Hurricane resistant powerline poles		
<b>Project Description:</b>	All new power line poles installed within the jurisdiction will be wind resistant to Hurricane grade winds.		
<b>Responsible Entity:</b>	Engineering Department Director		
<b>Losses avoided:</b>	Homes, businesses, and public facilities		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	48 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G13
<b>Hazard(s) Addressed:</b>	Hail, Hurricanes, Winter Storms		
<b>Project Title:</b>	Educate public of home improvement opportunities		
<b>Project Description:</b>	Educate elderly, low-income residents of grant funding opportunities to insulate the foundation of pier and beam homes, and update homes to withstand hurricane force winds and hail.		
<b>Responsible Entity:</b>	County EMC, partnering jurisdictions mayors and city councils, code enforcement and building department Manager		
<b>Losses avoided:</b>	Life, health, and safety of vulnerable populations, and property damage		
<b>Cost Estimate:</b>	2,500	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	HMGP, USDA Home Repair Grant	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G14
<b>Hazard(s) Addressed:</b>	Wildfire		
<b>Project Title:</b>	Reducing underbrush for wildfire prevention		
<b>Project Description:</b>	The city will work to reduce underbrush on identified wild-urban interface areas through techniques such as using skid steers or goats.		
<b>Responsible Entity:</b>	County EMC, Mayor and City Manager		
<b>Losses avoided:</b>	Current and future buildings and residents in wild-urban interface areas		
<b>Cost Estimate:</b>	500,000	<b>Timeframe:</b>	12-24 months
<b>Potential Funding Sources:</b>	HMGP, local budget and current salary, fire prevention and safety grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G15
<b>Hazard(s) Addressed:</b>	Tornado		
<b>Project Title:</b>	Tornado mitigation through rebate program		
<b>Project Description:</b>	The city will develop a rebate program for building owners who install straps, structural bracings, window shutters, or interlocking roof shingles in new construction or when renovating residences or businesses.		
<b>Responsible Entity:</b>	City Manager, Office of Code Enforcement Director		
<b>Losses avoided:</b>	Resident, homes, business, and local facilities		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	3 months
<b>Potential Funding Sources:</b>	Current city budget and salary, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G16
<b>Hazard(s) Addressed:</b>	Drought, Expansive Soils		
<b>Project Title:</b>	Structural and foundation protection		
<b>Project Description:</b>	Install moisture sensing irrigation systems at all existing and future county, local and critical facilities. Irrigation systems automatically water building to reduce the impacts of shrinking and swelling soils during drought.		
<b>Responsible Entity:</b>	Facilities and building department Director		
<b>Losses avoided:</b>	Structural foundations and anticipated cost of repairs		
<b>Cost Estimate:</b>	175,000	<b>Timeframe:</b>	36-48 months
<b>Potential Funding Sources:</b>	Local budgets and HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Manvel	<b>Action Number:</b>	G17
<b>Hazard(s) Addressed:</b>	Dam/ Levee Failure		
<b>Project Title:</b>	Structural		
<b>Project Description:</b>	Incorporate routine repairs and structural renovation efforts of dams and levee into capital improvement plans.		
<b>Responsible Entity:</b>	County EMC, partnering jurisdictions, mayors, city councils, capital improvement boards, engineering department Director		
<b>Losses avoided:</b>	Lives, homes, businesses, critical assets, public facilities, and infrastructure destruction in the event of dam or levee failure.		
<b>Cost Estimate:</b>	1,500,000	<b>Timeframe:</b>	24-36 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

## Brazoria

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H1
<b>Hazard(s) Addressed:</b>	Flooding, Hurricane, Wildfire, Lightning, Heat Events, Hail, Winter Weather, Tornado, Dam and Levee Failure		
<b>Project Title:</b>	Communication and Emergency Services		
<b>Project Description:</b>	Purchase radio/ communication equipment to improve communication leading up to and during natural disasters. Equipment will be protected against electrical surges caused by lightning, and elevated 4' above base flood level to protect equipment from flooding.		
<b>Responsible Entity:</b>	Police Chief, Fire Marshall, Mayor, City Manager and Public Works Director		
<b>Losses avoided:</b>	Residents (loss of life) and existing and new properties		
<b>Cost Estimate:</b>	120,000	<b>Timeframe:</b>	36-60 months
<b>Potential Funding Sources:</b>	Federal, State, Local, HMGP, PDM, FEMA Emergency Operations Center Funding, FEMA Emergency Management Performance Grant, USDA Rural Utilities Service Weather Radio Grant Program	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H2
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Prevention		
<b>Project Description:</b>	Develop and implement a drainage improvement program: Widen and reshape city owned drainage ditches, and upgrade culverts to restore adequate drainage to mitigate flooding, and increase size of culverts, including box culverts.		
<b>Responsible Entity:</b>	Public works department Director		
<b>Losses avoided:</b>	Flooding of homes and roads.		
<b>Cost Estimate:</b>	100,000	<b>Timeframe:</b>	12-24 months
<b>Potential Funding Sources:</b>	Drainage district funds available, Local funds, TWDB-Clean Water Development Board (Development Fund, USDA NRCA Watershed Protection and Flood Prevention Program, EPA-NPS Grant Program, 406 Public Assistance Program (following federal disaster declaration	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H3
<b>Hazard(s) Addressed:</b>	Flooding, Hurricane, Wildfire, Lightning, Heat Events, Hail, Winter Weather, Tornado, Dam and Levee Failure		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Retrofit Emergency Operations Center at City Hall. Add storm protection to glass doors and windows at EOC, Police Station, and Fire Station. Install network connection and Emergency Dispatch radio in EOC.		
<b>Responsible Entity:</b>	City EMC, Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	75,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	City funds, FEMA-HMGP and PDM program Federal, State, Local, FEMA-Emergency Management Performance Grant, Dept. of Justice-State Homeland Security Program, FEMA All Hazards Operational Planning, PDM, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H4
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms and Wildfire		
<b>Project Title:</b>	Emergency Services		
<b>Project Description:</b>	Replace aging Fire/EMS chief/ EMS Command and Emergency Management Staff command vehicles that are more than 100,000 miles or older than seven years old.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	150,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	Federal, state, local, FEMA-Assistance to Fire Fighters Grant, FEMA-All Hazards Operational Planning	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H5
<b>Hazard(s) Addressed:</b>	All Hazards		
<b>Project Title:</b>	Emergency Services		
<b>Project Description:</b>	Upgrade Brazoria Life Flight Landing Zone by replacing fence, landing surface and install pavement markings; improve drainage system and replace electrical system.		
<b>Responsible Entity:</b>	City EMC, Mayor and City Manager		
<b>Losses avoided:</b>	Loss of life and Continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$ 250,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, FEMA-Emergency Management Performance Grant, Homeland Security, PDM, and HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H6
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms and Hail		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Install hurricane shutters on City Hall, fire station and police department.		
<b>Responsible Entity:</b>	City EMC, Mayor and City Manager		
<b>Losses avoided:</b>	Prevents the need for expensive repairs, the loss of power, communication, and ability to provide emergency services.		
<b>Cost Estimate:</b>	40,000	<b>Timeframe:</b>	12-24 months
<b>Potential Funding Sources:</b>	USACE-Small Flood Control Projects, USDA NRCS-Emergency Watershed Protection Agency, TWDB-Clean Water State Revolving Fund, TWDB (Development Fund II)-Texas Water Development Fund, USDA NRCS-Watershed Protection and Flood Prevention Program, EPA-NPS Grant	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H7
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Tornado, Hail, Heat Events, Winter Storms		
<b>Project Title:</b>	Public Information and Education		
<b>Project Description:</b>	Develop severe weather warning system to alert the public of impending natural disasters.		
<b>Responsible Entity:</b>	Police Chief and Fire Marshall		
<b>Losses avoided:</b>	Loss of life and property protection		
<b>Cost Estimate:</b>	95,000	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	USDA-Rural Utilities Service-Weather Radio Grant Program, DOJ-State Homeland Security Program, National Weather Service, HMGP, PDM, FEMA-Emergency Operations Center Funding, FEMA-Emergency Management Performance Grant, USDA-Environmental Quality Incentive	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H8
<b>Hazard(s) Addressed:</b>	Floods and Wildfire		
<b>Project Title:</b>	Emergency Services		
<b>Project Description:</b>	Purchase street sign and barricades to block off streets for evacuation		
<b>Responsible Entity:</b>	Police Chief and City EMC		
<b>Losses avoided:</b>	Flooding, Homes lost, loss of life		
<b>Cost Estimate:</b>	2,500	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	Local funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H9
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Install security system for City service center.		
<b>Responsible Entity:</b>	Public Works Department Director		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	12-24 months
<b>Potential Funding Sources:</b>	FEMA-Emergency Management Performance Grant, Dept. of Justice-State Homeland Security Program, FEMA-All Hazards Operational Planning	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H12
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Tornado		
<b>Project Title:</b>	Public Information and Awareness, Emergency Services		
<b>Project Description:</b>	Develop evacuation plan.		
<b>Responsible Entity:</b>	Police Chief, Fire Marshall and Public Works Department Director		
<b>Losses avoided:</b>	Residents and existing and new properties		
<b>Cost Estimate:</b>	10,000	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	PDM Program, FEMA Emergency Management Performance Grant, Flood Mitigation Assistance Program, HMGP, USDA Environmental Quality Incentives Program, FEMA-All Hazards Operational Planning, FEMA Hazardous Materials Assistance Program, FEMA Fire Management As	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H13
<b>Hazard(s) Addressed:</b>	Wildfire		
<b>Project Title:</b>	Becoming an active participant in Firewise USA program		
<b>Project Description:</b>	The City will become an active participant in the Firewise USA program and implement a Firewise plan and outreach campaign in the community.		
<b>Responsible Entity:</b>	Mayor and city council		
<b>Losses avoided:</b>	Property and residents throughout the city.		
<b>Cost Estimate:</b>	4,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	HMP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H14
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Adopting land-use ordinance		
<b>Project Description:</b>	The city shall adopt a land-use ordinance which prohibits building residential or commercial structures in the 100-year floodplain.		
<b>Responsible Entity:</b>	City manager, City Council, Office of Code Enforcement Director		
<b>Losses avoided:</b>	Future buildings and infrastructure that may have been built within the 100-year floodplain.		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	4 months
<b>Potential Funding Sources:</b>	Current city budget and salary, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H15
<b>Hazard(s) Addressed:</b>	Tornado		
<b>Project Title:</b>	Tornado mitigation through rebate program		
<b>Project Description:</b>	The city will develop a rebate program for building owners who install straps, structural bracings, window shutters, or interlocking roof shingles in new construction or when renovating residences or businesses		
<b>Responsible Entity:</b>	City Manager, Office of Code Enforcement Director		
<b>Losses avoided:</b>	Residents, homes, business, and local facilities		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	3 months
<b>Potential Funding Sources:</b>	Current city budget and salary, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H16
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storm		
<b>Project Title:</b>	Hurricane resistant powerline poles		
<b>Project Description:</b>	All new power line poles installed within the jurisdiction will be wind resistant to Hurricane grade winds.		
<b>Responsible Entity:</b>	Engineering Department Director		
<b>Losses avoided:</b>	Homes, businesses, and public facilities		
<b>Cost Estimate:</b>	120,000	<b>Timeframe:</b>	36 Months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H17
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms Hail and Winter Storms		
<b>Project Title:</b>	Educate public of home improvement opportunities		
<b>Project Description:</b>	Educate elderly, low-income residents of grant funding opportunities to insulate the foundation of pier and beam homes, and update homes to withstand hurricane force winds and hail.		
<b>Responsible Entity:</b>	County EMC, partnering jurisdictions mayors and city councils, code of enforcement and building department Director		
<b>Losses avoided:</b>	Life, health, and safety of vulnerable populations, and property damage.		
<b>Cost Estimate:</b>	2,500	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	HMGP, USDA Home Repair Grant	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H18
<b>Hazard(s) Addressed:</b>	Dam/ Levee Failure		
<b>Project Title:</b>	Structural		
<b>Project Description:</b>	Incorporate routine repairs and structural renovation efforts of dams and levee into capital improvement plans.		
<b>Responsible Entity:</b>	County EMC, partnering jurisdictions, mayors, city councils, capital improvement boards, engineering department Director		
<b>Losses avoided:</b>	Lives, homes, businesses, critical assets, public facilities, and infrastructure destruction in the event of dam or levee failure.		
<b>Cost Estimate:</b>	1,500,000	<b>Timeframe:</b>	24-36 months
<b>Potential Funding Sources:</b>	HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H19
<b>Hazard(s) Addressed:</b>	All Hazards		
<b>Project Title:</b>	Emergency Services		
<b>Project Description:</b>	Construct a new Multi Jurisdiction Emergency Services building to house Fire Station, EMS, Police, and EOC.		
<b>Responsible Entity:</b>	Mayor and City Manager and Emergency Services District Director		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$3,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	FEMA EOC Funding & Performance Grant, HMPG, and BRIC Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H20
<b>Hazard(s) Addressed:</b>	Flooding, Hurricane, and Tornado		
<b>Project Title:</b>			
<b>Project Description:</b>	Construct a new City Hall to withstand Hurricane Force winds and continue city operations after a disaster event		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Continuity of services during and after natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$2,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, TWDB, HMPG, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	City of Brazoria, Brazoria County, West of the Brazos DD #11	<b>Action Number:</b>	H21
<b>Hazard(s) Addressed:</b>	Floods, Hurricanes, Tropical Storms		
<b>Project Title:</b>	Implement Drainage Improvements to Outfall Channels		
<b>Project Description:</b>	Widen and reshape channels, removal of trees and vegetation, and upgrade culverts to restore conveyance in channels and ditches to mitigate flooding.		
<b>Responsible Entity:</b>	Mayor and City Manager and Drainage District #11 Director		
<b>Partners:</b>	City of Brazoria, Brazoria County, and West of the Brazos DD #11		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$2,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, TWDB, HMGP, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H25
<b>Hazard(s) Addressed:</b>	Drought and Wildfire		
<b>Project Title:</b>	Construct additional EST, Replace GST		
<b>Project Description:</b>	Conduct an additional EST and replace 400,000 gal GST for additional storage to be used during a drought and fire protection to homes and businesses.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Loss of life; continuity of services during and after natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$2,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, TWDB, HMGP, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	City of Brazoria	<b>Action Number:</b>	H26
<b>Hazard(s) Addressed:</b>	Expansive Soils		
<b>Project Title:</b>	Waterline Replacement Program		
<b>Project Description:</b>	Replace old cast iron waterlines, service lines, fire hydrants, and valves throughout the city to provide adequate water during droughts, fire protection, and promote water conservation.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Loss of life; continuity of services during and after natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$2,500,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, TWDB, HMGP, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H27
<b>Hazard(s) Addressed:</b>	Flooding, Hurricanes, and Tropical Storms		
<b>Project Title:</b>	Sanitary Sewer Collections System Rehab		
<b>Project Description:</b>	Replace brick manholes, clay & concrete sewer mains, and service lines with PVC to eliminate infiltration/inflow of water into sewer system thereby preventing overflows of sewer into rivers and streams.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Continuity of services during natural disasters and/or hazards and protecting the environment.		
<b>Cost Estimate:</b>	\$12,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, TWDB, HMGP, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio

<b>Jurisdiction:</b>	Brazoria	<b>Action Number:</b>	H36
<b>Hazard(s) Addressed:</b>	Floods, Hurricanes, Tropical Storms, Winter Storm, Hail, and Lightning		
<b>Project Title:</b>	Emergency Services		
<b>Project Description:</b>	Purchase back-up generators for all critical facilities and Fire Stations		
<b>Responsible Entity:</b>	Public Works Director and Fire Marshall		
<b>Losses avoided:</b>	Continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$300,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants, Texas Forest Service	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

**Hillcrest Village**

<b>Jurisdiction:</b>	Hillcrest Village	<b>Action Number:</b>	I1
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Tornado, Drought, Heat Events, Hail, and Winter Storms, Expansive Soils		
<b>Project Title:</b>	Emergency Management Services		
<b>Project Description:</b>	Develop an outreach website and online notification system for residents to obtain Emergency information as well as informing the public of available programs to assist them in hazardous situations.		
<b>Responsible Entity:</b>	Emergency Management Coordinator		
<b>Losses avoided:</b>	Dangerous situations avoided due to the lack of information by the residents especially the elderly and low income.		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	24 months
<b>Potential Funding Sources:</b>	Local Budgets.	<b>Benefit-Cost Ratio:</b>	Less than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Hillcrest Village	<b>Action Number:</b>	I2
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Tornado, Heat Events, Hail, and Winter Storms		
<b>Project Title:</b>	Emergency Management Services		
<b>Project Description:</b>	Purchase and install backup 60KW generator to power Emergency Operations Command Center during power outages.		
<b>Responsible Entity:</b>	Emergency Management Coordinator		
<b>Losses avoided:</b>	Loss of life due to the incapacity to respond during emergency situations.		
<b>Cost Estimate:</b>	50,000	<b>Timeframe:</b>	24 months
<b>Potential Funding Sources:</b>	Local Budgets.	<b>Benefit-Cost Ratio:</b>	Less than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Hillcrest Village	<b>Action Number:</b>	I3
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Flood Mitigation		
<b>Project Description:</b>	Partner with local Drainage District to widen and reshape drainage ditches, and upgrade culverts to restore adequate drainage to mitigate flooding.		
<b>Responsible Entity:</b>	Public Works Director and Velasco Drainage District Director		
<b>Losses avoided:</b>	Repairs to homes flooded due to improper drainage.		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	Local Budgets.	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Hillcrest Village	<b>Action Number:</b>	I4
<b>Hazard(s) Addressed:</b>	Wildfire, Drought, and Heat Events		
<b>Project Title:</b>	Fire Mitigation		
<b>Project Description:</b>	Replace outdated fire Hydrants and associated system requirements with upgraded equipment.		
<b>Responsible Entity:</b>	Public Works Director		
<b>Losses avoided:</b>	Repairs to city structures and homes flooded due to improper drainage.		
<b>Cost Estimate:</b>	100,000	<b>Timeframe:</b>	36 months
<b>Potential Funding Sources:</b>	Local Budgets.	<b>Benefit-Cost Ratio:</b>	Less than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Hillcrest Village	<b>Action Number:</b>	I5
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Flood Mitigation		
<b>Project Description:</b>	Conduct an engineering survey to establish proper drainage for 24 Homes in the Flood Zone.		
<b>Responsible Entity:</b>	Public Works Director		
<b>Losses avoided:</b>	Repairs to city structures and homes flooded due to improper drainage.		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	Local Budgets.	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Hillcrest Village	<b>Action Number:</b>	I6
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Flood Mitigation		
<b>Project Description:</b>	Purchase additional land for retention pond construction to mitigate flooding in flood zones.		
<b>Responsible Entity:</b>	Emergency Management Coordinator		
<b>Losses avoided:</b>	Repairs to homes and city structures after flooding.		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	72 months
<b>Potential Funding Sources:</b>	Local, State and Federal Grants.	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

## Clute

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J1
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Waste water treatment plant		
<b>Project Description:</b>	Replace the old generator unit with a new unit at the waste water treatment plant.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	During any power outages, this would assure that the waste water treatment plant would continue to operate and avoid sewer back up. This plant serves Clute; Richwood		
<b>Cost Estimate:</b>	225,000	<b>Timeframe:</b>	36 to 48 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J2
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Infrastructure		
<b>Project Description:</b>	Deepen Velasco drainage District ditch between Lake Bend Ramp; Mammoth Lake, Lakeview, College park		
<b>Responsible Entity:</b>	Mayor and City Manager, Velasco drainage District Director		
<b>Losses avoided:</b>	Clute Ramp; Lake Jackson subdivision flooding		
<b>Cost Estimate:</b>	1,500,000	<b>Timeframe:</b>	24 to 36 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J3
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Refurbish Temple Ditch		
<b>Project Description:</b>	Refurbish Temple Ditch from Plantation to SH332, Deepen, widen, replace culverts and Clean.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Temple ditch is one of the city's main ditch for drainage especially during a storm or heavy rain.		
<b>Cost Estimate:</b>	750,000	<b>Timeframe:</b>	12 to 24 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J4
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Deepen VDD ditch behind high school		
<b>Project Description:</b>	Deepen Velasco drainage district ditch behind the Brazos wood high school to Lake Bend outfall		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	This ditch drains both Lake Jackson and Clute during heavy rains or storms. This would avoid subdivisions in both cities from flooding.		
<b>Cost Estimate:</b>	350,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J5
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	College Park Pump Station		
<b>Project Description:</b>	Install a permanent ditch water pumping station at College Park.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	Flooding of Homes throughout the subdivision		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J6
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms		
<b>Project Title:</b>	Lexington & Creek Rd Water Pumping station		
<b>Project Description:</b>	Install permanent ditch water pumping station at Lexington & Creek Road.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	This ditch receives rain water from Lake Jackson and Clute. Flooding		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	24 to 36 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J7
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Flag Lake Dry Culverts		
<b>Project Description:</b>	Deepen ditch and replace culverts on Flag Lake Dry to increase storm water infrastructure capacity.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	The flooding of homes and businesses along Flag Lake Dr.		
<b>Cost Estimate:</b>	200,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J8
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Wood shore Lift Station		
<b>Project Description:</b>	Obtain and install a SCADA notification system for the Wood Shore sewer lift station.		
<b>Responsible Entity:</b>	Mayor and City Manager		
<b>Losses avoided:</b>	The is used to monitor the lift station levels and flows, and possibly pump failure. A pump failure could cause potentially sewer to back up in the subdivision.		
<b>Cost Estimate:</b>	25,000	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Clute	<b>Action Number:</b>	J9
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Bumpy Rd sewer lift station		
<b>Project Description:</b>	Deepen Wet Well at Bumpy Rd sewer lift station. This would increase the sewer capacity.		
<b>Responsible Entity:</b>	Clute Mayor and City Manager		
<b>Losses avoided:</b>	The inability to keep up with the City's sewer demands in times of heavy rains		
<b>Cost Estimate:</b>	350,000	<b>Timeframe:</b>	12 to 24 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

## Port of Freeport

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L1
<b>Hazard(s) Addressed:</b>	Flooding, Hurricane, Wildfire, Drought, Lightning, Heat Events, Hail, Winter Weather, Tornado, Dam and Levee Failure, Coastal Erosion		
<b>Project Title:</b>	Warning System		
<b>Project Description:</b>	Develop audio warning system for notifying the Port personnel and tenants of an imminent natural hazard threat.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Human injury and loss of life Property damage		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	4 to 6 months
<b>Potential Funding Sources:</b>	Grant funding will be used with matching funds coming from Port Freeport funds.	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L2
<b>Hazard(s) Addressed:</b>	Flooding, Hurricane, Wildfire, Drought, Lightning, Heat Events, Hail, Winter Weather, Tornado, Dam and Levee Failure, Coastal Erosion		
<b>Project Title:</b>	Weather Station		
<b>Project Description:</b>	Update and expand the current weather station capabilities to give more detailed and earlier warnings of potentially threatening natural hazards.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Human injury or loss of life Property and equipment damage		
<b>Cost Estimate:</b>	35,000	<b>Timeframe:</b>	3 months
<b>Potential Funding Sources:</b>	Grant funds will be utilized with matching coming from Port Freeport funds.	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L3
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Tornado, Dam/ Levee Failure, and Winter Storms		
<b>Project Title:</b>	Record Management System		
<b>Project Description:</b>	Identify and implement a paperless records management system to improve resilience before and after a disaster.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Data loss (financial and sales), Engineering drawings destroyed or damaged, Administrative documents such as policies and procedures, Records required by law (ex. compliance and open record data)		
<b>Cost Estimate:</b>	75,000	<b>Timeframe:</b>	6 to 9 months
<b>Potential Funding Sources:</b>	Grant funds would be used with the matching coming from Port Freeport funds.	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L4
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Dam/ Levee Failure, and Winter Storms		
<b>Project Title:</b>	Drainage Improvement		
<b>Project Description:</b>	Implement drainage improvements to drain water away from the transit shed facilities and dock areas. Widen and reshape drainage ditches, and upgrade culverts to restore adequate drainage to mitigate flooding.		
<b>Responsible Entity:</b>	Port Freeport Engineering Director		
<b>Losses avoided:</b>	Building damage, Cargo damage/loss, Human injury		
<b>Cost Estimate:</b>	3,750,000	<b>Timeframe:</b>	9 to 12 months
<b>Potential Funding Sources:</b>	Grant funds will be used which the grant match coming from Port Freeport funds.	<b>Benefit-Cost Ratio:</b>	Less than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L5
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Wildfire, Tornado, Hail, and Winter Storms		
<b>Project Title:</b>	Storm Shutters		
<b>Project Description:</b>	Install storm shutters on all exterior Port facility windows and glass doors		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Human injury or death and Facility damage		
<b>Cost Estimate:</b>	325,000	<b>Timeframe:</b>	9 to 12 months
<b>Potential Funding Sources:</b>	The match will be paid with Port Freeport funds.	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L6
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Tornado, Dam/ Levee Failure, Hail, Winter Storms		
<b>Project Title:</b>	Communication Center Improvements		
<b>Project Description:</b>	Expand the information and communication capabilities of the Port Freeport Emergency Operation Center to better communicate vessel traffic and waterway information to channel users before, during and after natural disaster		
<b>Responsible Entity:</b>	Port Freeport Operations Director		
<b>Losses avoided:</b>	Human injury or death Marine vessel damage or loss Water channel blockage Damage to the shore line, Decreased channel depth, Environmental hazard release/spill, Vessel collision		
<b>Cost Estimate:</b>	425,000	<b>Timeframe:</b>	6 to 9 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L7
<b>Hazard(s) Addressed:</b>	All Hazards		
<b>Project Title:</b>	Emergency Power Back-up		
<b>Project Description:</b>	Implement a backup power solution for critical Port Freeport infrastructure which includes a fixed back up emergency power generator for the Port Freeport Administration Building and two mobile emergency power generator trailers.		
<b>Responsible Entity:</b>	Port Freeport Engineering Manager		
<b>Losses avoided:</b>	Lose the function of Administrative, Operation, and cargo storage facilities Impact to economy (\$126.6M/day) Loss of economy income (\$20.8M/day)		
<b>Cost Estimate:</b>	350,000	<b>Timeframe:</b>	6 to 9 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L8
<b>Hazard(s) Addressed:</b>	Coastal Erosion		
<b>Project Title:</b>	Erosion Barrier		
<b>Project Description:</b>	Add an erosion barrier wall to eliminate or reduce erosion along the Port's fence line.		
<b>Responsible Entity:</b>	Port Freeport Engineering Manager		
<b>Losses avoided:</b>	Human injury, Cargo damage, Property damage, Loss of usable property for cargo storage		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	12 to 18 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L9
<b>Hazard(s) Addressed:</b>	Wildfire, Drought, Heat Events		
<b>Project Title:</b>	Cooling zones		
<b>Project Description:</b>	Implement cooling zones in the Port to protect Port users from extreme heat. Cooling fans can also be utilized to deflect smoke and chemical released gases to a non-populated area.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Human injury or death, Cargo damage, Facility damage		
<b>Cost Estimate:</b>	175,000	<b>Timeframe:</b>	6 to 9 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L10
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Tornado, Hail, Winter Storms		
<b>Project Title:</b>	Crane simulator		
<b>Project Description:</b>	Install a crane simulator and implement a crane training program to improve resilience after a natural disaster. This capability would allow technicians and operators to train on crane troubleshooting and repairs in a training.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	During crane down time, the technicians will be better prepared to get the crane operational again. In return, this reduces the lost time and allows vessel to get out of the port in a timelier manner.		
<b>Cost Estimate:</b>	300,000	<b>Timeframe:</b>	12 to 18 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L11
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Wildfire, Tornado, Heat Events and Winter Storms		
<b>Project Title:</b>	Emergency Vessel Simulator		
<b>Project Description:</b>	Design and construct a ship vessel simulator for emergency response training to improve the response and rescue capabilities for first responders in the region. The marine training prop would be utilized to train local firefighters in a realistic live setting.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Human injury or death, Property loss, Cargo loss, Channel blockage, Dock damage, Environmental spill or release		
<b>Cost Estimate:</b>	425,000	<b>Timeframe:</b>	12 to 18 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L12
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Tornado, Drought, Dam/ Levee Failure, Heat Events, and Winter Storms		
<b>Project Title:</b>	IT Fail-over		
<b>Project Description:</b>	Implement an IT fail-over at a second location to assure proper network operation during and after a natural disaster. In the event the main data center failed, the fail-over location would take over IT network operations.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Commercial interruption (\$126.6M/day economic impact)		
<b>Cost Estimate:</b>	225,000	<b>Timeframe:</b>	9 to 12 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L13
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Tornado, Dam/ Levee Failure and Winter Storms		
<b>Project Title:</b>	Weather Cameras		
<b>Project Description:</b>	Expand the current video management system to include weather cameras along the waterway to remotely monitoring weather conditions, search for people in distress, and evaluate damage caused by natural hazards.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Human injury or death, Vessel damage or loss, Commercial interruption (\$126.6M/day in economic impact), Cargo damage or loss, Shoreline damage		
<b>Cost Estimate:</b>	200,000	<b>Timeframe:</b>	9 to 12 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L14
<b>Hazard(s) Addressed:</b>	Hurricane/ Tropical Storms, Wildfire, Tornado, Hail, and Winter Storms		
<b>Project Title:</b>	Channel lighting		
<b>Project Description:</b>	Add additional lighting along the waterway for increased vessel safety and visibility during poor weather conditions.		
<b>Responsible Entity:</b>	Port Freeport Engineering Manager		
<b>Losses avoided:</b>	Human injury or death, Vessel damage or loss, Cargo damage or loss, Commercial interruption (\$226.6M/day in economic impact), Shore line damage		
<b>Cost Estimate:</b>	150,000	<b>Timeframe:</b>	12 to 18 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L15
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Tornado, Drought, Dam/ Levee Failure Heat Events and Winter Storms		
<b>Project Title:</b>	Power Back up		
<b>Project Description:</b>	Upgrade the IT power backup and electrical grounding protection capabilities for Port of Freeport's Data Center to protect data and IT equipment during a natural hazard.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Commercial interruption (\$226.6M/day in economic impact), Cargo damage or loss, Port facilities not functional, including the Emergency Operation Center		
<b>Cost Estimate:</b>	250,000	<b>Timeframe:</b>	3 to 6 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L16
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storm, Erosion, and Dam/ Levee Failure		
<b>Project Title:</b>	Water Flow Monitor		
<b>Project Description:</b>	Design and install a system which will transmit water flow characteristics for the surrounding creeks, rivers, and intracoastal waterway to a central location, so the information can be shared with other waterway users while increasing the safety of vessel		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Human injury or death, Vessel damage or loss, Cargo damage or loss, Commercial interruption (\$226.6M/day in economic impact), Hazardous material release or spill		
<b>Cost Estimate:</b>	185,000	<b>Timeframe:</b>	12 to 18 months
<b>Potential Funding Sources:</b>	Match will be paid with Port Freeport funds	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L17
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, or Tropical Cyclone		
<b>Project Title:</b>	Emergency Alert System		
<b>Project Description:</b>	Audio and visual warning system for notifying the Port personnel and port users of an imminent natural hazard threat.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; property and facility damage.		
<b>Cost Estimate:</b>	\$200,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L18
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, or Tropical Cyclone		
<b>Project Title:</b>	Weather Station Enhancement		
<b>Project Description:</b>	Update and expand the current weather station capabilities to give more detailed and earlier warnings of potentially threatening natural hazards		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; property and facility damage.		
<b>Cost Estimate:</b>	\$35,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L19
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Paperless Record System		
<b>Project Description:</b>	Identify and implement a paperless records management system to improve resilience before and after a disaster.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; data loss (financial and sales); engineering drawings destroyed or damaged; administrative documents such as policies and procedures; records required by law (ex. compliance and open record data)		
<b>Cost Estimate:</b>	\$150,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L20
<b>Hazard(s) Addressed:</b>	Flood, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Drainage Improvements		
<b>Project Description:</b>	Implement drainage improvements to drain water away from the transit shed facilities and dock areas. Widen and reshape drainage ditches, and upgrade culverts to restore adequate drainage to mitigate flooding.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; cargo damage; reduction in cargo staging areas.		
<b>Cost Estimate:</b>	\$3,500,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L21
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Channel User Communications		
<b>Project Description:</b>	Expand the information and communication capabilities of the Port Freeport Emergency Operation Center to better communicate vessel traffic and waterway information to channel users before, during and after natural disaster.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; marine vessel damage; waterway channel blockage; shoreline damage; environmental hazardous spill/release; marine vessel collision.		
<b>Cost Estimate:</b>	\$400,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L22
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Back-up Generator for Administration Building		
<b>Project Description:</b>	Implement a backup power solution for critical Port Freeport infrastructure which includes a static Back-up emergency power generator for the Port Freeport Administration Building.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$425,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L23
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Fence Line Erosion Barrier		
<b>Project Description:</b>	Add an erosion barrier wall to eliminate or reduce erosion along the Port's fence line.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; cargo damage; property damage; loss of usable property for cargo storage.		
<b>Cost Estimate:</b>	\$300,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L24
<b>Hazard(s) Addressed:</b>	Extreme Heat, Flood, Hail, Tornado, Lightning, Severe Weather, Winter Storm, or Tropical Cyclone		
<b>Project Title:</b>	Crane Maintenance Simulator		
<b>Project Description:</b>	Install a crane simulator and implement a crane training program to improve resilience after a natural disaster. This capability would allow technicians and operators to train on crane troubleshooting and repairs in a training.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; time delays to supply chain.		
<b>Cost Estimate:</b>	\$350,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L25
<b>Hazard(s) Addressed:</b>	Extreme Heat, Flood, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, or Tropical Cyclone		
<b>Project Title:</b>	Emergency Response Training Simulator		
<b>Project Description:</b>	Design and construct a ship vessel simulator for emergency response training to improve the response and rescue capabilities for first responders in the region. The marine training prop would be utilized to train local firefighters in a realistic live setting simulating a response to a natural hazard incident on a maritime vessel.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; cargo loss; delays to supply chain; dock damage.		
<b>Cost Estimate:</b>	\$600,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L26
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Network Failover Site		
<b>Project Description:</b>	Implement an IT fail-over at a second location to assure proper network operation during and after a natural disaster. In the event the main data center failed, the fail-over location would take over IT network operations.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; delays to the supply chain.		
<b>Cost Estimate:</b>	\$460,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L27
<b>Hazard(s) Addressed:</b>	Flood, Hail, Tornado, Wildfire, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Channel Weather Cameras		
<b>Project Description:</b>	Expand the current video management system to include weather cameras along the waterway to remotely monitoring weather conditions, search for people in distress, and evaluate damage caused by natural hazards.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; delays to the supply chain.		
<b>Cost Estimate:</b>	\$225,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L28
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Network Infrastructure Power Backup and Electrical Grounding		
<b>Project Description:</b>	Upgrade the IT power backup and electrical grounding protection capabilities for Port of Freeport's Data Center to protect data and IT equipment during a natural hazard.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; Emergency Operation Center going off-line.		
<b>Cost Estimate:</b>	\$75,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L29
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Hail, Tornado, Wildfire, Lightning, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Backup Internet Services		
<b>Project Description:</b>	Add cellular and satellite internet service to the Emergency Operation Center, which would be utilized in the event of fiber internet service failure.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; Emergency Operation Center going off-line; delays to the supply chain.		
<b>Cost Estimate:</b>	\$75,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Ye
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L30
<b>Hazard(s) Addressed:</b>	Drought, Extreme Heat, Flood, Tornado, Wildfire, Levee Failure, Severe Weather, Winter Storm, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Pavement, Roadways and Surface Repairs		
<b>Project Description:</b>	Repair damages to roadways, driveways, entrances, parking lots and cargo staging area surfaces caused by a natural hazard.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$5,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Port Freeport	<b>Action Number:</b>	L31
<b>Hazard(s) Addressed:</b>	Drought, Flood, Tornado, Wildfire, Levee Failure, Severe Weather, Coastal Erosion, Expansive Soils, or Tropical Cyclone		
<b>Project Title:</b>	Dock Repairs		
<b>Project Description:</b>	Repair damages to the docks caused by a natural hazard, particularly if a natural hazard causes a ship to break loss and crash into the dock.		
<b>Responsible Entity:</b>	Port Freeport Protective Services Chief		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards; inability to handle cargo; divert cargo to other ports causing supply chain delays and shortages; spoiled food cargo.		
<b>Cost Estimate:</b>	\$20,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

**Brazosport College**

<b>Jurisdiction:</b>	Brazosport College		<b>Action Number:</b>	S1
<b>Hazard(s) Addressed:</b>	Emergencies on Campus (human and natural), Active Shooter, Floods, Severe Thunderstorms, Tornado, Hail, Public Safety			
<b>Project Title:</b>	Internal and External Campus-Wide Emergency Warning System Upgrade ( <i>TV screens inside buildings, personal computers, desk phones, and outside speakers</i> )			
<b>Project Description:</b>	Install, improve, and upgrade the campus-wide warning system for notifying all persons on campus of an imminent human or natural hazard threat on many platforms. This project would include software that would encompass all means of notification possible.			
<b>Responsible Entity:</b>	Brazosport College EMC and Police Chief			
<b>Losses avoided:</b>	Human injury and loss of life			
<b>Cost Estimate:</b>	\$254,000	<b>Timeframe:</b>	When funding becomes available	
<b>Potential Funding Sources:</b>	Hazard Mitigation Program Grant	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				Yes

<b>Jurisdiction:</b>	Brazosport College		<b>Action Number:</b>	S2
<b>Hazard(s) Addressed:</b>	Hurricanes, Tornadoes, High Winds, Public Safety			
<b>Project Title:</b>	Roofing and Structural Re-enforcement			
<b>Project Description:</b>	Reinforcing RTU's and piping on all building roofs. This will prevent system damages and flying debris caused by strong storms and hurricanes. Also, correcting structural issues in several concrete columns that are deteriorating from rusted rebar that has busted out large pieces of concrete in our Sadler and BASF buildings.			
<b>Responsible Entity:</b>	Brazosport College EMC and Police Chief			
<b>Losses avoided:</b>	Loss of Property, Continuity of services during natural disasters.			
<b>Cost Estimate:</b>	\$850,000	<b>Timeframe:</b>	When funding becomes available	
<b>Potential Funding Sources:</b>	Hazard Mitigation Program Grant	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio	
Does this action reduce effects of hazards on existing buildings?				Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?				Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?				No

<b>Jurisdiction:</b>	Brazosport College	<b>Action Number:</b>	S3
<b>Hazard(s) Addressed:</b>	Emergencies on Campus – Public Safety, Active Shooter, Fire, Chemical Release, Explosion		
<b>Project Title:</b>	North Emergency Roadway		
<b>Project Description:</b>	Design, engineer and construct a rock-based ~754' emergency roadway to the north end of campus that would exit into Oyster Bend Subdivision. Roadway would only be used for emergency ingress/egress to Oyster Bend subdivision.		
<b>Responsible Entity:</b>	Brazosport College EMC and Police Chief		
<b>Losses avoided:</b>	Human injury and loss of life		
<b>Cost Estimate:</b>	\$125,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Hazard Mitigation Program Grant, Brazoria County Pct. 1 Road and Bridge	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazosport College	<b>Action Number:</b>	S4
<b>Hazard(s) Addressed:</b>	Emergencies on Campus (human and natural), Active Shooter, Fire, Floods, Severe Thunderstorms, Tornados		
<b>Project Title:</b>	Building Automation Systems (Automated External Door Locks)		
<b>Project Description:</b>	Install building automation systems to all exterior doors to buildings on campus to be used in case of an imminent human or natural hazard threat.		
<b>Responsible Entity:</b>	Brazosport College EMC and Police Chief		
<b>Losses avoided:</b>	Human injury and loss of life		
<b>Cost Estimate:</b>	\$400.000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Hazard Mitigation Program Grant	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazosport College	<b>Action Number:</b>	S5
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Severe Thunderstorms, Tornado, Hail		
<b>Project Title:</b>	Upgrade Exterior Glass/Windows		
<b>Project Description:</b>	Upgrading campus exterior windows to windstorm rated glass. Due to our coastal location, amount of exterior window walls, and large amounts of trees, we need the added building and student/staff protection from severe storms and hurricanes.		
<b>Responsible Entity:</b>	Brazosport College EMC and Police Chief		
<b>Losses avoided:</b>	Loss of/damage to property; continuity of services during natural disasters.		
<b>Cost Estimate:</b>	\$2,500.000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Hazard Mitigation Program Grant	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazosport College	<b>Action Number:</b>	S6
<b>Hazard(s) Addressed:</b>	Public Safety, Crime Reduction		
<b>Project Title:</b>	Lighting Improvement on campus and jogging trail		
<b>Project Description:</b>	Install additional and stronger light coverage in darker areas between buildings, parking lots, sidewalks, and along the campus/community walking trail.		
<b>Responsible Entity:</b>	Brazosport College EMC and Police Chief		
<b>Losses avoided:</b>	Life Safety, Crime Reduction		
<b>Cost Estimate:</b>	\$250,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Hazard Mitigation Program Grant	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

## Sweeny

<b>Jurisdiction:</b>	Sweeny	<b>Action Number:</b>	T1
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Dam/ Levee Failure,		
<b>Project Title:</b>	Drainage Improvements		
<b>Project Description:</b>	Implement drainage improvement program to include widening and reshaping drainage ditches, and upgrade culverts to restore adequate drainage on CR 332		
<b>Responsible Entity:</b>	West Brazos Drainage District #11 Director, Sweeny Mayor and City Manager		
<b>Losses avoided:</b>	Life safety, protect property		
<b>Cost Estimate:</b>	500,000	<b>Timeframe:</b>	36-60 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Sweeny	<b>Action Number:</b>	T2
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Dam/ Levee Failure		
<b>Project Title:</b>	Drainage		
<b>Project Description:</b>	Enlarge culverts along Stevenson Slough to increase stormwater infrastructure.		
<b>Responsible Entity:</b>	Sweeny Mayor and City Manager		
<b>Losses avoided:</b>	Life safety and protect property		
<b>Cost Estimate:</b>	125,000	<b>Timeframe:</b>	36-60 months
<b>Potential Funding Sources:</b>	HMPG	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Sweeny	<b>Action Number:</b>	T3
<b>Hazard(s) Addressed:</b>	Drought, Heat Events, Expansive Soils, Winter Storms		
<b>Project Title:</b>	Replace Infrastructure		
<b>Project Description:</b>	Replacement of aging water and sewer lines throughout the city that are vulnerable to failure during natural disasters.		
<b>Responsible Entity:</b>	Sweeny Public Works Director		
<b>Losses avoided:</b>	Protect our sewer plant with less rain water going into broken sewer lines		
<b>Cost Estimate:</b>	10,000,000	<b>Timeframe:</b>	36-48 months
<b>Potential Funding Sources:</b>	FEMA Grants, TWDB Grants	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

## Unincorporated Brazoria County

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N1
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Structural Project		
<b>Project Description:</b>	Widen and reshape drainage ditches, and upgrade culverts to restore adequate drainage to mitigate flooding. Use a drainage study to target high impact areas.		
<b>Responsible Entity:</b>	County Road and Bridge Dept. Manager and County Drainage District Director		
<b>Losses avoided:</b>	Property and lives throughout the city		
<b>Cost Estimate:</b>	500,000	<b>Timeframe:</b>	48 months
<b>Potential Funding Sources:</b>	Drainage district funds as available, Local funds, TWDB-Clean Water Revolving Fund, TWDB (Development Fund II), USDA NRCS-Watershed Protection and Flood Prevention Program, EPA NPS Grant Program, 406 Public Assistance, USACE-Clearing and Snagging P	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N2
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Public Education		
<b>Project Description:</b>	Implement campaign on public education of ICC (Increased Cost of Compliance) coverage.		
<b>Responsible Entity:</b>	Brazoria County NFIP Administrator		
<b>Losses avoided:</b>	Life safety and public property		
<b>Cost Estimate:</b>	5,000	<b>Timeframe:</b>	24 months
<b>Potential Funding Sources:</b>	Flood Mitigation Assistance Program, Hazard Grant Program, ICC training for public and insurance agents may be available free of charge through FEMA	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N3
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Structural Project, Property Protection		
<b>Project Description:</b>	Implement dune and beach restoration to protect county beach areas between Surfside Beach and San Luis Pass		
<b>Responsible Entity:</b>	County Rd and Bridge Dept. Director and Parks Dept. Director		
<b>Losses avoided:</b>	Life safety and public property		
<b>Cost Estimate:</b>	750,000	<b>Timeframe:</b>	18 months
<b>Potential Funding Sources:</b>	USACE-Emergency Stream Bank and Shoreline Protection, USACE-Planning Assistance to States, HMGP, USACE-Nonstructural Alternatives to Structural Rehabilitation of Damages Flood Control Works, USACE-Planning Assistance to States	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N4
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Coastal River Flood Extent Analysis		
<b>Project Description:</b>	Determine flood extents, in Brazoria County, because of recent hurricane disasters, by analyzing the post event aerial imagery through a GIS image classification process, and compare the flood extent area to other sources, such as LIDAR surface elevate		
<b>Responsible Entity:</b>	Engineering Department Director		
<b>Losses avoided:</b>	Will prevent future loss of life and property, by refining evacuation area decisions, floodplain updates, development / building construction codes.		
<b>Cost Estimate:</b>	50,000	<b>Timeframe:</b>	6 to 12 months.
<b>Potential Funding Sources:</b>	90 percent - HMGP, PDM, TWDB FMA; 10 percent In-kind service match on part of Brazoria County through labor and in-turn data provision.	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N5
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms and Erosion		
<b>Project Title:</b>	Prevention, Property Protection		
<b>Project Description:</b>	Treasure Island Revetment project. The project also focuses on developing alternatives for a beach nourishment project near the revetment and fishing pier area to widen the beach and provide a buffer to reduce storm impacts to the existing s		
<b>Responsible Entity:</b>	Commissioner Donald "Dude" Payne, Brazoria County Pct. 1		
<b>Losses avoided:</b>	Life safety and public property		
<b>Cost Estimate:</b>	4,000,000	<b>Timeframe:</b>	48 to 60 months
<b>Potential Funding Sources:</b>	FEMA, HMG, CEPRA, CIAP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N6
<b>Hazard(s) Addressed:</b>	Floods and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Elevate structures in flood zone		
<b>Project Description:</b>	Elevate structures in flood zone. During Harvey Brazoria County had 12,000 structures flooded. Over 70% of these structures are pre-firm and do not meet current FEMA elevation standards. FEMA estimates that over 400 structures may be substantially damaged and must be elevated to meet current standards		
<b>Responsible Entity:</b>	Floodplain District Director		
<b>Losses avoided:</b>	The County estimates 60,000,000.00 in savings from flood damage to structures.		
<b>Cost Estimate:</b>	60,000,000	<b>Timeframe:</b>	60 months
<b>Potential Funding Sources:</b>		<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N7
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	NFIP Technical Material		
<b>Project Description:</b>	Place copies of FEMA Flood-related technical bulletins in County libraries.		
<b>Responsible Entity:</b>	Emergency Management Coordinator		
<b>Losses avoided:</b>	Creating an awareness of building requirements for NFIP participants will encourage them to build sensibly or modify existing structure, to be more flood damage-resistant.		
<b>Cost Estimate:</b>	1,000	<b>Timeframe:</b>	6 months
<b>Potential Funding Sources:</b>	PDM, HMGP, local funds	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N8
<b>Hazard(s) Addressed:</b>	Flood and Hurricane/ Tropical Storms		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Removal of debris, widen and reshape drainage ditches, and upgrade culverts to restore adequate drainage to mitigate flooding throughout the county.		
<b>Responsible Entity:</b>	Brazoria County EMC and Velasco Drainage District Director		
<b>Losses avoided:</b>	Life safety and public property		
<b>Cost Estimate:</b>	500,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	PDM, HMGP	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N9
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Secure and develop park land surrounding Hanson-Riverside County Park and San Bernard River area		
<b>Project Description:</b>	Purchase adjacent tracts of approximately 335 acres surrounding existing Hanson-Riverside County Park footprint. This land is divided into a few tracts, but all is listed as one owner, and much of it was impacted by recent flooding by near-record levels of the San Bernard River		
<b>Responsible Entity:</b>	Brazoria County Parks Department Director		
<b>Losses avoided:</b>	To help mitigate future flooding to which this area is prone.		
<b>Cost Estimate:</b>	6,000,000	<b>Timeframe:</b>	15 to 24 months
<b>Potential Funding Sources:</b>	County funds and all available grants, commercial and governmental	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N10
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Secure and develop Park land of surrounding tracts near Camp Mohawk County Park		
<b>Project Description:</b>	Purchase approximately 160 acres adjacent to and surrounding Camp Mohawk County Park, which will involve negotiating with several landowners of smaller tracts, and one large, 107-acre tract. Minimal but useful development of trails and boardwalks would be appropriate along this new acreage, and no doubt utilized by citizens of surrounding neighborhoods who already visit the park for day use such as hiking, biking, fishing and other recreation. Such development could also be engineered and appropriately elevated so as to help mitigate future high-water issues.		
<b>Responsible Entity:</b>	Brazoria County Park Department Director		
<b>Losses avoided:</b>	This area along Chocolate Bayou is also historically prone to flooding. During Hurricane Harvey, this immediate vicinity received huge amounts of rain along the bayou and its watershed, and the park and surrounding neighborhoods experienced severe flooding with hundreds of homes affected. Converting remaining undeveloped land into park space is perhaps the single most practical use of it, and would likely be welcomed by the surrounding populace.		
<b>Cost Estimate:</b>	7,500,000	<b>Timeframe:</b>	14 to 24 months
<b>Potential Funding Sources:</b>	County Funds and any applicable grants	<b>Benefit-Cost Ratio:</b>	Approximately a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	Brazoria County	<b>Action Number:</b>	N11
<b>Hazard(s) Addressed:</b>	Floods		
<b>Project Title:</b>	Property Protection		
<b>Project Description:</b>	Dig ditch to take water that builds up in Quail Ridge subdivision to the Austin Bayou.		
<b>Responsible Entity:</b>	Brazoria County Engineering Department Director		
<b>Losses avoided:</b>	Life safety and public property		
<b>Cost Estimate:</b>	75,000	<b>Timeframe:</b>	12 months
<b>Potential Funding Sources:</b>	Road and Bridge funds operating budget, TWDB-Clean Water Revolving Fund, TWDB (Development Fund II) - Texas Water Development Fund, USDA NRCS-Watershed Protection and Flood Prevention Program, EPA NPS Grant Program ,406 Public Assistance, USACE-Clear	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes

**BRAZOSPORT INDEPENDENT SCHOOL DISTRICT**

<b>Jurisdiction:</b>	<b>BRAZOSPORT INDEPENDENT SCHOOL DISTRICT</b>	<b>Action Number:</b>	V1
<b>Hazard(s) Addressed:</b>	ACTIVE SHOOTER (MASS CASUALTY)		
<b>Project Title:</b>	Educating students, staff, substitute teachers, and visitors on the Standard Response Protocols for an active shooter (Mass casualty) event.		
<b>Project Description:</b>	Implement an outreach and education campaign to educate students in grades 7th - 12th, staff, substitute teachers, and visitors on the Standard Response Protocols for an active shooter (Mass casualty) event. This training will help mitigate the loss of life and damage to property. This training will occur at the Districts Campuses (10 Elementary schools, 3 High schools, 5 Middle schools, and 1 Alternative school)		
<b>Responsible Entity:</b>	Brazosport ISD EMC		
<b>Losses avoided:</b>	Loss of life, prevention training, continuity of response, services, and recovery before, during, and after an event.		
<b>Cost Estimate:</b>	\$20,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce the effects of hazards on existing buildings?			<b>Yes or No</b>
Does this action reduce the effects of hazards for new buildings, infrastructure, or future development?			<b>Yes or No</b>
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			<b>Yes or No</b>

<b>Jurisdiction:</b>	<b>BRAZOSPORT INDEPENDENT SCHOOL DISTRICT</b>	<b>Action Number:</b>	V2
<b>Hazard(s) Addressed:</b>	Flooding, Hurricanes, Tropical Storm, Lighting, Heat, Winter Storm, Tornado		
<b>Project Title:</b>	Installation of Generators as a Secondary Source of Power during power outages due to Weather events. This allows the below instructional facilities to function as COMMUNITY SAFE ROOMS		
<b>Project Description:</b>	<p>Installation of 13 Generators at the following Instructional Campuses:</p> <ul style="list-style-type: none"> <li>● Stephen F. Austin Elementary / Madge Griffith Elementary</li> <li>● Elisabet Ney Pre-Kindergarten / Gladys Polk Elementary</li> <li>● Velasco Elementary / R. O'Hare Lanier Middle School</li> <li>● Grady Rasco Middle School / Clute Intermediate School</li> <li>● Freeport Intermediate School / Lake Jackson Intermediate School</li> <li>● Brazosport High School / Brazos Success Academy / Lighthouse Learning Center</li> </ul> <p>During power outage events, these facilities would be able to be community-safe rooms.</p>		
<b>Responsible Entity:</b>	BRAZOSPORT ISD EMC		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	\$4,550,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce the effects of hazards on existing buildings?			<b>Yes or No</b>
Does this action reduce the effects of hazards for new buildings, infrastructure, or future development?			<b>Yes or No</b>
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			<b>Yes or No</b>

## Freeport

<b>Jurisdiction:</b>	Freeport	<b>Action Number:</b>	R1
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Severe Thunderstorms, Tornado, Hail, Winter Storms		
<b>Project Title:</b>	Generator – City Hall		
<b>Project Description:</b>	Purchase Generator for critical facilities		
<b>Responsible Entity:</b>	City of Freeport Mayor and City Manager		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters.		
<b>Cost Estimate:</b>	\$425,000.00	<b>Timeframe:</b>	12 to 36 months
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Program	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Freeport	<b>Action Number:</b>	R2
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Severe Thunderstorms, Tornado, Hail, Winter Storms		
<b>Project Title:</b>	Generator – Recreation Center		
<b>Project Description:</b>	Purchase Generator for critical facilities		
<b>Responsible Entity:</b>	City of Freeport Mayor and City Manager		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters.		
<b>Cost Estimate:</b>	\$200,000.00	<b>Timeframe:</b>	12 to 36 months
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Program	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Freeport	<b>Action Number:</b>	R3
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Severe Thunderstorms, Tornado, Hail, Winter Storms		
<b>Project Title:</b>	Generator – Service Center		
<b>Project Description:</b>	Purchase Generator for critical facilities		
<b>Responsible Entity:</b>	City of Freeport Public Works Director		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters.		
<b>Cost Estimate:</b>	\$200,000.00	<b>Timeframe:</b>	12 to 36 months
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Program	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	Freeport	<b>Action Number:</b>	R4
<b>Hazard(s) Addressed:</b>	Floods, Hurricane/ Tropical Storms, Wildfire, Severe Thunderstorms, Tornado, Hail, Winter Storms		
<b>Project Title:</b>	Generator – Civic Center		
<b>Project Description:</b>	Purchase Generator for critical facilities		
<b>Responsible Entity:</b>	City of Freeport Public Works Director		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters.		
<b>Cost Estimate:</b>	\$200,000.00	<b>Timeframe:</b>	12 to 36 months
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Program	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			No

#### Sweeny Independent School District

<b>Jurisdiction:</b>	Sweeny Independent School District	<b>Action Number:</b>	Y1
<b>Hazard(s) Addressed:</b>	Flooding, Hurricanes, Tropical Storm, Lighting, Heat, Winter Storm, Tornado		
<b>Project Title:</b>	Installation of Generators as a Secondary Source of Power during power outages due to Weather events. This allows the below instructional facilities to function as COMMUNITY SAFE ROOMS		
<b>Project Description:</b>	<p>Installation of 3 Generators at the following Instructional Campuses:</p> <p>Sweeny High School Sweeny Junior High School Sweeny Elementary</p> <p>During weather events that cause power outages, these facilities would be able to be community-safe rooms for the citizens located in close proximity to these facilities.</p>		
<b>Responsible Entity:</b>	Sweeny ISD Police Chief and EMC		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	1,050,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes or No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes or No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes or No

**Danbury Independent School District**

<b>Jurisdiction:</b>	Danbury Independent School District	<b>Action Number:</b>	U1
<b>Hazard(s) Addressed:</b>	Flooding, Hurricanes, Tropical Storms, Lightning, Heat, Winter Storm, Tornado		
<b>Project Title:</b>	Installation of Generators as a secondary source of power during power outages due to weather events. This allows the below instructional facilities to function as a Community Safe Room		
<b>Project Description:</b>	<p>Installation of 2 generators at the following Instructional Campuses:</p> <ol style="list-style-type: none"> <li>1. Danbury Elementary School</li> <li>2. Danbury Secondary Schools (Middle and High Schools)</li> </ol> <p>During weather events that cause power outages, these facilities would be able to be community safe rooms for the citizens located in close proximity to these facilities.</p>		
<b>Responsible Entity:</b>	Danbury ISD EMC and Superintendent		
<b>Losses avoided:</b>	Loss of life; continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	700,000.00	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			<b>Yes or No</b>
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			<b>Yes or No</b>
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			<b>Yes or No</b>

## Drainage District No. 11

<b>Jurisdiction:</b>	West Brazoria County Drainage District No. 11	<b>Action Number:</b>	W1
<b>Hazard(s) Addressed:</b>	Flooding and Hurricane/Tropical Storm		
<b>Project Title:</b>	Drainage Studies		
<b>Project Description:</b>	Perform various detailed studies within the district to determine best method of water outflow to the main tributaries to optimize drainage. Results of the studies will be the basis for future projects.		
<b>Responsible Entity:</b>	West Brazoria County Drainage District No. 11 Director		
<b>Losses avoided:</b>			
<b>Cost Estimate:</b>	200,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	West Brazoria County Drainage District No. 11	<b>Action Number:</b>	W2
<b>Hazard(s) Addressed:</b>	Flooding and Hurricane/Tropical Storm		
<b>Project Title:</b>	Improvement Projects		
<b>Project Description:</b>	To prevent localized community, perform all engineering and survey and provide materials and construction to clean 150 miles of sloughs, ditches and creeks. The work will cover removal of existing trees and brush, regrade/reshape, installation of culverts where required and grass seeding of the completed ditch, slough or creek.		
<b>Responsible Entity:</b>	West Brazoria County Drainage District No. 11 Director		
<b>Losses avoided:</b>	Reduce the loss of life and property during flooding events.		
<b>Cost Estimate:</b>	15,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	West Brazoria County Drainage District No. 11	<b>Action Number:</b>	W3
<b>Hazard(s) Addressed:</b>	Flooding and Hurricane/Tropical Storm		
<b>Project Title:</b>	Land Purchase		
<b>Project Description:</b>	Preserve natural lands and green space to reduce the impacts from flooding and hurricane/tropical storms. Up to 1,000 acres of land tracts could be purchased from willing sellers for their natural ecosystem services, including water detention and management of water outflow. The land will be converted to parks, wildlife management areas and/or other public open spaces.		
<b>Responsible Entity:</b>	West Brazoria County Drainage District No. 11 Director		
<b>Losses avoided:</b>	Reduce the loss of life and property by preserving pervious surface and open space to reduce the effects of flooding. Reduce agricultural and water reservoir losses during droughts and reduce the loss of life and property during floods and tropical storms/hurricanes by using wetlands and wetland forests as natural storm infrastructure.		
<b>Cost Estimate:</b>	10,000,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			No

<b>Jurisdiction:</b>	West Brazoria County Drainage District No. 11	<b>Action Number:</b>	W4
<b>Hazard(s) Addressed:</b>	Flooding and Hurricane/Tropical Storm		
<b>Project Title:</b>	Data Base Management System		
<b>Project Description:</b>	Develop a GIS database of all ditches, sloughs and creeks within the district and periodically update as new information becomes available. Use output from the GIS database to develop a planning tool to track all information relative to the specific ditch, slough or creek, (e.g., property easements, license agreements, last ditch maintenance, planned maintenance, etc.).		
<b>Responsible Entity:</b>	West Brazoria County Drainage District No. 11 Director		
<b>Losses avoided:</b>			
<b>Cost Estimate:</b>	200,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

<b>Jurisdiction:</b>	West Brazoria County Drainage District No. 11	<b>Action Number:</b>	W5
<b>Hazard(s) Addressed:</b>	Flooding and Hurricane/Tropical Storm		
<b>Project Title:</b>	Master Drainage Plan		
<b>Project Description:</b>	Provision of all Project Management and Engineering to develop the Master Drainage Plan, inclusive of: Collect and review of existing reports, studies, gage data, etc., verify watershed boundaries, examine flooded structures and NFIP claims data Develop base conditions models for different storm conditions using Atlas 14 rainfall events, determine level of service for the main stem and tributaries Create HEC-RAS 2D models to determine sheet flow issues. Identify problem areas, areas for future development and constraints affecting the watershed Perform desktop environmental studies Develop Technical memorandum on baseline conditions, identify alternatives to solve existing flooding issues and perform hydraulic analysis to solve future flooding issues Develop Watershed Strategy via hierarchy of alternatives considering opportunities to team with other agencies, damage reduction, costs, priority areas to be worked and score each of the alternatives, issue a technical note providing documentation on the process of developing the strategy. Create a comprehensive Watershed Plan including a summary of projects and timeline for implementation, including maps, tables and other exhibits to document the analysis.		
<b>Responsible Entity:</b>	West Brazoria County Drainage District No. 11 Director		
<b>Losses avoided:</b>	Reduce the loss of life and property during flooding events.		
<b>Cost Estimate:</b>	1,500,000	<b>Timeframe:</b>	When funding becomes available
<b>Potential Funding Sources:</b>	Federal, State, and Local Funds, Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes

## City of Richwood

<b>Jurisdiction:</b>	City of Richwood	<b>Action Number:</b>	Z1
<b>Hazard(s) Addressed:</b>	Deficient Drainage		
<b>Project Title:</b>	Stormwater Master Plan, Phase 1		
<b>Project Description:</b>	6200 linear feet of main outfall stormwater drainage ditch in which slopes were graded, concrete channels added to base flow lines, and drainage grade reestablished		
<b>Responsible Entity:</b>	City of Richwood Mayor and City Manager, Public Works Director		
<b>Losses avoided:</b>	Continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	1.6 million	<b>Timeframe:</b>	2/2022 – 12/2022
<b>Potential Funding Sources:</b>	Local Funds (General Obligation Bond)	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes or No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes or No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes or No

<b>Jurisdiction:</b>	City of Richwood	<b>Action Number:</b>	Z2
<b>Hazard(s) Addressed:</b>	Lack of Resiliency		
<b>Project Title:</b>	American Rescue Plan Act, Lift Station & Water Well Generators		
<b>Project Description:</b>	Replacement of High Service Booster Pumps. Backup power generators added at primary water well site as well as Service Center to serve as backup power to City SCADA system and one wastewater lift station.		
<b>Responsible Entity:</b>	City of Richwood Public Works Director		
<b>Losses avoided:</b>	Continuity of services during natural disasters and/or hazards.		
<b>Cost Estimate:</b>	988,170	<b>Timeframe:</b>	03/2023 – 03/2024
<b>Potential Funding Sources:</b>	Federal & Public Assistance Grants	<b>Benefit-Cost Ratio:</b>	More than a 1:4 cost-benefit ratio
Does this action reduce effects of hazards on existing buildings?			Yes or No
Does this action reduce effects of hazards for new buildings, infrastructure, or future development?			Yes or No
Does mitigation action identify, analyze, and prioritize actions related to continued compliance with NFIP?			Yes or No

# Part 8: Plan Maintenance

## Part 8: PLAN MAINTENANCE

To remain an effective tool, the HMAP will undergo continuous review and updates. This practice is known as plan maintenance and requires monitoring, evaluating, updating, and implementing the plan. To accomplish this, a plan maintenance team (PMT) is comprised of representatives from each of the County's participating jurisdictions.

<b>Plan Maintenance Team</b>	
Plan Maintenance Team Leader	Brazoria County EMC / Disaster Recovery Manager
<b>Jurisdiction</b>	<b>Responsible Entity</b>
Unincorporated Brazoria County	Brazoria County EMC / Floodplain Administrator
Angleton	EMC
Brazosport College	EMC
Drainage District 11	Superintendent
Bonney	Mayor
Bailey's Prairie	Mayor
Brazoria	EMC / Mayor
Brazosport ISD	Assistant Superintendent / EMC
Brookside Village	Mayor
Clute	EMC
Danbury	Mayor
Hillcrest Village	EMC
Holiday Lakes	Mayor / City Secretary
Iowa Colony	Police Chief / City Manager
Jones Creek	Town Marshall
Lake Jackson	City Manager / Assistant EMC
Liverpool	EMC
Manvel	Fire Marshal
Oyster Creek	EMC
Port of Freeport	Safety & Security Chief
Freeport	Mayor / EMC
Quintana	EMC
Richwood	Police Chief / City Manager
Surfside Beach	City Secretary / Mayor
Sweeny	City Manager
Velasco Drainage District	Director
West Columbia	EMC / Police Chief

## **Meeting Schedule**

The PMT will hold its first meeting within two years after the plan's approval date and will continue to meet every year thereafter. A special meeting will be held 12 months prior to the plan's expiration to develop a timeline and strategy to update the plan in accordance with TDEM and FEMA's requirements.

## **Procedures**

The PMT will meet annually to address necessary revisions to the whole planning and public participation process, and the entirety of the written plan including developing amendments, assessing the implementation progress, and identifying emerging risks and vulnerabilities in the county.

Each participating jurisdiction is responsible for reporting and requesting updates to the HMAP, and the team will explore multi-jurisdictional solutions when applicable. Any new public participation activity suggestions, changes to the maintenance or implementation procedures, mitigation actions, strategies, or required studies will be submitted to the County's representative. The representative will evaluate the items for compliance with TDEM and FEMA regulations before leading the process to adopt or approve the new items.

Recommended changes, updates, and revisions will be implemented based on available funding to support revisions, and updates and will be assigned to appropriate officials with pre-determined timelines for completion. Updates to the HMAP will then be adopted by the appropriate governing body.

## **Public Involvement**

Continued stakeholder and public involvement will remain a vital component of the HMAP. The PMT will seek public input at all stages of Plan Maintenance related to the HMAP. The PMT Leader will also conduct outreach and involve the public through surveys, social media and online participation. The PMT Leader will advertise all meetings in local news outlets, on county and city social media pages and websites, and coordinate with all participating jurisdictions. Public surveys and online information will be a preferred method used.

In addition, each participating jurisdiction will seek input from the public on the status of existing hazards, emerging vulnerabilities, and evaluate the HMAP's strategy with the public. During each meeting, the PMT will provide an open comment forum through surveys, social media or other online interactive discussions with the public. The development of new goals and strategies will be a joint effort between the PMT and public participants.

## **Progress Monitoring**

It is important to monitor and evaluate the progress each jurisdiction has made toward implementing the HMAP. This ensures goals, objectives, and the mitigation strategy are regularly re-evaluated and reviewed for feasibility. Each participating jurisdiction will provide a progress report on completed or ongoing mitigation projects at each Plan Maintenance meeting. Unaddressed mitigation actions will be evaluated for relevancy and/or amended to increase feasibility.

## **Plan Evaluation**

Procedures to monitor and evaluate the HMAP were determined and adopted. This ensures that the entirety of the plan is regularly examined for feasibility, and that the HMAP remains a relevant and adaptive tool. An additional meeting will be held 12-months prior to the plan's expiration to develop a timeline and strategy to update the HMAP.

### Plan Maintenance: Evaluation & Monitoring Procedures

Method and Procedures	Schedule	Responsible Entity
<p>The PMT Leader will advertise all annual meetings in local newspapers, post invitations on the County social media pages, and post fliers at city and county buildings 30 days prior to the meetings in order to encourage public participation throughout the plan’s maintenance process.</p>	<p>30 days prior to public PMT meetings</p>	<p>PMT Leader</p>
<p>Emerging risks and vulnerabilities will be identified and discussed.</p> <ol style="list-style-type: none"> <li>1) PMT members are responsible for monitoring each hazard in their jurisdiction, and provide an update on any new occurrences and emerging risks.</li> <li>2) The PMT Leader will seek input from participants and the public at the annual meetings by opening the meeting for public comment.</li> </ol>	<p>Annually</p>	<p>PMT representative from each participating jurisdiction</p>
<p>The PMT will monitor the entirety of the planning process and the written plan to ensure the HMAP remains relevant and the strategy continues to be effective.</p> <ol style="list-style-type: none"> <li>1) PMT members will identify new projects and/or re-prioritize existing strategies based on changes in their jurisdiction.</li> <li>2) Funding sources and multijurisdictional cooperation for new initiatives will be determined.</li> <li>3) PMT members will review public participation outreach strategies in order to identify new or different methods of outreach in order to reach more community members</li> <li>4) The Plan Maintenance Team Leader will report on any suggestions for planning, maintenance, or implementation process for the plan.</li> </ol>	<p>Annually</p>	<p>PMT representative from each participating jurisdiction</p>
<p>Each participating jurisdiction will evaluate their progress implementing the mitigation strategy.</p> <ol style="list-style-type: none"> <li>1) Representatives will publicly discuss progress and submit written progress reports to the team leader.</li> <li>2) Completed and ongoing mitigation actions will be discussed by responsible entity.</li> <li>3) Unaddressed mitigation actions will be evaluated for relevancy and/or amended to increase feasibility.</li> <li>4) Feasibility of the mitigation strategy will be evaluated, and any necessary revisions will be proposed.</li> <li>5) The team leader will seek comment from the public after each participating jurisdiction's presentation.</li> </ol>	<p>Annually</p>	<p>PMT, the responsible department identified in the mitigation action up for discussion, and the public.</p>
<p>The PMT will develop a timeline and strategy to update the plan 12 months before it expires. The update strategy will include:</p> <ol style="list-style-type: none"> <li>1) Identify entities responsible for drafting and submitting the update to TDEM</li> <li>2) Send appropriate representatives to G-318 training.</li> <li>3) Determine funding needs and funding sources for plan update.</li> </ol>	<p>12 months prior to HMAP's expiration</p>	<p>PMT, and PMT Leader</p>

## Existing Plans & Regulations

Several existing plans and programs that require integration of the HMAP have been identified by the participating jurisdictions. These known planning mechanisms will be amended to support mitigation efforts, and both plans will be reviewed for contradictions.

- DRP: Disaster Recovery Plan**
- CP: Comprehensive Plan**
- FMP: Floodplain Management Plan**
- SMP Stormwater Management Plan**
- EOP: Emergency Operations Plan**
- COOP: Continuity of Operations Plan**
- TP: Transportation Plan**
- SO: Subdivision Ordinance**
- AB: Annual Budget**
- MA: Mutual Aid Agreement**
- FDPO: Flood Damage Prevention Ordinance**
- CIP: Capital Improvements Plan**

## Plan Integration

Integrating the HMAP into county and local planning mechanisms is key to its success. Effective integration allows communities to benefit from existing plans and procedures to further reduce their vulnerability and risk. Upon approval of the plan and approval of updates or revisions as proposed by the PMT, each participating jurisdiction will follow the pre-determined actions:

To update and revise existing planning mechanisms to further integrate the HMAP, all participating jurisdictions will follow a basic process(es) described in this section.

- 1.) Propose a policy, strategy, or regulatory amendment to the proper governing body.
- 2.) Advertise the amendment a minimum of 60 days before the meeting where it will be discussed.  
Advertising procedures for the public meeting(s) is outlined in the public involvement measures described in Section 8 of this plan, and will also abide by each jurisdiction's local regulations.
- 3.) Provide the public, elected officials, and governing bodies the opportunity to discuss and comment upon proposed change(s).
- 4.) If the proposal is accepted, the change is implemented by the appropriate governing authority.

Jurisdiction	Integration Method
Unincorporated Brazoria County	The HMAP and plan amendments will be presented to Commissioner’s Court by the PMT Leader. Upon approval by Commissioner’s Court, approved actions will be acted upon as funding becomes available and integrated into the identified county planning mechanisms. The PMT Leader will coordinate with the representatives tasked with maintaining the EOP and MA to incorporate the HMAP
Alvin	Alvin's PMT representative will select appropriate mitigation actions to be implemented using the City's local budget, and develop an implementation proposal. The budget request and implementation proposal will be presented before City Council. An agenda will be published 30 days before the meeting.
Angleton	The Angleton PMT representative will draft a proposal for incorporating the HMAP's mitigation strategy into their existing planning mechanisms. The proposal will be presented to the Planning and Zoning Commission (when applicable). Upon approval, it will be presented to the City Council for consideration. Angleton will advertise the amendment(s) no less than 30 days before the meetings. Upon approval, city staff will act to incorporate the HMAP into their existing planning mechanisms.
Bailey’s Prairie	The Bailey's Prairie PMT representatives will draft a proposal for incorporating the HMAP's mitigation recommendations into their existing planning mechanisms. The proposal will be presented to the City Alderman for consideration. Bailey's Prairie will advertise the amendment no less than 25 days before the meeting where it will be discussed.
Bonney	Bonney's PMT representative will select mitigation actions to be budgeted into the City of Bonney's annual budget to be implemented the following year. The proposal will be presented before City Council. An agenda will be published 30 days in advance.
Brazoria	The Brazoria City Manager will draft a proposal for incorporating the HMAP's mitigation strategy into their existing planning mechanisms. The proposal will be presented to the City Council and mayor for consideration. Brazoria will post an agenda for the public hearing no less than 14 days before the meeting when it will be considered. Upon approval, the city manager will initiate the process to incorporate the HMAP into their existing planning mechanisms.
Brookside	Brookside Village's PMT representative will select mitigation actions to be budgeted into the Brookside Village annual budget to be implemented the following year. The proposal will be presented before City Council. An agenda will be published 15 days in advance.

Clute	The Clute PMT representative will draft a proposal for incorporating the HMAP's mitigation strategy into their existing planning mechanisms. The proposal will be presented at a joint public hearing of the Planning and Zoning Commission and City Council for consideration. Clute will advertise the amendment(s) no less than 30 days before the meetings. Upon approval, city staff will act to incorporate the HMAP into their existing planning mechanisms.
Danbury	Danbury's PMT representative will select mitigation actions to be budgeted into the Danbury annual budget and be implemented the following year. The proposal will be presented before City Council and will follow General Law Type A municipality laws for adoption.
Hillcrest	Hillcrest's PMT representative will select mitigation actions to be implemented using the local budget. An agenda will be published 30 days in advance, the proposal will be presented before City Council.
Holiday Lakes	The Holiday Lakes PMT representative will draft a proposal for incorporating the HMAP's mitigation recommendations into their existing planning mechanisms. The proposal will be presented to the Town Council for consideration. Holiday Lakes will advertise the amendment no less than 14 days before the meeting where it will be considered. Upon approval, city staff will act to incorporate the HMAP into their existing planning mechanisms.
Iowa Colony	The Iowa Colony PMT representative will draft a proposal for incorporating the HMAP's mitigation strategy into their existing planning mechanisms. The proposal will be presented at a public hearing for the Mayors and City Council's consideration. Iowa Colony will post the agenda no less than 7 days before the meetings. Upon approval, city staff will act to incorporate the HMAP into their existing planning mechanisms.
Jones Creek	Jones Creek's PMT representative will draft a proposal for incorporating the HMAP's mitigation strategy into their existing planning mechanisms. The proposal will be presented before City Alderman and will follow Type A municipality laws for adoption and implementation.
Lake Jackson	The Lake Jackson City Secretary and PMT representative will draft a proposal for incorporating the HMAP's mitigation strategy into their existing planning mechanisms. The proposal will be presented to the City Council and mayor for consideration. Lake Jackson will post an agenda of the meeting no less than 7 days before the meeting when it will be considered. Upon approval, the PMT representative will initiate the process to incorporate the HMAP into their existing planning mechanisms with the assistance of Lake Jackson City Staff.
Liverpool	Liverpool's PMT representative will select appropriate mitigation actions to be implemented using the City's local budget, and develop an implementation proposal. The budget request and implementation proposal will be presented before City Council on the first Tuesday of the month following the annual PMT meetings.
Manvel	The Manvel PMT representative will draft a proposal for incorporating the HMAP's mitigation strategy into their existing planning mechanisms. The proposal will be presented at a public hearing for City Council consideration. Manvel will post the agenda no less than 14 days before the meetings. Upon approval, city and county staff will act to incorporate the HMAP into their existing planning mechanisms.
Oyster Creek	Oyster Creek's PMT representative will select appropriate mitigation actions to be implemented using the City's local budget and develop an implementation proposal. The proposal will be presented before City Council. An agenda will be published 30 days before the meeting on the city's website: <a href="http://www.cityfoystercreek.org">http://www.cityfoystercreek.org</a>
Quintana	Quintana's mayor will select mitigation actions to be implemented using the local budget, and will integrate new flood regulations in accordance with the HMAP's recommendations into the Code of Ordinances. An agenda will be published 30 days in advance, the

	proposal will be presented before City Council on the third Tuesday after the annual PMT meeting.
Richwood	The Richwood PMT representatives will draft a proposal to incorporate the HMAP's mitigation strategy into their existing planning mechanisms. The proposal will be presented to the Town Council for consideration. Upon approval, city staff will act to incorporate the HMAP into their existing planning mechanisms.
Surfside Beach	The Surfside PMT representatives will draft a proposal for incorporating the HMAP's mitigation recommendations into the CP and SO and present to city council. Upon approval, City staff will incorporate the HMAP into the CP and SO.
Sweeny	The Sweeny City Manager will draft a proposal for incorporating the HMAP's mitigation recommendations into their existing planning mechanisms. The proposal will be presented to the City Council and mayor for consideration. Sweeny will post an agenda of the meeting no less than 30 days before the meeting when it will be considered. Upon approval, the city manager will initiate the process to incorporate the HMAP into their existing planning mechanisms.
Brazosport ISD	The superintendent will coordinate with the PMT to ensure that students and their parents are provided proper educational resources, and that school integrates mitigation strategies and actions into their Improvement Plan and facilities schedules.
West Columbia	The West Columbia PMT representatives will draft a proposal for incorporating the HMAP's mitigation recommendations into their existing planning mechanisms. The proposal will be presented to the City Council for consideration. West Columbia will advertise the amendment no less than 1 month before the meeting when it will be considered. Upon approval, city staff will act to incorporate the HMAP into their existing planning mechanisms.
Alvin ISD	The superintendent of Alvin ISD will coordinate with the PMT to ensure that students and their parents are provided proper educational resources, and that school integrates mitigation strategies and actions into their Improvement Plan and facilities schedules.
Port of Freeport	The Port of Freeport will incorporate the HMAP and any subsequent updates into their EOP. The fire chief is responsible for presenting amendments to the Community Advisory Council for consideration.
Freeport	The Freeport PMT representative will work with the City Manager to draft a proposal for incorporating the HMAP's mitigation recommendations into their existing planning mechanisms. The proposal will be presented to the City Council and mayor for consideration. Freeport will post an agenda of the meeting no less than 30 days before the meeting when it will be considered. Upon approval, the city manager will initiate the process to incorporate the HMAP into their existing planning mechanisms.
Velasco Drainage District	Plan amendments and updates will be presented to the Velasco Drainage District superintendent by the PMT Leader. Upon approval by the Velasco Drainage District, approved actions will be acted upon and/or integrated into their FMP, EOP, and SMP but the appointed staff member.
Sweeny ISD	The superintendent and EMC will coordinate with the PMT to ensure that students and their parents are provided proper educational resources, and that school integrates mitigation strategies and actions into their Improvement Plan and facilities schedules.
Danbury ISD	Danbury ISD's PMT representative will draft a proposal for incorporating the HMAP's mitigation strategy into their existing planning mechanisms. This coordination will be through the school's superintendent, City Mayor and Brazoria County EMC.
Damon ISD	Damon ISD will be working with Brazoria County EMC to develop an integration plan and method to incorporate into the existing planning mechanisms for the school district.

The previous Hazard Mitigation Plan has not been incorporated into any other planning mechanisms.

# Appendix A: Planning Process

**The Planning Process began with HGAC over 5 years ago. Brazoria County and participating jurisdictions have used this as a springboard to help develop our methodology in updating our plan.**

Training our PMT and other participating jurisdiction officials with the G-318 course helped guide our progression giving us useful tools to update the plan.

Our team chose to use surveys for public participation to increase results. Public meeting turnout has been low to non-existent with the pandemic.

Our surveys resulted in over 100 responses and gave valuable information from the public about their concerns, anxieties and hierarchies for Hazard Mitigation.

### BRAZORIA COUNTY HAZARD MITIGATION PLAN KICK-OFF MEETING

The Houston-Galveston Area Council (H-GAC), in partnership with Brazoria County, City of Angleton, City of Brazoria, City of Clute, City of Iowa Colony, City of Lake Jackson, City of Liverpool, City of Quintana, City of Surfside Beach, City of Sweeny, and City of West Columbia, is hosting the first public meeting to develop Brazoria County's Hazard Mitigation Plan. The meeting will be held from 9:00 a.m. to noon, October 25, at the Nolan Ryan Center, 2925 TX-35, Alvin, TX 77511.

A Hazard Mitigation Plan is a strategic plan that proposes actions to reduce or eliminate long-term risk to people and property from future natural disasters. Public input and involvement is important for developing a comprehensive approach to reduce the effects of natural disasters on communities.

All Brazoria County residents are invited to participate and contribute their local expertise during the planning process. Mitigation actions developed by participants will be considered for inclusion in the County's Hazard Mitigation Plan to be submitted to the Federal Emergency Management Agency (FEMA).

The meeting agenda is available on H-GAC's website at <http://www.h-gac.com/community/community/hazard/documents/10-25-17-Brazoria-County-Meeting-Agenda.pdf>

More information on hazard mitigation plans is available on FEMA's website at <https://www.fema.gov/hazard-mitigation-planning>.

For more information about the meeting, contact Joey Kaspar, (713) 993-4547 or at [Joey.Kaspar@h-gac.com](mailto:Joey.Kaspar@h-gac.com), or Amy Combs, (713) 993-4544 or at [Amy.Combs@h-gac.com](mailto:Amy.Combs@h-gac.com).

#### Houston-Galveston Area Council

The Houston-Galveston Area Council ([www.h-gac.com](http://www.h-gac.com)) is a voluntary association of local governments in the 13-county Gulf Coast Planning Region—an area of 12,500 square miles and more than 6 million people. H-GAC works to promote efficient and accountable use of local, state, and federal tax dollars and serves as a problem-solving and information forum for local government needs.

# Hazard Mitigation Plan 2023

## Kick-off Meeting

November 9, 2022

1. Welcome – Steve Rosa
2. Sign in
3. Documentation is important – public involvement is vital
4. HMGP update vs. new plan development
5. Current HMGP review (mission and goals)
6. Review Hazard Rankings
7. Participating jurisdictions' responsibilities:
  - A. Mitigation Strategies (Proposed Projects)
  - B. Documented Public Participation (Surveys, Social Media, etc...)
  - C. Documented Press Releases
  - D. Jurisdiction Profile Changes
8. Role of Brazoria County:
  - A. Writing Plan Update
  - B. Collecting Hazus Analysis Data
  - C. Organizing Jurisdiction projects
  - D. Submitting Plan Draft and Final Plan
  - E. Distributing Plan Templates
9. HMGP 2023 Update Timeline (end of May final draft) and Next Meeting

**Questions / Comments**

# **Kick-Off Meeting Breakdown**

## **Welcome & Overview of Hazard Mitigation Plans & Procedures**

The presentation will also include project timelines, partner roles and responsibilities.

## **Review 2022 Risk Assessment**

Attendees will participate in a breakout session to review the draft risk assessment maps, charts, and provide feedback.

## **Local Risk Assessment & Capability Form**

Meeting attendees will fill out a form describing the frequency of a hazard, and rate their mitigation capabilities in their jurisdiction.

## **Break**

## **Mitigation Actions Presentation & Activity**

Creating mitigation actions and facilitate a practice exercise in writing a mitigation action and strategies

## **Update 2018 Mitigation Actions & Write New Actions**

Review 2018 mitigation actions for viability, and update actions to meet new FEMA standards. With remaining time, draft new mitigations for 2023.

## **Questions**

## Online Surveys Sample

A new entry to a form/survey has been submitted.

Form Name: Hazard Mitigation Date & Time: 04/04/2023 4:32 PM Response #: 61

Submitter ID: 59915

IP address: 50.249.86.61

Time to complete: 7 min. , 23 sec.

Survey Details Page 1

---

### 1. How long have you lived in Brazoria County?

10 years or more

### 2. Are you responding on behalf of a resident or commercial property?

Commercial

### 3. Do you own or rent your place of residence/business?

Rent

### 4. What is the Zip Code of your Primary residence?

77566

### 5. How concerned are you about the following hazards affecting our community?

Not Concerned Somewhat Concerned Very Concerned

Dam/Levee Failure

Drought and Water Shortage

Flood (Localized/Stormwater)

Hailstorm

Lightning

Tornado and/or Straight Line Wind     Severe Weather (Hurricane/Tropical Storms)

Beach/River Erosion

Extreme Heat

Winter Extreme Weather

Wildfire

### 6. In the past 5 years, have you been affected by any of the above hazards?

(o) Yes

**7. If yes, please list the hazards that affected you?**

Freeze

**8. Natural disasters can have a significant impact on a community but planning for these events can help lessen the impact. The following statements will help us determine community priorities in planning for these hazards. Please tell us how important each is to you.**

	Very Important	Neutral	Not Important
Protecting private property	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Protecting critical facilities (hospitals, transportation networks, fire stations)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Preventing development of businesses and neighborhoods in hazard prone areas	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Protecting natural environment	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Protecting historical/cultural landmarks	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Promoting cooperation among public agencies, citizens and businesses	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Protecting and reducing damage to utilities	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Increasing emergency services (Law Enforcement, Fire, EMS)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**9. What are the most effective ways for you to receive information about disaster preparedness? (Choose all that apply)**

County Website

Social Media  Television/Radio

Email

**10. Do you have flood insurance through the National Flood Insurance Program?**

(o) Yes

**11. Please add any additional comments.**

Not answered

**12. Enter contact information (Optional)**

# CHARM Workshop in the City of West Columbia – October 27, 2022

**From: To:**

**Cc:**

**Subject: Date: Attachments:**

**Importance:**

[EXTERNAL]City West Columbia Project Identification Meeting Follow-up Monday, October 31, 2022 1:38:32 PM

High

---

Good afternoon,

Thank you all for joining us for the West Columbia Project Identification Exercise on Thursday, October 27<sup>th</sup>! I wanted to follow up with some of our program resources. Attached you will find our technical assistance flyer. As you're also aware, Texas Community Watershed Partners also includes the [Green Infrastructure for Texas \(GIFT\)](#) program, which assists communities in developing nature-based stormwater management practices. Finally, you can participate in our [Texas Citizen Planner](#) courses online to build your expertise in policy tools and best practices for more resilient planning. Should any of these programs interest you or if you'd like more information, please feel free to reach out to me. I'm also glad to set up a follow-up meeting (virtual or in-person) if you'd like to continue working with the CHARM model you used last week.

Finally, we'll be developing a report detailing key discussion topics and priority projects, as well as possible funding sources. We will share that with you in the next few weeks. Once again, thank you so much for joining us for the West Columbia Project Identification Exercise, and we'll hope to work with you again in the near future!

Best,

**Dana Snyder**

Urban Resilience Planner | Project Manager  
Community Health and Resource Management (CHARM)  
Texas Community Watershed Partners | Texas A&M AgriLife Extension Service  
[1335 Regents Park Dr., STE. 260, Houston, TX 77058](#)

# Community Assistance Programs

*Our team is here to assist your efforts to become more resilient – at no cost.*

Texas A&M AgriLife Extension's expertise in community development and mitigation planning can support your local projects and needs. We are able to offer various no-cost, in-kind technical assistance and consultation services to Texas communities through a Cooperating Technical Partners agreement with FEMA Region 6.

## Project Identification Exercises

**An Interactive, Data-Driven Workshop:** We can facilitate mitigation project identification exercises for your community using our CHARM platform, using CHARM's risk data and interactive exercises and your local knowledge to create an engaging and collaborative experience for local stakeholders.

**Identifying Local Issues and Priorities:** Bringing local champions and experts around the table provides an opportunity for discussion and coordination. During a typical three-hour exercise, participants review local risk data, identify emerging or unmapped hazards and issues, assess potential mitigation opportunities or strategies, and prioritize next steps and implementation needs.

**Connecting You to Implementation and Funding:** We know that mitigation efforts and projects take planning time and funding. After the workshop, we review your priority projects from the exercise and develop recommendations for implementation strategies, other community assistance opportunities, and funding sources such as state and federal grant and loan programs.

## Technical Assistance Services

**Ordinance and Plan Writing:** Zoning, subdivision, floodplain, and building regulations are some of the most effective ways to reduce future risk. We work closely with your community's key stakeholders to strategically develop regulations that reflect local priorities and capacity.

**Technical Analyses:** Assessing current risk and future conditions is an important step in the planning process. We can use our expertise with GIS and data including our CHARM platform to study local questions such as long-term buildout, buyout feasibility, and potential future impacts of hazards.

**Education and Facilitation Assistance:** Informed community leaders and stakeholders are critical. We can create customized trainings for your community and assist with meeting facilitation, visioning exercises, and community engagement process design.

**GIS, Data, and Mapping Support:** We believe that data is an important asset for decision-making that should be easily accessible. We can assist with data creation, data gathering, and GIS trainings to ensure your community has access to the best available information to use in decision-making.

*We'd love to work with you!*

Let us know how we can help your community become more resilient. To schedule a consultation, contact Andrew Knuppel at [andrew.knuppel@ag.tamu.edu](mailto:andrew.knuppel@ag.tamu.edu).

# Current Hazard Mitigation Project – Public Meeting in Lake Jackson – February 2, 2023

## Freeport Project Public Open House Scheduled for February 2023

The Freeport Project, a component of the Sabine Pass to Galveston Bay Program (S2G Program), will host a public open house on February 2, 2023, to provide the public with information about project progress.

The Freeport Project is one of three projects included in the S2G Program and focuses on improvements to the existing hurricane flood protection system in the Freeport area. These improvements will reduce the risk of flooding from coastal storm surge, while not inducing adverse impacts to area residents and businesses within the Freeport area. The Freeport Project is a partnership of the U.S. Army Corps of Engineers (USACE) and its non-Federal sponsor, the Velasco Drainage District.

Date, time, and location information for the public open house is as follows:

**Thursday, February 2, 2023**  
**4 p.m. – 7 p.m.**  
**Lake Jackson Civic Center**  
**333 TX-332**  
**Lake Jackson, Texas 77566**

Informational displays will be available for public viewing and project team representatives will be available to provide information and answer questions.

Public feedback and participation are encouraged. The public open house is intended to inform and provide opportunities for the public to participate in the Freeport Project. **The public open house is not part of the formal National Environmental Policy Act (NEPA) process, which was completed in 2017.**

Comments received during this time will be taken into consideration by the Freeport Project Team but will not be documented as part of a NEPA-required public comment period. Written comments will be accepted during the public open houses and may be emailed to [S2GFreeport@usace.army.mil](mailto:S2GFreeport@usace.army.mil).

To learn more about the Freeport Project, visit the project website and StoryMap:

- Project website – [www.swg.usace.army.mil/S2G/Freeport/](http://www.swg.usace.army.mil/S2G/Freeport/)

## General Description of the Region

Hazus is a regional multi-hazard loss estimation model that was developed by the Federal Emergency Management Agency (FEMA) and the National Institute of Building Sciences (NIBS). The primary purpose of Hazus is to provide a methodology and software application to develop multi-hazard losses at a regional scale. These loss estimates would be used primarily by local, state and regional officials to plan and stimulate efforts to reduce risks from multi-hazards and to prepare for emergency response and recovery.

The flood loss estimates provided in this report were based on a region that included 1 county(ies) from the following state(s):

- Texas

**Note:**

Appendix A contains a complete listing of the counties contained in the region.

The geographical size of the region is 1,443 square miles and contains 10,082 census blocks. The region contains over 107 thousand households and has a total population of 313,166 people (2010 Census Bureau data). The distribution of population by State and County for the study region is provided in Appendix B.

There are an estimated 109,747 buildings in the region with a total building replacement value (excluding contents) of 33,799 million dollars (2010 dollars). Approximately 93.55% of the buildings (and 86.99% of the building value) are associated with residential housing.

**FEMA**

**RiskMAP**  
Increasing Resilience Together

## Building Inventory

### General Building Stock

Hazus estimates that there are 109,747 buildings in the region which have an aggregate total replacement value of 33,799 million (2014 dollars). Table 1 and Table 2 present the relative distribution of the value with respect to the general occupancies by Study Region and Scenario respectively. Appendix B provides a general distribution of the building value by State and County.

**Table 1**  
**Building Exposure by Occupancy Type for the Study Region**

Occupancy	Exposure (\$1000)	Percent of Total
Residential	29,401,709	87.0%
Commercial	2,672,546	7.9%
Industrial	727,466	2.2%
Agricultural	72,129	0.2%
Religion	396,214	1.2%
Government	125,448	0.4%
Education	403,471	1.2%
<b>Total</b>	<b>33,798,983</b>	<b>100.0%</b>

**Table 2**  
**Building Exposure by Occupancy Type for the Scenario**

Occupancy	Exposure (\$1000)	Percent of Total
Residential	13,793,343	87.2%
Commercial	1,224,634	7.7%
Industrial	343,405	2.2%
Agricultural	30,399	0.2%
Religion	182,414	1.2%
Government	40,771	0.3%
Education	203,149	1.3%
<b>Total</b>	<b>15,818,115</b>	<b>100.0%</b>

**Essential Facility Inventory**

For essential facilities, there are 3 hospitals in the region with a total bed capacity of 234 beds. There are 99 schools, 22 fire stations, 19 police stations and 1 emergency operation center.

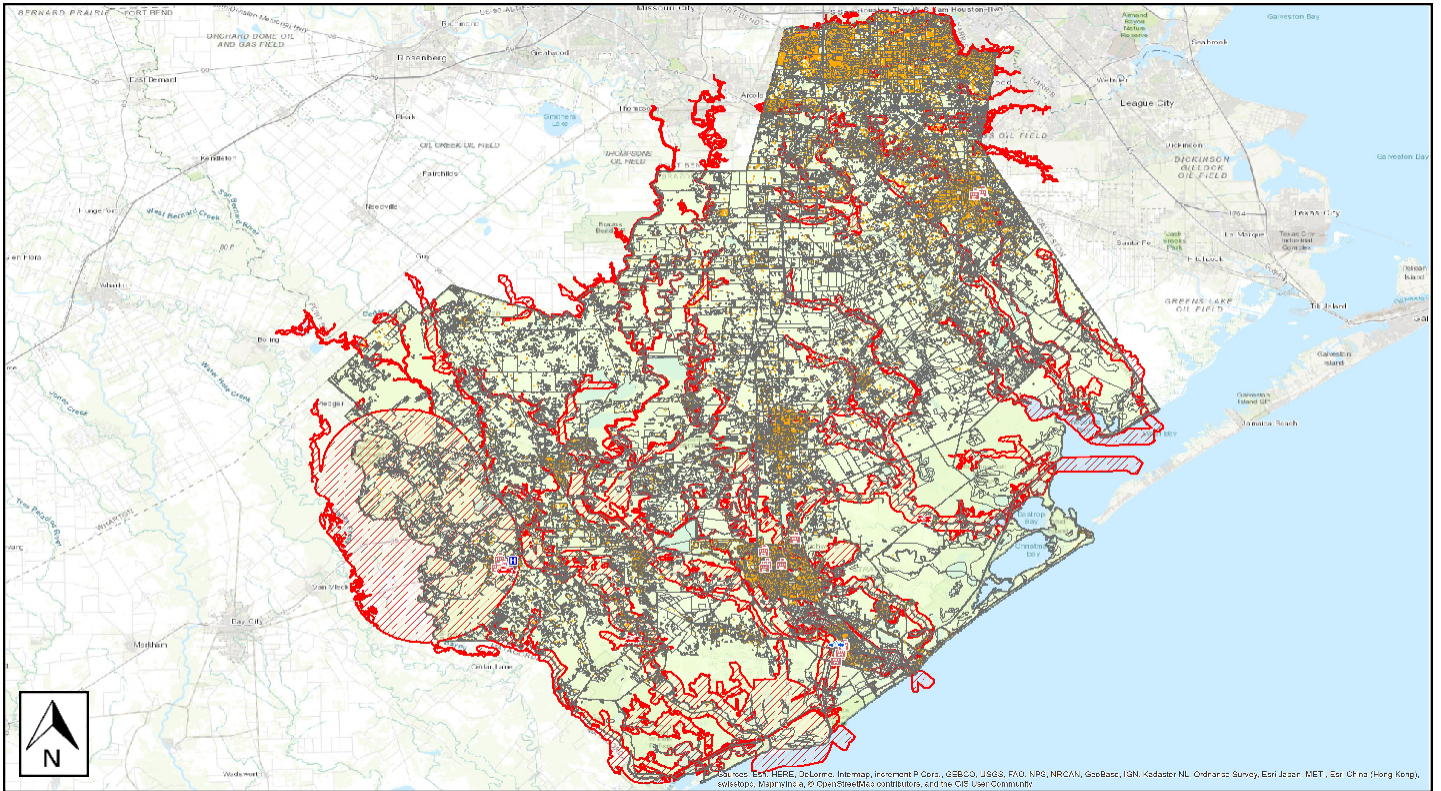

## Flood Scenario Parameters

Hazus used the following set of information to define the flood parameters for the flood loss estimate provided in this report.

<b>Study Region Name:</b>	Brazoria County
<b>Scenario Name:</b>	100-Year
<b>Return Period Analyzed:</b>	100
<b>Analysis Options Analyzed:</b>	No What-Ifs

### Study Region Overview Map

**Illustrating scenario flood extent, as well as exposed essential facilities and total exposure**

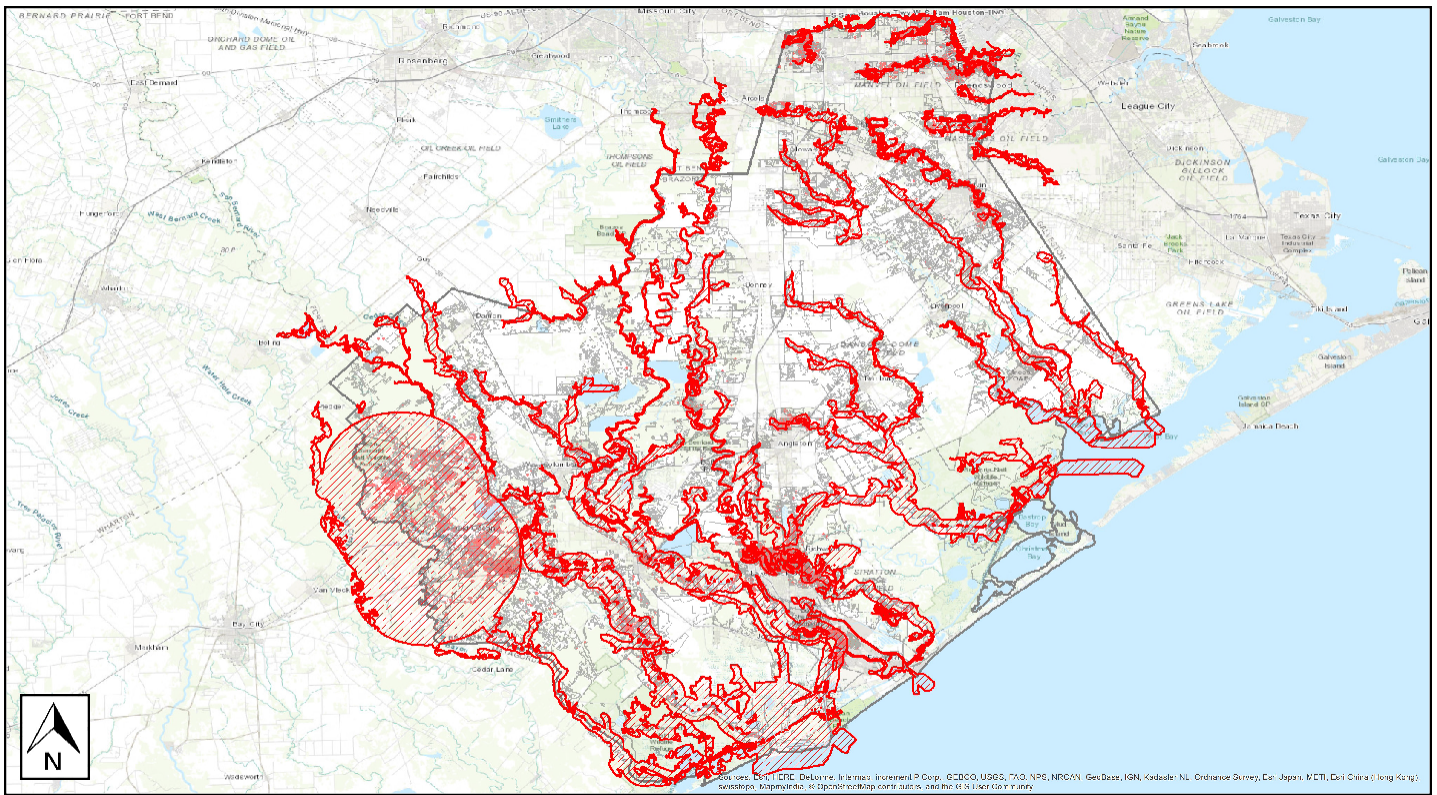

## Building Damage

### General Building Stock Damage

Hazus estimates that about 5,797 buildings will be at least moderately damaged. This is over 54% of the total number of buildings in the scenario. There are an estimated 1,611 buildings that will be completely destroyed. The definition of the 'damage states' is provided in Volume 1: Chapter 5 of the Hazus Flood Technical Manual. Table 3 below summarizes the expected damage by general occupancy for the buildings in the region. Table 4 summarizes the expected damage by general building type.

**Total Economic Loss (1 dot = \$300K) Overview Map**

## Essential Facility Damage

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 234 hospital beds are available in the region.

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 214 hospital beds are available in the region.

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 234 hospital beds are available in the region.

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 234 hospital beds are available in the region.

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 234 hospital beds are available in the region.

**Table 5: Expected Damage to Essential Facilities**

Classification	Total	# Facilities		
		At Least Moderate	At Least Substantial	Loss of Use
Fire Stations	22	1	0	5
Hospitals	3	0	1	1
Police Stations	19	2	0	2
Schools	99	10	2	12

If this report displays all zeros or is blank, two possibilities can explain this.

- (1) None of your facilities were flooded. This can be checked by mapping the inventory data on the depth grid.
- (2) The analysis was not run. This can be tested by checking the run box on the Analysis Menu and seeing if a message box asks you to replace the existing results.

## Induced Flood Damage

### Debris Generation

Hazus estimates the amount of debris that will be generated by the flood. The model breaks debris into three general categories: 1) Finishes (dry wall, insulation, etc.), 2) Structural (wood, brick, etc.) and 3) Foundations (concrete slab, concrete block, rebar, etc.). This distinction is made because of the different types of material handling equipment required to handle the debris.

**Analysis has not been performed for this Scenario.**

## Social Impact

### Shelter Requirements

Hazus estimates the number of households that are expected to be displaced from their homes due to the flood and the associated potential evacuation. Hazus also estimates those displaced people that will require accommodations in temporary public shelters. The model estimates 14,911 households will be displaced due to the flood. Displacement includes households evacuated from within or very near to the inundated area. Of these, 37,631 people (out of a total population of 313,166) will seek temporary shelter in public shelters.

## Economic Loss

The total economic loss estimated for the flood is 1,368.81 million dollars, which represents 8.65 % of the total replacement value of the scenario buildings.

### **Building-Related Losses**

The building losses are broken into two categories: direct building losses and business interruption losses. The direct building losses are the estimated costs to repair or replace the damage caused to the building and its contents. The business interruption losses are the losses associated with inability to operate a business because of the damage sustained during the flood. Business interruption losses also include the temporary living expenses for those people displaced from their homes because of the flood.

The total building-related losses were 1,361.36 million dollars. 1% of the estimated losses were related to the business interruption of the region. The residential occupancies made up 83.73% of the total loss. Table 6 below provides a summary of the losses associated with the building damage.

**Table 6: Building-Related Economic Loss Estimates**  
(Millions of dollars)

Category	Area	Residential	Commercial	Industrial	Others	Total

## Essential Facility Damage

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 234 hospital beds are available in the region.

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 234 hospital beds are available in the region.

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 234 hospital beds are available in the region.

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 234 hospital beds are available in the region.

Before the flood analyzed in this scenario, the region had 234 hospital beds available for use. On the day of the scenario flood event, the model estimates that 214 hospital beds are available in the region.

**Table 5: Expected Damage to Essential Facilities**

Classification	Total	# Facilities		
		At Least Moderate	At Least Substantial	Loss of Use
Fire Stations	22	3	1	5
Hospitals	3	1	0	1
Police Stations	19	1	1	2
Schools	99	10	2	16

If this report displays all zeros or is blank, two possibilities can explain this.

- (1) None of your facilities were flooded. This can be checked by mapping the inventory data on the depth grid.
- (2) The analysis was not run. This can be tested by checking the run box on the Analysis Menu and seeing if a message box asks you to replace the existing results.

## Induced Flood Damage

### Debris Generation

Hazus estimates the amount of debris that will be generated by the flood. The model breaks debris into three general categories: 1) Finishes (dry wall, insulation, etc.), 2) Structural (wood, brick, etc.) and 3) Foundations (concrete slab, concrete block, rebar, etc.). This distinction is made because of the different types of material handling equipment required to handle the debris.

**Analysis has not been performed for this Scenario.**

## Social Impact

### Shelter Requirements

Hazus estimates the number of households that are expected to be displaced from their homes due to the flood and the associated potential evacuation. Hazus also estimates those displaced people that will require accommodations in temporary public shelters. The model estimates 18,945 households will be displaced due to the flood. Displacement includes households evacuated from within or very near to the inundated area. Of these, 48,787 people (out of a total population of 313,166) will seek temporary shelter in public shelters.

## Economic Loss

The total economic loss estimated for the flood is 1,897.96 million dollars, which represents 12.00 % of the total replacement value of the scenario buildings.

### **Building-Related Losses**

The building losses are broken into two categories: direct building losses and business interruption losses. The direct building losses are the estimated costs to repair or replace the damage caused to the building and its contents. The business interruption losses are the losses associated with inability to operate a business because of the damage sustained during the flood. Business interruption losses also include the temporary living expenses for those people displaced from their homes because of the flood.

The total building-related losses were 1,888.22 million dollars. 1% of the estimated losses were related to the business interruption of the region. The residential occupancies made up 82.56% of the total loss. Table 6 below provides a summary of the losses associated with the building damage.

**Table 6: Building-Related Economic Loss Estimates**

## General Description of the Region

Hazus is a regional multi-hazard loss estimation model that was developed by the Federal Emergency Management Agency and the National Institute of Building Sciences. The primary purpose of Hazus is to provide a methodology and software application to develop multi-hazard losses at a regional scale. These loss estimates would be used primarily by local, state and regional officials to plan and stimulate efforts to reduce risks from multi-hazards and to prepare for emergency response and recovery.

The hurricane loss estimates provided in this report are based on a region that includes 1 county(ies) from the following state(s):

- Texas

**Note:**

Appendix A contains a complete listing of the counties contained in the region.

The geographical size of the region is 1,443.05 square miles and contains 50 census tracts. There are over 106 thousand households in the region and has a total population of 313,166 people (2010 Census Bureau data). The distribution of population by State and County is provided in Appendix B.

There are an estimated 109 thousand buildings in the region with a total building replacement value (excluding contents) of 33,799 million dollars (2014 dollars). Approximately 94% of the buildings (and 87% of the building value) are associated with residential housing.

## Building Inventory

### General Building Stock

Hazus estimates that there are 109,747 buildings in the region which have an aggregate total replacement value of 33,799 million (2014 dollars). Table 1 presents the relative distribution of the value with respect to the general occupancies. Appendix B provides a general distribution of the building value by State and County.

**Building Exposure by Occupancy Type**

**Table 1: Building Exposure by Occupancy Type**

<b>Occupancy</b>	<b>Exposure (\$1000)</b>	<b>Percent of Tot</b>
Residential	29,401,709	86.99 %
Commercial	2,672,546	7.91%
Industrial	727,466	2.15%
Agricultural	72,129	0.21%
Religious	396,214	1.17%
Government	125,448	0.37%
Education	403,471	1.19%
<b>Total</b>	<b>33,798,983</b>	<b>100.00%</b>

### Essential Facility Inventory

For essential facilities, there are 3 hospitals in the region with a total bed capacity of 234 beds. There are 99 schools, 22 fire stations, 19 police stations and 1 emergency operation facilities.

## Hurricane Scenario

Hazus used the following set of information to define the hurricane parameters for the hurricane loss estimate provided in this report.

### Thematic Map with peak gust windfield and HU track

**Scenario Name:** Probabilistic

**Type:** Probabilistic

## Building Damage

### General Building Stock Damage

Hazus estimates that about 66,546 buildings will be at least moderately damaged. This is over 61% of the total number of buildings in the region. There are an estimated 14,446 buildings that will be completely destroyed. The definition of the 'damage states' is provided in Volume 1: Chapter 6 of the Hazus Hurricane technical manual. Table 2 below summarizes the expected damage by general occupancy for the buildings in the region. Table 3 summarizes the expected damage by general building type.

### Expected Building Damage by Occupancy

**Table 2: Expected Building Damage by Occupancy: 1000 - year Event**

Occupancy	None		Minor		Moderate		Severe		Destruction	
	Count	(%)	Count	(%)	Count	(%)	Count	(%)	Count	(%)

---

### **Essential Facility Damage**

Before the hurricane, the region had 234 hospital beds available for use. On the day of the hurricane, the model estimates that 0 hospital beds (only 0.00%) are available for use by patients already in the hospital and those injured by the hurricane. After one week, 0.00% of the beds will be in service. By 30 days, 9.00% will be operational.

**Thematic Map of Essential Facilities with greater than 50% moderate**

**Table 4: Expected Damage to Essential Facilities**

Classification	Total	# Facilities		
		Probability of at Least Moderate Damage > 50%	Probability of Complete Damage > 50%	Expected Loss of Use < 1 day
EOCs	1	1	0	1
Fire Stations	22	19	0	21
Hospitals	3	3	1	0
Police Stations	19	19	0	13
Schools	99	99	0	0

## Induced Hurricane Damage

### Debris Generation

Hazus estimates the amount of debris that will be generated by the hurricane. The model breaks the debris into four general categories: a) Brick/Wood, b) Reinforced Concrete/Steel, c) Eligible Tree Debris, and d) Other Tree Debris. This distinction is made because of the different types of material handling equipment required to handle the debris.

The model estimates that a total of 1,918,245 tons of debris will be generated. Of the total amount, 632,573 tons (33%) is Other Tree Debris. Of the remaining 1,285,672 tons, Brick/Wood comprises 91% of the total, Reinforced Concrete/Steel comprises of 4% of the total, with the remainder being Eligible Tree Debris. If the building debris tonnage is converted to an estimated number of truckloads, it will require 49210 truckloads (@25 tons/truck) to remove the building debris generated by the hurricane. The number of Eligible Tree Debris truckloads will depend on how the 55,410 tons of Eligible Tree Debris are collected and processed. The volume of tree debris generally ranges from about 4 cubic yards per ton for chipped or compacted tree debris to about 10 cubic yards per ton for bulkier, uncompacted debris.

## Social Impact

### Shelter Requirement

Hazus estimates the number of households that are expected to be displaced from their homes due to the hurricane and the number of displaced people that will require accommodations in temporary public shelters. The model estimates 26,654 households to be displaced due to the hurricane. Of these, 6,090 people (out of a total population of 313,166) will seek temporary shelter in public shelters.

## Economic Loss

The total economic loss estimated for the hurricane is 15296.8 million dollars, which represents 45.26 % of the total replacement value of the region's buildings.

### **Building-Related Losses**

The building related losses are broken into two categories: direct property damage losses and business interruption losses. The direct property damage losses are the estimated costs to repair or replace the damage caused to the building and its contents. The business interruption losses are the losses associated with inability to operate a business because of the damage sustained during the hurricane. Business interruption losses also include the temporary living expenses for those people displaced from their homes because of the hurricane.

The total property damage losses were 15,297 million dollars. 2% of the estimated losses were related to the business interruption of the region. By far, the largest loss was sustained by the residential occupancies which made up over 88% of the total loss. Table 5 below provides a summary of the losses associated with the building damage.

**Total Loss by General Occupancy**

## General Description of the Region

Hazus is a regional multi-hazard loss estimation model that was developed by the Federal Emergency Management Agency and the National Institute of Building Sciences. The primary purpose of Hazus is to provide a methodology and software application to develop multi-hazard losses at a regional scale. These loss estimates would be used primarily by local, state and regional officials to plan and stimulate efforts to reduce risks from multi-hazards and to prepare for emergency response and recovery.

The hurricane loss estimates provided in this report are based on a region that includes 1 county(ies) from the following state(s):

- Texas

Note:

Appendix A contains a complete listing of the counties contained in the region.

The geographical size of the region is 1,443.05 square miles and contains 50 census tracts. There are over 106 thousand households in the region and a total population of 313,166 people (2010 Census Bureau data). The distribution of population by State and County is provided in Appendix B.

There are an estimated 109 thousand buildings in the region with a total building replacement value (excluding contents) of 31,721 million dollars (2014 dollars). Approximately 94% of the buildings (and 86% of the building value) are associated with residential housing.

## Building Inventory

### General Building Stock

Hazus estimates that there are 109,747 buildings in the region which have an aggregate total replacement value of 31,721 million (2014 dollars). Table 1 presents the relative distribution of the value with respect to the general occupancies. Appendix B provides a general distribution of the building value by State and County.

**Building Exposure by Occupancy Type**

**Table 1: Building Exposure by Occupancy Type**

Occupancy	Exposure (\$1000)	Percent of Tot
Residential	27,197,675	85.74 %
Commercial	2,725,704	8.59%
Industrial	737,081	2.32%
Agricultural	80,369	0.25%
Religious	415,968	1.31%
Government	135,010	0.43%
Education	429,622	1.35%
<b>Total</b>	<b>31,721,429</b>	<b>100.00%</b>

### Essential Facility Inventory

For essential facilities, there are 5 hospitals in the region with a total bed capacity of 357 beds. There are 122 schools, 32 fire stations, 27 police stations and 11 emergency operation facilities.

## Hurricane Scenario

Hazus used the following set of information to define the hurricane parameters for the hurricane loss estimate provided in this report.

**Scenario Name:** Cat 5 HGAC Scenario  
**Type:** Deterministic  
**Maximum Peak Gust in Study Region:** 193 mph

### User Defined Storm Track Input Data

## Building Damage

### General Building Stock Damage

Hazus estimates that about 109,375 buildings will be at least moderately damaged. This is over 100% of the total number of buildings in the region. There are an estimated 85,515 buildings that will be completely destroyed. The definition of the 'damage states' is provided in the Hazus Hurricane technical manual. Table 2 below summarizes the expected damage by general occupancy for the buildings in the region. Table 3 summarizes the expected damage by general building type.

**Table 2: Expected Building Damage by Occupancy**

Occupancy	None		Minor		Moderate		Severe		Destruction	
	Count	(%)	Count	(%)	Count	(%)	Count	(%)	Count	(%)
Agriculture	0.63	0.21	1.22	0.40	7.65	2.50	167.65	54.79	128.85	42.11

---

### **Essential Facility Damage**

Before the hurricane, the region had 357 hospital beds available for use. On the day of the hurricane, the model estimates that 0 hospital beds (only 0.00%) are available for use by patients already in the hospital and those injured by the hurricane. After one week, 0.00% of the beds will be in service. By 30 days, 0.00% will be operational.

## Induced Hurricane Damage

### Debris Generation

Hazus estimates the amount of debris that will be generated by the hurricane. The model breaks the debris into four general categories: a) Brick/Wood, b) Reinforced Concrete/Steel, c) Eligible Tree Debris, and d) Other Tree Debris. This distinction is made because of the different types of material handling equipment required to handle the debris.

The model estimates that a total of 6,213,268 tons of debris will be generated. Of the total amount, 826,540 tons (13%) is Other Tree Debris. Of the remaining 5,386,728 tons, Brick/Wood comprises 91% of the total, Reinforced Concrete/Steel comprises of 7% of the total, with the remainder being Eligible Tree Debris. If the building debris tonnage is converted to an estimated number of truckloads, it will require 212619 truckloads (@25 tons/truck) to remove the building debris generated by the hurricane. The number of Eligible Tree Debris truckloads will depend on how the 71,242 tons of Eligible Tree Debris are collected and processed. The volume of tree debris generally ranges from about 4 cubic yards per ton for chipped or compacted tree debris to about 10 cubic yards per ton for bulkier, uncompacted debris.

## Social Impact

### Shelter Requirement

Hazus estimates the number of households that are expected to be displaced from their homes due to the hurricane and the number of displaced people that will require accommodations in temporary public shelters. The model estimates 103,583 households to be displaced due to the hurricane. Of these, 71,252 people (out of a total population of 313,166) will seek temporary shelter in public shelters.

## Economic Loss

The total economic loss estimated for the hurricane is 49957.1 million dollars, which represents 157.49 % of the total replacement value of the region's buildings.

### Building-Related Losses

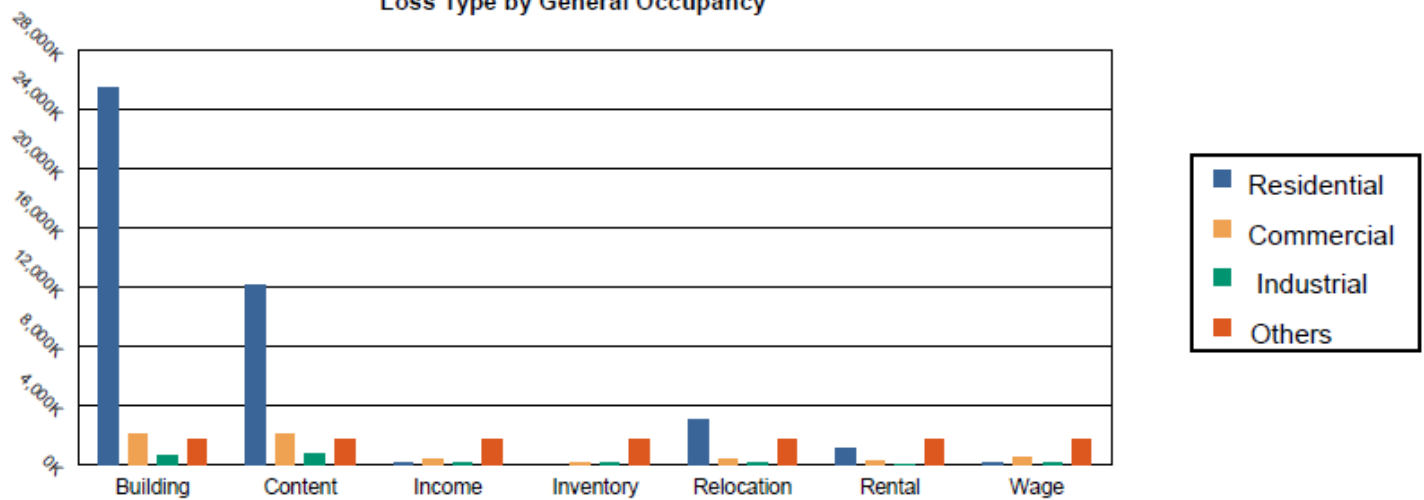

The building related losses are broken into two categories: direct property damage losses and business interruption losses. The direct property damage losses are the estimated costs to repair or replace the damage caused to the building and its contents. The business interruption losses are the losses associated with inability to operate a business because of the damage sustained during the hurricane. Business interruption losses also include the temporary living expenses for those people displaced from their homes because of the hurricane.

The total property damage losses were 49,957 million dollars. 11% of the estimated losses were related to the business interruption of the region. By far, the largest loss was sustained by the residential occupancies which made up over 83% of the total loss. Table 5 below provides a summary of the losses associated with the building damage.

Loss by Business Interruption Type (left) and Building Damage Type (right)

Loss Type by General Occupancy
