

Parks and Recreation December Monthly Update

The Parks and Recreation Department would like to share our updates and upcoming project plans.

We are planning to add two additional benches along the TJT Walking Trail to improve comfort and accessibility for community members who utilize the trail. In addition, we would like to purchase the sand for the volleyball court to enhance recreational opportunities at the park. We would like to allocate a portion of park and rec funding to purchase the volleyball sand for the volleyball court at the Backyard park and the two benches for the TJT walking trail.

We are also requesting that the council review the Sweeny Pavilion and Special Event Applications, particularly the components related to park rental. Approval of this application would allow us to extend opportunities to companies that may be interested in renting out the park for company picnics and etc. that support park improvements, helping further enhance and revitalize our community spaces.

Also, a citywide geocaching adventure is on the way! We're creating a trail of hidden treasures throughout the town, each one holding a fun historical fact about our community. It's our way of inviting residents and visitors to explore, learn, and connect through a playful journey across the places that make our town special.

Lastly, we are actively looking into grant opportunities to support the development of the proposed skate park.

Thank you for your continued support of our parks and recreational programs. If you have any questions or need further information, please let us know.

Estimated Cost for both projects: between \$1638 - \$1938

22.2 yards of Volleyball Sand- \$900 - \$1200

2 Red Benches- \$738
