QUARRY POOL RENOVATION NEEDS EVALUATION

The Engineer is hereby authorized to perform Engineering Services for the Client as provided for in our General Agreement for Professional Engineering Services dated December 16, 2016 and extended through December 31, 2019 by Amendment No. 1 executed on December 12, 2018, and as more fully described herein:

PROJECT DESCRIPTION

The Client's Quarry Pool needs renovation. The Client desires to determine the scope and cost of needed renovation. The first phase of the project is to perform an evaluation to identify needed structural retaining wall, children's pool surfacing, electrical, mechanical and filtering deficiencies of the existing facility and to prepare an engineering report summarizing the identified deficiencies and presenting budgetary level opinions of cost to address the identified deficiencies.

SCOPE OF WORK

The Engineer will perform a field survey of the pool area and non-destructive testing of the pool and deck to determine if reinforcing steel is present. The Engineer will also evaluate the existing condition of the children's pool surfacing, electrical, mechanical and filtering systems. The Engineer will also prepare and submit to the Client an engineering report detailing identified deficiencies and planning level opinions of cost for addressing the deficiencies.

SCHEDULE:

Submit report to Client within 6 weeks of receiving Notice to Proceed from Client.

BUDGET:

The budget for the above referenced work shall be set at \$12,500. The Engineer agrees not to exceed this amount without the Client's prior authorization.
