Subject: Petition For The Use Of The Tenino Quarry House

We would like to first start out by extending a "Thank You" for being both concerned enough about our Community to allow for this request, and also being willing to entertain this request to partner with us through the use of your City's facility. I'm sure we can agree that promoting citizen awareness as well as opportunities for our citizens to be better prepared, especially during the constraints of social restrictions, will serve to strengthen and empower our community.

That being said, Thurston County Medic One would like to formally ask to use the Tenino Quarry House to provide monthly Compression Only CPR Classes. We are also asking to use this Facility free of charge, as we are a non-profit, taxed based program that provides these classes free of charge to our citizens.

The Citizen Compression Only CPR/AED Class is based on a national curriculum and has been used to teach approximately 20,000 citizens in Thurston County since 2015. Training our citizens has been an integral part of sustaining our high survival rates for cardiac arrest victims in Thurston County.

Medic One provides Instructors that are EMS providers working in Thurston County. They are familiar with challenges people face performing CPR and the use of an AED, as well as challenges specific to our Community. We have found this model to be exceptionally well received; citizens trained leave the class with a better understanding and willingness to perform CPR.

Classes held under current COVID restrictions as of January 11th, 2021 include the following:

1. A maximum of 8 students per class and one Instructor.
2. Thurston County Medic One provides the instructor, equipment and sanitation supplies needed for each class.
3. All students and the Instructor are required to wear a mask throughout the class.
4. All equipment and meeting spaces are sanitized before, during and after each Class, to ensure participants safety.

In addition, all facility guidelines as set by the City of Tenino would be strictly followed.

We would like to reserve your facility for 2 hours per class to allow extra time for set up, sanitation, etc. We are requesting use of the Classroom on a monthly basis, on a day(s) decided by and agreed upon by both The City of Tenino and Thurston County Medic One.

If this is agreeable to the City of Tenino, we would like to start holding classes at your facility beginning January 2021, if possible. We look forward to hearing back from you and appreciate the willingness of the City of Tenino to entertain this request.

Sincerely,

Preston Wallace
