Includes Colors / Black and Red
(curved Sections Only)

MODULAR PUMPTRACK ENTRY / EXIT KIT

PARKITECT®

Highwire

Entry / Exit Kit

The Entry/Exit kit provides the modules & hardware necessary to add an entry & exit point to any Modular Pumptrack.

This kit is compatible with any new or existing layout. It can be purchased as an upgrade in conjunction with a new order or sold separately as an addition to an existing track.

Price includes Entry/Exit Modules and City Armour

CITY ARMOUR

City Armour - CA1

City Armour for covering the front bolts and recess of the T03 module.

The CA1 covers the bolts to prevent tampering and improves safety on the side of the T03 corner module.

CA1 can be permanently fixed using hardware provide or easily installed without fasteners as an excellent addition for events.

Tamper Resistant Hardware

Tamper resistant hardware uses stainless 'pin-hex' button head security screws with washers and internal coupling nuts.

The internal pin stops the use of standard hex tools improving the tamper resistance of all hardware.
