

In that traffic safety along Bonaventure Road in the Town of Thunderbolt has been of significant concern and that in response to those concerns the Town of Thunderbolt has responded with traffic calming measures by the installation of speed humps along Bonaventure Road on the northernmost half of that thoroughfare running from Mechanics Avenue to Bonaventure Cemetery and that due to the winding nature of the entirety of Bonaventure Road there continues to be a dangerous situation due to significant line of sight issues that have been unaddressed by those traffic calming measures thus far taken and that these line of sight issues are especially problematic along the southern half of this section of Bonaventure Road, I move that it be required that throughout that section of Bonaventure Road running through the Town of Thunderbolt, that all shrubbery and other plant life over 12 inches tall be removed from the right of way and that should this remedy be inadequate to address line of sight issues as determined by the Town Administration or the Public Safety representatives of the Town of Thunderbolt that additional pruning or plant removal be required of the property owners.
